Phase One Environmental Site Assessment

77 Metcalfe Street, Ottawa, Ontario

G2S25044A

Groupe Mach Inc
630 St-Paul Ouest Bur 600
Montreal, Quebec
H3C 1L9

April 2025

Executive Summary

G2S Consulting Inc. (G2S) was retained by Groupe Mach Inc. (the Client) to complete a Phase One Environmental Site Assessment (ESA) for the property located at 77 Metcalfe Street in Ottawa, Ontario (hereinafter referred to as the 'Site'). Refer to Drawing 1 in Appendix A for the Site Location Plan. Authorization to proceed with the Phase One ESA was provided by Mohamad Kheir Hassoun of Groupe Mach Inc.

The rectangular shaped Site is located on the east side of Metcalfe Street, located at the southeast corner of the intersection with Albert Street and Metcalfe Street, and covers an approximate area of 0.12 hectares (0.29 acres). The Study Area consists of commercial and residential land use, and the Rideau Canal is located approximately 315 m northeast of the Site.

G2S understands the Client requires a Phase One ESA to support the application for a Record of Site Condition (RSC) related to the redevelopment of the Site for residential purposes. The Site was most recently used for commercial purposes (restaurant and office building) and is proposed to be used for residential use. Since there is a change in property use planned (commercial to residential), a Record of Site Condition (RSC) is required under O. Reg. 153/04, as amended. This Phase One ESA was completed in accordance with Schedule D. of O. Reg. 153/04.

This Phase One ESA was conducted to:

i. Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One ESA property;

ii. Determine the need for a Phase Two ESA; and

iii. Provide a basis for carrying out any Phase Two ESA required.

The Site was first developed in the late 1800's as a residential property and included a livery with a coach shed within the northwestern portion of the Site. In 1912, a dry cleaner was developed on the northeastern portion of the Site, with the coach shed still present within the northwestern portion of the Site. Government Stores were present within the southern portion of the Site, being then converted into an autobody garage in 1922 until 1931. An additional dry cleaner was developed within the west central portion of the Site in 1922. The buildings were demolished in 1931, and a gasoline service station was developed within the northwestern portion of the Site including the presence of two underground storage tanks (USTs). The current building structure was constructed in 1954 and consisted of a multi-tenant commercial high-rise building with three elevators and two levels of underground. Two boilers were historically located within the western portion of the Site in 1955. The Site is currently vacant, and the building is in the early stages of being demolished.

Historical review of the Site and surrounding properties within a 250 m radius of the Site identified nine on-Site PCAs and several off-Site PCAs, as defined in O. Reg. 153/04. The PCAs were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, expected chemical storage amounts, etc. Based on review and evaluation of the information gathered, the following APECs have been identified:

APEC 1: Entire Site – Fill material of unknown origin and chemical quality was identified during subsurface investigations completed by others in 2024.

APEC 2A: Northeast portion of Site – Historical presence of a dry cleaner within the northeast portion of the Site from the years 1912 – 1922.

APEC 2B: Western portion of Site – Historical presence of a dry cleaner located within the west central portion of the Site in 1922.

APEC 2C: Entire Site – Historical presence of Paragon Cleaners, a dry cleaner located within the second level of the basement from the years 1986 – 1998.

APEC 3A: Northwest portion of Site – Historical use of the Site by Beamish Service Station as a gasoline service station with two underground storage tanks (USTs) of unknown volume from the years 1931 – 1950.

APEC 3B: Northeast portion of Site – Current and historical presence of a 1,025 L diesel aboveground storage tank (AST) associated with a diesel backup generator located within the northeast portion of the Site.

APEC 3C: Western portion of the Site – Historical presence of two oil fired boilers located within the western portion of the Site in 1995.

APEC 4: Central portion of the Site – Current and historical presence of a transformer vault with the presence of polychlorinated biphenyls (PCBs).

APEC 5: Southern portion of the Site – Historical use of the southern portion of the Site as a commercial auto garage from the years 1922 – 1950.

APEC 6: Southeastern portion of the Site – Historical use of 75 Slater Street (southeast adjacent) as an autobody shop, battery servicing, presence of USTs from the years 1948 – 1963. Known soil contamination was identified within a Record of Site Condition (RSC) in 2022.

APEC 7: Western portion of the Site – Historical use of the 116 Albert Street (~20 m west) as a former used car dealership, a newspaper publisher and machinery shop from the years 1950 – 2000.

APEC 8: Southwestern portion of the Site – Historical use of 119 Slater Street (~45 m west) as a dry cleaner from 1971 – 1981.

Based on the findings of this Phase One ESA, a Phase Two ESA is recommended to investigate the potential for contamination related to the above-noted APECs.

1. Introduction

G2S Consulting Inc. (G2S) was retained by Groupe Mach Inc. (the Client) to complete a Phase One Environmental Site Assessment (ESA) for the property located at 77 Metcalfe Street in Ottawa, Ontario, hereinafter referred to as the 'Site'. Refer to Drawing 1 in Appendix A for the Site Location Plan. Authorization to proceed with the Phase One ESA was provided by Mohamad Kheir Hassoun of Groupe Mach Inc.

G2S understands the Client requires a Phase One ESA to support the application for a Record of Site Condition (RSC) related to the redevelopment of the Site for residential purposes. The Site was most recently used for commercial purposes (restaurant and office building) and the proposed future use is residential. Since there is a change in property use planned (commercial to residential), a Record of Site Condition (RSC) is required under O. Reg. 153/04, as amended. This Phase One ESA was completed in accordance with Schedule D. of O. Reg. 153/04.

1.1 Terms of Reference

The nature of a Phase One ESA by definition is a nonintrusive site examination of "readily accessible features"; therefore, the Phase One ESA does not quantify the chemical or physical quality of the exposed or inaccessible features such as materials beneath buildings or buried on Site. In this regard, the Phase One ESA must be viewed as a mechanism that may assist in reducing, rather than eliminating, the uncertainty of encountering environmental contaminants during future use of the Site.

This Phase One ESA was conducted to:

i. Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One ESA property;

ii. Determine the need for a Phase Two ESA; and

iii. Provide a basis for carrying out any Phase Two ESA required.

1.2 Phase One ESA Property Information

Table 1: General Site Details

Municipal Address:	77 Metcalfe Street, Ottawa, Ontario
General Site Location:	East side of Metcalfe Street, located at the southeast corner of the intersection with Albert Street and Metcalfe Street, and the Rideau Canal is located approximately 315 m northeast.
Approximate Plan Area:	Approximate plan area of 0.12 hectares (0.29 acres) with frontage of approximately 35 m on Metcalfe Street and a depth of approximately 32 m.
Property Identification Number (PIN):	04115-0061 (LT)
Legal Description:	LT 52 & PT LT 53, PL 3922 , S ALBERT ST ; PT LTS 52 & 53, PL 3922 , N SLATER ST, AS IN N515612, S/T CR654072, T/W N326906 ; S/T N607932 OTTAWA
Current Site Owner and Contact Information:	Édifice 77 Metcalfe Inc. / 77 Metcalfe Building Inc.
Current Site Occupant:	Vacant (twelve-storey office building with mechanical penthouse and two basement levels)

The Phase One Study Area includes the Site and lands within approximately 250 m of the Site, as shown on Drawing 2 in Appendix A (hereinafter referred to as the ‘Study Area’).

2. Scope of Investigation

This assessment was performed in accordance with the Phase One ESA protocols and included the following tasks:

1. Records review.

2. Interviews with pertinent Site contacts.

3. A Site reconnaissance to assess current Site and Study Area conditions and the presence of any visual indications or olfactory evidence of potential contamination. A detailed review of regulatory compliance issues was not within the terms of reference for this assignment.

4. An evaluation of the information gathered from the records review, interviews, and Site reconnaissance.

5. Preparation of this report discussing the information compiled and the corresponding conclusions and recommendations.

3. Records Review

G2S reviewed reasonably accessible information and records to determine the land use history of the Site and Study Area.

3.1 General

3.1.1 Phase One ESA Study Area Determination

In accordance with O. Reg. 153/04, the Phase One ESA must include, at a minimum the Site and any other property that is located within 250 m of the Site boundaries. This is referred to as the Phase One ESA Study Area (Study Area) as depicted on Drawing 2 in Appendix A.

3.1.2 First Developed Use Determination

In accordance with the O. Reg. 153/04, the following definition applies:

"First developed use" means *the earlier of,*

i. The first use of a phase one property in or after 1875 that resulted in the development of a building or structure on the property, and

ii. The first potentially contaminating use or activity on the phase one property.

Based on information from the records review, the first developed use of the Site was in 1875 as stables and livery. The first commercial building was constructed on-Site in approximately 1912 for use as a dry cleaner.

3.1.3 Chain of Title

A land title search for the Site was conducted online at the Teranet Express website for the Ottawa Region Land Registry Office. As well, historical data including land registry information was obtained by P.L.P Titles Ltd. and Site ownership information was provided dating back to 1823.

The Land Registry documents indicates that the Site was transferred from 77 Metcalfe Street II GP Inc. to the current owner, Edifice 77 Metcalfe Inc. / 77 Metcalfe Building Inc. in July 2022. 77 Metcalfe Street GP Inc. owned it from 2012 – 2022.

For ease of reference, the Land Registry documents, and chain of title information is included in Appendix B and summarized in Section 6.1 of this report.

3.1.4 ERIS Database Records

An RSC Database report was requested from Environmental Risk Information Service (ERIS) for the Site and 250 m Study Area in September 2024. An EcoLog ERIS report provides environmental and historical information compiled from over 45 government and private source records covering various time periods. The report is used to aid in the identification of possible environmental concerns or risks for commercial, industrial and residential sites, including Certificates of Approval and Waste Generator Permits. The records are summarized below:

Table 2: ERIS Database Records

Database	Location/ Direction and Distance from Site	Pertinent Information
	88 Albert Street (East adjacent)	Fire/explosion of non-PCB transformer oil to ground due to a leaking cable from a cooling system leak in 1995 from Ontario Hydro Sub-Station transformer.
		Equipment failure of 5 L of transformer oil to ground from a cooling system leak by Ontario Hydro in 1992.
		Leak/break of 10 L of coolant N.O.S. to land and surface water due to equipment failure in 2017.
	81 Metcalfe Street (South adjacent)	Equipment failure of unknown amount of hydraulic oil to land, surface water, and source water zone from a Municipal transport truck in 2017.
	75 Slater Street (Southeast adjacent)	Leak/break of 30 L of diesel fuel to land in 2021
	Metcalfe Street and Albert Street intersection (~10 m northwest)	Equipment failure of 5 L of antifreeze to a catch basin from Ottawa city bus at a bus stop in 1992.
		Leak/break of 25 L hydraulic fluid spill to road and catch basin from boom truck due to equipment failure by Bell Canada Ltd in 2019.
	90 Elgin Street (~30 m east)	Spill of 115 L of raw unchlorinated sewage to floor drain from SNC-Lavalin ProFac Management in 2008.
		Collision/Accident of 30 L of coolant N.O.S. from a vehicle to land, surface water, and source water zone in 2017
	111 Albert Street (~35 m northwest)	Improper services/maintenance resulting in spill of 10 L of concrete admixture (de-watering) to land in 2022 by Atwil-Morin Construction
		Spill of 38 L of hydraulic oil from a vehicle to land in 2023
	30 Metcalfe Street (~35 m northwest)	Leak/break of 170 kg of refrigerant gas to air in 2014 by Inside Edge Properties
	99 Metcalfe Street (~40 m south)	Spill of 200 L of fire extinguisher charges, corrosive liquid (glycol) to parking garage in 2022.
	100 Metcalfe Street (~45 m southwest)	Leak/break of 10 L of glycol/water solution from a vehicle to catch basin in 2013 by OC Transpo Bus Service
	No address given	Leak/break of 14 L of diesel fuel onto land in 2023 during commercial and institutional building construction (Client: Kiewit Eurovia Vinci)
	75 Albert Street (~45 m northeast)	Pipe or hose leak of 100 L of bunker fuel oil to basement in 2009
	130 Albert Street (~ 65 m west)	Fire/explosion of non-PCB transformer oil to the ground due to cooling system leak resulting in 100 L of oil burnt in the fire in 2000
		Operator error resulting in spill of glycol/water solution by Enbridge gas in 2017

Database	Location/ Direction and Distance from Site	Pertinent Information
	60 Queen Street (~70 m northeast)	Spill of unknown amount of diesel fuel from a vehicle in a garage in 2014
	100 Queen Street (~75 m northwest)	Gasoline to sanitary sewer of light hydrocarbon to the land by OLRT in 2017.
		Leak/break of 1L hydraulic oil due to equipment failure by the City of Ottawa in 2018.
	66 Slater Street (~75 m southeast)	Leak/break of 20 L of coolant from a vehicle to land in 2014
		Equipment failure of 10 L of oil (petroleum based) to road and catch basin in 2014 by OC Transpo Bus Services
		Leak/break of 6 L of coolant to ground and catch basin from a vehicle in 2017 by OC Transpo Bus Services, contained/cleaned
	161 Laurier Avenue West (~95 m southeast)	Leak/break of 10 L of diesel fuel from a bus to land in 2016
	90 Sparks Street (~100 m north)	Leak/break of 105 kg of freon to the air in 2017 by Maple Leaf Property Management
	219 Laurier Avenue West (~110 m southwest)	Equipment failure of 15 L of oil (petroleum based, not specified) in elevator pit in 2015 by Mister Rooter (unofficial)
	80 Elgin Street (~110 m northeast)	Spill of 100 L of hydraulic oil to pit in 2010 by Her Majesty the Queen in Right of the Foreign & Commonwealth Office
		Pipe/hose leak of 15 L of hydraulic oil to asphalt from a vehicle in 2010
	151 Slater Street (~115 m west)	Leak/break of natural gas (0 L) to air in 2019 by Thomas Fuller Construction Co. Limited
	100 Sparks Street (~135 m northwest)	Equipment failure of 20 L of diesel fuel to ground and catch basin in 2015
		Equipment failure of 20 L of diesel fuel in alley way in 2015
	Elgin and Slater Street (~145 m southeast	Equipment failure of 20 gal of hydraulic oil to asphalt and catch basin in 2022 by S. 21 (contained)
	In front of 131 Queen Street (~145 m northwest)	Leak/break of unknown quantity of natural gas from Enbridge gas main in 2017, associated with Enbridge Gas Distributor Inc.
	129 Queen Street (~145 m northwest)	Leak/break of ~19 L pf hydraulic oil to the sidewalk in 2017 by OLRT Constructors
	Near Albert & Elgin Street (~150 m east)	Spill of 65 L of diesel fuel to road from unknown source in 1989
		Leak/break of 10 L of coolant from a bus to the road in 2016 by OC Transpo
	170 Laurier Avenue (~150 m south)	Spill of unknown quantity of natural gas to air in 2009
	162 Laurier Avenue West (~160 m southeast)	Spill of 5 L of acid to catch basin in 2014 due to operator/human error by the City of Ottawa

Database	Location/ Direction and Distance from Site	Pertinent Information
	Southwest Corner Sparks and Metcalfe (~165 m northwest)	Spill of unknown quantity of fuel onto land in 2015 by Clean Water Worls Inc.
	Queen Street and Elgin Street (~165 m northeast)	Leak/break of 4 L of coolant from a vehicle to catch basin in 2023 by Ottawa-Carleton Regional Transit Commission (contained)
	40 Elgin Street (~170 m northeast)	Spill of 20 L of sewage (raw unchlorinated) to soil in 2013 by DST Consulting Eng.
		Spill of 136 kg of refrigerant gases to the air in 2022 by Allied Properties
	Elgin Street (C/B) in front of National Arts Centre (~170 m northeast)	Valve/fitting leak or failure on bus resulting in 9 L of coolant to land (2L in catch basin) in 2001 by the City of Ottawa
	107 Sparks Street (~180 m northwest)	Cooling system leak of unknown quantity to air in June 2000 by Public Works Canada
		Cooling system leak of 330 lbs RF-22 to air due to pipe burst in August 2000 by Public Works Canada
		Container leak of small quantity of gasoline to loading dock in 2001 by Public Works Canada
		Equipment failure of 25 L of hydraulic oil to road in 2003 by Public Works Canada resulting in soil and surface water contamination
	11 Metcalfe Street (~180 m north)	Line blow resulting in oil spill of unknown amount from a vehicle in 2011 to the window of Cascades Recovery Inc.
	53 Elgin Street (~180 m east)	Spill of ~318 L of hydraulic oil to land in 2005 by the National Arts Centre
	Albert Street & O'Connor Street (~185 m west)	Leak/break of unknown amount of motor oil from vehicle to storm sewer in 2019
		Fire/explosion of douse water (particulate contaminant) of unknown quantity to land in 2019 by Waste Management of Canada
	Intersection of Slater and O'Connor Street (~190 m west-southwest)	Pipe/hose leak of 20 L of antifreeze to road and catch basin due to equipment failure in 2007 by OC Transpo
		Collision/accident of unknown amount of diesel fuel to storm sewer in 2013
	68 O'Connor Street (~200 m west)	Leak/break of halon (CFC) to the air due to equipment failure in 2016 by Bell Canada
	171 Slater Street (~200 m west)	Emission of unknown amount of natural gas to air in 2010 due to a service line strike associated with Enbridge Gas Distribution Inc.
		Leak/break of 297 kg of refrigerant gas to the air due to equipment failure in 2021
	78 O'Connor Street (~200 m west)	Spill of 110 kg of freon to air due to equipment failure in 2003 by Bell Canada
		Spill of 0.5 L of diesel fuel to land due to equipment failure in 2007 by Bell Canada

Database	Location/ Direction and Distance from Site	Pertinent Information
		Spill of unknown quantity of freon to air due to equipment failure in 2009 by Bell Canada
		Spill of ~29 kg of refrigerant gas to air due to equipment failure in 2009 by Bell Canada
		Leak/break of ~227 kg of refrigerant gas to air in 2013 by Bell Canada
		Leak/break of unknown amount of refrigerant gas to air in 2017 by Bell Canada
		Leak/break of unknown amount of refrigerant gas to air in 2018 by Bell Canada
		Leak/break of unknown amount of refrigerant gas to air in 2018 by Bell Canada
		Spill of 740 lbs of refrigerant gas from HVAC unit due to corrosion in 2019 by Bell Canada
		Leak/break of 1 kg of halon to air in 2023 by Bell Canada
	110 O'Connor Street (~205 m southwest)	Spill of 600 lbs of freon to air in 2009
		Spill of 15 L of hydraulic oil to pavement due to equipment failure in 2011 by Cascades Recovery Inc. (contained)
		Leak/break of 268 lb of refrigerant gas to air in 2017
	100 Wellington Street (~220 m northwest)	Container overflow of 40 L of oil to ground in 1990 by the American Embassy
Fuel Oil Spills and Leaks (INC)	75 Albert Street (~75 m northeast)	Spilled 170 L of fuel: reason unknown
	170 Laurier Avenue (~150 m south)	Vapour release of unknown quantity. B34SO Reg head flew off reg body when adjusting pressure, no date given
	73 Sparks Street (~180 m north)	Cooking equipment caught fire resulting in a natural gas leak of unknown amount in 2009
	171 Slater Street (~200 m west)	Fuel oil spill due to 1 ¼ inch pipeline hit in 2010
Ontario Regulation 347 Waste Generators Summary	77 Metcalfe (Site)	Paragon Cleaners (1986-1989, 1992-1998), waste generator (ON0517900) waste class 241 – halogenated solvents
		Nav Canada (2009), waste generator (ON3805959) waste class 312 – pathological wastes

Database	Location/ Direction and Distance from Site	Pertinent Information
	171 Slater Street (~200 m west)	GE Canada Real Estate Equity Holding Company (2008) was approved for discharge into the natural environment other than water
	234 Laurier Avenue West (~200 m southwest)	Gillin Engineering and Construction Limited (2012) was approved for air emissions
National PCB Inventory (NPBC)	161 Laurier Avenue West (~95 m southeast)	National Capital Commission (1993) – no other details given
	90 Sparks Street (~100 m north)	Globe Realty Management Ltd. – no year or other details given
	40 Elgin Street (~170 m northeast)	National Capital Commission (1995) – no other details given
	69 Sparks Street (~180 m north)	Canada All-News Radio Ltd. (1989, 1991, 1993) stored 4.5 L of Askarel
	78 O'Connor Street (~200 m west)	Bell Canada (1989, 1992, July & October 1993) – no other details given
Inventory of PCB Storage Sites	90 Sparks Street (~100 m north)	Globe Realty Management Ltd. (1995, 1998) – no other details given Globe Realty Management Ltd. (1999-2000) stored 2 drums of ballasts with high level PCBs (>1000 ppm), each 200 kg
	78 O'Connor Street (~200 m west)	Bell Canada (1992) – no other details given
TSSA Historic Incidents	78 O'Connor Street (~200 m west)	Incident/near-miss occurrence of 0.5 L of liquid fuel of Bell Canada Building, no year listed.
Pipeline Incidents	131 Queen Street (~145 m northwest)	Pipeline damaged due to 4-inch pipeline hit, associated with Enbridge Gas in 2017
Record of Site Condition (RSC)	131 Queen Street (~145 m northwest)	131 Queen Street Limited and Morguard filed RSC No.1008 in 2004 (based on Phase One and Two ESAs

Several of the above environmental source records were deemed to represent PCAs for the Site, and are summarized in Table A of Appendix G. The ERIS report and environmental records are included in Appendix C.

3.1.5 Fire Insurance Plans

Fire Insurance Plans (FIPs) for the Site and surrounding properties were available through a Phase One ESA report by others requested by Opta Environmental and the FIPs available were for the years 1878, 1895, 1901, 1912, 1922, 1948, 1955 and 1963. The Site was not included for the years 1878 year and 1901.

The FIP from 1895 showed the Site developed as a livery with stables, historically labelled at 77-79 Metcalfe Street. A coach shed is present within the northwest corner of the Site, and one dwelling is located in the northeast portion of the Site along Albert Street, labelled as 98 Albert Street.

The 1912 FIP identified 98 Albert Street as a Chinese Laundry. The coach shed is still present in the northwest portion of the Site, and Government Stores are located along the southern property boundary at 79 Metcalfe Street.

The Chinese Laundry located at 98 Albert Street is still present within the 1922 FIP. An additional Chinese Laundry is located at 77 Metcalfe Street. Two dwellings are located within the central portion of the Site. A vacant auto repair building is identified at 79 Metcalfe Street.

The 1948 FIP identified all structures from the 1922 FIP have been demolished and has been renamed as 100 Albert Street. One building is located within the northwest corner of the Site and labelled as a service station. Two underground storage tanks (USTs) are present within the western portion of the Site.

The 1955 FIP identified the present building footprint as under construction and labelled as the Commonwealth Building. The adjacent buildings are labelled as hotels and apartments. The 1963 FIP shows the Commonwealth Building having three elevators within the central portion of the building, and two boilers located at the western portion of the building. The Site occupants in 1963 were identified as Bank of Nova Scotia, offices and a garage within the basement.

The following Potentially Contaminating Activities (PCAs) were identified:

Table 2: Fire Insurance Plans, Potentially Contaminating Activities

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
98 Albert Street (Presently 77 Metcalfe Street)	Site	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1922 FIPs identified a dry cleaner located within the northeast portion of the property.	1912 – 1922
77 Metcalfe Street	Site	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP identified a dry cleaner located within the western portion of the Site.	1922
		PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	The 1955 FIP identified two boilers located within the western portion of the Sote.	1955

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
79 Metcalfe (Presently 77 Metcalfe Street)	Site	**PCA #10** – Commercial Autobody Shop	The 1922 FIP identified an Auto Repair shop located within the central portion of the Site.	1922
100 Albert Street (Presently 77 Metcalfe Street)	Site	**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1948 FIP identified a gasoline service station with two USTs present within the northwestern portion of the Site.	1948
No address (Presently 75 Slater Street)	Southeast adjacent	**PCA #10** – Commercial Autobody Shops	The 1955 FIP identified Meyers Motors Ltd.	1955
85 - 87 Slater Street (Presently 75 Slater Street)	Southeast adjacent	**PCA #6** – Battery Manufacturing, Recycling and Bulk Storage **PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks **PCA #39** – Paints Manufacturing, Processing and Bulk Storage	The 1948 and 1963 FIPs identified a paint shop and repair shop, including volcanizing and battery servicing. The FIP identified two 1000 gallon ASTs and one 500-gallon UST.	1948 – 1963
63 Metcalfe Street (Presently 55 Metcalfe Street)	~30 m north	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1955 FIP shows cleaning & pressing.	1955
72 Albert Street (Presently 90 Elgin Street)	~30 m east	**PCA #34** – Metal Fabrication	The 1912 identified metal work and manufacturing (manufacturers of metal parts only), occupied by The Eclipse Manufacturing.	1912
137 Albert Street (Presently 111 Albert Street)	~35 m northwest	**PCA #10** – Commercial Autobody Shops	The 1955 FIP identified Albert St Garage and federal motor sales.	1955
147-149 Albert Street (Presently 111 Albert Street)		**PCA #54** – Textile Manufacturing and Processing	The 1912 FIP identified Grant Holden Graham Ltd. as a wholesaler and manufacturer of tents and awnings	1912
124 – 136 Queen Street (Presently 111 Albert Street)		**PCA #31** – Ink, Manufacturing, Processing and Bulk Storage **PCA #45** – Pulp, Paper and Paperboard Manufacturing and Processing	The 1912 FIP identified a paper box factory and printing (motor), labelled as The Ottawa Paper Box.	1912

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
126 Queen Street (Presently 111 Albert Street)		**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1963 FIP identified paper staging and printing floor.	1963
135 – 139 Albert Street (Presently 111 Albert Street)		**PCA #10** – Commercial Autobody Shops	The 1922 FIP identified three garage repair shops.	1922
146 Albert Street (Presently 130 Albert Street)	~65 m west	**PCA #10** – Commercial Autobody Shops	The 1955 FIP identified Albert St Garage.	1955
146 Albert ST (Presently 130 Albert St)		**PCA #10** – Commercial Autobody Shops	1948 FIP identified Waverley Motors Ltd.	1948
100 Queen Street (Presently 56 Queen Street)	~70 m northeast	**PCA #40 –** Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	The 1912 and 1922 FIP identified a greenhouse.	1912 – 1922
118 Slater St (Presently 130 Slater Street)	~70 m southwest	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1955 FIP identified a printing office, occupied by Bomnc Electrotype Co. Ltd.	1955
82 – 88 Slater Street (Presently 84 Slater Street)	~45 m south	**PCA #18** – Electricity Generation, Transformation and Power Stations	The 1912 FIP identified the Ottawa Electric Co.	1912
			The 1948 FIP identified Ottawa Light Heat & Power Co. Ltd. Sub-Station.	1948
94 Slater Street (Presently 99 Slater Street)	~45 m south	**PCA #10** – Commercial Autobody Shops	The 1948 FIP identified an auto repair operation.	1948
68 – 80 Slater Street (Presently 74 Slater Street)	~55 m southeast	**PCA #10** – Commercial Autobody Shops	The 1948 FIP identified an autobody garage with a commercial space attached to the building.	1948
79 O'Connor Street (Presently 151 Slater Street)	~120 m west	**PCA #10** – Commercial Autobody Shops **PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1965 FIP identified auto servicing and one UST at the corner of Slater Street and O'Connor.	1965
87 O'Connor Street		**PCA #10** – Commercial Autobody Shops	The 1948 FIP identified a gasoline service station with six USTs located at the	1948

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
(Presently 151 Slater Street)		**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	corner of Slater Street and O'Connor Street.	
108 Sparks Street (Presently 96 Sparks Street)	~135 m northwest	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1878 FIP identified Citizen Printing.	1878
133 Queen Street (Presently 131 Queen Street)	~145 m northwest	**PCA #34** – Metal Fabrication **PCA#32 –** Iron and Steel Manufacturing and Processing	The 1895 FIP identified a Louvre Over Foundry and machine shop.	1895
		PCA #34 – Metal Fabrication	1912 FIP identified a lead melting and press room for an editorial office.	1912
		PCA #31 – Ink Manufacturing, Processing and Bulk Storage	The 1922 FIP identified an editorial building including couriers and printing.	1922
			The 1948 FIP identified Citizen's Printing and Linotyping.	1948
136 Sparks Street	~165 m northwest	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1963 FIP identified the Citizen Building, including pressing and processing.	1963
8 Elgin Street (Presently 59 Sparks St)	~185 m northeast	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1878 FIP identified a 'Fire Press Printing Office'	1878
61-63 Sparks Street	~185 m northwest	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1922, 1948 and 1963 FIPs identified a printing posts and offices.	1922 – 1963
192 Albert Street (Presently 78 O'Connor)	~200 m west	**PCA #10** – Commercial Autobody Shops **PCA #6** – Battery Manufacturing, Recycling and Bulk Storage	The 1922 FIP identified garage repairs and battery storage and servicing.	1922
84 O'Connor Street (Presently 82 O'Connor)	~200 m west	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	1912 FIP identified printing & bindery business.	1912
		PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)	1922 FIP identified a dry cleaner.	1922
			The 1955 FIP identified cleaners occupying the property.	1955

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
199 Albert Street (Presently 50 O'Connor)	~200 m northwest	**PCA #10** – Commercial Autobody Shops	The 1922 FIP identified a garage.	1922
		PCA #10 – Commercial Autobody Shops **PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1948 and 1963 FIPs identified an auto repair & garage with two USTs identified along Albert Street.	1948 – 1963
234 Laurier Avenue West	~200 m southwest	**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1948 and 1963 FIPs identified three USTs and a gasoline service station along the western portion of the property, occupied by Cities Service Ltd.	1948 – 1963
		PCA #31 – Ink Manufacturing, Processing and Bulk Storage	The 1948 and 1963 FIPs identified Mutual Press Ltd.	1948 – 1963
230 – 234 Laurier Avenue West (Presently 234 Laurier)	~200 m southwest	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1955 FIP identified Mutual Press LTD., including printing services.	1955
106 O'Connor Street (Presently 110 O'Connor Street)	~205 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1915 FIPs identified a chinese laundry store.	1912 – 1915
110 O'Connor Street	~205 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1948 and 1955 FIPs identified a dry cleaner.	1948 – 1955
94 O'Connor Street (Presently 110 O'Connor)	~205 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP identified the bottom commercial floor occupied by a cleaning & pressing business.	1922
118 O'Connor Street (Presently 110 O'Connor)	~230 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	1955 FIP labelled a building as cleaning.	1955
120 O'Connor Street (Presently 124 O'Connor)	~230 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP identified a dry cleaner.	1922
263 Laurier Avenue W (Presently 170 Slater St)	~235 m southwest	**PCA #10** – Commercial Autobody Shops **PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1948, 1955 and 1963 FIPs identified Campbell Motors Ltd. Garage. A UST is located north of the building on site.	1948 – 1963

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
263A Laurier Avenue West (Presently 170 Slater Street)	~235 m southwest	**PCA #10** – Commercial Autobody Shops PCA 39	The 1965 FIP identified a garage and repair shop, including a paint shop associated with 263 Laurier Avenue West.	1965
174 Slater Street (Presently 170 Slater Street)	~235 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1922 FIPs identified a dry cleaner.	1912 – 1922

Note: UST - Underground Storage Tank

The listed occupants were deemed to represent PCAs and are summarized in Table A of Appendix G of this report.

3.1.6 Street Directories

A street directories search was conducted for the Site and Study Area through Environmental Risk Information Services (ERIS) and were reviewed in approximately five-year increments from 1950 – 2023, when publication ceased, and in approximately ten-year increments from 1875 – 1950. The Site previously consisted of 98 Albert Street, 100 Albert Street, 79 Metcalfe Street, and 93 Slater Street. The table below summarizes the directory information for the Site.

Table 3: Street Directories, Site Occupant

Address	Occupant/Site Use	Years Occupied
77 Metcalfe Street Site	Café Deluxe	2006 – 2023
	NAV Canada	2000, 1997 – 2023
	Marquis Corp Ltd	1997 – 2007
	Foundation pour la Decouverite du Canada	1997 – 2007
	Commonwealth Building	1987 – 1993
	Paragon Cleaners	1981 – 1993
	Ralph's Warm Up (restaurant)	1987

Several of the Site occupants were deemed to represent PCAs. Land uses for the surrounding properties as described in the reviewed directories, are included in Appendix C. PCAs identified within the Site and Study Area based on the reviewed directories and are summarized in Section 6.2 of the report.

3.1.7 Waste Management Records

The Site and properties within the Study Area were searched by company name in the Hazardous Waste Information Network (HWIN) and the Hazardous Waste Information System (HWIS) databases from 2022 – 2024. Properties within the Study Area were also searched for records currently registered with Resource Productivity & Recovery Authority (RPRA) (formerly HWIN), included in Appendix D. The following records were found:

Table 4: HWIN Records

Address Direction and Distance from Site	Generator Name	Registered Wastes
81 Metcalfe Street (south adjacent)	Colonnade Bridgeport Realty Management ON001068474 2024	150 – Inert inorganic wastes

Several occupants were deemed to represent PCAs and are summarized in Table A of Appendix G.

3.1.8 Environmental Reports

G2S was provided with previous reports completed for the Site and the following is a general summary of the information obtained. Refer to the reports for particulars.

Table 5: Summary of Previous Environmental Reports

Report Details	Findings and Conclusions
Title: Final Phase I – Environmental Site Assessment **Date of Report:** October 2024 **Author of the Report:** Solroc Inc.	• At the time of the investigation, the Site was developed with a twelve-story commercial building with two levels of basement, and the office within the basement was vacant. • The first level of basement was occupied vacant offices, a parking garage, a garbage and recycling room, sprinkler room, and fire pump room. A garage access ramp is accessed through Slater Street and is owned by 81 Metcalfe Street. • Two aboveground storage tanks were noted on Site, with one 1,029 L diesel AST being present within the northeast portion of the first basement level used for an emergency generator. The second 458 L diesel tank is located within the mechanical penthouse associated with an emergency generator. • The building was constructed in approximately 1953 with two upper storey additions added in 1996. • The Site was occupied by a small structure in 1945, and in 1955 the Site was occupied by a structure similar to present, excluding a different configuration on the mechanical room. • The building in 1945 was not deemed to represent an

Report Details	Findings and Conclusions
	environmental risk due to the excavation that was carried out for the construction of the present building. • In 1948, the FIP identified off-Site concerns due to the presence of garages and underground and aboveground petroleum storage tanks to the east and southeast. • The land use plans in 1976 identified restaurants, offices and a bank. • The Site had a historical address comprising of 100 Albert Street as a previous structure on the Site, which included Beamish service station (1931 and 1950), By-town Service Station (1936 – 1945), Commonwealth building (1960 – 1982), Sizzling Wok (1994 – 1997), Tiffin Café (2000). • The previous occupants identified a livery (1885 – 1901), Topographical Survey Branch (1907 – 1916), Chinese Laundry (1920 – 1930), Lee Sing Laundry (1935), Metcalfe Sweets (1950), and Commonwealth Building (1955 – 1994), Paragon Cleaners (1981 – 1994), Marquis Corp Ltd (1997 – 2007), Fondation pour la decouverte du Canada (1997 – 2023), Café Deluxe (2006 – 2023), NAV Canada (1997 – 2023), Pacesetter Travel (2021 – 2023). • Paragon Cleaners occupied a part of the ground level of the basement, at the time of the report the second floor of the basement was used for storage, with possible storage of chemicals. • A previous service station was located at 100 Albert Street was located at the northeast portion of the Site from 1931 to 1950. The Phase One ESA recommended a Phase Two ESA based on the following risks identified for the Site: ○ Historic presence of a potential oil-fired heating system on Site with two boilers located in the west part of the basement; ○ Presence of a service station on Site with two underground storage tanks in 1948 (west and central parts); ○ Presence of a dry-cleaner on Site between 1979 and 1994; ○ Presence of repair garages and petroleum ASTs and USTs on the eastern and south-eastern adjacent properties (insurance plan dated 1948).
	G2S Comments: The previous environmental reports that were referenced in the report were not provided to G2S. Site photos were not appended in the Phase One ESA.

Report Details	Findings and Conclusions
Title: Geotechnical Subsoil Investigation Report **Date of Report:** February 20, 2025 **Author of the Report:** Solroc Inc.	• The proposed future use of the property is to demolish the current twelve-storey building with two levels of underground and to construct a new high-rise building. • A separate hydrogeological study was being conducted which will be issued under a separate cover. • The fieldwork was carried out between December 6th and 16th, 2024 and included two geotechnical standard penetration testing (SPT) including bedrock coring within the first level of the basement (labelled BH-1 and BH-2). Four geotechnical SPT boreholes with sampling and bedrock coring were within the second level of the basement level (BH-3 to BH-6). • Fill materials were identified within 0.46 and 0.83 m below ground surface (bgs). • Bedrock was encountered between 1.09 and 1.47 m bgs within the first level of the basement, and 0.44 to 1.22 m bgs within the second level of the basement. All boreholes were advanced within the basement of the property due to the parcel being limited to the building footprint. • Surveying was not completed at the time of the assessment, however a document by others indicated the elevation of the slab 1st floor basement level was 64.5 m and the elevation of the slab on grade of the 2nd basement level is 61.5 m. • The geotechnical boreholes identified concrete, underlain by fill materials of crushed stone, or a mixture of humid, silt, sand and gravel in different proportions with traces to some clay. Dark grey shale with submillimetre quartz veins was underlain by the fill materials. • The groundwater level was identified between 2.29 and 2.43 m bgs on the first floor of the basement, and between 0.23 and 2.55 m bgs on the second floor of the basement on January 27th, 2025.

3.2 Environmental Source Information

Table 6: Environmental Source Information

Document	Source	Pertinent Information
The City of Ottawa Official Plan: Schedule B1 – Downtown Core Transect Schedule C11-C – Natural Heritage System (East)	City of Ottawa website	Site and Study Area are generally classified as an 'Evolving Neighbourhood, Hub, and Corridor/Mainstreet'. Site and Study Area are generally classified as 'Urban Area'. No natural heritage features were identified.
Ministry of Natural Resources (MNR) and	MNR online	No areas of natural significance are located within the Site or Study Area.

Document	Source	Pertinent Information
Forestry, Ontario, Natural Heritage Areas database		
National Pollutant Release Inventory (NPRI) database	NPRI online	Search for records in the vicinity of the Site was conducted in two-year increments for the years 1993-2023. No records were found for the Site or Study Area.
Ontario Inventory of Polychlorinated Biphenyl (PCB) Storage Sites (1991 & 1995)	MECP	No records were identified within the Stie. The following three records were identified within the Study Area: - 90 Sparks Street (~100 m north): Occupied by Globe Realty Management Ltd. as a minor site in 1995. - 78 O'Connor Street (~200 m west): Occupied by Bell Canada as a major site with 5.388 tonnes in 1991. - 160 Elgin Street (~245 m southeast): Occupied by Bell Canada as a minor site in 1991.
Inventory of Coal Gasification Plant Waste Sites in Ontario	MECP	No records for the Site or Study Area.
Inventory of Industrial Sites Producing and Using Coal Tar and Related Tars in Ontario	MECP	No records for the Site or Study Area.
Freedom of Information (FOI) Request	MECP	Requests generally takes several weeks to months to generate a response. Should a response from the government agency change the conclusions or recommendations of this report, an addendum letter will be provided with the information received.
Waste Disposal Site Inventory, June 1991	MECP	No records for the Site or Study Area.
Brownfields Environmental Site Registry	MECP online	The following properties within the Study Area have Records of Site Conditions (RSCs) filed: - 75 Slater Street (southeast adjacent): APECs identified on the property as a former automotive garage, fill material of unknown quality, an existing hydro substation in 2022, a former automotive service garage, two former USTs at the southeast corner of the Site, and application of de-icing salt. Soil contamination was identified for metals, no groundwater was exceedances were identified.
Technical Standards and Safety Authority (TSSA)	TSSA via email	The Site and immediate properties were searched for TSSA records. The following record was identified at 130 Slater Street (~75 m southwest): - Two active Fuel Safety (FS) Appliances.

The environmental source information is included in Appendix D, and the PCAs identified are summarized in Table A of Appendix G.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

For ease of reference, aerial photographs are included as Drawings 4 through 9 in Appendix A. The following table summarizes the information.

Table 7: Aerial Photographs

Year	Site Description	Study Area Description
1928	The Site is developed and appears to be developed with five buildings. The northwest portion of the Site is undeveloped.	The Study Area is fully developed. All roadways have been partially developed within the Study Area and the Study Area is developed with commercial and residential buildings.
1965	The Site has been redeveloped with a high-rise commercial office building. A mechanical structure is located on the roof of the building.	The south and east adjacent buildings have been re-developed into commercial office buildings. Buildings are no longer present at 85 Albert Street (~20 m north) and is utilized as parking. The Study Area is in the processes of converting the previous buildings into high-rise buildings.
1991	No change to the Site from the 1965 aerial photograph.	81 Metcalfe Street (south adjacent) has had additions to the upper storeys of the office building. Slater Street and Albert Street have been expanded across the Rideau Canal. Eglin Street has been developed northwards, similar to present.
2002	The Site has expanded the upper floors and has current structure of the mechanical penthouse on the roof of the building.	75 Slater Street (southeast adjacent) appears to have been demolished. The remaining Study Area is developed similar to present.
2019	The building on-Site is developed similar to present.	90 Elgin Street (~35 m east) is developed similar to present. The Study Area is developed similar to present.
2024		No change from the 2019 aerial photograph.

3.3.2 Ontario Base Maps/Topographic and Other Maps

For ease of reference, selected maps are included as Drawings 10 through 13 in Appendix A. The following table summarizes the information.

Table 8: Topographic and Other Maps

Item	Year	Site Description	Study Area Description
Topographic Map	1950	The Site appears to be developed, no buildings are depicted. The ground elevation is approximately 68 m above sea level (ASL) and elevations are	The Study Area appears fully developed; no buildings are depicted. All roadways are developed within the Study Area. The Rideau Canal is located east of the Study Area, and the Ottawa River is located north of the Study Area.

Item	Year	Site Description	Study Area Description
		decreasing towards the Rideau Canal and towards the Ottawa River.	
Topographic Map	1983	The Site is shaded red indicating commercial and residential use.	A park is located at 100 Elgin Street (~190 m southeast). Albert Street and Slater Street have been extended across the Rideau Canal. The Study Area is shaded red, indicating residential and commercial use. Sparks Street appears to be undeveloped.
Topographic Map	1998		100 Elgin Street has been converted into armoury. 161 Elgin Street (~245 m southeast) is developed with buildings similar to present, identified as a courthouse. Sparks Street has been developed.
The Community Map of Canada Vector Basemap	2024	The Site is developed with current building footprint, similar to present. No elevations are depicted.	The Study Area is developed with commercial and residential properties.
Soil Associations of Southern Ontario	1960	The Site and Study Area is dominantly Lincoln (D.G.G.) Haldimand clay, formed on till or lacustrine sediments.	
Palaeozoic Geology of Southern Ontario, Map 2254, Ontario Division of Mines	1972	The Site and Study Area is underlain by grey and black shale of the Upper Ordovician Georgian Bay (Whitby (Eastview and Billings)) Formation.	

3.3.3 Hydrology and Hydrogeology

The building covers the entire Site and therefore limited surface water is generated at the Site, however, floor drains are located across the paved areas located throughout the underground parking levels of the Site and flow towards stormwater sumps located within the second underground parking level. Surface water is expected to runoff the paved surfaces along Metcalfe Street and Albert Street towards catch basins.

The Ottawa River is located approximately 650 m north of the Site and the Rideau Canal is located approximately 315 m northeast, flowing north towards the Ottawa River. Surface elevations in the area decrease to the north/northeast towards the Rideau Canal. Based on our observations and review, the expected direction of groundwater flow underlying the Site is northeast towards the Rideau Canal.

3.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

The Ottawa River is located approximately 650 m north of the Site and the Rideau Canal is located approximately 315 m northeast, no woodlands, wellhead protection zones, or areas of natural significance are not located within the Site.

Several monitoring well records were identified within the Study Area; no drinking water well records were located. The Site is within a developed urban setting and potable water is provided from a piped municipal supply that is sourced from the Ottawa River.

3.3.5 Well Records

According to the MECP records, there were seven monitoring well records within the Study Area (included in Appendix E) and none on-Site. A record from a monitoring well located 73 Albert Street (~45 m northeast) of the Site identified soil as asphalt underlain by brown sand fill to a depth between 0.24 and 0.61 m bgs, underlain by brown silty sand fill to a depth of 4.27 m bgs. Grey silty sand till with some gravel silt was encountered to a depth of 4.88 m bgs. Bedrock was encountered from depths of 4.88 to 6.1 m bgs. The static water level was not provided.

3.4 Site Operating Records

Site operating records were requested via a Phase One ESA questionnaire provided by G2S at the time of this Phase One ESA report. The following chart summarizes the records:

Table 9: Site Operating Records

Site Operating Records	
Regulatory Permits and Records	No records available
Material Safety Data Sheets	No records available
Underground Utility Drawings	No records available
Chemical Inventory and Storage	No records available
Storage Tanks	No records available
Environmental Monitoring Data	No records available
Waste Management Records	No records available
Process, Production and Maintenance Documents	No records available
Spills and Discharges	No records available
Emergency Response and Contingency Plans	No records available
Environmental Audit Reports	No records available
Facility Site Plans	No records available

4. Interviews

4.1 Site Personnel

An interview regarding the Site was conducted with Site Representative and Designer Manager for the Site, Mr. Mohamad Kheir Hassoun on February 27, 2025. A Phase One Questionnaire has not been returned at the issuance of this report.

4.2 Third Party Individuals

Third party individuals were not available for interview at the time of this Phase One ESA.

4.3 Government Officials

The following government officials were contacted as part of this Phase One ESA:

1. Ministry of the Environment, Conservation and Parks (MECP), Freedom of Information and Protection of Privacy Office; and

2. Technical Standards and Safety Authority (TSSA).

5. Site Reconnaissance

Observations of the Site, adjacent, and surrounding properties were conducted by walking over the Site. Adjacent and surrounding properties were observed from within the Site or by other public means. Refer to Drawing 3 (Site Plan) in Appendix A. Photographs of the Site and the Study Area are included in Appendix G.

5.1 General Requirements

Table 10: Site Reconnaissance

Date:	February 19, 2025
Time:	2:30 p.m.
Weather:	Sunny, -13 ºC
Person who conducted the Site visit:	Hailey Perras, B.Sc.
Site Contact/Personnel accompanying G2S during Site visit	Peter Tasse
Qualified Person supervising the Site visit:	Steve Campbell, P. Geo.
Facility Operating: (Yes/No)	No

5.2 Specific Observations at the Phase One Property

General Observations:	
The Site is developed as rectangular shaped vacant twelve-storey office building with a mechanical penthouse and two levels of underground. The first floor of underground consists of storage, vacant office spaces, a mechanical room and parking. The second floor of the underground parking level consists of office spaces. The northeast corner of the first floor of the basement includes a 1,025 L aboveground storage tank (AST) associated with a backup generator stored within a concrete basin. Three elevators are located within the central portion of the Site. A glycol system is located within the central portion of the Site associated with the cooling processes of the building. The glycol storage container is located within the 12th floor mechanical penthouse. The second floor for of the mechanical penthouse includes transformers and an exit to the roof where two backup power generators are located. The northeast portion of the main floor historically occupied a restaurant and bakery. NAV Canada historically occupied the remaining twelve stories. The building is currently in the early stages of being prepared for demolition.	
On-Site Potentially Contaminating Activities	
PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks PCA #55 – Transformer Manufacturing, Processing and Use	
Interior Observations	
Item	Observations
Building Observations	Carpet, concrete, drywall, metal deck, tile, suspended ceiling tiles, glass.
Existing and Former Heating and Cooling Systems	Glycol heating and cooling.
Description of Below-Ground Structures	Two basement levels.
Exit and Entry Points	Entrance to main floor via Albert Street and Metcalfe Street.

	Entrance to underground via Slater Street.
Drains, Pits and Sumps	Drains located throughout the building leading to stormwater management sump within the second-floor basement level.
Wells	Five monitoring wells were identified within the basement levels.
Mechanical Equipment	Three elevator hoists and elevators.
Stained Materials	None observed.
Noise, Odours, Vibrations	None observed.
Storage Tanks and Bulk Containers	One 1,025 L AST was identified within the northeastern corner of the first level of underground parking. One plastic glycol storage container is located within the first level of the mechanical penthouse.
Unidentified Substances	None observed.
Waste Disposal	Waste Management bins are located within the southeastern portion of the first level of the underground level.
Hazardous Materials and Special Attention Items:	A transformer vault is located within the central portion of the underground parking lot.
Hazardous Materials and Special Attention Items:	It is noted that a Designated Substances Survey (DSS) was not within the requested scope of work for this Phase One ESA. In this regard, the following is provided for information purposes only and does not constitute a DSS.
(i) Polychlorinated Biphenyls	Polychlorinated Biphenyls (PCBs) were widely used for cooling and lubricating electrical equipment from the 1930s to the 1970s. The use of PCBs was prohibited in the late 1970s. A transformer vault is located within the central portion of the underground basement, PCBs are present on-Site.
(ii) Asbestos Containing Materials	Asbestos is a generic term referring to a group of naturally occurring fibrous mineral silicates. Asbestos was used in many products due to its strength and resistance characteristics. Common uses include boiler and pipe insulation, spray-on fireproofing, floor and ceiling tiles, asbestos-cement products, etc. Legislation banned the use of asbestos-containing materials (ACMs) in the mid to late 1980s. Due to the age of the building, there is potential for ACMs to be present in the building.
(iii) Lead	Lead is a heavy metal typically found in pipes, batteries, lead solder, cabling, insecticides, paints, glass and as an additive to gasoline. In 1976, the federal government limited the amount of lead for interior paints to 0.5% by weight or 5,000 ppm. The Surface Coating Materials Regulation (SOR/2005-109) dated April 19, 2005, as amended, pursuant to the 2005 Hazardous Products Act, revised the standard to limit the amount of lead in certain paints to 0.06% (600 ppm). In October 2010, this was revised to 0.009 % (90 ppm). Due to the age of the building, there is potential for lead based paint to be present on-Site.
(iv) Mercury	Mercury is typically found in a variety of building materials including paints, thermostats and mercury-vapour lamps.

	Potential mercury-containing equipment may be located on-Site.
v) Ozone Depleting Substances	Ozone-Depleting Substances (ODSs) include any substances containing chlorofluorocarbon ("CFCs"), hydro chlorofluorocarbon ("HCFCs"), halon or any other material capable of destroying ozone in the atmosphere. Federal regulations eliminated the production and import of CFCs by January 1, 1996 and put a freeze on the production and import of HCFC-22 by January 1, 1996. The regulation also requires the complete replacement of HCFC-22 equipment by the year 2020. Potential ODS-containing equipment may be located on-Site including refrigerators and an air conditioning unit.
(vi) Urea Formaldehyde Foam Insulation	Urea Formaldehyde Foam Insulation (UFFI) was used as an insulation material for existing buildings (commonly houses) from the mid-1970s until its ban in Canada in 1980.
Site Limitations	Access was not permitted within the transformer vault.
Exterior Observations	
Item	Observations
Structure Exteriors	Twelve-storey commercial building with a two-storey mechanical penthouse.
Hazardous Materials	None observed.
Storage Tanks and Containers	None observed.
Unidentified Substances	None observed.
Wells	None observed.
Potable Water Supply	Municipal (Ottawa River).
Underground Utility and Service Corridors	Underground utilities were identified on-Site as part of a concurrent Phase Two ESA being completed by G2S.
Sewage Disposal	Municipal sewers.
Pits and Lagoons	None observed.
Stained Materials	None observed.
Stressed Vegetation	None observed.
Ground Surface	Concrete
Fill Materials	Subsurface investigations completed by others in 2024 identified the presence of fill material across the Site to depths of up to 0.86 m bgs.
Watercourses, Ditches and/or Standing Water	None observed on Site.
Roads, Parking Facilities and Rights of Way	Access to the Site is via Metcalfe Street, Slater Street and Albert Street.
Noises, Odours, Vibrations	None observed.
Storage	None observed.
Adjacent Land Uses	
North	Albert Street followed by 55 Metcalfe Street: Multi-unit commercial building
South	81 Metcalfe Street: Multi-unit commercial building

East	88 Albert Street: Hotel
West	Metcalfe Street followed by a parking lot.
Current or Former Railway Lines or Spurs	None observed on Site or in the Study Area.

5.2.1 Enhanced Investigation Property

An enhanced investigation of the Site is necessary when the Site is being used for one of the following uses as described in clause 32 (1) (b) of Ontario Regulation 153/04 of the Environmental Protection Act (EPA). Clause 32 (1) (b) identifies properties that are being used in whole or in part for:

i. For industrial use
ii. As a garage
iii. As a bulk liquid dispensing facility including gasoline service station
iv. For the operation of dry-cleaning equipment.

The Site is currently developed with a vacant commercial building with two levels of underground parking. The Site was historically occupied by a dry cleaner within the northeastern portion of the Site (98 Albert Street), and two dry cleaners have occupied 77 Metcalfe Street. Fire Insurance Plans (FIPs) identified a historical autobody shop located within the southern portion of the Site, and a historical gasoline service station located within the northwestern portion of the Site, therefore an enhanced investigation is required.

5.2.2 Operations

The current property use is commercial; and the previous uses included industrial, commercial and residential. In general, the Site was developed as a livery and tables in the late 1800s. The Site was then used for mixed residential/commercial purposes with a dry cleaner. In the 1910s – 1920s, an additional dry cleaner was developed within the western portion of the Site. The southern portion of the Site was utilized as an autobody garage from 1922 – 1931.

Beamish Service Station occupied the Site from the years 1931 to 1950. Two underground storage tanks (USTs) were indicated on the 1948 FIP. The current multi-unit commercial building at 77 Metcalfe was constructed in 1954, and the 1955 FIP identified the presence of potential oil-fired boilers located within the western portion of the Site. Paragon Cleaners occupied the basement level of 77 Metcalfe Street from the years 1986 – 1998. The Site has a two-story mechanical penthouse with the presence of transformers. A transformer vault is located within the first level of underground and contains PCBs.

According to a title search, the Site has consisted of multiple parcels of land located east and south of 77 Metcalfe Street, in 1953, all of the parcels were combined into the current Site.

G2S was unable to find contact information for previous owners for 77 Metcalfe Street, therefore information regarding the former operations at the Site, including processing or manufacturing was limited.

5.2.3 Hazardous Materials

It is unknown if there were hazardous material on Site that were related to former industrial uses. Regulatory permits, records and material safety data sheets (MSDS) were not available.

As previously indicated, the central portion of the basement is used as a transformer room. Electrical transformer equipment containing PCBs is present on Site.

5.2.4 Products Manufactured

Based on the available information, there is no indication that products have historically been manufactured on-Site.

5.2.5 By-Products and Wastes

It is unknown what by-products and wastes have historically been generated on-Site, other than domestic waste as part of the former commercial use. G2S's research for waste management records, historical waste storage locations and waste generator and waste receiver information (EcoLog ERIS Ltd.) indicated there were three records for the Site as follows:

- Paragon Cleaners located at 77 Metcalfe Street for halogenated solvents from 1986 to 1998.
- Nav Canada located at 77 Metcalfe Street for pathological wastes from 2009.
- The Cadillac Fairview Corporation Limited for air emissions related to a diesel back up generator located on the roof in 2002.

5.2.6 Raw Materials – Handling and Storage

It is unknown which raw materials were used on Site other than dry cleaning solvents. Inventories of chemicals, chemical usage and chemical storage areas were not available.

5.2.7 Details of Drums, Totes and Bins

No evidence of any former drums, totes or bins was noted on Site.

5.2.8 Details of all Oil/Water Separators

No evidence of oil/water separators were noted during the Site reconnaissance.

5.2.9 All Vehicle and Equipment Maintenance Areas

The former auto repair building was located on the southern portion of the Site, no mechanical equipment was identified within the FIPs.

5.2.10 Details of All Spills

As previously indicated, the EcoLog ERIS report identified no spill records for the Site. Since the Site has not been used for industrial purposes since approximately 1999, there were no emergency response and contingency plans, including spill prevention and contingency plans available.

5.2.11 Details of Liquid Discharge Points

Numerous floor drains were noted throughout floors within bathrooms. Numerous catch basins and drains are located within the underground levels associated with surface water.

Two storm water catch basins were observed on Site below the overhead bridge and convey surface water to stormwater sump located within the second basement level.

5.2.12 Details of Operations

Details of former operations including processing or manufacturing and equipment used in processing or manufacturing were obtained from a 1987 Opta Inspection Report.

5.2.13 Details of all Hydraulic Lift Equipment

Three elevator hoists were identified within the mechanical room along the 12th floor mechanical penthouse. It had an electric cable style elevating device, which was housed in an elevator service room on the building roof. The elevator serviced all floors.

5.3 Written Description of Investigation

The investigation carried out by G2S included inspection and examination of the Site as well as a visual inspection of the Study Area from areas accessible to the public. The investigation included documenting Site and Study Area conditions through notes and photographs and review of reasonably accessible information. The data complied was reviewed and evaluated for APECs, as presented in this report.

6. Review and Evaluation of Information

6.1 Current and Past Uses

Based on the information gathered from the Site visit, records review and interviews, the following is a summary of the current and past uses of the Site:

Table 11: Summary of Current and Past Site Uses

Year	Name of Owner	Description of Property Use	Property Use	Other Observations
Lot 52				
Prior to 1823	Crown	Undeveloped	Agricultural or other use	Based on information from title search, no aerial photos or Fire Insurance Plan (FIP) available.
1823 – 1826	John B. Honey			
1826 – 1862	Nicholas Sparks			
Lot 53				
Prior to 1834	Crown	Undeveloped	Agricultural or other use	Based on information from title search, no aerial photos or Fire Insurance Plan (FIP) available.
1830 – 1834	John B. Honey			
1834 – 1849	Daniel McLachlin			
1849 – 1868	Nicholas Sparks			
Part Lot C Con C & Other Lands				
Prior to 1826	Crown	Undeveloped	Agricultural or other use	Based on information from title search, no aerial photos or Fire Insurance Plan (FIP) available.
1826 – 1830	John B. Honey			
1830 – 1862	Nicholas Sparks			
Part Lot C & Other Lands, Lots 52 and Lots 53 South Albert				
1862	Nicholas Sparks	Undeveloped	Agricultural or other use	Based on information from title search, no aerial photos or Fire Insurance Plan (FIP) available.
1862 – 1874	Mary Wright			

Year	Name of Owner	Description of Property Use	Property Use	Other Observations
1865	James Sterward			
1865	Patrick Buckley			
1874 – 1898	Peter Egelson	The Site was developed as a coach shed and livery in the late 1800s, with a dry cleaner being developed within the 1910s. Residential dwellings were observed in 1895, 1912 and 1922.	Commercial, Residential or other use	Based on information from the title search, the 1895, 1912, 1922, 1948 Fire Insurance Plans (FIPs), and the 1928 aerial photograph, and street directories.
1898 – 1928	Ottawa Investment Co. Limited			
1901 – 1945	Ottawa Building Co. Ltd	The Site was developed with several commercial businesses including dry cleaners, autobody shops, government stores, and a gasoline service station.	Commercial or other use	
1945 – 1946	Harvey Interests Limited			
1946 – 1953	Duncan Mactavish			
1953 – 1954	Wittington Investments Limited			
1954 – 1967	Wittington Realty & Construction Limited	The Site was developed into the current configuration as present day, with the function being a multi-commercial high-rise building.	Commercial or other use	Based on information from the title search, the 1955 and 1963 Fire Insurance Plans (FIPs), 1965, 1991, 2002, 2014 aerial photographs, and street directories.
1967 – 1972	Joseph Ages Jack Pleet			
1972 – 1989	Estate of Zelikovitz			
1990	Whitehall Estates			
1989 – 1997	77 Metcalfe Corp.			
1997 – 2012	The Cadillac Fairview Corporation Limited			
2012 – 2022	77 Metcalfe Street II GP Inc.			
2022 – 2025	Edifice 77 Metcalfe Inc. / 77 Metcalfe Building Inc.	The Site has been vacant since 2022.		Based on information from the title search, the 2024 aerial photograph, street directories and Site Reconnaissance.

6.2 Potentially Contaminating Activities

The following Potentially Contaminating Activities (PCAs) were identified for the Site and/or Study Area and are summarized on Table A in Appendix G and shown on Drawing 14 in Appendix A.

6.3 Areas of Potential Environmental Concern

Based on review and evaluation of the PCAs, APECs were identified at the Site and are summarized on Table B in Appendix G and shown on Drawing 15 in Appendix A.

7. Phase One Conceptual Site Model

Site Description

The rectangular shaped Site is located on the east side of Metcalfe Street, located at the southeast corner of the intersection with Albert Street and Metcalfe Street, and covers an approximate area of 0.12 hectares (0.29 acres). The Study Area consists of commercial and residential land use, and the Rideau Canal is located approximately 315 m northeast of the Site. The Site location is illustrated on Drawing 1 in Appendix A and photographs of Site are included in Appendix F.

The Site was first developed in the late 1800's with residential and livery buildings with a coach shed within the northwestern portion of the Site. In 1912, a dry cleaner was developed on the northeastern portion of the Site, with the coach shed still present within the northwestern portion of the Site. Government Stores were present within the southern portion of the Site, being then converted into an autobody garage in 1922 until 1931. An additional dry cleaner was developed within the west central portion of the Site in 1922. The buildings were demolished in 1931, and a gasoline service station was developed within the northwestern portion of the Site including the presence of two underground storage tanks (USTs). The current building structure was constructed in 1954 and consisted of a multi-tenant commercial high-rise building with three elevators and two levels of underground. Two boilers were historically located within the western portion of the Site in 1955. The Site is currently vacant and in the stages of being prepared to be demolished.

Water Bodies/Areas of Natural Significance

No waterbodies or woodlands are located within the Study Area. The City of Ottawa official plan zones the Stie and Study Area as an Urban Area; the Ministry of Natural Resources (MNR) map does not identify any areas of natural significance.

No wellhead protection areas were identified within the Study Area; however, the Site is not located within an intake protection zone.

Surface water from the Site is expected to flow across the paved areas along Metcalfe Street and Albert Street towards catch basins. Surface water is expected flow towards the catch basins and drains located within the underground parking levels and drain towards a stormwater sump.

Drinking Water Wells

No drinking water well records were located. The Site is within a developed urban setting and potable water is provided from a piped municipal supply that is sourced from the Ottawa River.

Geological and Hydrogeological Setting

The Site is located approximately 68 m above sea level. The Rideau Canal is located approximately 315 m northeast, flowing north towards the Ottawa River, located approximately 650 m north. Surface elevations in the area generally decrease towards the northeast. Based on our observations and review, the expected direction of groundwater flow underlying the Site is northeast towards the Rideau Canal.

Based on a review of soil and geological mapping for the area, the near surface overburden soils at and in the vicinity of the Site are comprised of clay. The bedrock comprises grey to black shale of the Upper Ordovician Georgian Bay (Whitby (Eastview and Billings)) Formation.

Underground Utilities

Underground utilities were identified on-Site as part of a concurrent Phase Two ESA being completed by G2S. Based on the shallow depth of most utility lines and the expected depth of groundwater in the area, utilities are unlikely to affect contaminant distribution and transport.

Surrounding Properties

The Phase One ESA Study Area is developed primarily for residential, commercial and parkland land use (as shown on Drawing 2 in Appendix A).

Albert Street is located north of the Site, followed by 55 Metcalfe Street (multi-unit commercial building), 81 Metcalfe Street (multi-unit commercial building) is located south adjacent, 88 Albert Street is located east adjacent and is occupied by hotel/apartments, and Metcalfe Street followed by a parking lot is located west adjacent.

Potentially Contaminating Activities (PCAs)

Historical review of the Site and surrounding properties within a 250 m radius of the Site identified nine PCAs on-Site and several off-Site PCAs, as defined in O. Reg. 153/04. PCAs identified during the Phase One ESA are summarized in Table A of Appendix G.

Areas of Potential Environmental Concern (APECs)

The PCAs were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, expected chemical storage amounts, etc. Based on review and evaluation of the information gathered, twelve APECs were identified on-Site and are summarized in Table B of Appendix G.

8. Conclusions and Recommendations

This Phase One ESA was conducted to:

i) develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One ESA property;

ii) determine the need for a Phase Two ESA; and

iii) provide a basis for carrying out any Phase Two ESA required.

The assessment was performed in accordance with the Phase One ESA protocols outlined in O.Reg. 153/04, as amended, which came into force on July 1, 2011, and meets the requirements of Schedule D of the Regulation.

The Site was first developed in the late 1800's with residential and livery buildings with a coach shed within the northwestern portion of the Site. In 1912, a dry cleaner was developed on the northeastern portion of the Site, with the coach shed still present within the northwestern portion of the Site. Government Stores are present within the southern portion of the Site, being then converted into an autobody garage in 1922 until 1931. An additional dry cleaner was developed within the west central portion of the Site in 1922. The buildings were demolished in 1931, and a gasoline service was developed within the northwestern portion of the Site with the presence of two USTs. The current building structure was developed in 1954 and consisted of a multi-tenant commercial high-rise with three elevators. Two boilers were located within the western portion of the Site in 1955. The Site is vacant and under the process of demolition.

Historical review of the Site and surrounding properties within a 250 m radius of the Site identified nine on-Site PCAs and several off-Site PCAs, as defined in O. Reg. 153/04. The PCAs were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, expected chemical storage amounts, etc. Based on review and evaluation of the information gathered, the following APECs have been identified:

APEC 1: Entire Site – Fill material of unknown origin and chemical quality was identified during subsurface investigations completed by others in 2024.

APEC 2A: Northeast portion of Site – Historical presence of a dry cleaner within the northeast portion of the Site from the years 1912 – 1922.

APEC 2B: Historical presence of a dry cleaner located within the west central portion of the Site in 1922.

APEC 2C: Entire Site – Historical presence of Paragon Cleaners, a dry cleaner located within the second level of the basement from the years 1986 – 1998.

APEC 3A: Northwest portion of Site – Historical use of the Site by Beamish Service Station as a gasoline service station with two USTs of unknown volume from the years 1931 – 1950.

APEC 3B: Northeast portion of Site – Current and historical presence of a 1,025 L diesel AST located within the northeast portion of the Site associated with a diesel backup generator.

APEC 3C: Western portion of the Site – Historical presence of two oil fired boilers located within the western portion of the Site in 1995.

APEC 4: Central portion of the Site – Current and historical presence of a transformer vault with the presence of PCBs.

APEC 5: Southern portion of the Site – Historical use of the Site as a commercial auto garage from the years 1922 – 1950.

APEC 6: Southeastern portion of the Site – Historical use of 75 Slater Street (southeast adjacent) as an autobody shop, battery servicing, presence of USTs from the years 1948 – 1963. Known soil contamination was identified within a RSC in 2022.

APEC 7: Western portion of the Site – Historical use of the 116 Albert Street (~20 m west) as a former used car dealership, a newspaper publisher and machinery shop from the years 1950 – 2000.

APEC 8: Southwestern portion of the Site – Historical use of 119 Slater Street (~45 m west) as a dry cleaner from 1971 – 1981.

Based on the findings of this Phase One ESA, a Phase Two ESA is recommended to investigate the potential for contamination related to the above-noted APECs.

8.1 Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

It is the opinion of G2S that a Phase Two ESA is required before an RSC can be submitted for the Site.

8.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

It is the opinion of G2S that an RSC cannot be submitted for the Site based on a Phase One ESA alone.

9. Qualifications of the Assessors

This Phase One ESA was conducted by Hailey Perras, B.Sc. Ms. Perras is responsible for the successful completion of field work and reporting. Ms. Perras has completed numerous projects on behalf of private and public sector clients for industrial, commercial, and residential sites.

This Phase One ESA was reviewed by Ms. Stephanie Lewis, B.A. Ms. Lewis has been trained to conduct Phase One and Two ESAs in accordance with the CSA and O. Reg 153/04, as amended. She is a senior project manager with over 10 years of professional experience specializing in environmental investigations and project management. Her main areas of expertise include Phase One and Phase Two ESAs, project management, site cleanup/remediation, UST and AST removals, and site remediation. She has completed numerous projects on behalf of private and public-sector clients for industrial, commercial, and residential sites.

This Phase One ESA was reviewed by Mr. Steve Campbell, P. Geo. Mr. Campbell has over 20 years of environmental consulting experience, including Phase One and Two ESAs, hazardous materials management, contaminant hydrogeology, air quality, environmental monitoring and remediation of contaminated sites. Mr. Campbell is responsible for the overall management of projects, QA/QC, and health and safety, as well as acting as a technical lead on projects. Mr. Campbell is a Qualified Person as defined in Ontario Regulation 153/04 for signing off on Phase One and Two ESAs, remediation reports and Records of Site Condition (RSCs). Mr. Campbell has managed numerous asbestos, designated substances and mould assessments, as well as remediation programs.

11. Limitations

This Phase One Environmental Site Assessment (ESA) has been prepared for the sole benefit of the Client (Groupe Mach Inc.) and is intended to provide a Phase One ESA for the Site, 77 Metcalfe Street in Ottawa, Ontario. The Phase One ESA may not be relied upon by any other person or entity without the expressed written consent of the Client and G2S Consulting Inc. (G2S). Any use which a third party makes of this Phase One ESA, or any reliance on decisions made based on it, is the responsibility of such third parties. G2S accepts no responsibility for any loss, damage, expenses, or penalties suffered by any third parties that may arise or result from the use of any information or recommendations contained in this report.

The report is based solely on the scope of services which are specifically referred to in this report. No physical or intrusive testing has been performed, except as specifically referenced in this report. This report is not a certification of compliance with past or present regulations, codes, guidelines and policies.

The findings in this Phase One ESA are limited to the conditions at the Site at the time of this investigation (February to April 2025) and supplemented by a historical review and data obtained by G2S as described herein as well as information provided by the Site representative as reported herein. Conclusions presented in this Phase One ESA should not be construed as legal advice.

If Site conditions, regulations, codes, guidelines and applicable standards change or if any additional information becomes available at a future date, changes to the findings, conclusions and recommendations in this Phase One ESA may be necessary.

This assessment does not wholly eliminate uncertainty regarding the potential for existing or future costs, hazards or losses in connection with the Site and must be viewed as a mechanism to reduce risk rather than eliminate the risk of contamination concerns.

12. Signatures and Closing Remarks

We trust this Phase One ESA is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

G2S Consulting Inc.

Hailey Perras, B.Sc.

RE: CITY DIRECTORY RESEARCH
77 Metcalfe St and 110 O'Connor St
Ottawa,ON K1P 5L6

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

61-294 of Albert Street
96-219 of Bank Street
1-160 of Elgin Street
31-210 of Gloucester Street
140-360 of Laurier Ave W
231-311 of Lisgar Street
55-180 of Metcalfe Street
89-178 of Nepean Street
50-198 of O'Connor Street
50-234 of Queen Street
66-300 of Slater Street
25-240 of Sparks Street

Search Notes:

Laurier Ave W is also known as 140-360 Maria Street in Ottawa. Ottawa, Ontario, is last listed in 1875.
