Phase One Environmental Site Assessment

593, 601 & 603 Laurier Ave W
Ottawa, Ontario

Prepared for:

Heritage Investments Ltd.
1010 Polytek Street, Unit 5
Ottawa, Ontario
K1J 9H9

Attention: Dean Michaud

EXECUTIVE SUMMARY

Heritage Investments Ltd. has retained LRL Associates Ltd. (LRL) to complete a Phase One Environmental Site Assessment (ESA) on the properties located at 593, 601 and 603 Laurier Avenue West, Ottawa, Ontario (herein referred to as the “Site”). The Site is made up of three (3) individual property parcels. The legal description of the property at 593 Laurier Ave W is Part Lot 40, Concession A (OF) as in CR231415, CR259616 Except Part 1 on N287620; Ottawa/Nepean. The legal description of the property at 601/603 Laurier Ave W is Part Lot 40, Concession A (OF) as in NS85937; Ottawa/Nepean. The Site is currently developed with multi-tenant residential buildings set within an urban residential area of Ottawa, Ontario. A small asphalt parking lot is located at the front (southwest corner) of 593 Laurier Ave West. The existing developments on the Site are estimated to have been constructed from between the early 1900’s (1901) and the mid- 1950’s.

This assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and the adjacent lands. The assessment was conducted in general accordance with the Ontario Regulation 153/04, as amended. A historical review of the Site was conducted, as well as contact with relevant regulatory agencies, a walk-through Site inspection of the property and interviews with those knowledgeable of the Site. It is our understanding that this Phase One Environmental Site Assessment is required for the above-referenced property in support of a Site Plan Application with The City of Ottawa to support the creation of a 28-storey residential building, including 331 units.

The Site property identified as 593 Laurier Avenue West is an irregular shape, with a total area of approximately 1,221 m² or 0.30 acres, being approximately 31 m wide (west-east) by approximately 39 m deep (north-south). The property is currently occupied by a multi-tenant residential building. The Site identified as property 601 and 603 Laurier Avenue West is a triangular shape, with a total area of approximately 1,604 m² or 0.40 acres, being approximately 74 m wide (east-west) by approximately 40 m (north-south). The properties are each developed with a multi-tenant residential buildings. The Site has been used for residential purposes from the development in at least the early 1900’s (1901) through to present day (August 2024), with a re-development of the 601/603 Laurier Ave property in the early 1950’s. The Site is accessible via Laurier Avenue W, south of the Site.

The subject Site and neighbouring lands are serviced by municipal water supply and wastewater system. Based on available geological information collected, the overburden is described as till with a local relief of less than 5 m and the bedrock as dark grey limestone with some shaly partings and sandstone. The nearest open body of water identified is the Ottawa River that is located approximately 0.56 km north of the Site. The Site is generally flat with a steep slope towards the north (towards the Ottawa River). Based on available interactive mapping systems, including *The Atlas of Canada – Toporama*, the groundwater flow direction is interpreted to be to the north/northwest towards the Ottawa River.

From the Ecolog ERIS report, three-hundred sixty-nine records were found within a 300 m radius of the subject Site, the records found are listed below:

- Thirteen Certificates of Approval (C of A)
- Four (4) Commercial Fuel Oil Tanks
- Two (2) Environmental Activity and Sector Registries
- Three (3) Environmental Registries
- Fourteen Environmental Compliance Approvals
- Forty-seven Historical ERIS Searches
- Six (6) Contaminated Sites on Federal Land
- Two (2) Federal Identification Registry for Storage Tank Systems
- Two (2) Historic Fuel Tanks
- One-hundred twenty-two Ontario Regulation 347 Waste Generators
- One (1) Greenhouse Gas Emissions from Large Facilities
- Five (5) TSSA Historic Incidents
- Two (2) Fuel Oil Spills and Leaks
- One (1) National Pollutant Release Inventory Record
- Six (6) Pipeline Incidents
- One (1) Private and Retail Fuel Storage Tanks
- Five (5) Permits to Take Water
- Five (5) Records of Site Conditions
- Three (3) Scott's Manufacturing Directories
- Eighty-two Ontario Spill records
- Thirty-five Water Well Information Systems

A potentially contaminating activity is a use or activity set out in Table 2 of Schedule D of the O. Reg. 153/04. The activities on the Site and lands within 250 m generally consist of the activities on the Site and lands within 250 m generally consist of commercial and residential. Based on the results of the Phase One Environmental Site Assessment the following areas of potential environmental concern were identified:

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
1	PCA Other: Spill	South	220 m	Ecolog ERIS	28 Primrose Ave. In 2002, a garbage truck leaked an unknown amount of hydraulic oil.	Southern portion of the Site	Potential impact on soil and groundwater
2	PCA Other: Spill	South	250 m	Ecolog ERIS	54 Primrose Ave. In 2008, an unknown amount of furnace oil leaked into the ground from a UST.	Southern portion of the Site	Potential impact on soil and groundwater
3	PCA Other: Waste Generation	On-Site	0	Ecolog ERIS	In 2022, the Dalhousie Housing Co-op registered as a waste generator of light fuels.	Entirety of the Site	Potential impact on soil and groundwater
4	PCA Other: Waste Generation	Southeast	100 m	Ecolog ERIS	111-440 Gloucester St. Between 2002 and 2018, the Bronson Place registered as a waste generator of various classes.	Eastern portion of the Site	Potential impact on soil and groundwater
5	PCA Other: Waste Generation	Southeast	170 m	Ecolog ERIS	Between 1986 and 2021, the Bronson Centre registered as a waste generator of various classes.	Eastern portion of the Site	Potential impact on soil and groundwater
6	PCA Other: Waste Generation	South	60 m	Ecolog ERIS	Between 1986 and 2020, St Vincent Hospital registered as a waste generator of	Western portion of the Site	Potential impact on soil and groundwater

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
					various classes.		
7	PCA Other: Scott's Manufacturing Directory	Southeast	170 m	Ecolog ERIS	Records of a periodic publisher at a civic/social organization were found. No timeline was given in the records.	Eastern portion of the Site	Potential impact on soil and groundwater
8	PCA 41: Petroleum Storage Tank and Oil Heating	On-Site	0	Site Interview	In the interview with the property manager, all three (3) properties had heating oil tanks previously that have since been removed.	Entirety of the Site	Potential impact on soil and groundwater
9	PCA 30: Importation of Fill Materials of Unknown Quality	On-Site	0	Site Visit	The Site has an asphalted parking and circulation area. It is anticipated that to fill material was imported to the property.	Entirety of the Site	Potential impact on soil and groundwater
10	PCA 37: Operation of Dry Cleaning Equipment (where chemicals are used)	South	160	HLUI	Centretown Laundry Co-Op, a Laundries and Cleaners listed in 2005 at 211 Bronson.	Southern portion of the Site	Potential impact on soil and groundwater

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
11	PCA 39: Paints Manufacturing , Processing and Bulk Storage	South	160	HLUI	Good Day Workshop Reupholstery and Furniture Repair facility which operated from at least 2001 through 2012 at 211 Bronson Avenue.	Southern portion of the Site	Potential impact on soil and groundwater
12	PCA 31: Ink Manufacturing , Processing and Bulk Storage	South	85	HLUI	Perfection Printers, a Printing facility which operated in at least 1990 at 190 Bronson Avenue.	Southern portion of the Site	Potential impact on soil and groundwater
13	PCA 31: Ink Manufacturing , Processing and Bulk Storage	South	180	HLUI	Desktop Express Publishing, and Publishing facility in the at least 1990 at 208 Bronson Avenue.	Southern portion of the Site	Potential impact on soil and groundwater
14	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South	120	HLUI	Builders Exchange Building, located at 196 Bronson Avenue, is listed as being equipped with an underground petroleum storage tank used for fuel oil, installed in 1960.	Southern portion of the Site	Potential impact on soil and groundwater

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
15	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South	60	HLUI	St. Vincent Hospital located at 60 Cambridge Street, is listed as having seven (7) records of petroleum storage tanks installed from between 1952 and 1973.	Southern portion of the Site	Potential impact on soil and groundwater
16	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South	160	HLUI	The Immaculata High School located at 211 Bronson Avenue, has records of two (2) petroleum storage tanks installed between 1953 and 1961.	Southern portion of the Site	Potential impact on soil and groundwater

1 INTRODUCTION

Heritage Investments Ltd. has retained LRL Associates Ltd. (LRL) to complete a Phase One Environmental Site Assessment (ESA) on the properties located at 593, 601 and 603 Laurier Avenue West, Ottawa, Ontario (herein referred to as the “Site”). The Site is made up of three (3) individual property parcels. The legal description of the property at 593 Laurier Ave W is Part Lot 40, Concession A (OF) as in CR231415, CR259616 Except Part 1 on N287620; Ottawa/Nepean. The legal description of the property at 601/603 Laurier Ave W is Part Lot 40, Concession A (OF) as in NS85937; Ottawa/Nepean. The Site is currently developed with multi-tenant residential buildings set within an urban residential area of Ottawa, Ontario. A small asphalt parking lot is located at the front (southwest corner) of 593 Laurier Ave West. The existing developments on the Site are estimated to have been constructed from between the early 1900’s (1901) and the mid- 1950’s. The Site’s location is shown in **Figure 1**.

The assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and the adjacent lands. A historical review of the Site was conducted, as well as contact with relevant regulatory agencies, a walk-through Site inspection of the property, and interviews with those knowledgeable about the Site. It is our understanding that this Phase One Environmental Site Assessment is required for the above-referenced property in support of a Site Plan Application with the City of Ottawa to support the redevelopment of the Site to include a 28-storey residential building with 331 units.

The Phase I ESA identifies the existing environmental conditions and potential environmental liabilities associated with the subject property, focusing on the possible presence of contamination on the property. It includes a review of available information (historical data and aerial photographs) and a visual Site inspection to assess potential contamination of past or present activities conducted on the property itself and on adjacent properties. Potential contamination represents the uncontrolled release of foreign substances within the natural environment. Such an event can result in air, soil and groundwater contamination that may represent environmental liabilities towards the Site and perhaps towards adjacent properties. The ESA evaluates in a consistent manner, within the time constraints imposed for this report, whether such events have occurred at this Site. This level of work is a method of risk reduction and does not eliminate risk for the client.

The Site property identified as 593 Laurier Avenue West is an irregular shape, with a total area of approximately 1,221 m² or 0.30 acres, being approximately 31 m wide (west-east) by approximately 39 m deep (north-south). The property is currently occupied by a multi-tenant residential building. The Site identified as property 601 and 603 Laurier Avenue West is a triangular shape, with a total area of approximately 1,604 m² or 0.40 acres, being approximately 74 m wide (east-west) by approximately 40 m (north-south). The properties are each developed with a multi-tenant residential buildings. The Site has been used for residential purposes from the development in at least the early 1900’s (1901) through to present day (August 2024), with a redevelopment of the 601/603 Laurier Ave property in the early 1950’s. The Site is accessible via Laurier Avenue W, south of the Site.

The subject Site and neighbouring lands are serviced by municipal water supply and wastewater system. Based on available geological information collected, the overburden is described as till with a local relief of less than 5 m and the bedrock as dark grey limestone with some shaly partings and sandstone. The nearest open body of water identified is the Ottawa River that is located approximately 0.56 km north of the Site. The Site is generally flat with a steep slope towards the north (towards the Ottawa River). Based on available interactive mapping systems, including The

Atlas of Canada – Toporama, the groundwater flow direction is interpreted to be to the north/northwest towards the Ottawa River.

1.1 Phase One Property Information

The Phase One Property Information is summarized below in the following **Table 1** and **Table 2**:

Table 1: Phase One Property Information – Authorized and Regulation

Parameters	Information
Work Authorization	The formal authorization to proceed with the Phase One ESA was received by LRL on July 17, 2024.
Purpose of Phase One ESA	<p>A Phase One ESA is required for the above-referenced property in support of a Site Plan Application with the City of Ottawa to support the creation of a 28-storey 331-unit residential building, including two (2) basement floors for underground parking.</p> <p>This assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and adjacent lands. The Phase One ESA identifies the existing environmental conditions and potential environmental liabilities associated with the subject property, focusing on the possible presence of contamination on the property. It includes a review of available information (historical data and aerial photographs) and a visual Site inspection to assess potential evidence of past or present activities conducted on the property itself and on adjacent properties that could be potentially contaminating activities (PCA).</p> <p>Potential contamination represents the uncontrolled release of foreign substances within the natural environment. Such an event can result in air, soil and groundwater contamination that may represent environmental liabilities toward the Site and perhaps toward adjacent properties. The ESA evaluates in a consistent manner, within the time constraints imposed for this report, whether such events have occurred at this Site. This level of work is a method of risk reduction and does not eliminate risk for the client.</p>
Record of Site Condition	A Record of Site Condition (RSC) is not required as part of the proposed land re-development activities as the intended Site use will remain residential.
Regulation/Guideline used for Phase One ESA	<ul style="list-style-type: none"> • Canadian Standards Association (CSA) Phase One Environmental Site Assessment, Z768 01 (R2016); • Guidance on Sampling and Analytical Methods for Use at Contaminated Sites in Ontario, Ontario Ministry of the Environment and Energy, December 1996; and • Ontario Regulation (O. Reg.) 153/04, as amended.
Sampling and Testing	As part of a Phase One ESA, in-situ sampling, measuring, testing or analyzing the conditions and characteristics of soil, groundwater, or building materials (if applicable) across the subject Phase One ESA Site is not included. These activities would be completed as part of a Phase Two ESA or a designated substance and hazardous material survey if required.
Reliance of Report	This report is intended for the sole use of Heritage Investments Ltd. and their authorized agents. LRL Engineering will not be responsible for any use of the information contained within this report by any third party.

Table 2: Phase One Property Information

Parameters	Information
593 Laurier Avenue West:	
Location/Address	593 Laurier Avenue West The location of the Site is presented in the included Figure 1 .
Property Identification Number (PIN)	PIN#:04111-0260 (LT)
Legal Description	Part Lot 40, Concession A (of) as in CR231415, CR259616 Except Part 1 on N287620; Ottawa/Nepean
Dimensions	Irregular shape, being between approximately 32.1 m wide (east-west) by approximately 38.8 m (north-south). The general Site configuration is shown on the Site Plan in Figure 2 . For the purposes of this report, Laurier Ave will be inferred as running in an east-west direction.
Area	Approximately 1,229.2 m ² or 0.30 acres.
Zoning	Residential R5Q [2683] S 429
601 & 603 Laurier Avenue West:	
Location/Address	601 & 603 Laurier Avenue West: The location of the Site is presented in the included Figure 1 .
Property Identification Number (PIN)	PIN#:04111-0261 (LT)
Legal Description	Part Lot 40, Concession A (of) as in NS85937; Ottawa/Nepean
Dimensions	Triangular shape, being between approximately 74.1 m wide (east-west) and 40.3 m deep (north-south). The general Site configuration is shown on the Site Plan in Figure 2 . For the purposes of this report, Laurier Ave will be inferred as running in an east-west direction.
Area	Approximately 1,604.9 m ² or 0.40 acres.
Zoning	Residential R4UD

All Properties ('Site'):	
Frontage / Access to Phase One ESA Property	Laurier Avenue W along the southern extent of the Site.
Occupancy	Residential
Current Land Use	Residential The Phase One ESA properties are currently occupied with multi-unit residential buildings. The Site was historically occupied with residential tenants from the development in at least the early 1900's (1901) through to the present (August 2024).
Proposed Land Use	Residential More specifically, a 28-storey residential building, including 331 units.
Phase One ESA Property Owner	Heritage Investments Ltd. has owned 593 Laurier Ave W since October of 2023. Dalhousie Non-profit Housing Co-operative Inc. has owned 601/603 Laurier Ave W since May 1980.
Phase One ESA Property Contact	Dean Michaud, Heritage Investments Ltd. Phone: 6134022855 Email: dean@henryinvestments.ca Address: 1010 Polytek Street, Unit 5, Ottawa, Ontario K1J 9H9

LRL Associates Ltd. was retained by the proposed property developer owner to complete the Phase One ESA.

2 SCOPE OF INVESTIGATION

The Phase One ESA scope of the investigation is generally summarized in the following **Table 3**:

Table 3: Phase One ESA Scope of Investigation

Parameter	Information
Regulation/Guideline used as part of the Phase One ESA	The Phase One ESA was carried out in general accordance with the following regulations and guidelines: <ul style="list-style-type: none"> • Canadian Standards Association (CSA) Phase One Environmental Site Assessment, Z768 01 (R2016); • Guidance on Sampling and Analytical Methods for Use at Contaminated Sites in Ontario, Ontario Ministry of the Environment and Energy, December 1996; and • Parts I through VI of Schedule D of O. Reg. 153/04, as amended, made under the Environmental Protection Act (R.S.O. 1990, Chapter E.19).
Records Review	The Phase One ESA study area included a minimum radius from the Site boundaries of 300 m. Extending the study area beyond that of 300 m radius was dependent on the Record of Site Condition being required for this Phase One ESA.

	<p>The records which were reviewed and interpreted as part of the assessment, for the Phase One ESA property, and the Phase One ESA study area, included: Chain of Title Search; Fire Insurance Plans; Aerial Photographs including historical and current imagery; Topographical, Physiography, and Geological Maps; Previous Investigation reports for the Phase One ESA property, including Phase One ESAs, Phase Two ESA, or Geotechnical Reports; Well Head Protection Areas, Areas of Natural and Scientific Interest (ANSI) as maintained by the Ontario Ministry of Natural Resources; Water Well Information Systems; Permits to Take Water; Waste Disposal sites; Waste Generators & Receiver Information (Ontario Regulation 347); Private & Retail Fuel Storage Tanks (TSSA); Coal Gasification Plants and Coal Tar and Related Tar Industries, Certificates of Approval; Environmental Compliance Reports; Orders; Spills; Notices; Offences or Inspection Reports by the Ontario Ministry of the Environment, Conservation and Parks (MECP); Inventory of PCB Storage Sites; RSC on adjoining property; Certificates of Property Use; National Pollution Release Inventory (NPRI);q National PCB Inventory; and all other available illustrated atlases, land registry records and government records.</p> <p>A Freedom of Information (FOI) request was made to the MECP, as well as to the City of Ottawa, for a record search in relation to reportable spills, orders, and convictions associated with the Phase One Property.</p> <p>A Historical Land Use Inventory (HLUI) request was made to the City of Ottawa as part of this Phase One ESA.</p> <p>EcoLog Environmental Risk Information Service (ERIS) was obtained to complete searches in all available environmental databases, including but not limited to the following:</p> <ul style="list-style-type: none"> • National Pollutant Release Inventory (NPRI); PCB information; • Environmental Approvals, permits and certificates; • Inventory of coal gas plants; Records concerning environmental incidents; • Waste management records, including Ontario Regulation 347 Waste Generators; • Fuel storage tanks information, including Technical Standards and Safety Authority (TSSA) database; • Landfill information; and • Records of Site Condition
Interview	Interview current and previous owners and/or tenants as well as local and provincial authorities who have knowledge of the Phase One ESA property.
Site Reconnaissance	<p>The Site reconnaissance consisted of a walk-through of the Phase One Property, including a visual inspection of the current land use for the purpose of validating the current and past land uses of Phase One Property, which will be identified by historical searches.</p> <p>The observations of the Phase One ESA property and those of the Phase One Study Area were used to further identify the potential presence of staining or distressed vegetation, which may be an indication of a possible environmental concern.</p>

Records and Observations Evaluation	The information gathered from the records review, interview, and Site reconnaissance were reviewed and evaluated for any Potentially Contaminating Activities (PCAs) and any Areas of Potential Environmental Concerns (APECs).
Reporting	Preparation of a Phase One ESA Report, which includes and summarizes the findings of the assessment, records evaluation, and provides recommendations for further investigation (if necessary).

This report will present the results of the ESA carried out between July 18th and August 15th, 2024.

3 RECORDS REVIEW

3.1.1 First Developed Use Determination

First developed use is defined by O. Reg. 153/04 Section 22 (1) as the first property use after 1875 that resulted in a building or structure or the first potentially contaminating activity, whichever is earlier. The first development use was established from a review of available Aerial Photographs (Section 3.6.1 for further detail) and the City Directory (Section 3.2 for further detail) in addition to observations made at the time of the Site Reconnaissance.

The Site has been developed since at least the early 1900's (1901). From the time of the property development through until present day (August 2024), the Phase One ESA property was occupied with residential tenants.

Records retrieved and as outlined in later sections within this report confirm the residential use.

3.1.2 Fire Insurance Plans

Fire Insurance Plans (FIP) mapped streets and buildings of urban Canada in great detail and illustrated building construction, occupancy and potential fire hazards. They also provide detailed information regarding storage tanks, transformers, boilers, and electrical rooms. The original plans were produced between 1875 and 1923 and continued to be produced and updated until production ceased in 1974.

A copy of the Fire Insurance Plans is included in **Appendix A**.

Year:	1878
Description of area covered:	Between north of the existing Wellington Street to the north, Lisgar Street to the south, Salley Road (now Lyon Street) to the east and Booth Street to the west.
Lot & address number:	The Site is not shown in the FIP. Laurier Avenue was Maria Street at the time of this survey.
Description of Features in the Phase One Property:	No scale was visible on the plans reviewed. The Site was not shown in the FIP. The land use in the study area is primarily residential with some commercial developments in proximity to the Site.
Relevant information regarding potentially contaminating activity and area of potential environmental concern:	
<ul style="list-style-type: none"> At the west end of Sparks Street and Wellington Street, when they used to intersect, was the Alexander Fleck Foundry, heated with steam and lit with oil. The building had a machine shop and a moulding shop. The foundry was located approximately 300 m north of the Site (down-gradient). Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern. At the west end of Queen Street and Albert Street, was a stone foundry. Located approximately 180 m north of the Site (down-gradient). Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern. 	

Year:	1901
Description of area covered:	Between north of Wellington Street to the north, Somerset to the south, Lyon Street to the east and Booth Street to the west.
Lot & address number:	The Site is identified as 593 and 601 Maria Street (now 593 Laurier Avenue).
Description of Features in the Phase One Property:	The scale is approximately 1 inch: 50 ft. Two (2) structures are located on the Site at the approximate location of the Site buildings. They appear to be residential. It is not known if these are the existing Site buildings. The land use in the study area is primarily residential with some commercial and institutional (i.e. school) developments identified on the lands in proximity to the Site.

Relevant information regarding potentially contaminating activity and area of potential environmental concern:

- The Alexander Fleck Foundry is still present from the 1878 FIP, however, it is now the Stewart and Fleck Foundry. The foundry expanded, but many of the building descriptions are illegible besides a livery and a boiler room. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern.
- Two (2) cordwood yards are present at this time. One (1) located approximately 130 m northeast from the Site (down-gradient), between Slater Street and Maria Street (now Laurier Avenue). One (1) located approximately 120 m north of the Site (down-gradient), along Commissioners Lane. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the cordwood yards do not present a potential risk for environmental concern.
- Chaudiere Machine & Foundry Co was located approximately 280 m northwest of the Site (down-gradient), presently located at the northeast corner of Lett and Fleet Street. The company consists of a machine shop, moulding shop, pattern shop, smith, and an office. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern.
- Canadian Atlantic Railway was located approximately 225 m northwest of the Site (down-gradient), presently located in between the Lett Street and the pumping station. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the railway does not present a potential risk for environmental concern.
- J.R. Booth Yard was located approximately 200 m north of the Site (down-gradient). The yard was used for lumber transportation. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the wood storage yard does not present a potential risk for environmental concern.
- Water Works Pump House located approximately 170 m northwest of the Site (down-gradient) where the present pump house remains. The pump house also had an associated yard used for equipment and materials required to keep the pump house in use. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the pump house, and associated equipment and materials do not present a potential risk for environmental concern.
- House of Mercy, Maternity Hospital, located approximately 100 m south of the Site (up-gradient), just off Cambridge Street. The presence of a hospital on its own is not considered a potential contaminating activity, therefore this record does not present a potential risk for environmental concern. However, select activities and equipment, as discussed in subsequent sections of this report may be considered a potential risk.

Year:	1912/1915
Description of area covered:	Between north of Wellington Street to the north, east to Lyon Street, west to Booth Street and south to Lisgar Street.
Lot & address number:	The Site is identified as 593 Laurier Avenue West. The previous 601 Laurier Avenue structure has since been demolished
Description of Features in the Phase I Property:	The scale is approximately 1 inch: 50 ft. A structure is located on the Site at the approximate location of the Site building. It appears to be residential and has expanded since the previous FIP. It is not known if this is the existing Site building. The land use in the study area is primarily residential with some commercial, institutional and industrial developments identified on the lands in proximity to the Site.

Relevant information regarding potentially contaminating activity and area of potential environmental concern:

- The Alexander Fleck Foundry is still present from the 1878 FIP, however, it is now the Vulcan Iron Works, Fleck Ltd. The foundry expanded, including two (2) machine shops, two (2) moulding shops, a smith, an office and storage. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern.
- Boiler Works, P.J. Powers Co, approximately 300 m north of the Site (down-gradient), located in between Sparks and Wellington Street. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the boiler works activities do not present a potential risk for environmental concern.
- A lumber yard from the 1901 FIP is still present, now lumber piles ranging from 6 to 15 ft high for Ottawa Electric Co. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, it does not present a potential risk for environmental concern.
- Canadian Atlantic Railway is still present from the 1901 FIP. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the railway does not present a potential risk for environmental concern.
- Chaudiere Machine & Foundry Co is still present from the 1901 FIP. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern.
- J.R. Booth yard is still present from the 1901 FIP. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the wood yard does not present a potential risk for environmental concern.
- Water Works Pump House is also still present from the 1901 FIP. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the water works pump house, and associated materials and equipment does not present a potential risk for environmental concern.
- A broom factory was located approximately 100 m northwest of the Site (down-gradient), between Wellington and Albert Street. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the manufacturing operations do not present a potential risk for environmental concern.
- House of Mercy, Maternity Hospital, located approximately 100 m south of the Site (up-gradient), just off Cambridge Street. The presence of a hospital on its own is not considered a potential contaminating activity, therefore this record does not present a potential risk for environmental concern. However, select activities and equipment, as discussed in subsequent sections of this report may be considered a potential risk.

Year:	1922
Description of area covered:	Between north of Wellington Street to the north, east to Lyon Street, west to Booth Street and south to Lisgar Street.
Lot & address number:	The Site is identified as 593 Laurier Avenue West.
Description of Features in the Phase I Property:	The scale is approximately 1 inch: 50 ft. A structure is located on the Site at the approximate location of the Site building. It appears to be residential. It is not known if this is the existing Site building. The land use in the study area is primarily residential with some commercial, institutional and industrial developments identified on the lands in proximity to the Site.

Relevant information regarding potentially contaminating activity and area of potential environmental concern:

- The Vulcan Iron Works, Fleck Ltd. is still present from the 1915 FIP. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the former foundry does not present a potential risk for environmental concern.
- Boiler Works, P.J. Powers Co. is still present from the 1915 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- A lumber yard from the 1901 FIP is still present, for Ottawa Electric Co. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- Chaudiere Machine & Foundry Co is still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- J.R. Booth yard is still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- Canadian Atlantic Railway (now Grand Trunk Railway) is still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- Water Works Pump House is also still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- McAuliffe Davis Lumber Co Limited is located approximately 260 m northwest of the Site (down-gradient), presently located at the northeast corner of Lett and Fleet Street. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- City Iron & Bottle Co. located approximately 160 m northwest of the Site (down-gradient), consists of a machine shop, storage, stock/junk piles and a warehouse. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- Oxy-Acetylene Welding located approximately 165 m northwest of the Site (down-gradient). Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the welding operation does not present a potential risk for environmental concern.
- House of Mercy, Maternity Hospital, located approximately 100 m south of the Site (up-gradient), just off Cambridge Street. The presence of a hospital on its own is not considered a potential contaminating activity, therefore this record does not present a potential risk for environmental concern. However, select activities and equipment, as discussed in subsequent sections of this report may be considered a potential risk.

Year:	1948
Description of area covered:	Between north of Wellington Street to the north, south to Christie Street, west to Booth Street and east to Bay Street.
Lot & address number:	The Site is identified as 593 Laurier Avenue West.
Description of Features in the Phase I Property:	The scale is approximately 1 inch: 50 ft. A structure is located on the Site at the approximate location of the Site building. The building is labelled as apartments. It is not known if this is the existing Site building. The land use in the study area is primarily residential with some commercial, institutional and industrial developments identified on the lands in proximity to the Site.

Relevant information regarding potentially contaminating activity and area of potential environmental concern:

- Water Works Pump House is also still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- RCMP Garage, located approximately 260 m northwest of the Site (down-gradient), includes two (2) garages and an office/warehouse. Due to the down-gradient location from the Site with respect to the inferred north/northwesterly groundwater flow direction, the garages do not present a potential risk for environmental concern.
- Gasoline Service Station located approximately 165 m west of the Site (down-gradient). Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- The Vulcan Iron Works, Fleck Ltd. is still present from the 1915 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- Canadian Atlantic Railway (now Canadian National Railway) is still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- Castings of Ottawa Ltd. (metal castings) located approximately 140 m northeast of the Site (down-gradient), consists of a moulding shop, furnace room, office and storage. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- An automotive repair garage is identified approximately 300 m north of the Site and is equipped with two (2) underground storage tanks and gasoline service station. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- An automotive repair garage is identified approximately 100 m east of the Site, following Bronson Avenue, and is equipped with an underground storage tank. Due to the trans-gradient location from the Site, it does not present a potential risk for environmental concern.
- Two (2) underground storage tanks are identified approximately 250 m east of the Site at an apartment complex located at the southeast corner of the intersection of Slater Street and Bay Street. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.
- House of Mercy, Maternity Hospital, located approximately 100 m south of the Site (up-gradient), just off Cambridge Street. The presence of a hospital on its own is not considered a potential contaminating activity, therefore this record does not present a potential risk for environmental concern. However, select activities and equipment, as discussed in subsequent sections of this report may be considered a potential risk.

Year:	1963
Description of area covered:	Between north of Albert Street to the north, Lyon Street to the east, Booth Street to the west and south to Cooper Street.
Lot & address number:	The Site is identified as 593, 601 and 603 Laurier Avenue West.
Description of Features in the Phase I Property:	The scale is approximately 1 inch: 100 ft. Three (3) structures are located on the Site at the approximate locations of the Site buildings. The buildings are all labelled as apartments. It is not known if this is the existing Site building, however, obtains a similar footprint to modern day. The land use in the study area is primarily residential with some commercial, institutional and industrial developments identified on the lands in proximity to the Site.
Relevant information regarding potentially contaminating activity and area of potential environmental concern:	
<ul style="list-style-type: none"> • Water Works Pump House is also still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern. • Gasoline Service Station located approximately 165 m west of the Site (down-gradient), equipped with three (3) underground storage tanks. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern. • Canadian Atlantic Railway (now Canadian National Railway) is still present from the 1901 FIP. Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern.. • The Vulcan Iron Works, Fleck Ltd. is still present from the 1915 FIP (original from 1878 FIP). Due to the down-gradient location from the Site, it does not present a potential risk for environmental concern. • The automotive repair garage approximately 100 m east of the Site, following Bronson Avenue, is still present from the 1948 FIP. Due to the trans-gradient location from the Site, it does not present a potential risk for environmental concern. • The two (2) underground storage tanks approximately 250 m east (trans-gradient) of the Site at an apartment complex located at the southeast corner of the intersection of Slater Street and Bay Street are still present from the 1948 FIP. Due to the trans-gradient location from the Site, the presence of the underground storage tanks do not present a potential risk for environmental concern. • St Vincent Hospital (from 1901 FIP) located approximately 100 m south of the Site (up-gradient). The presence of a hospital on its own is not considered a potential contaminating activity, therefore this record does not present a potential risk for environmental concern. However, select activities and equipment, as discussed in subsequent sections of this report may be considered a potential risk.

3.1.3 Property Underwriters' Report

Property Underwriters Site Plans and Reports provide detailed information on a site-specific basis and include descriptions of building construction, heating sources, production processes, and the presence of chemicals or materials which may be stored on Site. They also indicate the presence of environmental hazards such as electrical rooms, transformers, boilers, and storage tanks. No property underwriters' reports or inspection reports were found for any of the Site addresses.

3.2 Chain of Title

Land Titles contain legal title information concerning property ownership, transfer details, and any encumbrances such as mortgages or easements. Each time a new transaction occurs, property records are updated as soon as the instrument is registered. Schedule D of O. Reg. 153/04, as amended, specifies that the Chain of Title search should include all titles to date, dating back to Crown land. As this Phase One ESA is not required for an RSC, the Chain of Title search was completed back 50 years, and a search of the property was completed using the Canadian County Atlas Digital Project to access ownership information from the late 1870's.

The search of the Service Ontario Land Registry Office was completed by ERIS on July 31, 2024. A copy of the Chain of Title is included in **Appendix B**, and a summary of the pertinent information retrieved is summarized below in **Table 4**.

Table 4: Chain of Title

Property	Date	Party From	Party To
593 Laurier Avenue W PIN#: 04111-0260 (LT)	01/01/1879	The City of Ottawa	--

3.3 Previous Reports

Three (3) previous environmental reports, and one (1) geotechnical report are available for the Subject property. More specially, for 593 Laurier Avenue West, Ottawa. A summary of each report is included in the following sections.

3.3.1 Phase I Environmental Site Assessment,

A Phase I Environmental Site Assessment, for 593 Laurier Avenue West, Ottawa, Ontario, was prepared by LRL Associates, dated July 15, 2019 (Revised September 4, 2020). The assessment was conducted in the context of obtaining a City of Ottawa Site plan approval for proposed development. The Phase I ESA was conducted in general accordance with Ontario Regulation (O. Reg.) 153/04 CSA Standard Z768-01, R2016, and City of Ottawa Guide to Preparing Studies and Plans, all as amended, in support of a City of Ottawa site plan approval application.

The report indicated that the site in question was irregularly shaped with an approximate area of 1,230 m² (0.3 acres). It is developed with a three-story residence constructed circa 1908. The residence has a footprint of approximately 335 m². The building is serviced with municipal water and sanitary services and is heated with natural gas.

According to aerial photographs reviewed, the site appeared to have been developed in at least 1928 and what appears to be a fence or a wall like structure makes up the eastern and northeastern extents of the Site. The general area is developed with minor land use changes over the years, with the exception of the lands approximately 100 m northwest of the Site which have been cleared in 1965 of what appeared to be residences in the 1928 photograph. The lands within 250 m appear to have generally been used for residential and commercial purposes. The activities on the Site and lands within the 250 m study area are predominantly residential.

The nearest open water body identified is the Ottawa River, located approximately 550 m north of the Site. The general surrounding area including the Site has a significant slope north-northwest towards the Ottawa River with elevations dropping from 80 m above mean sea level (amsl) at the Site to 50 m amsl at the river. The inferred groundwater flow direction in the general area would be north-northwest towards the Ottawa River. Geological mapping describes the overburden as till with a local relief less than 5 m and the bedrock as dark grey limestone with some shaly partings and some sandstone.

Based on the results of the Phase I Environmental Site Assessment the following potential contaminating activities were identified:

- The former heating oil storage tank, historically located in the basement of the building on the site;
- The presence of an unknown trap door on the floor of the garage;
- A former foundry located approximately 20 m east of the subject property; and
- The presence of a reported spill along Bronson Avenue (east of the site), although the exact location was not confirmed.

Based on the findings of the Phase I ESA, the potential environmental risk to the site associated with the present and former uses of the site and properties within the 250 m study area were considered moderate to high. A Phase II ESA was recommended to determine potential impacts from the environmental concerns identified.

Furthermore, due to the estimated age of the building (1908), the presence of asbestos containing material (ACM) is possible. There is potential that other designated substances including silica containing materials such as brick and concrete, leaded solder and lead-based paint are also present. If renovation or demolition activities are to occur on the building, a Designated Substances Survey (DSS) was also recommended to identify potential designated substances and other hazardous materials so they can be addressed accordingly to ensure that the contractors or building occupants do not come into contact with these materials.

3.3.2 Phase II Environmental Site Assessment

A Phase II Environmental Site Assessment was completed at 593 Laurier Avenue West, Ottawa, Ontario, by LRL Associates, dated November 7, 2019 (Revised September 4, 2020). The purpose of a Phase II ESA was to determine if recognized potential environmental concerns identified in the previous Phase I ESA (discussed above in Section 3.3.1) have negatively impacted the quality of soil and groundwater of the subject site.

The assessment focused on potential contaminating activities (PCAs) identified in the Phase I ESA, including a former heating oil tank in the basement, a trap door in the garage, a nearby foundry, and a spill on Bronson Avenue. Contaminants of concern included Petroleum Hydrocarbons, Volatile Organic Compounds, Polycyclic Aromatic Hydrocarbons and Metals including mercury and hexavalent chromium.

The investigation involved advancing two (2) boreholes across the site at strategic locations based on potential areas of environmental concern. The two (2) boreholes were completed as monitoring wells to assess the Site's hydrogeological conditions and facilitate groundwater sampling. The advancement of boreholes was attempted in the basement beneath the former oil tank and in the gravel pit beneath the garage, however bedrock was encountered directly beneath the concrete slab and the gravel. The subsurface soil conditions in the area investigated on the Site generally consist of topsoil over fill. Limestone with shaly partings was encountered from depths of 0.50 and 1.65 m below ground surface (bgs) to 7.75 and 9.30 m bgs where the boreholes were terminated.

Groundwater contours could not be established due to the lack of data points. The general surrounding area including the Site has a significant slope north-northwest towards the Ottawa River with elevations dropping from 80 m amsl at the Site to 50 m amsl at the river. Although only two (2) groundwater monitoring wells were installed, it was inferred that the groundwater flow direction will be strongly influenced by the steep topography and presence of the Ottawa River.

Based on the topography the inferred groundwater flow direction in the general area is inferred to be to the north-northwest towards the Ottawa River.

No olfactory or visual (i.e. staining or free phase) evidence of petroleum hydrocarbon impacts were observed in any of the soil samples collected. Observations were confirmed through combustible soil vapour concentrations measured. These concentrations ranged between non-detect (<0.1 ppm) and 0.2 ppm. In the monitoring wells, headspace volatile organic compounds levels were 1.2 and 3.9 ppm in MW19-1 and 0.6 and 3.1 ppm in MW19-2, on October 17, 2019 and August 10, 2020, respectively. No olfactory or visual (i.e. sheen or free phase) evidence of petroleum hydrocarbon impacts were observed in the groundwater.

Select soil and groundwater samples were submitted for analysis to establish if the potential environmental concerns have negatively impacted the soil and groundwater conditions. The rationale for selection of soil and groundwater samples submitted for analysis was based on the results of the sample field screening, visual/olfactory observations and/or proximity to the water table.

The analytical results revealed that volatile organic parameters analysed were not detected in the soil samples submitted for analysis. Petroleum Hydrocarbon Fractions F3 and F4 were detected in BH19-1 and BH19-2; however, levels are below the applicable Ontario Regulation 153/04 (as amended) Table 7 site condition standard. Select metals parameters exceeded the applicable Table 7 site condition standards in BH19-1 and BH19-2 as follows:

- Barium was detected in BH19-2 at 397 µg/g, above the SCS of 390 µg/g;
- Cadmium was detected in BH19-2 at 1.7 µg/g, above the SCS of 1.2 µg/g;
- Lead was detected in BH19-1 (172 µg/g) and BH19-2 (842 µg/g), above the SCS of 120 µg/g;
- Mercury was detected in BH19-1 (0.3 µg/g) and BH19-2 (2.1 µg/g), above the SCS of 0.27 µg/g; and
- Zinc was detected in BH19-2 at 1020 µg/g above the SCS of 340 µg/g.

Volatile Organic Compounds and Petroleum Hydrocarbon parameters were not detected in the groundwater samples collected on October 17, 2019 with the exception of chloroform. Chloroform was detected in MW19-1 and MW19-2 at concentrations of 17.5 µg/L and 13.0 µg/L, respectively, above the Table 7 site condition standard of 2 µg/L. The presence of chloroform detected was rationalized as being due to the use of chlorinated municipal water used during coring. Select metal and Polycyclic Aromatic Hydrocarbons parameters were detected, however levels are below the applicable site condition standards. Due to a limited amount of water submitted from MW19-1, the laboratory method detection limit for PHC F2 was raised to 196 µg/L which is above the applicable site condition standards of 150 µg/L. Therefore, it could not be determined whether the sample meets the applicable site condition standards for Petroleum Hydrocarbon Fraction F2.

Additional groundwater monitoring was conducted on August 4, 2020, to confirm the chloroform exceedances and elevated detection limit of Petroleum Hydrocarbon Fraction F2 in the results of the October 17, 2019, groundwater samples. The concentrations of Petroleum Hydrocarbon Fraction F1 through F4 and Volatile Organic Compounds, including chloroform, were below the laboratory detection limits in the additional samples, and the detection limits were below the applicable Table 7 site condition standards. The non-detections of chloroform in the additional groundwater samples were reported to likely be caused by the use of chlorinated municipal water during coring.

The horizontal extent of the metals impacts in the soil was delineated. It was recommended that the horizontal extent of the soil contamination be delineated and remediated.

It is recommended that if groundwater monitoring wells are not required for future monitoring purposes, they should be decommissioned in accordance with O. Reg. 903.

3.3.3 Contamination Delineation

A Contamination Delineation program was completed for 593 Laurier Avenue West, Ottawa, Ontario, prepared by LRL Associates, dated November 8, 2019. The assessment was conducted to address the extents of the previously encountered elevated metal-based parameter contamination encountered at the northeastern and southeastern portion of the subject property. These exceedances were identified at the time of the Phase II Environmental Site Assessment, as discussed above in Section 3.3.2.

The contamination delineation was conducted on October 31, 2019, and consisted of the advancement of sixteen (16) manual auger holes (AH19-1 through AH19-16) at distances of approximately 3.0 m and 6.0 m from the previously advanced boreholes completed as part of the Phase II Environmental Site Assessment. The auger holes were advanced to depths between 0.2 m and 0.7 m bgs where refusal was encountered over inferred dense fill or bedrock. Representative soil samples collected during the investigation from approximately 3.0 m from the Phase II ESA boreholes were submitted for metals analysis including mercury.

Lead and/or mercury concentrations exceeded the applicable standards in all nine (9) samples submitted. Seven (7) of the samples submitted exceeded the standard for lead (120 µg/g) with levels between 129 µg/g and 532 µg/g. Six (6) of nine (9) the samples submitted exceeded the standard for mercury (0.27 µg/g) with levels between 0.3 µg/g and 1.6 µg/g and the detection limits in the remaining three (3) samples were (1.0 µg/g), above the standard of 0.27 µg/g. The exceedances were found at depths ranging between surface and 0.5 m bgs.

The report concluded that the soil contamination encountered onsite presents a low risk to the building occupants if left undisturbed. It was recommended that tenants be notified not to dig, and not to allow dogs to dig, in the yard. It was further recommended that the soil contamination be remediated at the time of site development. The vertical extent of contamination was anticipated to be from surface to bedrock, encountered at depths between 0.5 m and 1.65 m bgs. The horizontal extent of contamination was not delineated; however, it was indicated that it was anticipated to extend across the majority of the subject property.

3.3.4 Geotechnical Investigation

LRL was retained by the Alexander Fleck House Inc., to complete a Geotechnical Investigation for the property located at 593 Laurier Avenue West in Ottawa, Ontario. The details of the investigation are presented in the report entitled Geotechnical Investigation, Proposed Mid-Rise Apartments – Revision 4, 593 Laurier Avenue West, Ottawa, Ontario, prepared by LRL and dated June 2019, Revised May 2022.

The purpose of the investigation was to identify the subsurface conditions across the site by the completion of a borehole drilling program. The fieldwork for this investigation was carried out on May 17, 2019. A total of five (5) boreholes, were drilled across the property, where possible to do so, to get a general representation of the site's subsurface conditions. The boreholes were advanced using a track mount CME 75 drill rig equipped with 200 mm diameter continuous flight hollow stem auger.

Sampling of the overburden materials encountered in the boreholes was carried out at regular depth intervals using a 50.8 mm diameter drive open conventional spoon sampler in conjunction with standard penetration testing (SPT) “N” values. The SPT were conducted following the method ASTM D1586 and the results of SPT, in terms of the number of blows per 0.3 m of split-spoon sampler penetration after first 0.15 m designated as “N” value. All boreholes were advanced until practical auger refusal over inferred bedrock, four (4) of the boreholes consisted of HQ-size (Ø63.5mm) rock coring. The boreholes were terminated at depths ranging from 2.3 to 6.7 m below ground surface (bgs).

The subsurface conditions encountered in the boreholes were classified based on visual and tactile examination of the materials recovered from the boreholes. Topsoil of thickness ranging from 150 to 760 mm was found at the surface at select boring locations and was generally described as being sandy with black organics. Generally, underlying the topsoil was fill which was described as a heterogeneous mixture of sand-silt-clay, mixed with some black organics, moist, and dark brown in colour. The fill material encountered extended to depths ranging from 0.6 – 1.6 m bgs. Bedrock was identified at shallow depths of between 0.3 and 1.6 m bgs. The Rock Quality Designation values, expressed as a percent, ranged from 20 to 95%, which was identified as indicating the rock was very poor to excellent quality. The bedrock formation in this area can be described as consisting of limestone, with shaly partings, and grey to dark grey.

Groundwater was monitored during the field investigation. No water was encountered within the overburden during the borehole drilling, and no long-term groundwater monitoring was carried out. Groundwater was measured on October 16, 2019, in two (2) available monitoring wells, and the groundwater was found to be at 5.04 and 3.21 m bgs.

3.4 City Directories

City directories have been produced for most urban and some rural areas since the late 1800s. These directories are often archived in research and municipal libraries. The directories are generally not comprehensive and may contain gaps in time periods. Where available, city directories were reviewed in a minimum five-year increment to determine historical property use of the subject and adjoining properties. The City Directories search was completed by ERIS and included a search of the Vernon’s, Polk’s, Might’s and the Ontario Digital Business Directory. Data from 2012 to 2021 does not include residential information.

A copy of the city directory is included in **Appendix C**, and a summary of the findings is included below in **Table 5**:

Table 5: City Directories

Location	Details
Years Searched:	1920 – 2021
Historical Property Uses:	
Subject Site:	<p>593 Laurier Avenue W: RESIDENTIAL (1920-1941); MULTI-TENANT RESIDENTIAL (1945-2007);</p> <p>601 Laurier Avenue W: ADDRESS NOT LISTED (1920-1950); MULTI-TENANT RESIDENTIAL (1955-2007);</p> <p>603 Laurier Avenue W: ADDRESS NOT LISTED (1920-1945); MULTI-TENANT RESIDENTIAL (1950-2007);</p>
Adjacent Land:	<p>The remaining adjacent lands were either listed as residential (single occupant, multi-tenant or apartments) or the address was reported as not listed with the following exceptions:</p> <p>548 Albert St: HOWE JAS G & SON PAINTERS (1927); HELENE CURTIS SERVICE CENTRE BEAUTY PARLOR EQUIP (1941);</p> <p>71 Bronson Avenue: INCORPORATED SYNOD OF THE DIOCESE OF OTTAWA OFFICES (1967);</p> <p>81 Bronson Avenue: BRONSON HOME FOR PROTESTANT AGED WOMEN (1967);</p> <p>100 Bronson Avenue: NATIONAL DENTAL EXAMINING BD OF CANADA (1982) and EMBASSY OR JORDAN (1982-1987); CANADIAN PETROLEUM ASSOCIATION (1987) and ROCKWELL INTERNATIONAL OF CANADA (1987) and INNER PEACE MOVEMENT OF CANADA (1987-1994);</p> <p>176 Bronson Avenue: ROYAL CANADIAN MOUNTED POLICE BARRACKS (1950); SISTER OF ST VINCENT HOSPITAL (1955); BEL-AIR NURSING HOME (1964); RETROSPECTORS BLACK CAT CHIMNEY SWEEPS (1982); CALDWELL & ASSOCIATES REALTY LIMITED (1987); POLLACK PERSONNEL/GROUP (1994-2000) and ASSOCIATED REHABILITATION (1994); WHITHAM SCHOOL FOR THE PERFORMING ARTS (1997); INFORMETRICA (2007);</p> <p>190 Bronson Avenue: OVERSTREET C P (1976); SALON BRONSON (1982-1997); ANDREX HOLDINGS LIMITED (1987-1994) and NOLAN LINDS J DESIGNER (1987-1994) and GEORGIAN OAKS INTERNATIONAL FRANCHISING (1987) and TANDEM CONSULTING INC MECHANICAL ENGINEERING CONSULTANTS (1987-1994) and SBRISSA OVIDIO ARCHITECT (1987) and JOB CREATION OF CANADA (1987) and PERMAX INC MGMT CONSULTANTS (1987); ABSOR CONSTRUCTION (1994) and GAGNON EMBURG MANAGEMENT SERV INC (1994) and STAVE & ASSOCIATES (1994-1997) and CANADA RESEARCH INSTITUTE (1994) and DEVON GROUP LTD (1994-1997) and AFRICA INTERMATION (1994) and ALLER & COMPANY (1994) and ANDREWS COMSBERG ASSOC (1994) and KENNEDY & DE GROH CONSULTANTS (1994) NATIONAL CAPITAL ZOOLOGICAL SOCIETY (1994) and PHASE 5 CONSULTING GROUP</p>

(1994); CANADIAN RELIEF FUND FOR CHERNOBYL VICTIMS IN BELARUS (1997) and JUST FOR LUNCH (1997) and MINION SOFTWARE INC (1997);

196 Bronson Avenue: OTTAWA BUILDERS EXEH BLDG (1976) and NATIONAL ANTI-POVERTY ORGANIZATION (1976) and CANADIAN JOHNS-MANVILLE CO BUILDING MATERIALS (1976) and OTTAWA CONSTRUCTION ASSOCIATION (1976-1997) and MECHANICAL CONTRACTORS ASSN TRADE (1976-1997); NORFEST INFORMATION DESIGN (1982) and CANADIAN CHROMALOX COMPANY (1982) and DONN CANADA LTD (1982); OTTAWA VALLEY BID DEPOSITORY (1994-1997) and CANADIAN PRESTRESSED CONCRETE INSTITUTE (1994-1997) and ELECTRA QUOTE & ASSOCIATES (1994);

211 Bronson Avenue: IMMACULATA HIGH SCHOOL (1967);

213 Bronson Avenue: MCPHAIL MEMORIAL BAPTIST CHURCH (1967);

21 Cambridge Street N: ERIC GOODMAN & ASSOCIATES INC (1997)

26 Cambridge Street N: MISERICORDIA GENERAL HOSPITAL (1931); ST VINCENT HOSPITAL FOR INCURABLES (1936-1955);

27 Cambridge Street N: DEPARTMENT OF NURSING ST VINCENT HOSPITAL (1987); ST VINCENT HOSPITAL FOUNDATION (1994);

42 Cambridge Street N: MISERICORDIA MATERNITY HOSPITAL (1920-1927); MISERICORDIA HOME (1931); ST VINCENT HOSPITAL ANNEX (1936-1955);

60 Cambridge Street N: ST VINCENT HOSPITAL (1960-2021); CAN DO CASH (2007-2017); PRIMROSE FAMILY MEDICINE CTR (2012);

64 Cambridge Street N: ST VINCENT HOSPITAL NURSES RESIDENCE (1941-1967) and GRAY NUNS NURSES HOME (1950-1955);

72 Cambridge Street N: ANBER E N FRUIT AND GROCERY (1936); JOES CONFECTIONARY GROCERIES (1976-1987); CAMBRIDGE FOOD MART (1994-2007);

575 Laurier Avenue W: PATTERSON-ALEXANDER GEN CONTRACTORS LTD (1967) and BILLCLIFF LTD REAL ESTATE (1967) and MASON V K CONSTRUCTION LTD (1967) and DOUGLASS & ROSS ARCHITECTS (1967) and STEWART WEIR & CO (1967) and OTTAWA APPLICANCE SERVICE LTD (1967) and MCKEEN D C LTD (1967);

584 Laurier Avenue W: RCMP BARRACKS (1941-1950); ST VINCENT HOSPITAL STAFF HOUSE (1955)

604 Laurier Avenue W: SUNNYHILL NURSERY & KINDERGARTEN (1960-1976); CHILDRENS VILLAGE OF OTTAWA DAYCARE (1987); TUNGASUVVINGAT INUIT COMMUNITY CNTR (1994-2017);

1208 Laurier Avenue W: INUIT NON-PROFIT HOUSING (1997);

Relevant information regarding potentially contaminating activity and areas of potential environmental concern

The activities identified on the Site throughout the available periods documented by the City Directories do not indicate a potential environmental concern.

3.5 Environmental Source Information

As part of the Phase One ESA, a search was completed for available federal, provincial, and private databases. The search covered the Phase One ESA Site, as well as the Phase One Study Area. The information was obtained through the following search providers:

- EcoLog ERIS search provider;
- MECP Water Well Registry;
- MECP Freedom of Information (FOI) Request;
- City of Ottawa FOI, Historical Land Use Inventory (HLUI) Requests and other available related documents; and
- Technical Standards and Safety Authority (TSSA).

A summary of the records retrieved pertaining to the Phase One ESA Study Area, interpreted from the ERIS reports received, is summarized below in **Table 6**. A copy of the report provided is included in **Appendix D**.

Table 6: Summary of ERIS Search Records

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
National Pollutant Release Inventory	0	1	One (1) record that was found is listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located approximately 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.
Certificate of Approval (C of A)	0	13	Thirteen records were found: <ul style="list-style-type: none"> • One (1) record was approximately 70 m south (up-gradient) of the Site in 1994, located at the Bronson Ave and Gloucester St intersection, which was for municipal water. • One (1) record was for The Ottawa Construction Association located approximately 115 m south (up-gradient) of the Site in 2003, at 196 Bronson Ave, which was approved for industrial sewage works.

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
			<ul style="list-style-type: none"> Two (2) records were for Saint Vincent Hospital located approximately 60 m south (up-gradient) of the Site in 1993, at 60 Cambridge Street. They were approved for industrial air and municipal sewage. One (1) record was approximately 50 m north (down-gradient) of the Site in 1999, at the Bronson Ave and Slater St intersection, which was approved for municipal water. One (1) record was approximately 95 m north (down-gradient) of the Site in 1999, at the Commissioner St and Albert St intersection, which was approved for municipal sewage. One (1) record was located approximately 170 m north of the Site (down-gradient) in 2009, at 473 Albert St, which was approved by industrial air. One (1) record was located approximately 230 m northwest of the Site (down-gradient) in 1998, at Pooley's Bridge, which was approved for municipal water. Two (2) records were located approximately 190 m east of the Site (trans-gradient) in 1990, at 500-530 Laurier Ave W, both for industrial air. Three (3) records were located approximately 170 m northwest of the Site (down-gradient) in 2008/2010, at 10 Fleet St, for municipal and private sewage works and industrial air.
Commercial Fuel Oil Tanks (CFOT)	0	4	The four (4) records that were found were listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.
Pesticide Register (PES)	0	0	No record found within 300 m of the Phase One properties.

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
Permit to Take Water (PTTW)	0	5	<p>One (1) record located 300 m north of the Site (down-gradient), received a permit to take water in 2013 for construction purposes.</p> <p>One (1) record was found located at 665 Albert St, approximately 210 m southwest of the Site (trans-gradient). A permit to take water was proposed in 2023 for reasons related to the LeBreton Flats redevelopment.</p> <p>One (1) record was found located at the southeast quadrant of Fleet Street and Lett Street, approximately 300 m northwest of the Site (down-gradient). A permit to take water was received in 2012 for Claridge Homes Inc. for the LeBreton Phase 3 project.</p> <p>Two (2) of the records that were found were listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.</p>
Environmental Activity and Sector Registry (EASR)	0	2	<p>One (1) record was found at 60 Cambridge Street N, approximately 60 m south (up-gradient). In 2019, Bruyere Continuing Care Inc. was registered for air emissions in the Rideau Valley.</p> <p>One (1) record was found approximately 90 m northwest of the Site (down-gradient). In 2022, Aecon Construction Ontario registered for water taking for construction dewatering purposes.</p>
List of Expired Fuels Safety Facilities (EXP)	0	0	No records were found within a 300 m radius from the Site.
Contaminated Sites on Federal Land (FCS)	0	6	All the six (6) records are for the LeBreton Flats, which are located 220 m west and northwest of the Site (down-gradient). Three (3) of the records have been since closed due to remediation strategies. Investigation into the LeBreton Flats contamination

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
			began in 2006, the other three (3) active records are involved in annual monitoring programs.
Federal Identification Registry for Storage Tank Systems (FRST)	0	2	The two (2) records that were found are located at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.
Greenhouse Gas Emissions from Large Facilities (GHG)	0	1	One (1) record was found listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.
TSSA Historic Incidents (HINC)	0	5	<p>One (1) record was found at 79 Cambridge Street N, approximately 265 m south of the Site (up-gradient). An incident occurred in March of 2009 causing a carbon monoxide release into the environment. Due to the type of release (air), there is a low potential for environmental concern.</p> <p>One (1) record was found at 54 Primrose Street, approximately 260 m south of the Site (up-gradient). In October of 2008, 200L of fuel oil was leaked due to equipment failure. Due to the up-gradient location from the Site, there is a potential for environmental concern.</p> <p>One (1) record was found at 210 Bay Street, approximately 240 m northeast of the Site (trans-gradient). An incident occurred in February of 2007 causing a carbon monoxide release into the environment due to equipment and human error. Due to the type of release (air), there is a low potential for environmental concern.</p> <p>One (1) record was found at 42 Empress Avenue, approximately 245 m southwest of the Site (trans-gradient). An incident occurred at an unknown date,</p>

			<p>involving a gaseous fuel leak. Due to the trans-gradient location from the Site, there is a low potential for environmental concern.</p> <p>One (1) record was found listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.</p>
Ontario Regulation 347 Waste Generators Summary (GEN)	1	121	<p>One (1) record was found on the subject properties, 603 Laurier Ave W. In 2022, Dalhousie Non-Profit Housing Co-op registered as a waste generator of light fuels.</p> <p>Eleven records were found for Bronson Place, located at 111-440 Gloucester St, approximately 100 m southeast of the Site (up-gradient).</p> <ul style="list-style-type: none"> • From 2002 to 2005, Bronson Place was a waste generator of PCB's and other specified inorganics. • From 2003 to 2005, Bronson Place was a waste generator of paint, pigments and coating residues. • From 2009 to 2018, Bronson Place was a waste generator of oil skimmings and sludges. <p>Twenty-one records were found for Saint Vincent Hospital, Bruyere Continuing Care, and SCO health Service, all located at 60 Cambridge Street, approximately 60 m south of the Site (up-gradient).</p> <ul style="list-style-type: none"> • From 1986 to 1990, the hospital was a waste generator of pathological wastes. • From 1989 to 1996, the hospital was a waste generator of paint, pigments, coating residues, inorganic lab chemicals, aliphatic solvents, petroleum distillates, and pharmaceuticals.

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
			<ul style="list-style-type: none"> From 1992 to 1996, the hospital was a waste generator of acid waste, alkaline wastes, waste oils and lubricants, organic lab chemicals, photo processing wastes and pathological wastes. From 1997 to 2013, the hospital was a waste generator of inorganic/organic lab chemicals, acid wastes, alkaline wastes, paint, pigments, coating residues, petroleum distillates, heavy fuels, waste oils and lubricants, pharmaceuticals, photo processing wastes, pathological wastes, waste compressed gases, light fuels and aliphatic solvents. From 2014 to 2020, the hospital was a waste generator of acid waste, oil skimmings, sludges, organic/inorganic lab chemicals, petroleum distillates, paint, pigment, coating residues, compressed gases, pathological wastes, heavy fuels, pharmaceuticals, waste oils, lubricants, light fuels, and other specified inorganics. <p>Sixteen records were found for The Bronson Centre, Shepards of Good Hope, Good Day Workshop Programs, and Ottawa R.C. School Board, located at 211 Bronson Ave, approximately 170 m southeast from the Site (up-gradient).</p> <ul style="list-style-type: none"> From 1986 to 1990, the school board was a waste generator of inorganic lab chemicals. From 1992 to 1998, the school board was a waste generator of inorganic and organic lab chemicals. From 2007 to 2012, the workshop was a waste generator of petroleum distillates. From 2013 to 2016, Shepards of Good Hope was a waste generator of organic lab chemicals, aliphatic solvents, alkaline wastes and petroleum distillates.

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA

			<ul style="list-style-type: none"> 506 Commissioner Street located approximately 190 m northwest of the Site (down-gradient) registered one (1) monitoring well in February 2021.
Environmental Condition Reports	--	--	Not included in Phase One ESA ERIS searches.
Areas of Natural Significance	--	--	Not included in Phase One ESA ERIS searches.
Fuel Oil Spills and Leaks (INC)	0	2	<p>One (1) record was found at 91 Cambridge Street N, approximately 270 m south of the Site (up-gradient). A natural gas service pipeline was damaged with a hand shovel. Due to the type of incident (gas release), the potential for environmental concern is low.</p> <p>One (1) record that was found was listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.</p>
TSSA Pipeline Incidences (PINC)	0	6	Six (6) records were found within a 300 m radius of the Site. All of which were either for a natural gas pipeline break or the record does not specify the kind of pipe that was hit. The releases of natural gas are not a concern to the environmental conditions of the Site due to the matrix of the product released and general attributes.
Fuel Storage Tanks (FST)	0	0	No records were found within a 300 m radius from the Site.
Fuel Storage Tank – Historic (FSTH)	0	2	The two (2) records that were found were listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
Environmental Compliance Approval (ECA)	2	12	<p>Two (2) records were found on one of the subject properties. Both were for the Alexander Fleck House located at 593 Laurier Ave W. The records are from 2023, and both are approved for municipal and private sewage works.</p> <p>One (1) record was found for 192 Bronson Ave which is located 115 m south (up-gradient) from the Site. In 2019, an ECA for municipal and private sewage works was approved.</p> <p>One (1) record was found for The Ottawa Construction Association, which is located at 196 Bronson Ave, approximately 115 m south of the Site. In 2003, an ECA for industrial sewage works was approved.</p> <p>Three (3) records were found for 473 Albert St, approximately 170 m north of the Site (down-gradient). In 2009, there was an approval for an ECA for air emissions. In 2021, a record of site condition (RSC) was conducted. Also in 2021, an ECA for municipal and private sewage works was approved.</p> <p>Four (4) records were found for the Fleet Street Pumping Station located at 10 Fleet St, approximately 170 m northwest of the Site. In 2005, an ECA for municipal drinking water systems was approved. In 2008, an ECA for air emissions and municipal and private sewage works were approved. In 2010, an ECA for municipal and private sewage works was approved.</p> <p>One (1) record for 351-445 Queen St were found approximately 250 m north of the Site (down-gradient). In 2013, an ECA for municipal and private sewage works was approved.</p> <p>One (1) record for Earth Embassy Developments Ltd. Located at 439 Queen St, approximately 270 m north (down-gradient). In 2012, an ECA was approved for municipal and private sewage works.</p>

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
			One (1) record that was found was listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.
Private and Retail Fuel Storage Tanks (PRT)	0	1	One (1) record that was found was listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.
Scott's Manufacturing Directory (SCT)	0	3	<p>Two (2) records were found at 211 Bronson Ave, located approximately 170 m southeast of the Site (up-gradient). Neither of the records have an associated date or timeline in which manufacturing was completed. The records are for a periodic publisher and a civic/social organization. Due to the lack of information available for these records the environmental concern could be low or moderate.</p> <p>One (1) record was found for the Planetary Association located at 100 Bronson Ave located 155 m north of the Site (down-gradient). Established in 1975, registered as periodical/book publishers, environmental consulting services and a social advocacy organization. Due to the down-gradient location of the Site, there is a low potential for environmental concern.</p>
Ontario Spills (SPL)	0	82	<p>Many of the records retrieved were for a material that would not present a risk for environmental concern to the Site (i.e. propane or natural gas releases). These records were not included in the report.</p> <p>Three (3) records were located up-gradient from the Site and have potential environmental impacts to the subject properties. They are summarized as follows:</p> <ul style="list-style-type: none"> In May 2008, one (1) record was listed at the intersection of Bronson Avenue and Nepean

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
			<p>Street, approximately 140 m southeast of the Site. An OC Transpo bus leaked 10 L of antifreeze into the sewer and surrounding area. Due to the chemical attributes of antifreeze, the incident is not considered a potential risk for environmental concern. Antifreeze evaporates rapidly (minutes upon surface contact) and is unlikely a contributor for potential contamination to the Site.</p> <ul style="list-style-type: none"> • In May 2002, one (1) record was listed at 28 Primrose Avenue, approximately 220 m south of the Site. Hydraulic oil from a garbage truck spilled onto to the road. • In October 2008, one (1) record was listed at 54 Primrose Avenue, approximately 250 m south of the Site. An unknown volume of furnace oil leaked into the ground from an underground storage tank. <p>Each of the remaining records were located down- or trans-gradient of the Site, which further considers them as low-risk due to the inferred groundwater flow direction. The remaining records retrieved are summarized as follows:</p> <p>Eleven records are listed at 529 Albert Street, approximately 200 m east of the Site.</p> <ul style="list-style-type: none"> • In December 2013, 200 L of concrete admixture (shotcrete accelerator) was leaked due to pressure loss within the equipment. • In June 2014, 619 L of aluminum sulphate solution leaked from an above ground tank due to operator error. • In August 2014, 5 L of diesel fuel leaked from an above ground tank due to equipment failure. • In October 2014, 5 L of diesel fuel was leaked from an above ground tank due to operator error. • In December 2014, 2 L of petroleum oil leaked from its drum due to operator error.

	Phase One Property	Phase One Study Area	
			<p>Five (5) records were found at the intersection of Wellington Street and Commissioner Street, approximately 300 m north of the Site.</p> <ul style="list-style-type: none"> • In April 2014, 1 L of hydraulic oil was leaked into the ground due to equipment failure. • In July 2015, 10 L of glycol and water solution was leaked due to operator error. • In July 2015, 20 L of hydraulic oil was leaked due to equipment failure. • In August 2015, 3 L of concrete washer to land due to operator error. • In August 2015, 3 L of sediment laden water was leaked due to material failure. <p>Five (5) records were found at 584 Wellington Street, approximately 210 m west of the Site. From 2011 to 2016, five (5) spills occurred in this area, including three (3) spills of concrete wash out, a small (1L) diesel spill, a small (2L) oil spill and 30 L of coolant.</p> <p>One (1) record was reported from the pumping station located at 10 Fleet Street, approximately 180 m northwest of the Site. In 2011, a sheen was reported on the Ottawa River outside of the pumping station.</p> <p>One (1) record was found at 443 Queen St W, approximately 230 m north of the Site. In November 2014, 1400 L of propylene glycol was leaked due to equipment failure.</p> <p>One (1) record was found at 435 Albert Street, approximately 215 m northeast of the Site. In January 2018, 12 L of coolant leaked from a bus due to operator error.</p> <p>Thirty-seven records that were found were listed at 1 Fleet Street, at the heating and cooling plant. ERIS has stated this property is 300 m north of the Site, however, the actual plant is located 700 m north of the Site. Due to the actual distance from the subject properties, the records belonging to this address will not be included in the report.</p>

3.5.1 City of Ottawa

3.5.1.1 City of Ottawa Historical Land Use Inventory (HLUI)

The City of Ottawa was contacted on August 27th, 2024, to obtain available information for the Site and surrounding areas through their Historical Land Use Inventory (HLUI). A formal response was received on October 31, 2024.

The City has identified 65 historical land use inventory area features. The majority of which are found to be located down- or trans-gradient of the Site, and do not present a potential risk for environmental concern. Six (6) addresses included in the historical land use inventory area features are located up-gradient of the Site, and include the following:

- 196 Bronson Avenue, approximately 120 m south of the Site is recorded to have a manufacturing facility in 2012 (Aerodynamics & Associates Testing Services). Additional listing at this address includes the Ottawa Construction Association, described as an Office between 2001 and 2012, and B L Thermal Insulation Ont In, described as Exterior Close in Work, in 2005. Further research into the former manufacturing operation on the property (Aerodynamics & Associates Testing Services) revealed that they are associated with air conditioning equipment, which is not considered a potential contaminating activity, therefore does not present a potential risk for environmental concern;
- 211 Bronson Avenue, approximately 160 m south of the Site is recorded to have operated as various industries between 1912 and 2006. They included:
 - Transport Action Canada, described as other services (except public administration) in at least 2006 and 2012;
 - Centretown Laundry Co-Op, described as a Laundries and Cleaners in 2005;
 - Good Day Workshop, described as an Reupholstery and Furniture Repair facility in at least 2001 through 2012; and
 - Immaculata High School, described as an Elementary and Secondary Education from at least 1012 through 1956.

The former Centretown Laundry Co-op facility in operation in at least 2005, and the Good Day Workshop Reupholstery and Furniture Repair facility which operated from at least 2001 through 2012 are considered a potential risk for environmental concern to the Site;

- 190 Bronson Avenue, approximately 85 m south of the Site, is recorded as Perfection Printers, a Printing facility which operated in at least 1990. **This printing facility presents a potential risk for environmental concern to the Site;**
- 208 Bronson Avenue, approximately 180 m south of the Site, is recorded as Desktop Express Publishing, and Publishing facility in the at least 1990. **This publishing facility presents a potential risk for environmental concern to the Site;**
- 400 Gloucester Street, approximately 90 m southeast of the Site, is recorded as Bronson Place in 2016 with no further details; O'keefe Brewery Co Ltd., described as a Brewers & Bottlers between 1900 and 1950; and
- 60 Cambridge Street, approximately 60 m south of the Site, is reported as the House of Mercy Maternity Hospital, Misericordia Maternity Hospital, Sco Health Service and St Vincent Hospital for Incurables from between 1901 through 2005.

The City has identified 46 historical land use inventory point features. The majority of which are found to be located down- or trans-gradient of the Site, and do not present a potential risk for environmental concern. Three (3) addresses included in the historical land use inventory area features are located up-gradient of the Site, and include the following:

- 196 Bronson Avenue, approximately 120 m south of the Site is recorded as a builders exchange building equipped with an underground petroleum storage tank used for fuel oil. The tank is identified to be located at rear of building on Cambridge Street. The tank was installed in 1960;
- Seven (7) records were received for 60 Cambridge Street (St. Vincent Hospital), approximately 60 m south of the Site. They records include five (5) listings for underground petroleum storage tanks used to store fuel oil and bunker oil, and two (2) records for above ground petroleum storage tanks used to store fuel oil. The tanks were installed between 1952 and 1973; and
- Two (2) records were retrieved for Immaculata High School located at 211 Bronson Avenue, approximately 160 m south of the Site, which included one (1) underground fuel oil tank, and one (1) not-specified fuel oil tank, installed between 1953 and 1961.

Each of the above records of petroleum storage tanks presents a potential risk for environmental concern to the Site.

The City of Ottawa identified an abandoned railway approximate 220 m north of the Site, and generally in the same linear area, an electric railway in operation from between 1870 through 1950. Due to the down-gradient location from the Site, the railways identified do not present a potential risk for environmental concern to the Site.

A former land fill was identified by the City of Ottawa (Unnamed Landfill) west of the intersection of Booth Street and Fleet Street, approximately 350 m northwest of the Site. Additional details related to the types of waste accepted, and dates of operation are not provided. Due to the down-to trans-gradient location from the Site, this former landfill site does not present a potential risk for environmental concern to the Site.

A copy of the City of Ottawa Historical Land Use Inventory results is included in **Appendix K**.

3.5.1.2 1988 Intera Report

Prior to the 2001 amalgamation, the City did not have a consolidated database of environmental concerns for City properties and typically referred all inquiries to the *1988 Mapping and Assessment of Former Industrial Sites, City of Ottawa*, prepared by Intera Technologies Ltd. (1988 Intera Report). This report describes an inventory and assessment study of former industrial sites in the former (prior to the 2001 amalgamation) City of Ottawa from 1850 to 1984 that likely produced or handle hazardous wastes and materials. LRL reviewed a physical copy of the 1988 Intera Report as part of the Phase I ESA desktop assessment for the Site and found eight (8) industrial sites present within 300 m of the Site. The results from the report are as follows:

Location	Period of Operation	Description of Operations	PCAs
542 Wellington Street, approximately 120 m northwest of the Site (down-gradient)	1922 to 1965	Ottawa Brass Manufacturing Co. Small machine shop and brass works making brass and copper products.	Due to the down-gradient location from the Site, the record does not present a potential risk for contamination to the site.
471 Wellington Street, approximately 240 m northwest of the Site (down-gradient)	1922 to 1940	Photogelatine Engraving Co. Ltd. Small operation, with printers, binders, lithographers, and engravers.	Due to the down-gradient location from the Site, the record does not present a potential risk for contamination to the site.
478-482 Maria Street (now Laurier Avenue), approximately 280 m east of the Site (trans-gradient)	Before 1878 to 1901	W.J. Campbell and Sons, Engineering Works Medium size operation, boilermakers	Due to the trans-gradient location from the Site, the record does not present a potential risk for contamination to the site.
422-426 Slater Street, approximately 170 m east of the Site (trans-gradient)	1920's to 1960's	Ottawa Car Manufacturing Ltd. Brass Foundry Medium size operation, brass foundry for car works/workshop	Due to the trans-gradient location from the Site, the record does not present a potential risk for contamination to the site.
200 Bay Street, approximately 250 m northeast of the Site (trans-gradient)	--	Dyeing and Cleaning Works Medium size operation, cleaners and dyers	Due to the trans-gradient location from the Site, the record does not present a potential risk for contamination to the site.
416-428 Wellington Street, approximately 300 m north of the Site (down-gradient)	1865 to 1945	Vulcan Iron Works Large operation, founders and machinists, boilermakers	Due to the down-gradient location from the Site, the record does not present a potential risk for contamination to the site.
440-442 Wellington Street, approximately 300 m north of the Site (down-gradient)	1885 to 1900	David Manchester, Clothing Manufacturer Small manufacturer of ready-made clothing includes a woollen and carding mill	Due to the down-gradient location from the Site, the record does not present a potential risk for contamination to the site.
430-434 Wellington Street, approximately 300 m north of the Site (down-gradient)	1890 to 1945	P.J. Powers & Co. Ltd. / Vulcan Boiler Works Large operation, boilermakers, boat builders, and machinists	Due to the down-gradient location from the Site, the record does not present a potential risk for contamination to the site.

3.5.1.3 City of Ottawa Old Landfill Management Strategy Document, 2004

A report entitled *Old Landfill Management Strategy Phase 1 – Identification of Sites City of Ottawa, Ontario*, was prepared by Golder Associates for the City of Ottawa in 2004. This report identified old landfill site for potential environmental consideration within the boundary of the amalgamated City of Ottawa. LRL reviewed this report as part of the Phase I ESA desktop assessment for the Site and found no landfills present within 300 m of the Site.

3.5.2 Ontario Ministry of Environment Conservation, and Parks Freedom of Information Act

The Ontario Ministry of the Environment, Conservation, and Parks (MECP) was contacted under the Freedom of Information Act (FOI) to obtain available information for the Site regarding:

- Certificates of Approvals or any permits relating to air emissions (including noise), water taking and discharging, waste disposal sites, septic systems, pesticides storage or other similar instruments.
- Incidents, orders, offences, spills, discharges of contaminants or inspections;
- Waste management records, including current and historical waste storage locations and waste generator and waste receiver information; and

Reports on the environmental conditions of the property were submitted to the Ministry of the Environment, Conservation and Parks (MECP). A Freedom of Information (FOI) request was made to the MECP for each of the properties located at 593, 601, and 603 Laurier Avenue West. A formal response from the MECP confirmed that no records were found for any of the subject properties. The MECP decision letters are provided in **Appendix E**.

3.5.3 Inventory of Coal Tar Industrial Sites in Ontario

The MECP has created an inventory of all known and historical coal gasification plants. It identifies industrial sites that produced and continue to produce or use coal tar or other related tars. The program was discontinued in 1988. A search of the databased revealed no records within a 300 m radius from the Site.

3.5.4 Technical Standards and Safety Authority

Fuel storage at commercial and industrial facilities is regulated by the Technical Standards and Safety Authority (TSSA). Records of aboveground storage tanks are maintained for bulk storage facilities only. Underground storage tanks are required to be registered with the TSSA. There are no requirements to register private underground and aboveground fuel oil storage tanks for heating or waste oil. Records of registered and licensed tanks have been maintained since 1990.

TSSA was contacted on September 24, 2024, regarding available information concerning the presence of petroleum storage tanks, fuel spill records, accidents or fuel-related incidents which may be registered on the Site or surrounding properties. The Public Information Agent has indicated three (3) records of Fuel Service Appliance. Each record was for the property located at 60 Cambridge Street North, approximately 60 m south (up-gradient of the Site). A Fuel Service Appliance is a natural gas powered appliance, therefore, the record does not represent a potential environmental concern to the Site.

3.5.5 Ministry of Environment, Conservation, and Parks Water Well Records

The MECP well records database provides information of locations and characteristics of water wells throughout Canada in accordance with Ontario Regulation 903. Information of the stratigraphy, depth of bedrock and approximate depth of water table is also provided. A search

of the water well record database was completed on August 6, 2024. Records of twenty-nine wells were identified within a 250 m radius of the Site. Each of the wells identified are located on neighbouring properties, and the details of representative wells are summarized below.

The results are summarized in the following summary table, **Table 8**, and a copy of the available records retrieved are included in **Appendix F**.

Table 8: Summary of Well Records Retrieved

Well Identification	Details
7357890	<p>A well cluster containing two (2) monitoring wells, located on-Site at property 593 Laurier Ave W were installed in 2019.</p> <p>Well 19-1 located on the southeast corner of the property, fill was encountered to 4.7 m below ground surface (bgs) followed by bedrock to 7.75 m bgs where the well was terminated. Static water level was found at 5.04 m bgs.</p> <p>Well 19-2 located on the northeast corner of the property, fill was encountered to 6.27 m bgs followed by bedrock to 9.32 m bgs where the well was terminated. Static water level was found at 3.21 m bgs.</p>
7292921	<p>A monitoring well approximately 30 m east of the Site, was installed in August of 2017 and abandoned in December of 2017. The subsurface conditions encountered include asphalt/gravel extending to 0.31 m bgs, followed by silt and sand to 1.22 m bgs, followed by grey limestone to 12.19 m bgs where the well was terminated. Depth at which water was found was not included in the records.</p>
7292920	<p>A monitoring well approximately 75 m east of the Site, was installed in August of 2017 and abandoned in December of 2017. The subsurface conditions encountered include topsoil extending to 0.91 m bgs, followed by grey limestone to 12.19 m bgs where the well was terminated. Depth at which water was found was not included in the records.</p>
7292922	<p>A monitoring well approximately 110 m east of the Site, was installed in August of 2017 and abandoned in December of 2017. The subsurface conditions encountered include asphalt/gravel extending to 0.31 m bgs, followed by silt and sand/bricks/concrete to 2.44 m bgs, followed by grey limestone to 15.24 m bgs where the well was terminated. Depth at which water was found was not included in the records.</p>
7409464	<p>Located 60 m north of the Site and was installed in 2021. No other information was found.</p>
7419132	<p>Located 65 m north of the Site and was installed in 2022. No other information was found.</p>
7409463	<p>Located 45 m north of the Site and was installed in 2021. No other information was found.</p>
7339402	<p>A test hole approximately 220 m southwest of the Site, was installed in 2019. The subsurface conditions encountered include sand/fill/gravel to 2.23 m bgs, followed by limestone to 5.12 m bgs where the well was terminated. Depth at which water was found was not included in the records.</p>

7332168	Located 250 m southwest of the Site and was installed in 2018. No other information was found.
7332199	Located 250 m southwest of the Site and was installed in 2018. No other information was found.
7206940	Located 185 m west of the Site and was installed in 2013. No other information was found.
7238459	A test hole approximately 155 m west of the Site, was installed in 2015. The subsurface conditions encountered include sand/stone to 3.96 m bgs, followed by dry sand and silt to 5.79 m bgs, followed by wet sand and silt to 7.01 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7332167	Located 120 m west of the Site and was installed in 2017. No other information was found.
7238458	A monitoring well located 105 m west of the Site was installed in 2015. The subsurface conditions encountered include sand to 5.79 m bgs, followed by silt and sand to 7.01 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7238460	A monitoring well located 100 m north of the Site was installed in 2015. The subsurface conditions encountered include sand/silt to 9.14 m bgs, followed by gravel to 9.75 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7238457	A monitoring well located 105 m north of the Site was installed in 2015. The subsurface conditions encountered include sand/stone to 6.1 m bgs, followed by silt/clay to 8.23 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7372058	Located 120 m west of the Site and was installed in 2017. No other information was found.
7387881	A monitoring well located 140 m southwest of the Site was installed in 2021. The subsurface conditions encountered include loam to 0.31 m bgs followed by brown silt and silt to 4.57 m bgs, then silt and limestone to 5.18 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7354215	A monitoring well located 200 m north of the Site was installed in 2020. The subsurface conditions encountered include concrete and gravel to 0.31 m bgs, followed by limestone and shale to 3.83 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7317392	A monitoring well located 210 m north of the Site was installed in 2018. The subsurface conditions encountered include concrete and gravel to 0.31 m bgs, followed by limestone and shale to 3.96 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7354218	A monitoring well located 205 m north of the Site was installed in 2019. The subsurface conditions encountered include concrete to 0.31 m bgs, followed by gravel to 0.61 m bgs, followed by limestone to 4.57 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7354217	A monitoring well located 215 m north of the Site was installed in 2019. The subsurface conditions encountered include concrete and gravel to 0.31 m bgs, followed by limestone and shale to 3.83 m bgs where the well was terminated. Depth at which water was found was not included in the reports.

7354216	A monitoring well located 215 m north of the Site was installed in 2019. The subsurface conditions encountered include concrete and gravel to 0.31 m bgs, followed by sand/gravel/fill to 4.12 m bgs, followed by limestone and shale to 4.57 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7317391	A monitoring well located 215 m north of the Site was installed in 2018. The subsurface conditions encountered include concrete to 0.31 m bgs, followed by gravel to 0.61 m bgs, followed by limestone to 4.57 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7354222	A monitoring well located 220 m north of the Site was installed in 2019. The subsurface conditions encountered include concrete and gravel to 0.31 m bgs, followed by limestone and shale to 3.65 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7354219	A monitoring well located 225 m north of the Site was installed in 2019. The subsurface conditions encountered include concrete to 0.31 m bgs, followed by sand and gravel to 0.49 m bgs, followed by limestone and shale to 3.81 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7354220	A monitoring well located 230 m north of the Site was installed in 2019. The subsurface conditions encountered include gravel to 0.31 m bgs, followed by limestone and shale to 3.66 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7335409	A well cluster containing three (3) monitoring wells was installed in January of 2019 and abandoned in April of 2020. Only one (1) of the wells is located within the 250 m radius of the Site. Well 19-3 is located 250 m south of the Site. The subsurface conditions encountered include asphalt/gravel/sand to 0.35 m bgs, followed by limestone and shale to 4.39 m bgs where the well was terminated. Static water level was found at 2.96 m bgs.

3.5.6 Waste Disposal Site Inventory

The MECP's Waste Management branch maintains an inventory of known open (active or inactive) and closed disposal site in Ontario. A search of the database revealed three (3) records of waste disposal sites within a 1 km radius from the Site.

Location	Date Closed	Classification	PCAs
Ottawa, near the Supreme Court Building, approximately 750 m northeast of the Site (trans-gradient)	1944	A5 Potential Hazard	Due to the trans-gradient location from the Site, there is low potential for environmental concern.
Ottawa, Broad Street (LeBreton Flats), approximately 560 m west of the Site (down-gradient)	1920	A5 Potential Hazard	Due to the down-gradient location from the Site, there is low potential for environmental concern.
Ottawa, LeBreton Flats, approximately 800 m west of the Site (down-gradient)	1964	A5 Potential Hazard	Due to the down-gradient location from the Site, there is low potential for environmental concern.

3.6 Physical Setting Sources

The Site is located at approximately 75 m above mean sea level (amsl) and is generally flat land with a steep slope towards the north (towards the Ottawa River). The topography of the Site and general area is presented in the topographic map included in **Appendix G**.

3.6.1 Aerial Photographs

Aerial photographs were obtained from GeoOttawa and the National Air Photo Library through a search provider. Review of the photographs was completed to develop a general history of the development of the Site and surrounding properties. Aerial photographs may be at a scale that limits a detailed review of the Site and surrounding properties.

Copies of select aerial photographs are included in **Appendix H**, and a summary is included in **Table 9**.

Table 9: Summary of Aerial Photographs

Year	Phase One Property (Site)	Phase One Study Area (Surrounding Area)
1928 (AP1)	Due to the quality of the image, it is unsure whether the Site is developed at this time.	High-density development in each direction is observed in the Phase One study area. Laurier Avenue is developed to the south of the Site.
1958 (AP2)	The Site appeared to be developed with buildings on each of the Phase One properties.	No significant changes were observed to the Phase One study area from the observation made in 1928. The hospital south of the Site (up-gradient) has greatly expanded since the previous AP1.
1965 (AP3)	The Site appeared similar to 1958.	No significant changes were observed to the Phase One study area from the observation made in 1958. The property immediately to the north of the Site has been developed.
1976 (AP4)	The Site appeared similar to 1965.	No significant changes were observed to the Phase One study area from the observation made in 1965.
1991 (AP5)	The Site appeared similar to 1976.	No significant changes were observed to the Phase One study area from the observation made in 1976.
2002 (AP6)	The Site appeared similar to 1991.	No significant changes were observed to the Phase One study area from the observation made in 1991.
2011 (AP7)	The Site appeared similar to 2002.	No significant changes were observed to the Phase One study area from the observation made in 2002.
2022 (AP8)	The Site appeared similar to 2011.	No significant changes were observed to the Phase One study area from the observation made in 2011.

3.6.2 Topography, Hydrology & Geology

An Ontario Base Map was retrieved by ERIS for the Phase One Subject Area and surrounding properties. A copy of the map is included in **Appendix I**. Furthermore, the City of Ottawa interactive mapping system, geoOttawa, provides additional topographic information such as contours.

Geological maps were reviewed to obtain information on regional geology, surficial soils and bedrock. These maps included the following:

- Harrison, J.E., 1976, Generalized Bedrock Geology, Ottawa-Hull, Ontario and Quebec, Geological Survey of Canada, Map 1508A, Scale 1:125,000.
- St-Onge, D.A., (compilation), 2009, Surficial Geology, Lower Ottawa Valley, Ontario-Quebec, Geological Survey of Canada, Map 2140A, Scale 1:125,000.

A summary of Topographical, Physiographical, Hydrogeological and Geological Conditions are summarized on **Table 10**.

Table 10: Summary of Topographical, Physiographical, Hydrogeological and Geological Conditions

Parameter	Source	Description
Topography	Ontario Base Map (included in Appendix G), and geoOttawa	The Site is generally flat with a steep slope towards the north (towards the Ottawa River). The Site has an approximate elevation of 75 m amsl.
Physiography	Not Applicable	A review of the Physiography of the Phase One ESA property, and Subject Area was not included as part of this ESA.
Hydrology	Toporama – The Atlas of Canada	The inferred groundwater flow direction is north toward the Ottawa River. No further details were retrieved pertaining to groundwater levels below grade.
Geology	Geological Survey of Canada mapping, as referenced above at the beginning of this Section.	Generalized surficial geology: glacial deposits: Till, plain, local relief less than 5 m; and Limestone, dolomite, sandstone, and locally shale, relatively flat-lying (St-Onge, D.A., 2009). Generalized bedrock geology: Eastview and Ottawa Formation: dark grey almost black limestone and limestone with some shaly partings: some sandstone in basal part. (Harrison, J.E., 1976). According to the Phase II ESA submitted on November 7, 2019 (Revised September 4, 2020), limestone with shaly partings was encountered from depths of 0.50 and 1.65 m bgs to 7.75 and 9.30 m bgs where the boreholes were terminated.

3.6.3 Fill Material

Based on our review of available historical information, it has been revealed that the Phase One property was undeveloped prior to the development in the early 1900's (at least 1901). The presence of the former development on the Site is a not a potential environmental concern.

3.6.4 Water Bodies and Areas of Natural Significance

O. Reg. 153/04 identifies an Areas of Natural Significance through the following databases and criteria:

- The Site is not part of a provincial park or conservation area;
- The Site is not within any Areas of Natural and Scientific Interest (ANSI) identified by the Ministry of Natural Resources (MNR) as having provincial significance;
- The Site does not include any area identified as Provincial Significance Wetland (PSW) by MNR
- The Site does not include any area designated as environmentally significant in municipal official plans;
- The Site does not include any area designated as an escarpment natural area by Niagara Escarpment Plan;
- The Site does not include any area which is a habitat of endangered species;
- The Site does not include any Oak Ridges Moraine Conservation area; and,
- The Site does not include any area designated as a wilderness area.

Based on the Ottawa River's natural significance, the Phase One ESA property is considered to be within an Area of Natural Significance, as seen in the Ontario Base Map included in **Appendix G**.

3.7 Site Operating Records

Site operating records have not been provided in associated with this report. It is unlikely that the these reports are available for the Site based on the residential occupancy use.

4 INTERVIEWS

A summary of the interview conducted as part of this Phase One ESA is included in the following **Table 11**.

Table 11: Summary of Interview

Parameter	Information
Interviewee	Kelly, Property Manager
Interviewer	Olivia Wanamaker, Environmental Technician
Interview Type	In person
Interview Date	Aug 15 th , 2024
Interview Details/Pertinent Information	<ul style="list-style-type: none"> • Kelly has been familiar with the Site for almost two (2) years when she became the property manager. • Kelly has indicated that all of the Site properties have been used for residential purposes since construction in the early 1900's (593 Laurier Ave) and the early 1950's (601/603 Laurier Ave). • Kelly has indicated that the buildings on the Site are serviced by municipal water, sanitary services and is heated by natural gas. • Kelly has indicated that there was a renovation to 593 Laurier Avenue in the past (~50 years), which included turning the large home into several separate residential units. • Kelly has indicated that all the buildings used to be heated with heating oil tanks on all three properties until they were removed in the 1970-1980's and replaced with modern heating equipment.
Evaluation	Based on the interview, it is found that the information retrieved corresponded to that obtained from the records reviewed with no inconsistencies or deviations encountered.

5 SITE RECONNAISSANCE

A summary of the Site reconnaissance conducted as part of this Phase One ESA is included in the following **Table 12A** through **Table 12C**.

Table 12A: Summary of the Site Reconnaissance 593 Laurier Ave W

Parameter	Information
Date	Aug 15 th , 2024
Time	1:45 pm – 2:15 pm
Weather Conditions	Sunny, 30°C
Site Activity	Residential
Person conducting Site visit	Olivia Wanamaker, Environmental Technician
Limitations to Site visit	The units on the upper floor and the basement units were unavailable for access.
Site Reconnaissance Details	<p>The following observations were made of the Phase One ESA Property, 593 Laurier Ave W, in Ottawa, Ontario:</p> <ul style="list-style-type: none"> • The Site is developed with a two-storey, multi-unit residential home, occupied by several tenants. • The majority of the Site is encompassed by the residential development; however, there is a backyard to the northern extents of the Site and a small asphalt driveway/parking area in the southwest corner of the Site • The exterior finish of the building on the Site is brick and stone. • The Site is generally flat with a slight slope to the south and a steep slope immediately to the north of the Site. • The building includes a full basement that is mostly unfinished, the walls included brick, concrete and stone, the floors included vinyl, concrete, wood and tile. • The finishes on the upper floors of the building include wood flooring, drywall and tall wooden baseboard. • The basement contained a storage shelf with paints, thinners, antifreeze and other cleaning chemicals; however, they were all sealed in proper packaging and labelled accordingly. • The basement is used for tenant storage, laundry area, as well as a mechanical room containing various pieces of equipment (furnace, water heater, natural gas, etc.) • There is a garage accessible from the basement and from the outside used for tenant and owner storage. There is also a small trapdoor connecting the garage and the lower part of the basement. • There is a pile of wooden skids in the southwest corner of the backyard. There is a wall that wraps around majority of the backyard area, then a steep slope immediately follows the wall down to Albert Street.
Utilities	<p>Potable water is available through Municipal drinking water supply. The Site is connected to municipal sanitary service infrastructure.</p> <p>Natural gas/electric infrastructure is available, and services the Site.</p>
Site Visit Photographs	Photographs from the Site visit are included in Appendix J .

Table 12B: Summary of the Site Reconnaissance 601 Laurier Ave W

Parameter	Information
Date	Aug 15 th , 2024
Time	1:15 pm – 1:45 pm
Weather Conditions	Sunny, 30°C
Site Activity	Residential
Person conducting Site visit	Olivia Wanamaker, Environmental Technician
Limitations to Site visit	None of the residential units were available for access.
Site Reconnaissance Details	<p>The following observations were made of the Phase One ESA Property, 601 Laurier Ave W, in Ottawa, Ontario:</p> <ul style="list-style-type: none"> • The Site is developed with a three-storey, multi-unit residential complex, occupied by several tenants. • The majority of the Site is encompassed by the residential development with two (2) small concrete walkways located at the southern portion of the Site. • The exterior finish of the building on the Site brick. • The Site is generally flat with a steep slope immediately to the north of the Site. • The building has no basement and has interior finishes of vinyl, tile and concrete flooring as well as drywall and brick walls. • There are two staircases, one at the front of the building, and one at the back of the building that give access to the various units throughout. • There are two (2) common space areas, one (1) is an unfinished laundry, storage and mechanical room. The other is a finished laundry space with light storage and a large meeting table. • There is a wooden deck/fence that wraps around the backside of the building where a separate entrance is. • No storage of solvents, adhesives, petroleum-based fuel or other potentially contaminating chemicals and products were observed.
Utilities	<p>Potable water is available through Municipal drinking water supply.</p> <p>The Site is connected to municipal sanitary service infrastructure.</p> <p>Natural gas/electric infrastructure is available, and services the Site.</p>
Site Visit Photographs	Photographs from the Site visit are included in Appendix J .

Table 12C: Summary of the Site Reconnaissance 603 Laurier Ave W

Parameter	Information
Date	Aug 15 th , 2024
Time	12:45 pm – 1:15 pm
Weather Conditions	Sunny, 30°C
Site Activity	Residential
Person conducting Site visit	Olivia Wanamaker, Environmental Technician
Limitations to Site visit	Only one (1) of the residential units were available for access and the mechanical room was not accessible.
Site Reconnaissance Details	<p>The following observations were made of the Phase One ESA Property, 603 Laurier Ave W, in Ottawa, Ontario:</p> <ul style="list-style-type: none"> • The Site is developed with a two-storey, multi-unit residential complex, occupied by several tenants. • The majority of the Site is encompassed by the residential development with three (3) small concrete walkways located at the southern portion of the Site. • There is also a small grassy area in the southwest corner of the Site with a picnic table, BBQ, two (2) storage sheds, and a garbage collection area. • The exterior finish of the building on the Site is brick. • The Site is generally flat with a steep slope immediately to the north of the Site. • The building has no basement and has interior finishes of vinyl, tile and concrete flooring as well as drywall and brick walls. • There are two staircases, one at the front of the building, and one at the east side of the building. The units in the front are accessible by the front stairs. The units that are located on the east side are accessible by the side stairs. • A concrete deck is located at the rear (north side) of the building for access to the back of the building, BBQ's and outdoor seating. • No storage of solvents, adhesives, petroleum-based fuel or other potentially contaminating chemicals and products were observed.
Utilities	<p>Potable water is available through Municipal drinking water supply.</p> <p>The Site is connected to municipal sanitary service infrastructure.</p> <p>Natural gas/electric infrastructure is available, and services the Site.</p>
Site Visit Photographs	Photographs from the Site visit are included in Appendix J .

5.1 Specific Observations of the Phase One ESA property

The specific observations encountered at the Phase One ESA property are summarized in the following **Table 13**.

Table 13: Specific Observations of the Phase One ESA property

Parameters	Information
Property Dimensions	593 Laurier Ave W: Irregular shape, being approximately 32.1 m wide (east-west) by approximately 38.8 m (north-south). 601 & 603 Laurier Ave W: Triangular shape, being approximately 74.1 m wide (east-west) by approximately 40.3 m (north-south).
Current Occupants/ Tenants	All three (3) properties are used as multi-unit residential buildings.
Structures/ Improvements	The Site contains three (3) multi-tenant residential buildings estimated to have been constructed in the early 1900's (593 Laurier Ave) and the early 1950's (601/603 Laurier Ave). 593 Laurier Ave has been renovated within the past 50 years to turn the large home into several residential units. An asphalt driveway and parking area are present in the southwest corner of 593 Laurier Ave.
Sewage Works	The building on Site is connected to municipal sanitary service infrastructure.
Landscaped & Vegetated Areas	There is small grasses, plants, weeds and small trees on the south sides of the properties. To the north of the properties there is a wooded area that surrounds the northern extents to Albert Street.
Pavement, Roads & Driveways:	An asphalt driveway and parking area are located in the southwest corner of 593 Laurier Ave W. At 601 and 603 Laurier Ave W there are a few small concrete walkways leading to the buildings.
Topography	Generally flat with a slight slope to the south and a steep slope immediately to the north of the Site properties.
Surface Drainage	To the north of the property.
Drainage Improvements	None observed.
Receives Drainage from Adjacent Lands:	None observed.
Watercourses, Ditches or Standing Water:	None observed.
Aboveground storage tanks (ASTs)	None observed.
Underground storage tanks (USTs)	None observed.
Fill Ports, Vent Pipes	None observed.
Storage Containers	None observed.

Hazardous Materials	None observed.
Unidentified Substances	None observed.
Odours	None observed.
Air Emissions	None observed.
Wells	None observed.
Sewage Disposal	The building on Site is connected to municipal sanitary service infrastructure.
Pits and Lagoons, Wastewater or Solid Waste	None observed. Domestic waste is generated on the Phase One ESA property, which is disposed of through waste management pick up services.
Stained Material and Stressed Vegetation	None observed.
Fill or previous fill activities	None observed.
Earth Moving Activities	None observed.
Railway Lines	None observed.
Other	None observed.
Potential Contaminating Activities (PCA)	Each property used to have a heating oil tank that has since been replaced with modern natural gas heat.
Unidentified Substances	None observed.

5.2 Adjacent Land Use

The current land uses of the adjoining properties were observed from the property limits and publicly accessible locations to assess potential impacts to the Site that may arise from off-Site operations. The properties surrounding the subject Site are as follows:

- North:** Wooded area with a steep slope
- South:** Laurier Ave followed by Residential Apartments
- East:** Bronson Ave followed by a Community Park
- West:** Small asphalt parking area (no longer in use)

5.3 Special Attention Items

Eleven chemical contaminants have been identified under the Occupational Health and Safety Act (OHSA) and regulations have been set in place to prohibit, regulate restrict, limit or control workers exposure to these substances. Other hazardous materials not included in the OHSA but under the Environmental Protection Act were also observed. The observations presented herein do not constitute a designated substance/hazardous material survey but are rather for information purposes only.

5.3.1 Designated Substances

<p>Asbestos Containing Material (ACM) Since the late 1970's the manufacture and use of asbestos containing building materials started to decrease. It is commonly presumed that buildings constructed prior to 1980 are more likely to contain both friable and non-friable forms of asbestos. General buildings constructed up to the mid 1980's are more likely to contain non-friable asbestos (flooring, joint compound). Due to the estimated construction dates of the buildings the presence of ACM is possible. ACM may be present inside of concealed spaces such as ceiling and walls.</p>
<p>Lead Lead may be present in a variety of building materials including paint and water distributions pipes, however, lead based paints (LBP) are considered the most significant hazard. According to published information by Health Canada concerning LBP, buildings constructed before 1980 may contain lead-based interior and exterior paints. Due to the estimated construction dates of the buildings the presence of lead-based piping and paints are possible.</p>
<p>Mercury Minor amounts of mercury are commonly found in a variety of building material including mercury vapour lamps, fluorescent light tubing and thermostats and other electrically control switches. Mercury containing materials were not observed.</p>
<p>Others No other designated substances were identified (i.e. arsenic, ethylene oxide, vinyl chloride, benzene, coke oven emissions, acrylonitrile or isocyanates).</p>

5.3.2 Other Hazardous Building Materials/Items

<p>Microbial Contamination and Mould: Areas of possible sources of mould (i.e. water damage, poor housekeeping, poor ventilation) were identified at the Site. Orange mould was found on an old wooden exterior door in the backyard of 593 Laurier Ave.</p>
<p>Ozone-Depleting Substances (ODS): ODS such as chlorofluorocarbons (CFC) and hydrochlorofluorocarbon (HCFC) are typically found in refrigeration equipment, air conditioners, aerosols, cleaning solvents and fire extinguishers. Federal regulations required the elimination of production and import of CFC and a freeze on the production and import of HCFC by January 1, 1996. The regulations govern only the production and import therefore these materials are still used as long as a supply is in place. Refrigeration units are present which possibly contains ODS.</p>
<p>Polychlorinated Biphenyls (PCB): The Federal Chlorobiphenyls Regulation, SOR/91-152 prohibits PCBs from being used in products, equipment, machinery, electrical transformers and capacitors which were manufactured or imported into the country after July 1, 1980. However, older equipment in use after this date may still contain PCBs if the equipment fluid has not been replaced. PCB-containing equipment can also include fluorescent, mercury, and sodium vapour light ballasts. Due to the estimated construction date of the buildings, the presence of PCBs is possible.</p>
<p>Urea Formaldehyde Foam Insulation (UFFI): UFFI was widely used as an insulating material until December 1980 when a ban was enacted under the Hazardous Products Act. UFFI was commonly injected through walls by drilling injections holes in roof structures, ceilings and overhangs. No UFFI were noted in the buildings inspected. Due to the estimated construction date of the buildings, the presence of UFFI is possible but could have been removed during the 1987 renovation.</p>
<p>Radon: Radon gas is a product of the decay series of uranium that is commonly found in geological units that contain black shale, sandstone or granite. Radon can percolate up through the soil where it may accumulate in basement of buildings with cracks or joints in the foundation. Because the existence of radon is dependent upon geological factors, it is more a regional concern than site specific. Due to the location of the Site, any radon levels would be low or minimal.</p>
<p>Electric and Magnetic Fields: Electromagnetic fields are generally associated with high frequency power lines. No high voltage power lines were noted within 250 m of the Site.</p>
<p>Noise and Vibration: Noise and vibration are typical of an urban environment (i.e. traffic).</p>
<p>Methane: Methane gas is a colourless and odourless gas commonly formed by the decomposition of organic material. The Site is not located near active or closed waste disposal sites, marshes, swamps or peat deposits therefore methane is not a concern.</p>
<p>Others: Silica may be present within cement-based products encountered, such as the cement floor and walls, in addition to exterior parking and general circulation infrastructure (i.e. curbing). No other designated substances were identified (i.e. arsenic, ethylene oxide, vinyl chloride, benzene, coke oven emissions, acrylonitrile or isocyanates).</p>

6 REVIEW AND EVALUATION OF INFORMATION

6.1 Enhanced Investigation Property

As defined in O. Reg. 153/04, as amended, an Enhanced Investigation Property “means a property that is being used or has been used, in whole or in part, in a manner described in clause 32 (1) (b) to which subsection 32 (2) does not apply”. Those property include the following:

- Industrial use which involves assembling, fabricating, manufacturing, processing, producing, storing, warehousing, or distributing goods or raw materials;
- a garage;
- bulk liquid dispensing facility; or
- dry-cleaning operation.

Based on the records retrieved and reviewed as part of this assessment, the Phase One ESA Property was, at one point, not used for the above-mentioned uses, therefore the Site is not considered an enhance investigation property.

6.2 Phase One ESA – Investigation Details

LRL completed a Site reconnaissance of the subject property, as outlined above in Section 5. The Site reconnaissance included a detailed walkthrough of the Phase One ESA Property, to allow for a review of its current condition, as well as to evaluate the likely impacts from past uses and neighbouring properties. Some limitations were encountered during the Site reconnaissance, including several inaccessible residential units amongst all three (3) properties and the mechanical room of 603 Laurier Ave was not accessible. The Site reconnaissance included the following:

- A thorough walkthrough of the Phase One Property, with a focus on:
 - The presence of structures or other features of construction;
 - The surface cover type and areas of fill, or debris;
 - Areas of staining, stressed vegetation or anomalous condition;
 - Presence of unidentifiable substances; and
 - The presence, or former evidence, of underground/ buried features or structures, including storage tanks and utility corridors;
- A perimeter walk-around, noting the condition and general characteristics of the Phase One Property limits;
- Visually observations of the neighbouring lands from the Phase One Property extents, to locate and document the following:
 - Potentially contaminating activities;
 - Water bodies; and
 - Possible storage tanks and areas of natural significance.

A summary of the observations encountered are included in **Figure 2**.

6.3 Phase One ESA Site Reconnaissance Findings

Based on the findings of the Site Reconnaissance, the following PCAs have been identified, which are summarized in the subsequent **Table 14**.

Table 14: Site Reconnaissance Findings Corresponding to Areas of Potential Environmental Concern.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA 41: Petroleum Storage Tank and Oil Heating	On-Site	During the interview with the property manager, it is noted that all three (3) properties had heating oil tanks previously that have since been removed.	The PCA is located on the Site and is therefore automatically considered to contribute to an on-site APEC.
PCA 30: Importation of Fill Materials of Unknown Quality	On-Site	The southwestern portion of the Site includes an asphalted parking and circulation area. It is anticipated that to accommodate this structure, fill material was imported to the property.	The PCA is located on the Site and is therefore automatically considered to contribute to an on-site APEC.

7 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses

Below is a summary of the current and past uses of 593, 601 & 603 Laurier Ave W, Ottawa, Ontario. **Table 15** represents the current and past uses for 593, 601 & 603 Laurier Ave W.

Table 15: 593, 601 & 603 Laurier Ave W – Current and Past Uses

Year	Phase One Property PIN#04111-0260 (LT) 593 Laurier Ave W	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, ect.
1879	The City of Ottawa	Based on the date, the property was vacant or low-density development	Vacant or low-density development	The Canadian County Atlas Digital Project and Fire Insurance Plans
1980	Dalhousie Non-Profit Housing Co-Operative Inc.	Multi-unit Residential Building	Residential	Land Title Search, City Directories
Year	Phase One Property PIN#04111-0261 (LT) 601 & 603 Laurier Ave W	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, ect.
1879	The City of Ottawa	Based on the date, the property was vacant or low-density development	Vacant or low-density development	The Canadian County Atlas Digital Project and Fire Insurance Plans
1990	Roose, Joan Sybil	Multi-unit Residential Building	Residential	Land Title Search, City Directories
2023	Heritage Investments Ltd.	Multi-unit Residential Building	Residential	Land Title Search, City Directories

7.2 Potential Contaminating Activity (PCA) & Areas of Potential Environmental Concern (APEC)

A potentially contaminating activity is a use or activity set out in Table 2 of Schedule D of the O. Reg. 153/04. These activities are summarized in the Table included in **Appendix K**.

The activities on the Site from at least the early to mid 1910’s to the present have been mixed-use, including residential and commercial (office space and retail). Furthermore, the activities on adjacent lands within 250 m from at least the early 1910’s to the present have been mainly residential and commercial (office space, and retail). Based on the results of the Phase One Environmental Site Assessment, the following areas of potential environmental concern were identified and are presented in **Figure 3**:

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA Other: Spill	South 260 m	In October of 2008, 200L of fuel oil was leaked due to equipment failure at 54 Primrose Street (<i>possibly intended to be 'Avenue'</i>).	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.
PCA Other: Spill	Southeast 140 m	In May 2008, a spill occurred at the intersection of Bronson Ave and Nepean Street causing an OC Transpo bus to leak 10 L of antifreeze into the surrounding area.	Due to the type of material spilt and its chemical attributes (rapid evaporation time), the PCA is not considered to contribute to an on-Site APEC.
PCA Other: Spill	South 220 m	In May 2002, at 28 Primrose Avenue, a garbage truck leaked an unknown amount of hydraulic oil onto the road.	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.
PCA Other: Waste Generation	On-Site	In 2022, the Dalhousie Non-Profit Housing Co-op registered as a waste generator of light fuels.	The PCA is located on the Site and is therefore automatically considered to contribute to an on-Site APEC.
PCA Other: Waste Generation	Southeast 100 m	Between 2002 and 2018, the Bronson Place located at 111-440 Gloucester St registered as a waste generator of various classes.	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.
PCA Other: Waste Generation	South 60 m	Between 1986 and 2020, St Vincent Hospital located at 60 Cambridge Street registered as a waste generator of various classes.	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.
PCA Other: Waste Generation	Southeast 170 m	Between 1986 and 2021, the Bronson Centre located at 211 Bronson Ave registered as a waste generator of various classes.	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.
PCA Other: Record of Site Condition	South 115 m	Paterson Group completed an RSC for four (4) neighbouring properties in 2019 that were demolished. A new multi-unit building was constructed in place.	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA Other: Scott's Manufacturing Directory	Southeast 170 m	At 211 Bronson Ave, records of a periodic publisher at a civic/social organization were found. No timeline was given in the records.	The PCA is located up-gradient to the Site and is therefore considered to contribute to an on-Site APEC.
PCA 41: Petroleum Storage Tank and Oil Heating	On-Site	During the interview with the property manager, it is noted that all three (3) properties had heating oil tanks previously that have since been removed.	The PCA is located on the Site and is therefore automatically considered to contribute to an on-Site APEC.
PCA 30: Importation of Fill Materials of Unknown Quality	On-Site	The southwestern portion of the Site includes an asphalted parking and circulation area. It is anticipated that to accommodate this structure, fill material was imported to the property.	The PCA is located on the Site and is therefore automatically considered to contribute to an on-site APEC.
PCA 34: Metal Fabrication	North 300 m	At the west end of Sparks Street and Wellington Street was the Alexander Fleck Foundry. Present in FIPs 1878 to 1963.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Northeast 130 m	A lumber yard located between Slater Street and Maria Street (now Laurier Avenue). Present in FIPs 1901 to 1922.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	North 120 m	A lumber yard located along Commissioners Lane. Present in the 1901 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	Northwest 280 m	Chaudiere Machine & Foundry Co was found in the 1901 to the 1922 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA 46: Rail Yards, Tracks and Spurs	Northwest 225	Canadian Atlantic Railway located in between the Lett Street and the pumping station was found in the 1901 to the 1963 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	North 200 m	J.R. Booth Yard was found along the railway in the 1901 to the 1922 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Factory	Northwest 100 m	A broom factory was located between Wellington Street and Albert Street. Present in FIP 1912.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	North 300 m	Boiler Works, P.J. Powers Co, located in between Sparks and Wellington Street. Present in the 1912 and 1922 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Northwest 260 m	McAuliffe Davis Lumber Co Limited located at the northeast corner of Lett and Fleet Street was found in the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 29: Glass Manufacturing PCA 32: Iron and Steel Manufacturing and Processing	Northwest 160 m	City Iron & Bottle Co. consists of a machine shop, storage, stock/junk piles and a warehouse. Present on the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks PCA 34: Metal Fabrication	Northwest 165 m	Oxy-Acetylene Welding located in the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 10: Commercial Autobody Shop	Northwest 260 m	RCMP Garage, includes two (2) garages and an office/warehouse. Present in the 1948 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	West 165 m	Gasoline Service Station equipped with three (3) underground storage tanks. Present in the 1948 to 1963 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	Northeast 140 m	Castings of Ottawa Ltd. (metal castings) consists of a moulding shop, furnace room, office and storage. Present on the 1948 FIP.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 10: Commercial Autobody Shop PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	North 300 m	An automotive repair garage is equipped with two (2) underground storage tanks and gasoline service station. Present on the 1948 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 10: Commercial Autobody Shop PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	East 100 m	An automotive repair garage is identified, following Bronson Avenue, and is equipped with an underground storage tank. Present in the 1948 and 1963 FIPs.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	East 250 m	Two (2) underground storage tanks are identified at an apartment complex located at the southeast corner of the intersection of Slater Street and Bay Street. Present in the 1948 FIP.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 170 m	Five (5) records were found for the Rideau Transit Group, located at 529 Albert Street registered as a waste generator of various classes between 2014 to 2019.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	West 90 m	Two (2) records were found for the City of Ottawa Corporate Real Estate Office, located at 555 Albert Street. Registered as waste generators in 2021 to 2022 for light fuels, oil	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
		skimming's, sludges and heavy fuels.	
PCA Other: Waste Generation	Northwest 190 m	Five (5) records were found for the City of Ottawa Transportation, located at 557 Wellington Street. Registered as waste generators between 2011 to 2019 for various waste classes.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 170 m	Six (6) records were found at 473 Albert Street for Property Material Management, Rosont Investment Inc., 2164613 Ontario Inc, and HVAC Maximum Heating & Cooling Inc. Registered as waste generators between 1986 to 2011 for various waste classes.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	East 250 m	Three (3) records were found for Carleton Condominium Corp., located at 500 Laurier Avenue W. From 2003 to 2010, registered as a generator of aliphatic solvent wastes.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 200 m	Three (3) records were found at 434 Queen Street, for Farm Credit Corporation and Tower Committee. Registered as waste generators between 1989 to 2022 for various waste classes.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northeast 160 m	Fifteen records were found for the Ottawa-Carleton District School Board, located at 440 Albert Street. Registered as waste generators between 1986 to 2022 for various waste classes.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA Other: Waste Generation	Northwest 200 m	One (1) record was found for Donalco Inc., located at 10 Fleet Street. Was registered in 2017 as a generator of inorganic sludges, slurries and solids.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northwest 170 m	One (1) record was found for the City of Ottawa Pumping Station, located at 3 Fleet Street. In 2013, registered as a generator of light fuels.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 230 m	One (1) record was found for Gafftech Solutions Inc., located at 443 Queen Street. In 2014, was registered as a generator of aliphatic solvents.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northwest 280 m	One (1) record was found for Malhorta Construction Ltd., located at 300 Lett Street. In 2015, registered as a generator of light fuels.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	East 220 m	Twelve records were found for Ottawa-Carleton District School Board, located at 376 Gloucester Street. Registered as waste generators between 2006 to 2022 for various waste classes.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 300 m	One (1) record was found for Cathedral Hill, located at 428 Sparks Street. Registered as a generator in 2021 of waste oils and sludges.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Scott's Manufacturing Directory	North 155 m	One (1) record was found for the Planetary Association located at 100 Bronson Ave. Established in 1975, registered as periodical/book publishers, environmental consulting services and a social advocacy organization.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA Other: Spill	East 200 m	Eleven records are listed at 529 Albert Street. The spills that occurred involved the following: concrete admixtures, aluminum sulphate, diesel, petroleum oil, and hydraulic oil.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 100 m	One (1) record was found at the intersection of Albert Street and Commissioner Street. In July 1995, an unknown quantity of asphalt sealer leaked from a trailer onto the road.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	East 90 m	One (1) record was found in November 2019 was listed at 556 Laurier Avenue W. Due to material failure, 5 L of fuel oil was leaked onto the ground.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	Northeast 95 m	One (1) record was found at 553 Laurier Ave W. In January 1996, due to vandalism, 900 L of furnace oil was leaked into the basement and sanitary sewer works.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 130 m	One (1) record was found on Slater Street, between Bronson Ave and Bay St. In November 2008, 20 L of radiator fluid (coolant) was leaked into nearby catch basins due to equipment failure.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	West 125 m	Two (2) records were found at 670 Albert Street. In August 2015, 10 L of water and dye solution was spilt. Also in October 2015, 15 L of coolant was leaked into the sewers from an OC Transpo bus.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 300 m	Five (5) records were found at the intersection of Wellington Street and Commissioner Street. The spills that occurred involved the following: hydraulic oil,	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
		glycol, concrete washer and sediment laden water.	
PCA Other: Spill	West 210 m	Five (5) records were found at 584 Wellington Street. From 2011 to 2016, five (5) spills occurred in this area, including three (3) spills of concrete wash out, a small (1L) diesel spill, a small (2L) oil spill and 30 L of coolant.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	Northwest 180 m	One (1) record was reported from the pumping station located at 10 Fleet Street. In 2011, a sheen was reported on the Ottawa River outside of the pumping station.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 230 m	One (1) record was found at 443 Queen St W. In November 2014, 1400L of propylene glycol was leaked due to equipment failure.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	Northeast 215 m	One (1) record was found at 435 Albert Street. In January 2018, 12 L of coolant leaked from a bus due to operator error.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	Northwest 120 m	Ottawa Brass Manufacturing Co. at 542 Wellington Street from 1922 to 1965. Small machine shop and brass works making brass and copper products.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 33: Metal Treatment, Coating, Plating and Finishing	Northwest 240 m	Photogelatine Engraving Co. Ltd. at 471 Wellington Street from 1922 to 1940. Small operation, with printers, binders, lithographers, and engravers.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	East 280 m	W.J. Campbell and Sons, Engineering Works at 478-482 Maria Street from 1878 to 1901. Medium size operation, boilermakers.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA 34: Metal Fabrication	East 170 m	Ottawa Car Manufacturing Ltd. Brass Foundry at 422-426 Slater Street from 1920 to 1960. Medium size operation, brass foundry for car works/workshop.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 33: Metal Treatment, Coating, Plating and Finishing	East 170 m	Ottawa Car Manufacturing Ltd. Brass Foundry at 422-426 Slater Street from 1920 to 1960. Medium size operation, brass foundry for car works/workshop.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 17: Dye Manufacturing, Processing and Bulk Storage	Northeast 250 m	Dyeing and Cleaning Works at 200 Bay Street from an unknown time. Medium size operation, cleaners and dyers.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 51: Solvent Manufacturing, Processing and Bulk Storage	Northeast 250 m	Dyeing and Cleaning Works at 200 Bay Street from an unknown time. Medium size operation, cleaners and dyers.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	North 300 m	Vulcan Iron Works at 416-428 Wellington Street from 1865 to 1945. Large operation, founders and machinists, boilermakers	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Manufacturing Facility	North 300 m	David Manchester, Clothing Manufacturer at 440-442 Wellington Street from 1885 to 1900. Small manufacturer of ready-made clothing includes a woolen and carding mill.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	North 300 m	P.J. Powers & Co. Ltd. / Vulcan Boiler Works at 430-434 Wellington Street from 1890 to 1945. Large operation, boilermakers, boat builders, and machinists.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal	Northeast 750 m	There was an old A5 waste disposal site near the Supreme Court Building that closed in 1944.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners			
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	West 560 m	There was an old A5 waste disposal Site on Broad Street, in the LeBreton Flats that closed in 1920.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	West 800 m	There was an old A5 waste disposal Site in the LeBreton Flats that closed in 1964.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	Northwest 350 m	A former landfill was identified by the City of Ottawa (Unnamed Landfill) west of the intersection of Booth Street and Fleet Street. No additional details were provided.	This record does not present an APEC to the Site due to the down- to trans-gradient location and the inferred groundwater flow.
PCA 37: Operation of Dry Cleaning Equipment (where chemicals are used)	South 160 m	Centretown Laundry Co-Op, a Laundries and Cleaners listed in 2005 at 211 Bronson Avenue.	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.
PCA 39: Paints Manufacturing, Processing and Bulk Storage	South 160 m	Good Day Workshop Reupholstery and Furniture Repair facility which operated from at least 2001 through 2012 at 211 Bronson Avenue.	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Contribution to an APEC
PCA 31: Ink Manufacturing, Processing and Bulk Storage	South 85 m	Perfection Printers, a Printing facility which operated in at least 1990 at 190 Bronson Avenue.	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.
PCA 31: Ink Manufacturing, Processing and Bulk Storage	South 180 m	Desktop Express Publishing, and Publishing facility in the at least 1990 at 208 Bronson Avenue.	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South 120 m	Builders Exchange Building, located at 196 Bronson Avenue, is listed as being equipped with an underground petroleum storage tank used for fuel oil, installed in 1960.	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South 60 m	St. Vincent Hospital located at 60 Cambridge Street, is listed has having seven (7) records of petroleum storage tanks installed from between 1952 and 1973.	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South 160 m	The Immaculata High School located at 211 Bronson Avenue, has records of two (2) petroleum storage tanks installed between 1953 and 1961	This record does present an APEC to the Site due to the up-gradient location and the inferred groundwater flow.
PCA 46: Rail Yards, Tracks and Spurs	North 220 m	The City of Ottawa identified an abandoned railway approximate 220 m north of the Site, and generally in the same linear area, an electric railway in operation from between 1870 through 1950.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

7.3 Areas of Potential Environmental Concern

Based on the PCAs noted in Section 6.2 above, the following APECs on the subject Site were identified and are presented in **Figure 4**:

Table 16: Areas of Potential Environmental Concern (APEC)

APEC	Location	Comments	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	South 220 m	To address the impacts from a spill of a hydraulic oil spill from a garbage truck.	VOCs, PHCs, metals and PAHs	Soil and Groundwater
APEC 2	South 250 m	To address the impacts from a leak of furnace oil into the ground from a UST	VOCs, PHCs, metals and PAHs	Groundwater
APEC 3	On-Site	To address possible impacts associated with historical waste generation on-Site of light fuels	VOCs, PHCs, metals, PAHs and sulfur	Soil and Groundwater
APEC 4	Southeast 100 m	To address possible impacts associated with an up-gradient historical waste generation of PCBs, inorganics, paint, pigments and coating residues, oil skimmings and sludges.	PCBs, VOCs, PHCs, metals and PAHs	Groundwater
APEC 5	Southeast 170 m	To address possible impacts associated with an up-gradient historical waste generation of inorganic and organic lab chemicals, petroleum distillates, aliphatic solvents, alkaline wastes, oils and lubricants.	PCBs, VOCs, PHCs, metals, PAH, chlorides, nitrates, sulfates, general Inorganics	Groundwater
APEC 6	South 60 m	To address possible impacts associated with an up-gradient historical waste generation of pathological wastes, paint, pigments, coating residues, inorganic and organic lab chemicals, aliphatic solvents, petroleum distillates, pharmaceuticals, acid waste, alkaline wastes, waste oils and lubricants, photo processing wastes, heavy fuels, waste compressed gases, light fuels, oil skimmings, sludges.	PAHs, VOCs, PHCs, metals, general inorganics and PCBs	Groundwater
APEC 7	Southeast 170 m	To address possible impacts associated with the historical up-gradient manufacturer/publisher	PAHs, VOCs, PHCs, PCBs, and metals	Groundwater
APEC 8	On-Site	To address possible impacts associated with the heating oil tanks that were previously present in each of the Phase One properties. The tanks have now since been removed.	PAHs, VOCs, BTEX, PHCs, metals, general inorganics and PCBs	Soil and groundwater

APEC 9	On-Site	To address possible impacts associated with possible fill material used to accommodate the parking/driveway area at the southwest corner of 593 Laurier Ave. W.	PAHs, VOCs, PHCs and metals	Soil and groundwater
APEC 10	South 160 m	To address possible impacts associated with the former Centretown Laundry Co-Op, a Laundries and Cleaners which operated at 211 Bronson Avenue.	VOCs	Soil and groundwater
APEC 11	South 160 m	To address possible impacts associated with the former Reupholstery and Furniture Repair facility at 211 Bronson Avenue.	VOCs, Metals	Soil and groundwater
APEC 12	South 85 m	To address possible impacts associated with the former Perfection Printers, a Printing facility which operated at 190 Brons Avenue.	VOCs', PHCs, Metals	Soil and groundwater
APEC 13	South 180 m	To address possible impacts associated with the former Desktop Express Publishing, and Publishing facility which operated at 208 Bronson Avenue.	VOCs', PHCs, Metals	Soil and groundwater
APEC 14	South 120 m	To address possible impacts associated with the underground petroleum storage tank installed in 1960 at 196 Bronson Avenue.	PHCs, VOCs, Metals, PAHs	Soil and groundwater
APEC 15	South 60 m	To address possible impacts associated with the above- and underground petroleum storage tanks installed between 1952 and 1973 at 60 Cambridge Street.	PHCs, VOCs, Metals, PAHs	Soil and groundwater
APEC 16	South 160 m	To address possible impacts associated with petroleum storage tanks installed between 1953 and 1961 at 211 Bronson Avenue.	PHCs, VOCs, Metals, PAHs	Soil and groundwater

Notes : PEC – Potential Environmental Concern
 PHC – Petroleum Hydrocarbons
 PAH – Polycyclic Aromatic Hydrocarbons
 VOC – Volatile Organic Compounds

1 - Area of Potential Environmental Concern (APEC) means the area on, in, or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One ESA, including through:

- (a) Identification of past or present uses on, in, or under the Phase One Property and
- (b) Identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One Study Area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011,

7.4 PCA Exclusion Rationale

As part of this Phase One ESA, additional PCAs were encountered in the vicinity of the Site through the records retrieved. However, select PCAs encountered have been excluded as actual PCAs to the Phase One ESA Property. Exclusion of a PCA is often related to the location of the PCA in relation to the Phase One Property, the direction of groundwater flow, and the results from previous environmental reports pertaining to the Phase One Property (if any). The records excluded are summarized above in previous sections, in addition to the general rationale for their respective exclusion.

Table 18: Potential Contaminating Activity (PCA) Exclusion Rationale

O. Reg 153/04 Schedule D PCA	Location of PCA	Description and Source Information	Rationale
PCA 34: Metal Fabrication	North 300 m	At the west end of Sparks Street and Wellington Street was the Alexander Fleck Foundry. Present in FIPs 1878 to 1963.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Northeast 130 m	A lumber yard located between Slater Street and Maria Street (now Laurier Avenue). Present in FIPs 1901 to 1922.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	North 120 m	A lumber yard located along Commissioners Lane. Present in the 1901 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	Northwest 280 m	Chaudiere Machine & Foundry Co was found in the 1901 to the 1922 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 46: Rail Yards, Tracks and Spurs	Northwest 225	Canadian Atlantic Railway located in between the Lett Street and the pumping station was found in the 1901 to the 1963 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	North 200 m	J.R. Booth Yard was found along the railway in the 1901 to the 1922 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

PCA Other: Factory	Northwest 100 m	A broom factory was located between Wellington Street and Albert Street. Present in FIP 1912.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	North 300 m	Boiler Works, P.J. Powers Co, located in between Sparks and Wellington Street. Present in the 1912 and 1922 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Northwest 260 m	McAuliffe Davis Lumber Co Limited located at the northeast corner of Lett and Fleet Street was found in the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 29: Glass Manufacturing	Northwest 160 m	City Iron & Bottle Co. consists of a machine shop, storage, stock/junk piles and a warehouse. Present on the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 32: Iron and Steel Manufacturing and Processing	Northwest 160 m	City Iron & Bottle Co. consists of a machine shop, storage, stock/junk piles and a warehouse. Present on the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	Northwest 165 m	Oxy-Acetylene Welding located in the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	Northwest 165 m	Oxy-Acetylene Welding located in the 1922 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 10: Commercial Autobody Shop	Northwest 260 m	RCMP Garage, includes two (2) garages and an office/warehouse. Present in the 1948 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	West 165 m	Gasoline Service Station equipped with three (3) underground storage tanks. Present in the 1948 to 1963 FIPs.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

PCA 34: Metal Fabrication	Northeast 140 m	Castings of Ottawa Ltd. (metal castings) consists of a moulding shop, furnace room, office and storage. Present on the 1948 FIP.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 10: Commercial Autobody Shop	North 300 m	An automotive repair garage is equipped with two (2) underground storage tanks and gasoline service station. Present on the 1948 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	North 300 m	An automotive repair garage is equipped with two (2) underground storage tanks and gasoline service station. Present on the 1948 FIP.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 10: Commercial Autobody Shop	East 100 m	An automotive repair garage is identified, following Bronson Avenue, and is equipped with an underground storage tank. Present in the 1948 and 1963 FIPs.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	East 100 m	An automotive repair garage is identified, following Bronson Avenue, and is equipped with an underground storage tank. Present in the 1948 and 1963 FIPs.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	East 250 m	Two (2) underground storage tanks are identified at an apartment complex located at the southeast corner of the intersection of Slater Street and Bay Street. Present in the 1948 FIP.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 170 m	Five (5) records were found for the Rideau Transit Group, located at 529 Albert Street registered as a waste generator of various classes between 2014 to 2019.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	West 90 m	Two (2) records were found for the City of Ottawa Corporate Real Estate Office, located at 555 Albert Street. Registered as waste generators in 2021 to 2022 for light fuels, oil skimming's, sludges and heavy fuels.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.

PCA Other: Waste Generation	Northwest 190 m	Five (5) records were found for the City of Ottawa Transportation, located at 557 Wellington Street. Registered as waste generators between 2011 to 2019 for various waste classes.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 170 m	Six (6) records were found at 473 Albert Street for Property Material Management, Rosont Investment Inc., 2164613 Ontario Inc, and HVAC Maximum Heating & Cooling Inc. Registered as waste generators between 1986 to 2011 for various waste classes.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	East 250 m	Three (3) records were found for Carleton Condominium Corp., located at 500 Laurier Avenue W. From 2003 to 2010, registered as a generator of aliphatic solvent wastes.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 200 m	Three (3) records were found at 434 Queen Street, for Farm Credit Corporation and Tower Committee. Registered as waste generators between 1989 to 2022 for various waste classes.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northeast 160 m	Fifteen records were found for the Ottawa-Carleton District School Board, located at 440 Albert Street. Registered as waste generators between 1986 to 2022 for various waste classes.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northwest 200 m	One (1) record was found for Donalco Inc., located at 10 Fleet Street. Was registered in 2017 as a generator of inorganic sludges, slurries and solids.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northwest 170 m	One (1) record was found for the City of Ottawa Pumping Station, located at 3 Fleet Street. In 2013, registered as a generator of light fuels.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

PCA Other: Waste Generation	North 230 m	One (1) record was found for Gafftech Solutions Inc., located at 443 Queen Street. In 2014, was registered as a generator of aliphatic solvents.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	Northwest 280 m	One (1) record was found for Malhorta Construction Ltd., located at 300 Lett Street. In 2015, registered as a generator of light fuels.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	East 220 m	Twelve records were found for Ottawa-Carleton District School Board, located at 376 Gloucester Street. Registered as waste generators between 2006 to 2022 for various waste classes.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Waste Generation	North 300 m	One (1) record was found for Cathedral Hill, located at 428 Sparks Street. Registered as a generator in 2021 of waste oils and sludges.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Scott's Manufacturing Directory	North 155 m	One (1) record was found for the Planetary Association located at 100 Bronson Ave. Established in 1975, registered as periodical/book publishers, environmental consulting services and a social advocacy organization.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	East 200 m	Eleven records are listed at 529 Albert Street. The spills that occurred involved the following: concrete admixtures, aluminum sulphate, diesel, petroleum oil, and hydraulic oil.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 100 m	One (1) record was found at the intersection of Albert Street and Commissioner Street. In July 1995, an unknown quantity of asphalt sealer leaked from a trailer onto the road.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	East 90 m	One (1) record was found in November 2019 was listed at 556 Laurier Avenue W. Due to material failure, 5 L of fuel oil was leaked onto the ground.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.

PCA Other: Spill	Northeast 95 m	One (1) record was found at 553 Laurier Ave W. In January 1996, due to vandalism, 900 L of furnace oil was leaked into the basement and sanitary sewer works.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 130 m	One (1) record was found on Slater Street, between Bronson Ave and Bay St. In November 2008, 20 L of radiator fluid (coolant) was leaked into nearby catch basins due to equipment failure.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	West 125 m	Two (2) records were found at 670 Albert Street. In August 2015, 10 L of water and dye solution was spilt. Also in October 2015, 15 L of coolant was leaked into the sewers from an OC Transpo bus.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 300 m	Five (5) records were found at the intersection of Wellington Street and Commissioner Street. The spills that occurred involved the following: hydraulic oil, glycol, concrete washer and sediment laden water.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	West 210 m	Five (5) records were found at 584 Wellington Street. From 2011 to 2016, five (5) spills occurred in this area, including three (3) spills of concrete wash out, a small (1L) diesel spill, a small (2L) oil spill and 30 L of coolant.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA Other: Spill	Northwest 180 m	One (1) record was reported from the pumping station located at 10 Fleet Street. In 2011, a sheen was reported on the Ottawa River outside of the pumping station.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA Other: Spill	North 230 m	One (1) record was found at 443 Queen St W. In November 2014, 1400L of propylene glycol was leaked due to equipment failure.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

PCA Other: Spill	Northeast 215 m	One (1) record was found at 435 Albert Street. In January 2018, 12 L of coolant leaked from a bus due to operator error.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	Northwest 120 m	Ottawa Brass Manufacturing Co. at 542 Wellington Street from 1922 to 1965. Small machine shop and brass works making brass and copper products.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 33: Metal Treatment, Coating, Plating and Finishing	Northwest 240 m	Photogelatine Engraving Co. Ltd. at 471 Wellington Street from 1922 to 1940. Small operation, with printers, binders, lithographers, and engravers.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	East 280 m	W.J. Campbell and Sons, Engineering Works at 478-482 Maria Street from 1878 to 1901. Medium size operation, boilermakers.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	East 170 m	Ottawa Car Manufacturing Ltd. Brass Foundry at 422-426 Slater Street from 1920 to 1960. Medium size operation, brass foundry for car works/workshop.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 33: Metal Treatment, Coating, Plating and Finishing	East 170 m	Ottawa Car Manufacturing Ltd. Brass Foundry at 422-426 Slater Street from 1920 to 1960. Medium size operation, brass foundry for car works/workshop.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 17: Dye Manufacturing, Processing and Bulk Storage	Northeast 250 m	Dyeing and Cleaning Works at 200 Bay Street from an unknown time. Medium size operation, cleaners and dyers.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 51: Solvent Manufacturing, Processing and Bulk Storage	Northeast 250 m	Dyeing and Cleaning Works at 200 Bay Street from an unknown time. Medium size operation, cleaners and dyers.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	North 300 m	Vulcan Iron Works at 416-428 Wellington Street from 1865 to 1945. Large operation, founders and machinists, boilermakers	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.

PCA Other: Manufacturing Facility	North 300 m	David Manchester, Clothing Manufacturer at 440-442 Wellington Street from 1885 to 1900. Small manufacturer of ready-made clothing includes a woolen and carding mill.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 34: Metal Fabrication	North 300 m	P.J. Powers & Co. Ltd. / Vulcan Boiler Works at 430-434 Wellington Street from 1890 to 1945. Large operation, boilermakers, boat builders, and machinists.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	Northeast 750 m	There was an old A5 waste disposal site near the Supreme Court Building that closed in 1944.	This record does not present an APEC to the Site due to the trans-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	West 560 m	There was an old A5 waste disposal Site on Broad Street, in the LeBreton Flats that closed in 1920.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	West 800 m	There was an old A5 waste disposal Site in the LeBreton Flats that closed in 1964.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
PCA 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of bio soils as soil conditioners	Northwest 350 m	A former landfill was identified by the City of Ottawa (Unnamed Landfill) west of the intersection of Booth Street and Fleet Street. No additional details were provided.	This record does not present an APEC to the Site due to the down- to trans-gradient location and the inferred groundwater flow.

PCA 46: Rail Yards, Tracks and Spurs	North 220 m	The City of Ottawa identified an abandoned railway approximate 220 m north of the Site, and generally in the same linear area, an electric railway in operation from between 1870 through 1950.	This record does not present an APEC to the Site due to the down-gradient location and the inferred groundwater flow.
---	-------------	---	---

7.5 Uncertainties or Absence of Information

No uncertainties of absence of information has been encountered in the preparation of this report.

7.6 Phase One Conceptual Site Model

7.6.1 Conceptual Site Model Drawing

The location of the Site is shown in the attached **Figure 1** and the current layout of the Site is shown in the attached **Figure 2**. PCAs and APECs are shown in the included **Figure 3**, and **Figure 4**, respectively.

7.6.2 Description and Assessment

The PCAs identified on the Phase One Property, as well as those identified within the Phase One Study Area, were recognized through the records review, interview, and Site reconnaissance. A total of seven (7) PCAs were identified. They are further summarized below in **Table 17** as follows:

Table 17: Summary of Conceptual Site Model – PCAs

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
1	PCA Other: Spill	South	220 m	Ecolog ERIS	28 Primrose Ave. In 2002, a garbage truck leaked an unknown amount of hydraulic oil.	Southern portion of the Site	Potential impact on soil and groundwater
2	PCA Other: Spill	South	250 m	Ecolog ERIS	54 Primrose Ave. In 2008, an unknown amount of furnace oil leaked into the ground from a UST.	Southern portion of the Site	Potential impact on soil and groundwater
3	PCA Other: Waste Generation	On-Site	0	Ecolog ERIS	In 2022, the Dalhousie Housing Co-op registered as a waste generator of light fuels.	Entirety of the Site	Potential impact on soil and groundwater
4	PCA Other: Waste Generation	Southeast	100 m	Ecolog ERIS	111-440 Gloucester St. Between 2002 and 2018, the Bronson Place registered as a waste generator of various classes.	Eastern portion of the Site	Potential impact on soil and groundwater
5	PCA Other: Waste Generation	Southeast	170 m	Ecolog ERIS	Between 1986 and 2021, the Bronson Centre registered as a waste generator of various classes.	Eastern portion of the Site	Potential impact on soil and groundwater
6	PCA Other: Waste Generation	South	60 m	Ecolog ERIS	Between 1986 and 2020, St Vincent Hospital registered as a waste generator of various classes.	Western portion of the Site	Potential impact on soil and groundwater

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
7	PCA Other: Scott's Manufacturing Directory	Southeast	170 m	Ecolog ERIS	Records of a periodic publisher at a civic/social organization were found. No timeline was given in the records.	Eastern portion of the Site	Potential impact on soil and groundwater
8	PCA 41: Petroleum Storage Tank and Oil Heating	On-Site	0	Site Interview	In the interview with the property manager, all three (3) properties had heating oil tanks previously that have since been removed.	Entirety of the Site	Potential impact on soil and groundwater
9	PCA 30: Importation of Fill Materials of Unknown Quality	On-Site	0	Site Visit	The Site has an asphalted parking and circulation area. It is anticipated that to fill material was imported to the property.	Entirety of the Site	Potential impact on soil and groundwater
10	PCA 37: Operation of Dry Cleaning Equipment (where chemicals are used)	South	160	HLUI	Centretown Laundry Co-Op, a Laundries and Cleaners listed in 2005 at 211 Bronson.	Southern portion of the Site	Potential impact on soil and groundwater
11	PCA 39: Paints Manufacturing, Processing and Bulk Storage	South	160	HLUI	Good Day Workshop Reupholstery and Furniture Repair facility which operated from at least 2001 through 2012 at 211 Bronson Avenue.	Southern portion of the Site	Potential impact on soil and groundwater

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
12	PCA 31: Ink Manufacturing , Processing and Bulk Storage	South	85	HLUI	Perfection Printers, a Printing facility which operated in at least 1990 at 190 Bronson Avenue.	Southern portion of the Site	Potential impact on soil and groundwater
13	PCA 31: Ink Manufacturing , Processing and Bulk Storage	South	180	HLUI	Desktop Express Publishing, and Publishing facility in the at least 1990 at 208 Bronson Avenue.	Southern portion of the Site	Potential impact on soil and groundwater
14	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South	120	HLUI	Builders Exchange Building, located at 196 Bronson Avenue, is listed as being equipped with an underground petroleum storage tank used for fuel oil, installed in 1960.	Southern portion of the Site	Potential impact on soil and groundwater
15	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South	60	HLUI	St. Vincent Hospital located at 60 Cambridge Street, is listed as having seven (7) records of petroleum storage tanks installed from between 1952 and 1973.	Southern portion of the Site	Potential impact on soil and groundwater

APEC No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
16	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks	South	160	HLUI	The Immaculata High School located at 211 Bronson Avenue, has records of two (2) petroleum storage tanks installed between 1953 and 1961.	Southern portion of the Site	Potential impact on soil and groundwater

7.6.3 Contaminants of Potential Concern

The contaminants of potential concern related to the identified PCAs are as follows:

Polycyclic Aromatic Hydrocarbons (PAHs);

- Metals;
- General Inorganics;
- Nitrite, Nitrate, Sulphate;
- Polychlorinated Biphenyls (PCBs);
- Volatile Organic Compounds (VOCs);
- Petroleum Hydrocarbons (PHCs)– F1 through F4

7.6.4 Potential for Underground Utilities to Influence the Transportation and Distribution of Contaminates

The underground utilities present on the Phase One ESA Site include Municipal Water Supply Lines and Sanitary Sewer Lines, Hydro Ottawa Infrastructure, and Natural Gas Lines. All of these lines are found throughout the Site.

7.6.5 Available Regional or Site-Specific Geological or Hydrogeological Information

The Phase One ESA Site is found to have generalized surficial geology consisting of glacial Deposits: till, plain; local relief less than 5 m. Generalized bedrock geology is found to be the Ottawa/Eastview Formation which includes dark grey almost black limestone and limestone with some shaly partings: some sandstone in basal part.

According to available MECP water well records, bedrock is found to be between approximate 1.0 and 5.0 m below grade.

Based on available interactive mapping systems, including *The Atlas of Canada – Toporama*, the groundwater flow direction is interpreted to be to the north towards the Ottawa River, located approximately 0.56 km north of the Site.

8 CONCLUSIONS

The Conceptual Site Model shows nine (9) PCAs on and surrounding the property, which have been based on consideration of groundwater flow direction and general attributes of the corresponding records or products identified. The PCAs that affect the Phase One Property include three (3) on-Site PCAs, namely PCA Other for waste generation, PCA 30, which is the importation of fill material of unknown quality and PCA 41 for the previous heating oil tanks that were present. The remaining PCAs are represented by **PCA Other** for Waste Generators, Spills, and Manufacturing Facilities. Each of the PCAs is a contributor to the generated onsite Areas of Potential Environmental Concern (APECs).

APEC 1 was generated due to the presence of PCA Other : Spill for a hydraulic oil spill which occurred approximately 220 m south of the Site according to records available through the Ecolog ERIS report.

APEC 2 was generated due to the record of a previous furnace oil leak at the property located approximately 250 m south of the Site, PCA Other : Spill. The incident record was retrieved through the Ecolog ERIS report.

APEC 3 was generated due to the presence of PCA Other : Waste Generator at the Site. According to available records retrieved through Ecolog ERIS, the Site was registered historically as a generator of light fuels.

APEC 4 was generated due to the presence of PCA Other : Waste Generator for the property located approximately 100 m southeast. According to the Ecolog ERIS report, the facility was listed as a waste generator of PCBs, inorganics, paint, pigments and coating residues, oil skimmings and sludges.

APEC 5 was generated due to the presence of PCA Other : Waste Generator for the property located approximately 170 m southeast. According to the Ecolog ERIS report, the facility was listed as a waste generator of inorganic and organic lab chemicals, petroleum distillates, aliphatic solvents, alkaline wastes, oils and lubricants.

APEC 6 was generated due to the presence of PCA Other : Waste Generator for the property located approximately 60 m south. According to the Ecolog ERIS report, the facility was listed as a waste generator of pathological wastes, paint, pigments, coating residues, inorganic and organic lab chemicals, aliphatic solvents, petroleum distillates, pharmaceuticals, acid waste, alkaline wastes, waste oils and lubricants, photo processing wastes, heavy fuels, waste compressed gases, light fuels, oil skimmings, sludges.

APEC 7 was generated to address the previous up-gradient manufacturer/publisher identified through Ecolog ERIS reports for the property located approximately 170 m southeast.

APEC 8 was generated due to the PCA 41 for the former presence of heating oil tanks in each of the Phase One properties according to the Site Interview.

APEC 9 was generated due to the presence of PCA 30 for the possible fill material used to accommodate the parking circulation area at one of the Phase One properties based on the Site Visit.

APEC 10 was generated due to the presence of PCA 37 for the former Centretown Laundry Co-Op, a Laundries and Cleaners listed in 2005 at 211 Bronson Avenue, approximately 160 m south of the Site.

APEC 11 was generated due to the presence of PCA 39 to address possible impacts associated with the former Reupholstery and Furniture Repair facility at 211 Bronson Avenue, approximately 160 m south of the Site.

APEC 12 was generated due to the presence of PCA 31 to address possible impacts associated with the former Perfection Printers, a Printing facility which operated at 190 Bronson Avenue, approximately 85 m south of the Site.

APEC 13 was generated due to the presence of PCA 31 to address possible impacts associated with the former Desktop Express Publishing, and Publishing facility in the at least 1990 at 208 Bronson Avenue, approximately 180 m south of the Site.

APEC 14 was generated due to the presence of PCA 28 to address possible impacts associated with the underground petroleum storage tank installed in 1960 at 196 Bronson Avenue, approximately 120 m south of the Site.

APEC 15 was generated due to the presence of PCA 28 to address possible impacts associated with the above- and underground petroleum storage tanks installed between 1952 and 1973 at 60 Cambridge Street, approximately 60 m south of the Site.

APEC 16 was generated due to the presence of PCA 28 To address possible impacts associated with petroleum storage tanks installed between 1953 and 1961 at 211 Bronson Avenue, approximately 160 m south of the Site.

The general extents of the APECs are shown in **Figure 4**.

A Phase Two Environmental Site Assessment is recommended to address the identified APECs.

9 LIMITATIONS AND USE OF REPORT

The results of this Phase One ESA should not be considered a warranty that the subject property is free from all contaminants from former and current practices other than those noted in this report, nor that all compliance issues have been addressed.

The findings contained in this report are based on data and information collected during the Phase One ESA of the subject property conducted by LRL Associates Ltd. The conclusions and recommendations are based solely on-site conditions encountered at the time of our inspection on August 14th, 2024, supplemented by historical information and data obtained as described in this report. No assurance is made regarding changes in conditions subsequent to the time of this investigation. If additional information is discovered or obtained, LRL Associates Ltd. should be requested to re-evaluate the conclusions presented in this report and to provide amendments as required.

In evaluating the subject property, LRL Associates Ltd. has relied in good faith on information provided by individuals, as noted in this report. We assume that the information provided is factual and accurate. We accept no responsibility for any deficiencies, misstatements or inaccuracies contained in this report as a result of omissions, misinterpretation or fraudulent acts of the persons contacted.

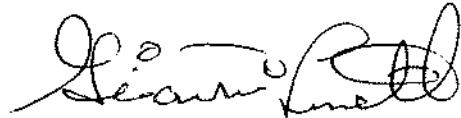

This report is intended for the sole use of Heritage Investments Ltd. and their authorized agents. LRL Associates Ltd. will not be responsible for any use of the information contained within this report by any third party.

In addition, LRL Associates Ltd. will not be responsible for the real or perceived decrease in the property value, its saleability or ability to gain financing, through the reporting of information.

Yours truly,
LRL Associates Ltd.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

RE: CITY DIRECTORY RESEARCH
601 Laurier Ave W
Ottawa, ON K1R 6K9

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

550 of Albert Street
140-175 of Bronson Avenue
1-60 of Cambridge Street N
590-605 of Laurier Avenue W

Search Notes:

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Note: Substances included on NPRI reports for this NPRI ID are summarized below in the NPRI ID Substances Summary section. Substances listed in the Substances Summary are included on the basis of NPRI ID only. For entities (NPRI ID) with mobile plants and/or more than one facility location, substances listed above may or may not have been reported for specific facilities/mobile locations. The list of substances additionally includes those which have been included on the NPRI report with an unknown quantity or a quantity of 0.

For specific details about substance quantities, years, release/transfer/disposal methods, the reader is referred the facility report:

<https://pollution-waste.canada.ca/national-release-inventory/?fromYear=1993&toYear=2022&name=10178>

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on

information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

Act(s):**First Matter:****Second Matter:****Investigation 1:****Investigation 2:****Penalty Imposed:****Description:**

On August 13, 2009, Veolia ES Canada Services Industriels Inc. pled guilty to failing to comply with a condition of a Provisional Certificate of Approval for a waste management system. The Court heard that during the course of an investigation, ministry officials became aware that the company was involved in transporting waste between Ontario and Quebec. Ministry records confirmed that one of the companies hauling waste for Veolia ES Canada Services Industriels Inc. was not authorized and no Certificate of Approval had been issued. The company had not reported the additional vehicles to the ministry. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$8,000 plus a victim fine surcharge, and was given sixty days to pay.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNR), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Apr 2024

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -May 2024

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-May 2024

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jun 30, 2024

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2024

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jun 30, 2024

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Apr 30, 2024

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2024

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2023

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2024

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2022

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory 1993-2020:

Federal

[NPR2](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2024

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jun 30, 2024

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Apr 30, 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI:

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jun 30, 2024

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial **RSC**

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2024

Retail Fuel Storage Tanks:

Private **RST**

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory:

Private **SCT**

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial **SPL**

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in Mar 2023-Mar 2024 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Jan 2023; see description

Wastewater Discharger Registration Database:

Provincial **SRDS**

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks:

Provincial **VAR**

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Audit No.: C 48449

Well Abandonment
Person Abandoning the Wells:
Name: n/a
(Print or Type) - See instruction 11 on the back of this form

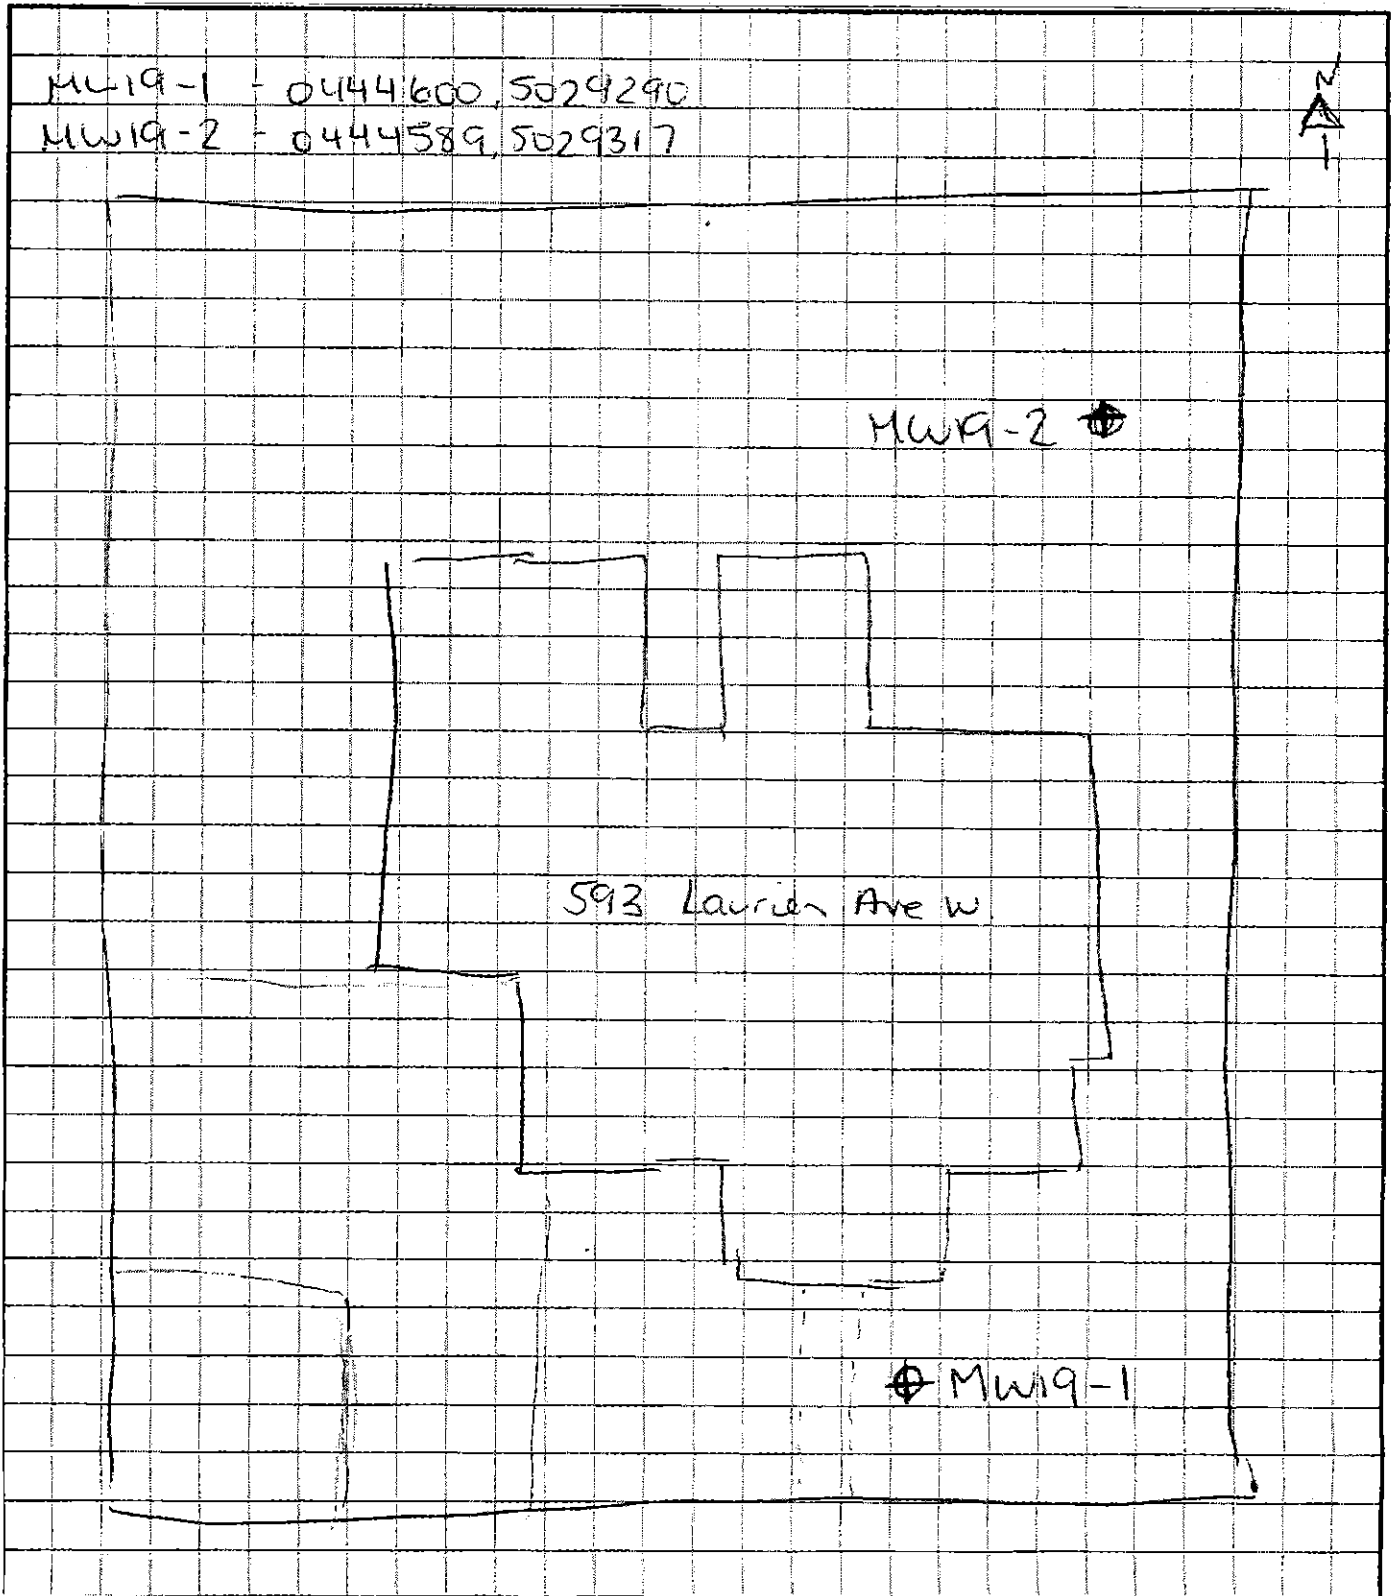

Comments:

Note: This Well Record for Well Cluster Part 3 - Detailed Drawing of all Well Locations, must be attached to Parts 1 and 2. The drawing must include all property boundaries, an arrow indicating the North direction, all named roads and sufficient measurements to locate all wells in the cluster in relation to fixed points. The drawing must show the location of each well and each well must be numbered on the drawing to match number used for that well on the Well Record for Well Cluster Parts 1 and 2. The well with the well tag must be clearly identified on the Drawing.

UTM coordinates should appear beside each well, if space permits. Additional comments on wells can be included on the drawing

Signature of Technician/Contractor Date (yyyy/mm/dd) 2020/05/04

Well Details

Table with columns: Well # on Drawing, UTM Coordinates (Zone, Easting, Northing), Hole Depth (m/ft), Hole Diameter (cm/in), Method of Construction, Casing Material; Diameter (cm/in), Casing (m/ft) (From, To), Screen Interval (m/ft) (From, To), Annular Space Material (m/ft) (From, To, Material), Overburden/Bedrock or Abandonment Filing Material Intervals (m/ft), Static Water Level (m/ft), Date of Completion (yyyy/mm/dd). Rows 19-3 to 19-9.

Well Contractor and Well Technician Information

Business Name of Well Contractor: GEORGE DOWNING ESTATE DRILLING
Business Address: 410 RUE PRINCIPALE GRENVILLE-SUR-LA-ROUGE QC
Well Contractor's Licence No.: 1844
Business E-mail Address: info@georgedowningdrilling.com
Name of Well Technician: STEPHEN DOWNING
Well Technician's Licence No.: 3326
Date Submitted: 2020/05/04

Date First Well in Cluster Constructed or Abandoned (yyyy/mm/dd): 2020/04/20
Date Last Well in Cluster Completed (yyyy/mm/dd): 2020/04/20

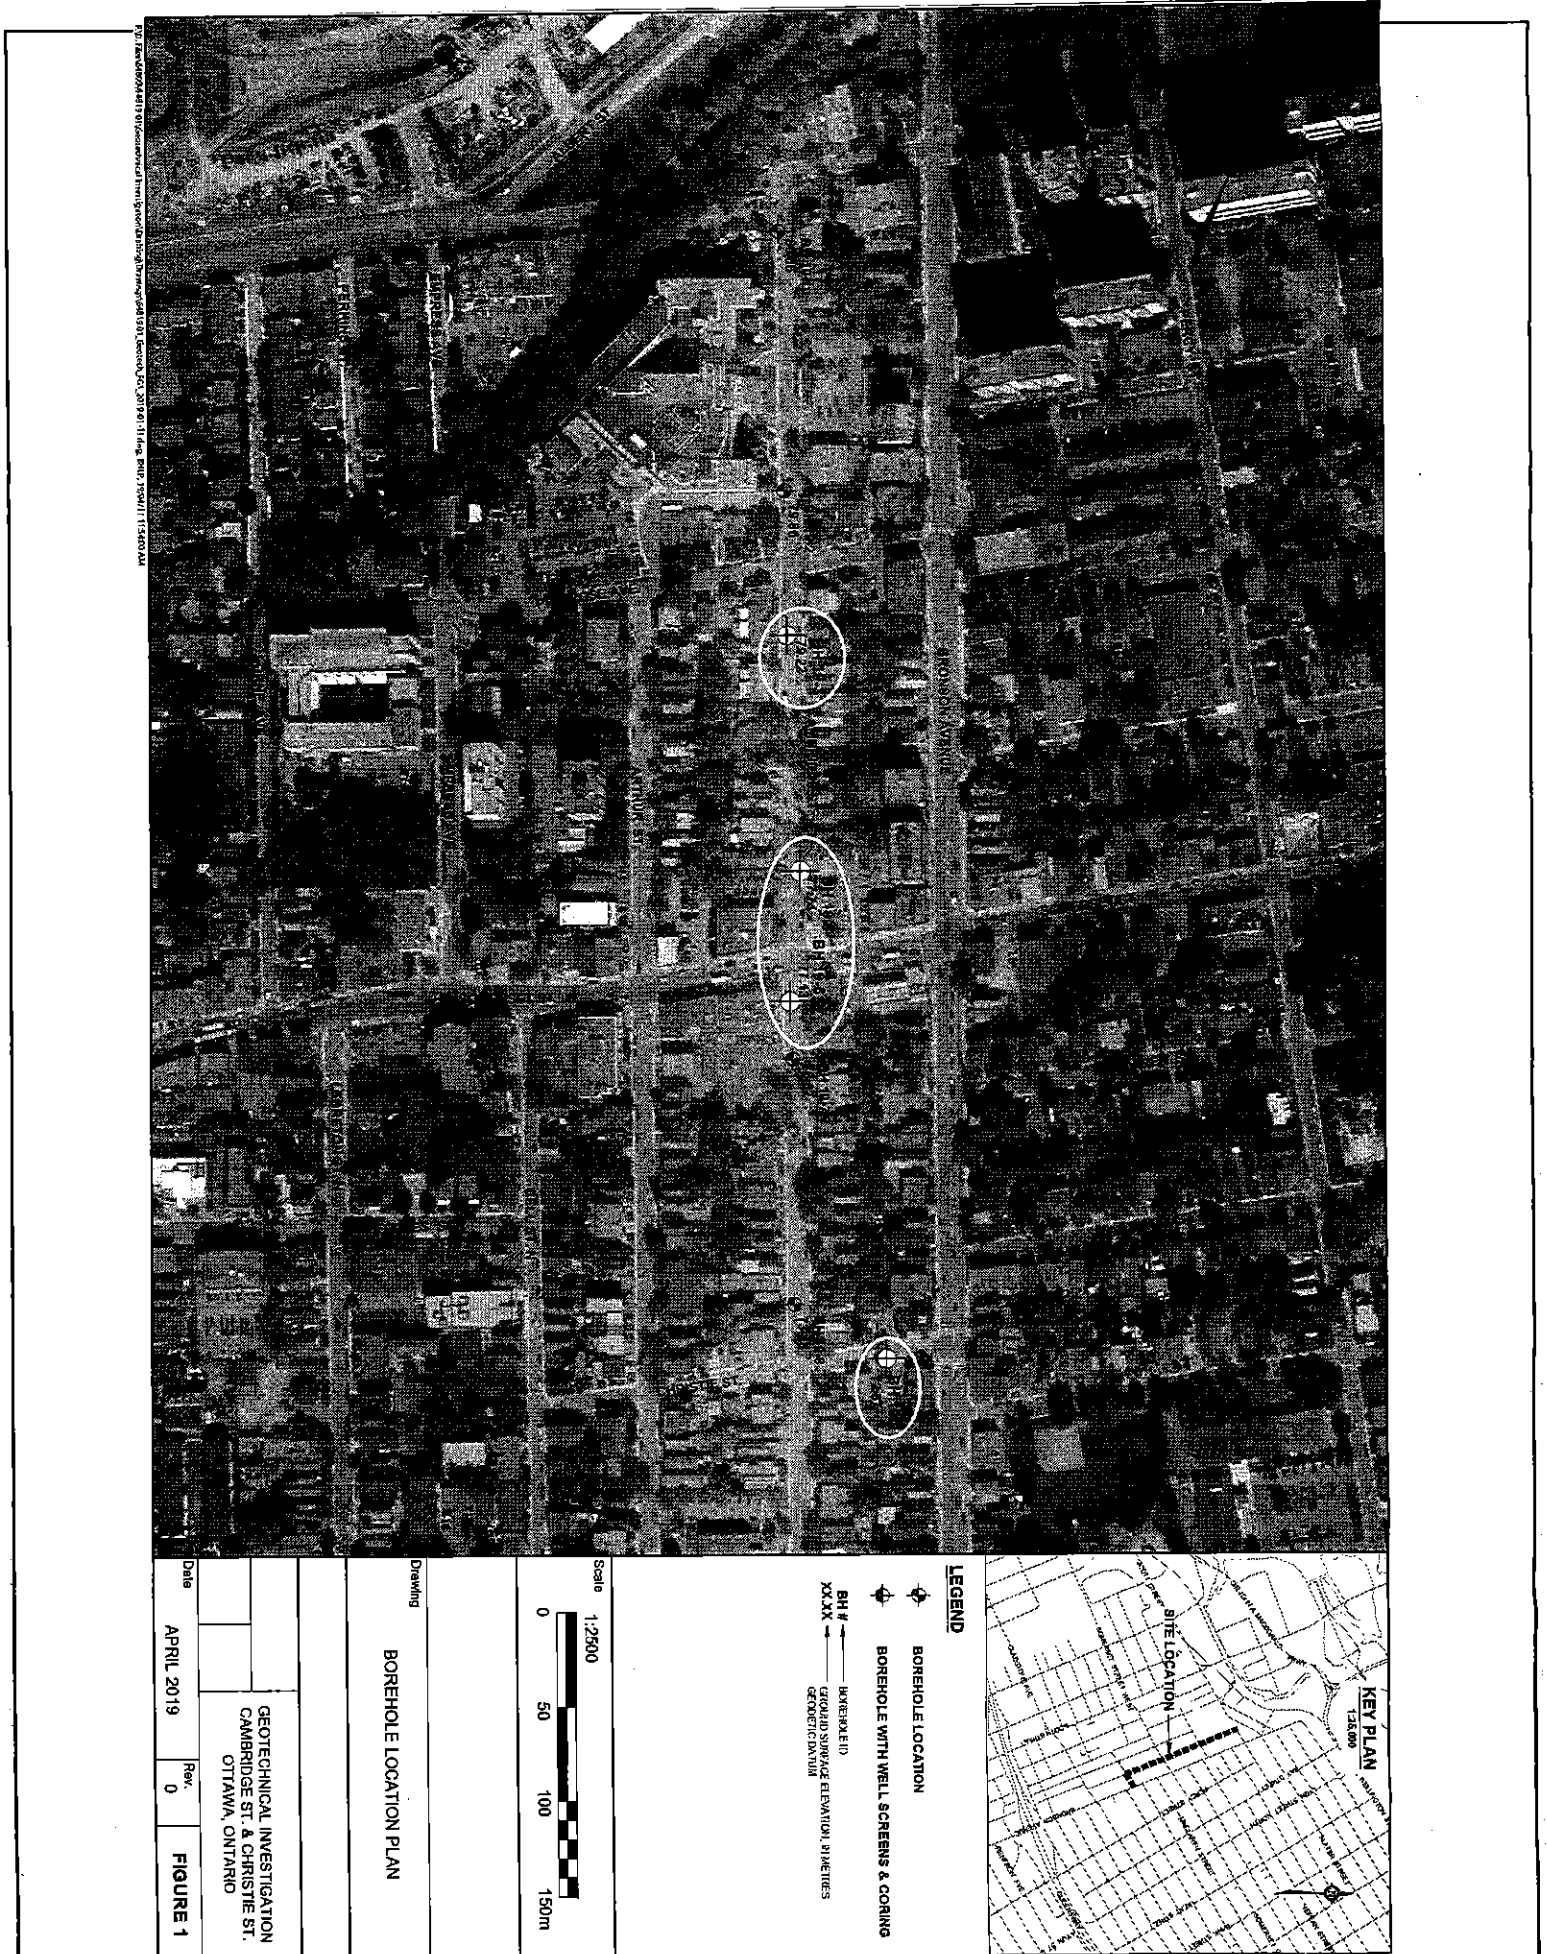

Ministry Use Only
Date Received (yyyy/mm/dd): MAY 27 2020
Audit No.: C 48491

Well Abandonment
Person Abandoning the Wells:
Name: CITY OF OTTAWA
(Print or Type) - See instruction 11 on the back of this form

Note: This Well Record for Well Cluster Part 3 - Detailed Drawing of all Well Locations, must be attached to Parts 1 and 2. The drawing must include all property boundaries, an arrow indicating the North direction, all named roads and sufficient measurements to locate all wells in the cluster in relation to fixed points. The drawing must show the location of each well and each well must be numbered on the drawing to match number used for that well on the Well Record for Well Cluster Parts 1 and 2. The well with the well tag must be clearly identified on the Drawing.
UTM coordinates should appear beside each well, if space permits. Additional comments on wells can be included on the drawing

Well Tag Number: # A251271, A251303

"Well Record for Well Cluster" Form Audit Number: # C48491

C-1844 C48491

Map: Well records

Photograph No. 18	
Date: 8/15/2024	
Description 601 Laurier Ave W Walkway on the east side of the building that runs to the back of the property.	

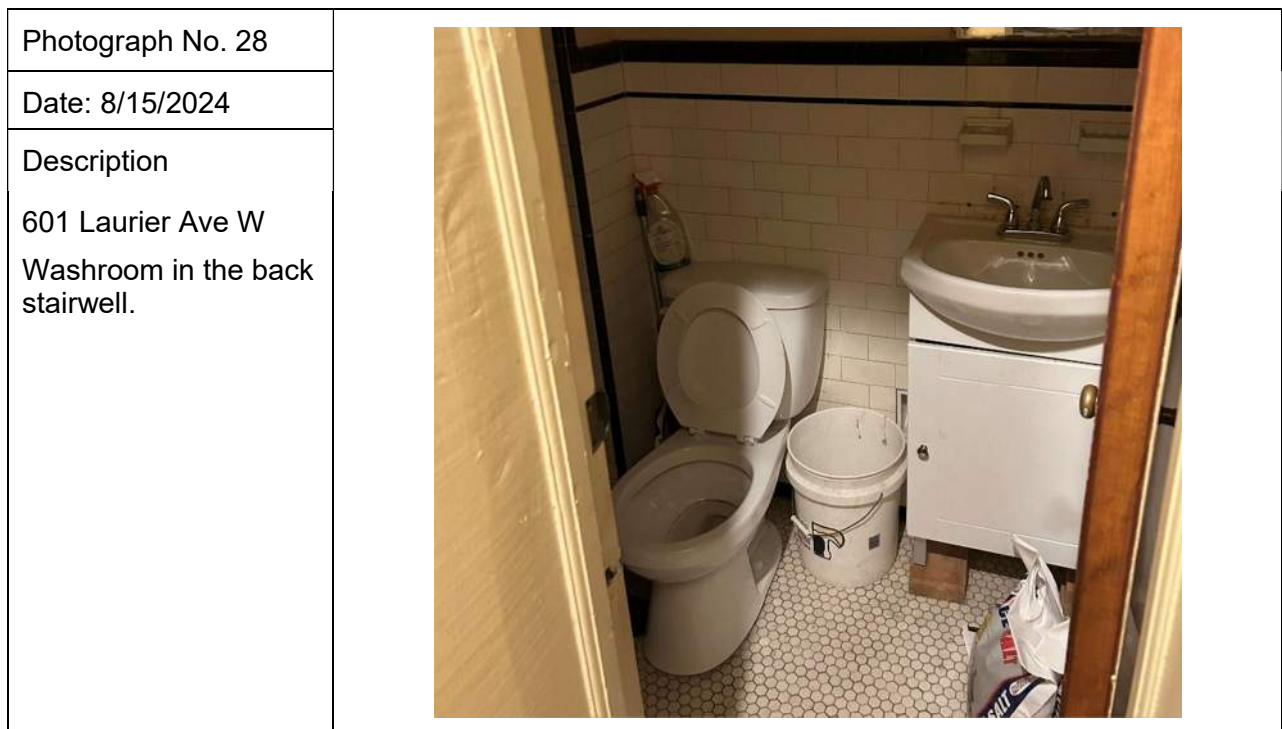

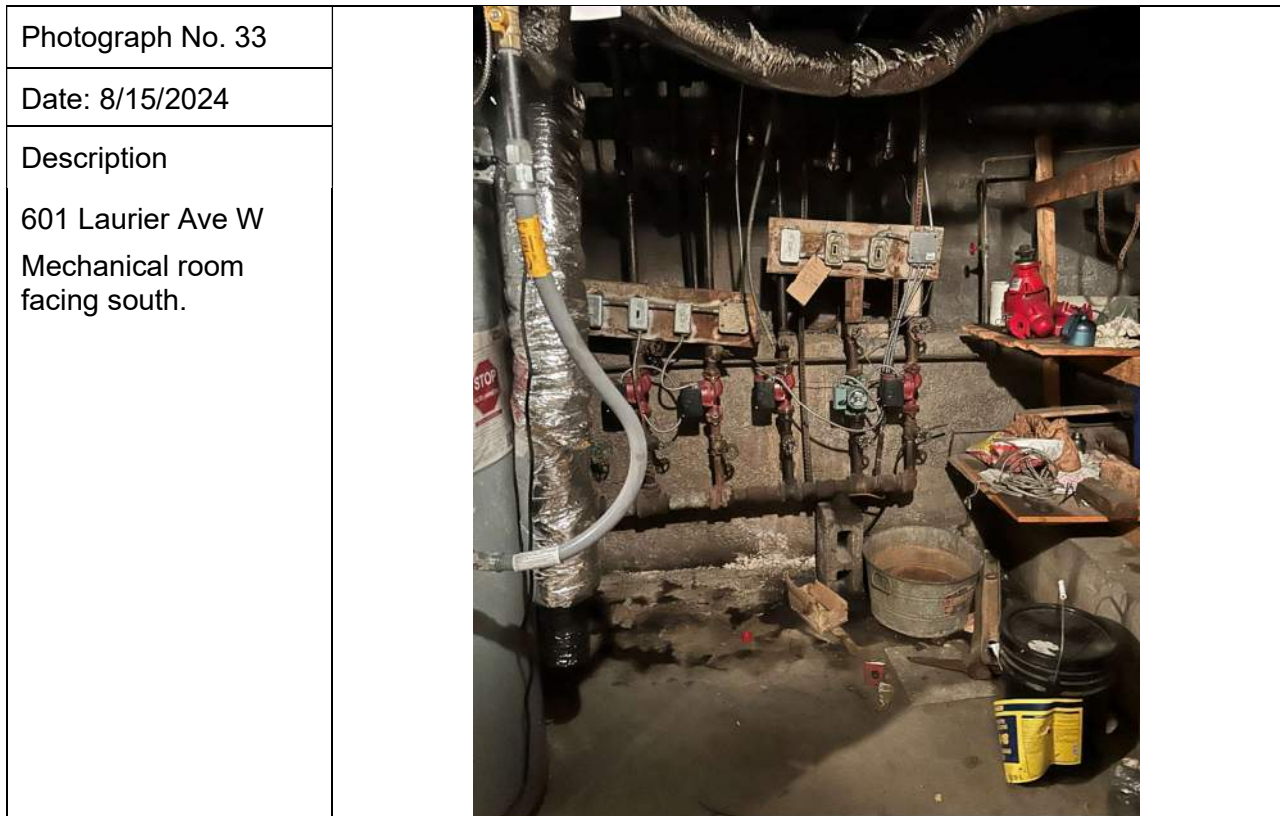

Photograph No. 31	
Date: 8/15/2024	
Description 601 Laurier Ave W Tenant storage area beside the laundry machines.	

Photograph No. 32	
Date: 8/15/2024	
Description 601 Laurier Ave W Mechanical room facing the western exterior wall.	

Photograph No. 39	
Date: 8/15/2024	
Description 601 Laurier Ave W Possible previous cold storage room (door was locked). Located inside the laundry area. Maintenance storage shelves (tacks, sealant, garbage bags, etc.). All sealed and properly labelled.	

Photograph No. 40	
Date: 8/15/2024	
Description 593 Laurier Ave W Front entrance facing north.	

Photograph No. 41	
Date: 8/15/2024	
Description 593 Laurier Ave W Front parking area and garage facing north.	 A photograph showing the front parking area and garage of a brick building. The building is constructed of red brick with a stone foundation. A dark brown garage door is visible on the ground floor. Above it is a window with a flower box. To the right, there is a taller window. The foreground is filled with green bushes and a green trash bin is visible on the left. A paved area leads to the garage.

Photograph No. 42	
Date: 8/15/2024	
Description 593 Laurier Ave W Front side of the house, facing northeast.	 A photograph showing the front side of a brick house, facing northeast. The building is constructed of red brick with a stone foundation. A prominent arched window is visible on the ground floor. Above it is a smaller window. The roof is dark and appears to be made of shingles. A brown downspout runs vertically down the side of the building. The foreground is filled with green bushes and a black metal ladder is visible against the stone foundation.

Photograph No. 43	
Date: 8/15/2024	
Description 593 Laurier Ave W Gas meter located on the parking area at the western side of the building.	

Photograph No. 44	
Date: 8/15/2024	
Description 593 Laurier Ave W Driveway leading up to the parking area off Laurier Ave.	

Photograph No. 45	
Date: 8/15/2024	
Description 593 Laurier Ave W Staircase from the Laurier Ave sidewalk to the front walkway.	

Photograph No. 46	
Date: 8/15/2024	
Description 593 Laurier Ave W Eastern extent of the property. Side door entrance. Backyard gate next to retaining wall.	

Photograph No. 47	
Date: 8/15/2024	
Description 593 Laurier Ave W Back of the house facing the alley between the sunroom and a backdoor.	

Photograph No. 48	
Date: 8/15/2024	
Description 593 Laurier Ave W Orange mold identified on one (1) of the backdoors to the backyard.	

Photograph No. 49	
Date: 8/15/2024	
Description 593 Laurier Ave W Facing south from the backyard towards the house.	 A photograph of a brick building with a stone foundation. The building features a large arched window on the upper level and two smaller windows on the lower level. The foreground is filled with green foliage.

Photograph No. 50	
Date: 8/15/2024	
Description 593 Laurier Ave W Facing south from the backyard along the eastern property extent.	 A photograph showing a narrow alleyway between brick buildings. The building on the right has a stone foundation and a brick upper section. The foreground is filled with green foliage.

<p>Photograph No. 51</p>	
<p>Date: 8/15/2024</p>	
<p>Description</p> <p>593 Laurier Ave W Facing southwest (601 Laurier Ave seen in the back) along the western extent of the property. Wood skid pile identified.</p>	

<p>Photograph No. 52</p>	
<p>Date: 8/15/2024</p>	
<p>Description</p> <p>593 Laurier Ave W Facing south along the western wall of the building. Discoloration in the brick due to extension/renovation done to turn the building into multi-unit.</p>	

Photograph No. 53	
Date: 8/15/2024	
Description 593 Laurier Ave W Hallway with wooden floors, doors and wall panels.	

Photograph No. 54	
Date: 8/15/2024	
Description 593 Laurier Ave W Basement stair landing showing the basement apartment's door and heating unit.	

Photograph No. 55	
Date: 8/15/2024	
<p>Description</p> <p>593 Laurier Ave W Basement storage room. Vault door on the left side and storage shelves for items including paint, antifreeze, and cleaning supplies. All properly labelled and sealed.</p>	 A photograph of a basement storage room. On the left is a dark, heavy vault door. To the right, there are wooden shelves filled with various containers, including paint cans, antifreeze jugs, and other cleaning supplies. A wooden cabinet with a dark mesh door is visible in the foreground. The ceiling has a single light fixture, and the floor is made of wooden planks.

Photograph No. 56	
Date: 8/15/2024	
<p>Description</p> <p>593 Laurier Ave W Basement laundry area.</p>	 A photograph of a basement laundry area. A white front-loading washing machine is in the center, with its lid open. To its right is a white dryer. In the foreground, there is a dark-colored utility tub. The room features exposed pipes, a green-painted wall, and a concrete floor. Several bottles of laundry detergent are on a counter to the left.

Photograph No. 59	
Date: 8/15/2024	
Description 593 Laurier Ave W Mechanical room equipment.	

Photograph No. 60	
Date: 8/15/2024	
Description 593 Laurier Ave W Basement maintenance area.

Date: 8/15/2024	
Description 593 Laurier Ave W Staircase landing, access to two (2) upper units.	

APPENDIX J

Table 2 of Schedule D of O. Reg. 153/04

Ontario Regulation 153/04 – Schedule D
Summary of Potentially Contaminating Activities & Areas of Potential Environmental Concern

Acid and Alkali Manufacturing, Processing and Bulk Storage	Explosives and Firing Range	Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
Adhesives and Resins Manufacturing, Processing and Bulk Storage	Fertilizer Manufacturing, Processing and Bulk Storage	Pharmaceutical Manufacturing and Processing
Airstrips and Hangars Operation	Fire Retardant Manufacturing, Processing and Bulk Storage	Plastics (including Fibreglass) Manufacturing and Processing
Antifreeze and De-icing Manufacturing and Bulk Storage	Fire Training	Port Activities, including Operation and Maintenance of Wharves and Docks
Asphalt and Bitumen Manufacturing	Flocculants Manufacturing, Processing and Bulk Storage	Pulp, Paper and Paperboard Manufacturing and Processing
Battery Manufacturing, Recycling and Bulk Storage	Foam and Expanded Foam Manufacturing and Processing	Rail Yards, Tracks and Spurs
Boat Manufacturing	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Rubber Manufacturing and Processing
Chemical Manufacturing, Processing and Bulk Storage	Gasoline and Associated Products Storage in Fixed Tanks	Salt Manufacturing, Processing and Bulk Storage
Coal Gasification	Glass Manufacturing	Salvage Yard, including automobile wrecking
Commercial Autobody Shops	Importation of Fill Material of Unknown Quality	Soap and Detergent Manufacturing, Processing and Bulk Storage
Commercial Trucking and Container Terminals	Ink Manufacturing, Processing and Bulk Storage	Solvent Manufacturing, Processing and Bulk Storage
Concrete, Cement and Lime Manufacturing	Iron and Steel Manufacturing and Processing	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
Cosmetics Manufacturing, Processing and Bulk Storage	Metal Treatment, Coating, Plating and Finishing	Tannery
Crude Oil Refining, Processing and Bulk Storage	Metal Fabrication	Textile Manufacturing and Processing
Discharge of Brine related to oil and gas production	Mining, Smelting and Refining; Ore Processing; Tailings Storage	Transformer Manufacturing, Processing and Use
Drum and Barrel and Tank Reconditioning and Recycling	Oil Production	Treatment of Sewage equal to or greater than 10,000 litres per day
Dye Manufacturing, Processing and Bulk Storage	Operation of Dry Cleaning Equipment (where chemicals are used)	Vehicles and Associated Parts Manufacturing
Electricity Generation, Transformation and Power Stations	Ordnance Use	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
Electronic and Computer Equipment Manufacturing	Paints Manufacturing, Processing and Bulk Storage	Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
Explosives and Ammunition Manufacturing, Production and Bulk Storage	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	

APPENDIX K
Historical Land Use Inventory Records

Olivia Wanamaker
LRL Engineering

Sent via email owanamaker@lrl.ca

Dear Olivia Wanamaker,

**Re: Information Request
593, 601, 603 Laurier Avenue West Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The Environmental Remediation Unit does not have any environmental records for this property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** No records found for this property.
- **Solid Waste Services:** No records found for this property.

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('ADDRESS – HLUI Summary report.xlsx'), please refer to the [Overview and User Guide](#).”

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House

Fax: (613) 239-1422

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Nathan Li
