## **Limitations and Sign-off**

The conclusions in the Report titled Phase One Environmental Site Assessment: Proposed Development Hamilton Avenue, Spencer Avenue, Parkdale Avenue, Armstrong Street, Ottawa, Ontario are Stantec's professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient's own risk.

Stantec has assumed all information received from Taggart Realty Management/ 1000147699 Ontario Inc. (the "Client") and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec's contract with the Client. While the Report may be provided to applicable authorities having jurisdiction and others for whom the Client is responsible, Stantec does not warrant the services to any third party. The report may not be relied upon by any other party without the express written consent of Stantec, which may be withheld at Stantec's discretion.

## **Executive Summary**

Stantec Consulting Ltd. (Stantec) was retained by Taggart Reality Management/1000147699 Ontario Inc. (Taggart) to conduct a Phase One Environmental Site Assessment (ESA) of the properties bounded by Spencer Street, Hamilton Avenue North, Parkdale Avenue, and Armstrong Street (the Phase One Property) in Ottawa, Ontario. These properties are broadly referred to as the “Block”. The municipal addresses for the properties within the Block are 3 Hamilton Avenue North (which includes units 5, 7A, 7B, and 340 Parkdale Avenue); and 223, 229, and 233 Armstrong Street.

The Phase One ESA was completed to determine if Areas of Potential Environmental Concern (APECs) exist at the Phase One Property, which may be present as a result of current and/or past potentially contaminating activities (PCAs) on the Phase One Property or nearby properties within 250 m of the perimeter of the Phase One Property (Phase One Study Area). Stantec understands that the Phase One ESA is required to support the re-development of the Phase One Property from its current commercial land use to a mixed commercial and residential land use. Due to the proposed change of land use, Taggart is required to file a Record of Site Condition (RSC) under Ontario Regulation 153/04 (O.Reg.153/04).

A site survey is provided in **Appendix A**, while site plans showing the Phase One Study Area and Phase One Property are included in **Appendix B**.

## **Site Description and Current Operations**

Based on the historical information gathered during the Phase One ESA, the Phase One Property and surrounding Study Area were generally vacant/undeveloped or of residential property use prior to 1920. From 1920 until present day, the Phase One Property and surrounding Study Area has been developed for mixed residential/commercial/light industrial uses. Based on aerial photography, the Phase One Property underwent its first major development sometime between 1928 and 1958, and the buildings appears to be of similar configuration as present day.

At the time of the site visit, the Site consisted of multiple multi-tenant buildings, a paved parking area, and an inaccessible grassy/treed courtyard area. Current operations included a pet salon, a home hardware storage space (hardwood and tile storage), a storage service, several small coffee shops, and upholsterer, a bicycle shop, a tattoo parlor, a workout space, and a pub.

## **Previous Investigations**

A number of previous environmental and geotechnical reports were provided to Stantec for review including a Phase I ESA, a Phase II ESA, geotechnical investigations, and Remedial Action Plans (RAPs) completed by a number of consultants between 2005 to 2021.

The most recent Phase I ESA completed by Paterson Group Inc. (Paterson) in October 2011 identified six PCAs contributing to two on-site APECs and 13 PCAs located at 11 off-site properties within the 250 m of the Block that were not determined to result in APECs.

Paterson completed a Phase II ESA simultaneously with the Phase I ESA. The Phase II ESA completed by Paterson identified chlorinated solvent impacts in the groundwater at the Block ranging from marginal exceedances to concentrations approximately 700 times the applicable standard. The chlorinated solvents and other observed impacts included: tetrachloroethylene (PCE), trichloroethylene (TCE), vinyl chloride, benzene, 1,2-dichloroethane, and 1,1-dichloroethylene (DCE). Paterson also developed a RAP in conjunction with the Phase I and Phase II ESAs to be implemented prior to the re-development of any portion of an Area of Environmental Concern (AEC). The RAP recommended a full-depth remediation approach, including pumping and treatment of impacted groundwater to be undertaken concurrently with site redevelopment.

## Conclusions and Recommendations

The Phase One ESA has revealed 17 APECs at the Site.

| APEC | Location of APEC on Phase One Property  | PCA                                                                                                                                    | Location of PCA (on-site or off-site) | Contaminants of Potential Concern <sup>1</sup>                                                                             | Media Potentially Impacted (Ground water, soil and/or sediment) |

<sup>1</sup> Contaminants include petroleum hydrocarbons (PHCs), volatile organic compounds (VOCs), benzene, toluene, ethylbenzene, and xylenes (BTEX), polycyclic aromatic hydrocarbons (PAHs), electrical conductivity (EC), Sodium Adsorption Ratio (SAR), metals.

The table below briefly summarizes the APECs and associated PCAs at the Site. Based on the findings of the Phase One ESA, it is our opinion that there are areas of potential environmental concern with respect to soil and groundwater quality. A Phase Two ESA would be required to assess those issues before a Record of Site Condition could be submitted for the Phase One ESA Property.

The statements made in this Executive Summary are subject to the same limitations included in the Closure (**Section 7.4**) and are to be read in conjunction with the remainder of this report

# 1 Introduction

## 1.1 Phase One Property Information

Stantec Consulting Ltd. (Stantec) was retained by Taggart Reality Management/1000147699 Ontario Inc. (Taggart) to conduct a Phase One Environmental Site Assessment (ESA) of the properties bounded by Spencer Street, Hamilton Avenue North, Parkdale Avenue, and Armstrong Street (the Phase One Property) in Ottawa, Ontario. These properties are broadly referred to as the “Block”. The municipal addresses for the properties within the Block are 3 Hamilton Avenue North (which includes units 5, 7A, 7B, and 340 Parkdale Avenue); and 223, 229, and 233 Armstrong Street.

The property identification number (PIN), owner, and legal description for each parcel comprising of the Phase One Property are provided in **Table 1**.

**Table 1 Legal Descriptions of the Phase One Property**

| Location ID                    | Property Address(es)                          | PIN and Owner                                      | Legal Description                                                                                         |
|--------------------------------|-----------------------------------------------|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| Northern portion of the Block  | 3 Hamilton Avenue North                       | PIN 04035-0144<br>1000147699 Ontario Inc.          | LT 1156, PL 157; LTS 1158 & 1159, PL 157; LT 1161, PL 157; OTTAWA                                         |
| Southwest portion of the Block | 233 Armstrong Street, 7 Hamilton Avenue North | PIN 04035-0145<br>1000147699 Ontario Inc.          | LT 1163, PL 157; LT 1165, PL 157; OTTAWA                                                                  |
| Southeast portion of the Block | 229 Armstrong Street                          | PIN 04035-0146<br>Linda Saikaley                   | PT LT 1160, PL 157; PT LT 1162, PL 157, PART 2 & 3, 4R1186; S/T CR664868; OTTAWA                          |
| Southeast portion of the Block | 223 Armstrong Street                          | PIN 04035-0147<br>Carleton Tavern (Ottawa) Limited | PT LT 1160, PL 157; PT LT 1162, PL 15 ; PT 1, 4R1186; AS IN NS89155 EXCEPT CR664868, T/W CR664868; OTTAWA |

The Phase One ESA was completed to determine if Areas of Potential Environmental Concern (APECs) exist at the Phase One Property, which may be present as a result of current and/or past potentially contaminating activities (PCAs) on the Phase One Property or nearby properties within 250 m of the perimeter of the Phase One Property (Phase One Study Area). Stantec understands that the Phase One ESA is required to support the re-development the Phase One Property from its current commercial land use to a mixed commercial and residential land use. Due to the proposed change of land use, Taggart is required to file a Record of Site Condition (RSC) under Ontario Regulation 153/04 (O.Reg.153/04).

A site survey is provided in **Appendix A**, while site plans showing the Phase One Study Area and Phase One Property are included in **Appendix B**.

**1 Introduction**

February 7, 2025

## 1.2 Contact Information

The Phase One Property is owned by Taggart. Stantec understands that Taggart recently purchased all properties on the Block, and that the titles provided for review do not necessarily reflect the updated ownership, particularly PINs 04035-0146, and 04035-0147.

Access to the Phase One Property was arranged by Viktoriya Neadow, Assistant Property Manager at Taggart, and Mikala DeMarchi, Junior Property Manager at Taggart. Access to individual properties at the Block was granted by tenants on site at the time of the site visit on March 17, 2023. Contact details for Viktoriya Neadow and Mikala DeMarchi are provided in **Table 2** below.

**Table 2                  Contact Information**

| <b>Name</b>      | <b>Position</b>            | <b>Company</b> | <b>Telephone</b>      | <b>Address</b>                                           |
|------------------|----------------------------|----------------|-----------------------|----------------------------------------------------------|
| Viktoriya Neadow | Assistant Property Manager | Taggart        | 613-234-7000 ext. 585 | 225 Metcalfe Street, Suite 708, Ottawa, Ontario, K2P 1P9 |
| Mikala DeMarchi  | Junior Property Manager    | Taggart        | 613-234-7000 ext. 584 | 225 Metcalfe Street, Suite 708, Ottawa, Ontario, K2P 1P9 |

## **2 Scope of Investigation**

### **2.1 Phase One ESA Scope of Work**

The Phase One ESA was completed to determine if APECs exist at the Phase One Property, which may be present as a result of current and/or past PCAs on the Phase One Property or nearby properties within 250 m of the perimeter of the Phase One Property (Phase One Study Area). Stantec understands the filing of an RSC by Taggart is required under O.Reg.153/04. The objectives of the Phase One ESA included the following:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property.
- To assess the need for a Phase Two ESA.
- To provide a basis for carrying out a Phase Two ESA, if necessary.
- To provide adequate preliminary information about the environmental condition of in the land or water on, in or under the Phase One Property to conduct a risk assessment following completion of a Phase Two ESA, if necessary.

The Phase One ESA is intended to reduce, but not necessarily eliminate, uncertainty regarding the potential for contamination at a property. The Phase One ESA carried out by Stantec on this property generally satisfied the requirements of O.Reg.153/04, and consisted of the following:

- Records review including, but not limited to, publicly available aerial photographs, city directories, environmental databases, landfill inventory, geological and topographic maps
- Purchase of a database report from Environmental Risk Information Services (ERIS) that consisted of a search of available databases within a 250 m radius of the perimeter of the Site
- Request for fire insurance plans (FIPs) and/or property underwriters' reports/plans associated with the Site from Opta Information Intelligence (Opta)
- A request submitted to the Ministry of Environment, Conservation, and Parks (MECP) Freedom of Information and Protection of Privacy Office included a search for occurrence reports and general information from the District Office, investigation documents from the Investigations and Enforcement Branch, and orders from the Sector Compliance Branch pertaining to the municipal addresses of the Site and current/former tenants and owners of the Site.
- Review of available environmental databases and records
- Review of previous environmental reports and existing title searches, if made available
- Interviews with persons having specific knowledge of the Phase One Property, if available

- A site reconnaissance to identify PCAs associated with:
  - Current on-site operations
  - Waste generation
  - Fuel, chemical and waste storage
  - Exterior conditions including surface features, fill material and wells
  - Potential off-site activities and operations in the Phase One Study Area
- Evaluation of information from records reviewed, interviews and site reconnaissance
- Preparation of the Phase One ESA report.

A Phase One ESA does not include sampling or testing of air, soil, ground water, surface water or building materials. This assessment did not include a review or audit of compliance with any environmental legislation applicable to the Phase One Property, or of any environmental management systems which may exist for the Phase One Property.

A site reconnaissance was conducted at the Phase One Property by Romeet Gonsalves, B.Sc., G.I.T., of Stantec, on March 17, 2023. The Phase One Property and readily visible and publicly accessible portions of nearby properties within the Phase One Study Area were observed for PCAs. Stantec was unaccompanied during the site visit but was provided access to the units within the Block by individual tenants of each unit. No interviews were conducted with persons associated with the Site during the Phase One ESA; however, brief description of daily operations were provided by some tenants on site. Relevant details from these discussions are included in the appropriate sections of this report.

## **2.2 Regulatory Framework**

In Ontario, the roles and powers of the MECP when dealing with contaminated sites are outlined primarily in the *Environmental Protection Act* (R.S.O. 1990). The MECP has a mandate to address conditions where there is an adverse effect, or the likelihood of an adverse effect, associated with the presence or discharge of a contaminant. O.Reg.153/04 provides roles and responsibilities for property owners and consultants to use when assessing the environmental condition of a property when determining whether or not restoration is required and in determining the kind of restoration needed to allow continued use or reuse of a property. The regulation includes generic numerical standards for soil and ground water quality for specific land and ground water uses. A Phase One ESA is an initial step in the site assessment process, which may lead to the requirement for restoration work if areas of potential environmental contamination are identified. During a Phase One ESA, samples are not collected; however, if there are previous soil or ground water sample results available, the results are compared to applicable O.Reg.153/04 site condition standards.

## 3 Records Review

### 3.1 General

#### 3.1.1 Phase One Study Area Determination

The Phase One Study Area included the Phase One Property, properties immediately adjoining the Phase One Property, and neighbouring properties located wholly or partially within 250 m from the boundary of the Phase One Property. The presence or absence of landfills and/or coal gasification plants within approximately 1 km of the Phase One Property was also evaluated.

#### 3.1.2 First Developed Use Determination

Aerial photographs from 1928 to 2021, information obtained during the site reconnaissance, information from the ERIS report and selected city directories published from 1920 to 2021 were considered to determine the first developed use of the Site. Based on this information review, 3 Hamilton Avenue North (the northern half of the Phase One Property) was first developed in the early 1940s for industrial use which converted to various commercial uses in 2000. 233 Armstrong Street (the southwest portion of the Phase One Property) was first developed for residential use between 1928 and 1932 and was converted to various commercial uses in the early 1940s. 229 and 223 Armstrong Street (the southeast portion of the Phase One Property) were first developed for residential use prior to 1932 and were converted to commercial uses in the 1940s and 1930s, respectively.

The title search documentation provided by Taggart for PINs 04035-0144, 04035-0145, 04035-0146, and 04035-0147 is summarized in **Table 3** below and is provided in **Appendix E**.

**Table 3 Summary of Title Search Results**

| Portion of the Phase One Property                  | PIN         | Patent | Granted to        | Historical Ownership                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|----------------------------------------------------|-------------|--------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Northern portion of the Block (3 Hamilton Ave. N.) | 040345-0144 | 1987   | Honeywell Limited | After the initial grant holder, this parcel was under residential use until 1940 when manufacturing of scientific instruments began as Ontario Hughes Owen Co. then continued as Sperry Gyroscope Co. in 1951, as Sperry Rand Canada in 1970 and as Honeywell Limited in 1987 until 2000. The parcel ownership then changed to Spencedale Properties Limited in 2000, Joanne Edwards in 2006, 2018297 Ontario Inc./Nello Inc./ Marcel Delattre/Joelle Delattre in 2011, several parties in 2016, Taggart Land Holdings (Group 1) Ltd. in 2021 and 1000147699 Ontario Inc. in 2022. In 2023 the property owner is listed as 1000147699 Ontario Inc. |

| Portion of the Phase One Property                     | PIN         | Patent | Granted to                                | Historical Ownership                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------------|-------------|--------|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Southwest portion of the Block (233 Armstrong Street) | 040345-0145 | 1956   | Ottawa Shoe Manufacturing Company Limited | After the initial grant holder, this parcel changed ownership to Robert Brown in 1938 and based on available city directories, various commercial and light industrial tenants occupied this parcel between 1945 and the present, including the Ottawa Shoe Manufacturing Company Limited in 1958. The parcel ownership changed from Robert Brown to June Davidson Lacharity in 1962, Earl Gary Lacharity in 1996, Strongton Holdings Limited in March 2006, Markton Properties Limited in May 2006, 2018297 Ontario Inc./Nello Inc./ Marcel Delattre/Joelle Delattre in 2011, Tega Homes (Attika) Inc. in 2015, several parties in 2016, Taggart Land Holdings (Group 1) Ltd., in 2021, and 1000147699 Ontario Inc. in 2022. In 2023 the property owner is listed as 1000147699 Ontario Inc. |
| Southeast portion of the Block (229 Armstrong Street) | 040345-0146 | 1974   | Touffie and Linda Saikaley                | After the initial grant holder, this parcel changed ownership from the City of Ottawa to Touffie and Linda Saikaley in 1975 and then the Carleton Tavern (Ottawa) Limited in 1980.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Southeast portion of the Block (223 Armstrong Street) | 040345-0147 | 1980   | Carleton Tavern (Ottawa) Limited          | After the initial grant holder, this parcel changed ownership from the City of Ottawa to Carleton Tavern (Ottawa) Limited in 1930. Since 1980, the property has not changed ownership.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

### 3.1.3 Fire Insurance Plans

A request was submitted to Opta Information Intelligence (Opta) for Fire Insurance Plans and Site Inspection Plans associated with the addresses at and adjacent to the Site. A response from Opta indicated that several records were available for review; however, Stantec opted to not purchase these records as copies were available in-house and digitally online.

#### 1902 (revised 1912):

- The Phase One Property is mostly undeveloped with some structures occupying the northeast quadrant of the Block and some structures along the eastern boundary of the Block.
- The surrounding Phase One Study Area is less developed compared to present day. The properties directly north of the Phase One Property were undeveloped. The areas to the east and the south appear to be developed with single unit residential properties and light industrial and light commercial properties. Directly south of the Phase One Property are several light industrial properties including a planning mill, a barrel and pail distributor and a lumber yard including the

storage of lumber and a dry kiln where a steam boiler was indicated as being present.

**(APEC 1d)**

- The remaining surrounding area appears to be generally occupied by residential properties aside from a commercial property (grain and feed elevator) which can be observed approximately 200 m southeast from the Phase One Property.
- Several larger structures including St. Georges Home (church) and Capital Wire & Clothing Manufacturing Co. were noted as being under construction in 1902 fire insurance plan, indicating that development was ongoing in the Phase One Study Area.

**Fire Insurance Plan 1956**

- The Phase One Property and surrounding Study Area appear to have undergone significant development since the 1902 fire insurance plans, and as observed in the 1928, 1932, and 1945 aerial imagery described in **section 4.3.1**, below.
- The Phase One Property is almost completely occupied with industrial, commercial and retail structures including but not limited to Sperry Gyroscope Ottawa Ltd, including machine shop and instrument manufacturing (PCA 3, APEC 4a), the Carleton Hotel, and the Ottawa Shoe Manufacturing Co. Ltd (PCA 1, APEC 3a).
- The surrounding Phase One Study Area has also undergone significant development. East of the Phase One Property continues to be occupied by single unit residential properties; however, significant industrial, commercial, and retail properties have been developed to the north, south, and west of the Site.
- Notable industrial properties include several foundries on the property directly northwest of the Phase One Property where two associated boilers can be observed (**APEC 4b**)
- Two retail fuel stations can be observed south of the Phase One Property located at 390 Parkdale Avenue where three underground storage tanks (USTs) can be observed (**APEC 1e**) and 1186 Wellington Street West where two USTs can be observed (**APEC 1a**).
- The planning mill, lumber yard, and dry kiln directly south of the Phase One Property appear to no longer be present, as the 1956 fire insurance plans indicate the entire property is now vacant (with exception of a small structure in the southeast corner of the property).

**3.1.4 Chain of Title**

Chain of title searches for the Phase One Property were provided by Taggart. Relevant information from the chains of title were used to determine the first developed uses at the Phase One Property and is discussed in more detail in **Section 4.1.2**.

A complete list of the owners' names and dates of ownership is provided in the various chain of title documentation provided in **Section 7.1, Table 8 – Current and Past Land Uses**, and in **Appendix E**.

### 3.1.5 Environmental Reports

Stantec was provided with 32 environmental and geotechnical reports or letters from work completed at the Phase One Property from 2007 to 2022. The following eight recent environmental and geotechnical reports described in **Table 4**, were determined to contain relevant information related to this Phase One Environmental Site Assessment.

**Table 4 Reviewed Environmental and Geotechnical Reports and Company Records**

| Title                                                                                                                                  | Date                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Client                                   | Author                          |

| Analysis of Sources of Chlorinated Solvents at 223 Armstrong Street, 233 Armstrong Street and 3 Hamilton Avenue North, Ottawa, Ontario | August 2005                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Honeywell International Inc. (Honeywell) | Golder Associates Ltd (Golder). |
| Findings:                                                                                                                              | <p>The purpose of this report was to assess and describe the sources of chlorinated solvents resulting in groundwater impacts identified at the Site (APEC 6a) through a review of geology, hydrogeology, and contaminant distribution at 223 Armstrong Street, 233 Armstrong Street, 3 Hamilton Avenue North, and surrounding properties.</p> <ul style="list-style-type: none"> <li>A review of historical documents indicated the presence of floor drains at 233 Armstrong Street drained wastes from motor and parts degreasing into the subsurface.</li> <li>A review of historical documents indicated that Ottawa Shoe Manufacturing company at 233 Armstrong Street may have used PCE for leather preparation during shoe manufacturing.</li> <li>A review of historical documents indicated historical storage of liquid hazardous materials including various chlorinated solvent degreasers, in the courtyard area of 3 Hamilton Avenue North.</li> <li>A review of historical documents indicated the historical operation of a structure resembling a dry well, and the historical operation of a degreasing dip tank under a "lean-to" structure located in the courtyard of 3 Hamilton Avenue North.</li> <li>A review of historical reports documented a number of other off-site uses of chlorinated solvents including a foundry, printing facilities, a retail fuel outlet, and a former dry cleaner within the Study Area; however, it was noted that based on the distribution of impacts observed at the Site, that these off-site potential sources were unlikely to be the sources of chlorinated solvent impacts identified at the Site.</li> <li>Two distinct areas of Dense Non Aqueous Phase Liquid (DNAPL) chlorinated solvents in soils in unsaturated zones were identified: 1) 3 Hamilton Avenue North, and 2) 233 Armstrong Street</li> <li>The areas of chlorinated solvents had distinct chemical signatures.</li> <li>The main contaminants of concerns consisted of PCE, trichloroethylene (TCE), cis-1,2 dichloroethylene (DCE), and vinyl chloride. Additionally, some localized hydrocarbon impacts were identified.</li> <li>Higher concentrations of chlorinated solvents in groundwater were observed at 233 Armstrong Street than at 3 Hamilton Avenue North.</li> <li>Based on the different chemical signatures, it appeared that the chlorinated solvents from 233 Armstrong Street had migrated towards 3 Hamilton Avenue North and beyond; however, the chlorinated solvents from 3 Hamilton Avenue North did not appear to have migrated towards 233 Armstrong Street.</li> </ul> |                                          |                                 |

**Phase One Environmental Site Assessment: Proposed Development Hamilton Avenue, Spencer Avenue, Parkdale Avenue, Armstrong Street, Ottawa, Ontario**

|                                                                                                                                                                                                                                                                             | As the purpose of the report was to identify the sources of the confirmed chlorinated solvent impacts, no further recommendations were made at the time of report issuance; however, Golder did provide a Remedial Action Plan (RAP) under separate cover, summarized below. Based on the review of this report, Stantec has identified PCAs contributing to APECs were identified at 223 Armstrong Street (APECs 3a, 3b, 3c) and 3 Hamilton Avenue North (APEC 4a and 4b).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                              |                                     |
| Remedial Action Plan, Migration Control – For Perimeter Shallow Groundwater Control System, 3 Hamilton Avenue North, Ottawa, Ontario                                                                                                                                        | August 2005                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Honeywell International Inc. | Golder Associates Ltd.              |
| Findings:                                                                                                                                                                                                                                                                   | <p>The purpose of this report was to provide description of the technical justification for a perimeter groundwater control system to be installed around 3 Hamilton Avenue North, 223 Armstrong Street, and 233 Armstrong Street. The purpose of the perimeter groundwater control system was to prevent contaminants originating from the aforementioned properties from migrating to the municipal rights-of-way and other downgradient and surrounding properties.</p> <ul style="list-style-type: none"> <li>Sources of chlorinated solvents were identified at 3 Hamilton Avenue North and 233 Armstrong Street.</li> <li>3 Hamilton Avenue North is downgradient of 233 Armstrong Avenue Street (implying a north/northwesterly local groundwater flow direction). The chlorinated solvents from 233 Armstrong Street were migrating towards 3 Hamilton Street and beyond.</li> <li>Without prevention of further migration of the chlorinated solvents, shallow groundwater impacts may pose an unacceptable risk to indoor air at properties downgradient of the Site.</li> <li>A network of eductors in extraction wells was proposed based on cost effectiveness, ease of upgrading additional recovery wells if needed, the ability to maintain a negative vacuum on the well head to effectively recover groundwater and vapour, and the ability to maintain low water levels in the wells to induce a reasonable radius of influence in the groundwater.</li> <li>The proposed system would consist of 24 recovery wells installed to a depth of 7 metres below ground surface (m bgs) and designed for continual operation. Based on pilot testing, each eductor would have a radius of influence of up to 4 metres and would recover up to 1.0L/minute.</li> <li>The proposed treatment system would have two waste streams (an air stream and a water stream), running through granular activated carbon fiber filters, and the expected groundwater extraction rate would be less than 50,000 litres per day.</li> </ul> |                              |                                     |
| Ministry of Environment (MOE) (now MECP) correspondence with Golder Associates Ltd. in response to the Analysis of Sources of Chlorinated Solvents and the Remedial Action Plan for 223 Armstrong Street, 233 Armstrong Street and 3 Hamilton Avenue North, Ottawa, Ontario | October 13, 2005                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Golder Associates Ltd.       | Ministry of Environmental (Ontario) |
| Findings:                                                                                                                                                                                                                                                                   | <p>A letter was provided to comment on the findings and recommendations of the Analysis of Sources of Chlorinated Solvents and the Remedial Action Plan for 223 Armstrong Street, 233 Armstrong Street and 3 Hamilton Avenue North, as well as to provide further recommendations and requirements, as applicable.</p> <ul style="list-style-type: none"> <li>The Ministry was in agreement with the conclusions and proposed RAP provided by Golder as outlined in the two summarized reports above.</li> <li>The Ministry was concerned that the success of the perimeter pump and treatment system may depend on how closely the system simulates the Sites hydrogeological conditions; therefore, the Ministry recommended that Golder conduct quarterly sampling of 12 monitoring wells for at least two years after initiating the treatment system.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                              |                                     |

| Findings: | <p>The purpose of this report was to review five environmental reports previously completed for the Site from 2005 to 2011. Key points of each report are summarized below:</p> <p>“Remedial Action Plan, Migration Control - For Perimeter Shallow Groundwater Control System, 3 Hamilton Avenue North, Ottawa, Ontario”, prepared by Golder Associates., for Honeywell International Inc., dated August 2005.</p> <ul style="list-style-type: none"> <li>Summarized in <b>Section 4.1.5</b>, above.</li> </ul> <p>“August 2010 Quarterly and Annual Off-Site Groundwater at 3 Hamilton Avenue North, Ottawa, Ontario”, prepared by Golder for Honeywell, dated February 2011.</p> <ul style="list-style-type: none"> <li>71 monitoring well samples were assessed for VOCs and PHCs from quarterly and annual groundwater monitoring and sampling events since 2005.</li> <li>Golder concluded that groundwater impacts within the shallow and deep bedrock remained present both on- and off-Site but that impacts in close proximity to the Site were not increasing (<b>APECs 3a, 3b, 3c and APECs 4a and 4b, APEC 6a</b>).</li> </ul> <p>“Soil Vapour Sampling and Screening Level Risk Assessment, 3 Hamilton Avenue North, Ottawa, Ontario”, prepared by Golder Associates for Honeywell International Inc., dated March 2011.</p> <ul style="list-style-type: none"> <li>Eight vapour sample probes were installed at the Site and select off-Site locations to collect samples to determine ambient vapour conditions.</li> <li>Potential risks were calculated based on hazard quotients and incremental lifetime cancer risks, and human receptors were identified as being residential tenants (both children and adults).</li> <li>Previous risk assessment investigations completed at the Site and surrounding properties concluded that chloroform concentrations did not originate from the on-Site impacts and were likely generated from an off-Site chlorinated source leak such as drinking water or sanitary sewer. The RA concluded that chloroform did not present unacceptable risk.</li> <li>Additional risk was evaluated for construction workers with limited time in a hypothetical on-Site trench (human receptor) and it was determined that no significant risk could be identified; however, it was recommended that these human receptors take precaution in the form of respirators, long sleeve shirts, pants, gloves, and boots to minimize exposure and contact with the impacts.</li> <li>Golder recommended vapour sampling be continued to ensure long-term risks from inhalation remain acceptable.</li> </ul> <p>“Phase I-II Environmental Site Assessment, Proposed Multi-Storey Building, 233 Armstrong Street and 3 Hamilton Avenue North, Ottawa, Ontario”, prepared by Paterson Group Inc. for Tega Developments, dated August 12, 2011.</p> <ul style="list-style-type: none"> <li>Summarized in <b>Section 4.1.5</b>, above.</li> </ul> <p>“Environmental Remedial Action Plan and Associated Quantities, Proposed Residential Building, 233 Armstrong Street and 3 Hamilton Avenue North, Ottawa, Ontario”, prepared by Paterson for Tega Developments, dated August 15, 2011.</p> <ul style="list-style-type: none"> <li>The RAP consisted of a memorandum discussing Site development including excavating on-Site soil and bedrock to an approximate depth of 21 m bgs.</li> <li>Paterson proposed that all groundwater accumulated in the excavation be pumped, treated on site via air stripping or granular activated carbon and then discharged to the City sanitary sewer system.</li> <li>The remedial option would be required to meet MECP requirements to complete a Record of Site Conditions as a land use change was being proposed.</li> <li>The excavation was estimated to be open for 6 to 8 months and drawdown created by the excavation was estimated to be approximately 85 to 170 metres.</li> </ul> |        |        |

**Phase One Environmental Site Assessment: Proposed Development Hamilton Avenue, Spencer Avenue, Parkdale Avenue, Armstrong Street, Ottawa, Ontario**  
**3 Records Review**  
February 7, 2025

| Title                                                                                                                                      | Date                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Client            | Author              |
|--------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|---------------------|
| <ul style="list-style-type: none"> <li>It was surmised that any remaining impacts would biodegrade through natural attenuation.</li> </ul> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                   |                     |
| Memorandum - Environmental Remedial Action Plan, Proposed Residential Building, 233 Armstrong Street and 3 Hamilton Avenue - Ottawa        | December 20, 2012                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Tega Developments | Paterson Group Inc. |
| Findings:                                                                                                                                  | <p>The purpose of the 2012 memorandum was to revise the RAP from 2011 based on new information. A summary of key points in the RAP are below:</p> <ul style="list-style-type: none"> <li>Paterson recommended that two additional deep monitoring wells be drilled to confirm groundwater contamination was not present below the proposed foundation depth of 21 metres.</li> <li>A remediation program using a full depth generic approach be used, including source removal by excavating all VOC impacted soil, bedrock, and groundwater from within the boundaries of the Site.</li> <li>Overburden soils, where present would be stripped and segregated for off-Site disposal. Soil would be stockpiled in 20 to 40 m<sup>3</sup> piles and screened and tested for VOC impacts.</li> <li>Bedrock would be removed by line drilling and blasting, and line drilled holes along the site perimeter would be immediately grouted to eliminate potential vertical migration of VOCs.</li> <li>Following excavation, bedrock face would be sprayed with 50 mm layer of shotcrete to seal the bedrock surface and minimize vertical migration of off-Site impacted groundwater.</li> <li>Groundwater and surface water infiltrating the excavation would be directed towards a lower area of the excavation and water would be pumped through a treatment system prior to being disposed.</li> <li>A VOC resistant waterproof membrane would be installed between two layers of concrete along the concrete floor slab and follow up testing and corrections would be made, if necessary, to ensure the functionality of the membrane.</li> <li>A confirmatory sampling program would be carried out following the implementation of the RAP program.</li> </ul> |                   |                     |

The PCAs and APECs identified in the previous investigations has been incorporated into the findings of the current Phase One ESA. A compilation of groundwater and soil vapour data was also provided to Stantec on June 11, 2021 and over 6500 hardcopy pages of information were purchased through the Freedom of Information required. Generally, the results were consistent with information that was previously provided to Taggart.

## **3.2 Environmental source information**

Available environmental databases and records were searched to determine if the Phase One Property and nearby lands within the Phase One Study Area were listed. The databases and search results are presented in the following subsections.

### **3.2.1 City Directories**

City directories were purchased from ERIS for the Site and properties within the Phase One Study Area (see **Appendix E**). 3 Hamilton Avenue North (the Site) was listed as Sperry Gyroscope Ottawa Ltd from 1955 to 1984, Honeywell Sperry Aerospace from 1988 to 1994, and Honeywell Ltd. in 2000. 340 Parkdale Avenue (the Site) was also listed as Sperry Gyroscope Ottawa Ltd. from 1966 to 1984 and Honeywell in 1988 and 1989. The operations at these addresses are considered to be a PCA that may contribute to an APEC at the Site (**APEC 4a**).

The remaining listings in the city directories included residential properties, office spaces and commercial/retail properties including but not limited to restaurants and bars, a radio store, sporting goods stores, a tattoo parlour, sewing shops, advertising agencies, personal storage spaces, health clubs, etc. Due to the nature of operations of these properties, these properties are not considered to be PCAs that may contribute to an APEC to the Phase One Property.

### **3.2.2 Property Underwriters' Reports and Plans**

No property underwriter reports or plans for the Phase One Property were provided by Opta.

### **3.2.3 National Pollutant Release Inventory (NPRI)**

Included in the ERIS report was a search of the National Pollutant Release Inventory database for properties within the Phase One Study Area. No properties within the Phase One Study Area were listed in the NPRI database.

### **3.2.4 PCB Storage Sites and Inventory Databases**

Included in the ERIS report was a search of the National PCB Inventory and the Ontario Inventory of PCB Storage Sites databases for properties within the Phase One Study Area. No properties within the Phase One Study Area were listed in these databases.

### **3.2.5 Certificate of Approval / Environmental Compliance Approval**

Included in the ERIS report was a search of the Certificates of Approval (CofA) and Environmental Compliance Approval (ECA) databases for properties within the Phase One Study Area. One record was found for the Phase One Property, three records were found along the rights of way bounding the Block,

and 16 were found in the remaining Phase One Study Area. An additional 40 unplottable records were also found.

The record found for the Site was an Environmental Compliance Approval registered to Honeywell Limited and dated October 2007, was for emissions to air for the perimeter treatment system of chlorinated solvent and hydrocarbon impacted soil vapour and groundwater at the Phase One Property. This ECA is not in and of itself considered to be a PCA which may contribute to an APEC at the Phase One Property; however, it does highlight the ongoing environmental remediation work being completed at the Site. The three records found at the rights of way along the perimeter of the Block were related to municipal and/or private water or sewage works.

Of the 16 records found for the Study Area, two records were related to air emissions and 14 records were related to municipal and/or private water or sewage works. The 40 unplottable records were either similar in nature or could not be confidently attributed to the Site or Study Area.

A review of the records did not identify activities that could pose a significant environmental concern to the Site.

### **3.2.6 MECP Freedom of Information Requests**

A request submitted to the MECP's Freedom of Information and Protection of Privacy Office included a search for occurrence reports and general information from the District Office, investigation documents from the Investigations and Enforcement Branch, waste generator information from the Environmental Monitoring and Reporting Branch, Certificates of Approval from the Environmental Assessment and Approvals Branch, and orders from the Sector Compliance Branch pertaining to the municipal address of the Site and current/former tenants and owners of the Site.

The response received from the MECP indicated that approximately 6,500 hardcopy pages had been located and are available for purchase. Stantec has purchased the information and it was received from the MECP on February 13, 2024. A total of 20,403 pages of records were provided and reviewed. Generally, the results were consistent with information that was previously provided to Taggart. Further, considering the historical data there was no new information presented that would warrant additional environmental assessment or change the recommendation for a Phase Two ESA.

### **3.2.7 Coal Gasification Plant Waste Sites**

Stantec reviewed the report titled *Inventory of Coal Gasification Plant Waste Sites in Ontario, (Volumes I and II)*, dated April 1987, prepared by Intera Technologies Ltd. for the Ontario Ministry of the Environment (now MECP). The documents include an inventory of known coal gasification plants historically operating in Ontario. No properties within 1 km of the Phase One Property were listed as former coal gasification plants.

### **3.2.8 Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars**

Stantec reviewed the report titled Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, (Volumes I and II), dated November 1988, prepared by Intera Technologies Ltd. for the MECP. The documents identify industrial sites that produced and/or continue to produce or use coal tar and other related tars. No properties within 1 km of the Site were listed as industrial sites producing or using coal tar.

### **3.2.9 Hazardous Waste Generators and Receivers**

Included in the ERIS report was a search of the Ontario Regulation 347 Waste Generators and the Ontario Regulation 347 Waste Receivers databases for properties within the Phase One Study Area.

17 hazardous waste listings are associated with 3 Hamilton Avenue North (the Site); one for Honeywell Aerospace and/or Sperry Aerospace for the generation of aliphatic solvents, halogenated solvents, inorganic laboratory chemicals, petroleum distillates, oil skimmings and sludges, light fuels, and inert organic wastes between 1988 to 2021. Based on the nature of operations and types of wastes generated, these operations are expected to be a PCA that has contributed to an APEC at the Site (**APEC 4a**).

CAA North & East Ontario located at 16 Hamilton Avenue North, approximately 90 m south of the Phase One Property, is listed once for the generation of waste oils and lubricants from 1999 to 2001. Based on the proximity of this operation to the Site, this operation is expected to be a PCA that may contribute to an APEC at the Site (**APEC 1b**).

Ontario Petroleum Pump located at 1 Hamilton Avenue North, approximately 140 m north of the Phase One Property was listed for the generation of light fuels in 2005. Based on the distance between this address and the Site, this operation is not expected to be a PCA that may contribute to an APEC at the Site.

M.O.M Printing and Scintrex Trace Corp. located at 300 Parkdale, approximately 130 m north of the Phase One Property are listed 15 times for the generation of various wastes including but not limited to acid wastes, aliphatic solvents, petroleum distillates, acid waste and alkaline wastes, waste oils and lubricants, photoprocessing waste, paint/pigment/coating residues, etc., between 1992 to 2022. Based on the distance between this address and the Site, these operations are not expected to be PCAs that may contribute to an APEC at the Site.

Rosemount Family Health Organization and GEM Health Care Services Inc. located at 383 Parkdale, approximately 80 m southeast of the Phase One Property, are listed ten times for the generation of pathological wastes from 2015 to 2021. Based on the nature of operations and types of wastes generated, these operations are not expected to be a PCA that has contributed to an APEC at the Site.

62 more waste generators were registered within the Phase One Study Area. Based on separation distances from the Phase One Property, the inferred and observed ground water flow directions, and the nature of the operations at these properties, these waste generators are not expected to be PCAs contributing to an APEC at the Site.

Graphic Display Canada located at 45 Spencer Street, adjacent to the north of the Phase One Property, is listed three times for the generation of photoprocessing wastes from 1986 to 2001. Based on the nature of the operations at this address, this property is not expected to be a PCA that has contributed to an APEC at the Site.

Metcalfe Realty Company Limited located at 7 Hinton Avenue, adjacent to the west of the Phase One Property, is listed four times for the generation of waste oils and lubricants, organic laboratory chemicals, and oil skimmings and sludges in 2006, 2009, 2012. Given that the quantities of waste were likely limited due to the nature of the operations at this address, this property is not expected to be a PCA that has contributed to an APEC at the Site.

### **3.2.10 Technical Standards and Safety Authority (TSSA)**

A request was made to the TSSA for a search of their files regarding tank installations, fueling facilities, outstanding instructions, incident reports, fuel oil spills and/or contamination records for the Phase One Property. An individual request was made for each address: 223 Armstrong Street, 229 Armstrong Street, 233 Armstrong Street, and 3 Hamilton Avenue North, Ottawa, Ontario.

A reply dated March 31, 2023, was received from the TSSA for each aforementioned addresses indicating they had no records in their database of any fuel storage tanks at the Phase One Property. The TSSA responses are provided in **Appendix E**.

### **3.2.11 Environmental Registry**

Included in the ERIS report was a search of the Environmental Registry database for properties within the Phase One Study Area. Honeywell Limited located at 3 Hamilton Avenue (the Phase One Property) was approved for the discharge of emissions to air in 2007. Based on the receiving medium, this environmental registry is not expected to contribute to an APEC to the Site. Windmill Development Group located at 1233 Wellington Street West approximately 250 m southwest of the Phase One Property was approved for the discharge of emissions to air in 2007. Based on the receiving medium and the distance from the Phase One Property, this environmental registry is not expected to contribute to an APEC to the Site.

### **3.2.12 Records of Site Condition (RSC)**

Included in the ERIS report was a search of the Record of Site Condition (RSC) database for properties within the Phase One Study Area. No records were for the Phase One Property while two records were found for the Study Area whose relevant details are summarized below:

- Hamilton Avenue Holdings Inc. at 20 Hamilton Avenue North, approximately 90 m south and upgradient of the Site was listed in 2022.
- Numbered company 1592541 Ontario Inc., at 1233 Wellington Street West, approximately 250 m southwest and upgradient of the Site, was listed in 2005.

A search of the online MECP Brownfields Environmental Site Registry was completed for the abovementioned properties. This registry is the native data source for the *Record of Site Condition* database.

For 20 Hamilton Avenue North, the Record of Site Condition indicated that 1,702 cubic metres (m<sup>3</sup>) of soil was removed from the property, including soils within 3 m of the property boundary for the purpose of remediation. Final soil and groundwater conditions met applicable provincial regulatory standards. No other remedial, risk management, or maintenance was required. The COCs were PAHs, metals including mercury and hydride-forming metals, PHCs, BTEX, hexavalent chromium, electric conductivity, sodium absorption ratio, and VOCs in soil and groundwater. Given the final soil and groundwater conditions met the applicable provincial regulatory standards, the property at 20 Hamilton Avenue North is not considered to represent a potential environmental concern for the Site.

For 1233 Wellington Street West, the Record of Site Condition indicated that 4,400 cubic metres (m<sup>3</sup>) of soil was removed from the property, including soils within 3 m of the property boundary for the purpose of remediation. Final soil and groundwater conditions met applicable provincial regulatory standards. No other remedial, risk management, or maintenance was required. The COCs were PHCs and VOCs in the soil and groundwater. Given the final soil and groundwater conditions met the applicable provincial regulatory standards, the property at 1233 Wellington Street West is not considered to represent a potential environmental concern for the Site.

### **3.2.13 Areas of Natural Significance (ANSI)**

Stantec searched the Ontario Ministry of Natural Resources and Forestry's (MNRF's) Natural Heritage online database. No areas of natural or scientific interest (ANSIs) or natural heritage areas were identified within 1 km of the Phase One Property.

### **3.2.14 Waste Disposal Sites**

Stantec reviewed the information contained in the MOE document titled Waste Disposal Site Inventory, dated June 1991 and the Golder Associates document titled Old Landfill Management Strategy (OLMS), Phase 1, Identification of Sites dated 2004. The reports include lists of known active and closed waste disposal sites in Ontario, as of October 31, 1990. Based on the coordinates provided in the inventory, four former waste disposal sites were identified within 1 km of the Phase One Property ranging from 540 m to 850 m from the Site. The details of the four waste disposal sites are summarized below:

- The dump at the corner of Yonge Street and Fairmont Avenue located approximately 830 m southeast of the Phase One Property operated between 1928 to 1932. No methane was detected during monitoring conducted in 1988. Based on the distance of this former landfill to the Phase One Property it is not expected to contribute to an APEC to the Site.
- The dump at Bayswater Avenue and Wellington Street West located approximately 850 m east of the Phase One Property is noted as having been in operation prior to 1928 and used for the disposal of glass, crushed stone, brick fragments, and other construction rubble. Based on the distance of this former landfill to the Phase One Property it is not expected to contribute to an APEC to the Site.
- The dump at Laroche Park, east of Stonehurst Avenue, located approximately 540 m northeast of the Phase One Property is noted as having been in operation between 1928 and 1932. Based on the distance of this former landfill to the Phase One Property it is not expected to contribute to an APEC to the Site.
- The Bayview Dump located approximately 815 m northeast of the Phase One Property is noted as having been in operation between 1933 and 1946 presumably for domestic waste and light industrial solid waste. Previous environmental investigations have observed PAH and metal impacts at the former dump and the area has been used as a snow dump area. Based on the distance of this former landfill to the Phase One Property it is not expected to contribute to an APEC to the Site.

In addition, included in the ERIS report was a search of the Waste Disposal Sites and Anderson's Waste Disposal Sites databases for the Site and properties within a 250 m radius of the perimeter of the Site. No listings for waste disposal sites were found in the ERIS report.

### **3.2.15 ERIS Report**

An ERIS report was obtained as part of the Phase One ESA. The report consisted of a search of available databases (including unplottable records) within a 250 m radius of the perimeter of the Phase One Property. Records of environmental significance within the Phase One Study Area, which are not discussed elsewhere in this report, are summarized in **Table 5** below.

**Table 5 ERIS Report**

| <b>Location</b>                                                                | <b>Summary</b>                                                                                                                                                                                                                                                                      |

Tanks listed included two 25,000 L liquid fuel USTs, one 50,000 L fuel UST, and one 65,000 L fuel UST.</li> <li>A gasoline spill of unknown quantity was reported at the Sunoco Gas Station in 2005.</li> </ul> <p>Based on the proximity of these operations to the Phase One Property as well as a gasoline spill, this property is considered to be a PCA that has contributed to an APEC at the Site (<b>APEC 1e</b>).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1186 Wellington Street West<br>(approximately 160 m south of the Phase One Property) | <ul style="list-style-type: none"> <li>Esso Petroleum Canada/Parkdale Esso Ron Aspek &amp; Son Ltd. were noted in several fuel storage related databases for several USTs installed in 1979 and delisted in 2013. The fuel tanks included at least one 22,700 L liquid fuel tank, and one 13,600 L liquid fuel tank.</li> <li>A 3000 L furnace oil leak from an underground tank was noted in March 1992 with confirmed impacts to soil and groundwater.</li> <li>A gasoline spill of unknown quantity from an underground tank to soil was noted in 1993.</li> </ul> <p>Based on the proximity of this operation to the Phase One Property, the nature of a gas station operation, and the volume of the spills, this property is considered to be a PCA that has contributed to an APEC at the Site (<b>APEC 1a</b>).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Unplottable records                                                                  | <ul style="list-style-type: none"> <li>Several ECAs and Environmental Registry listings were associated with Quantum Remediation Inc., located at 15 Fitzgerald Road (&lt;12 km from the Phase One Property).</li> <li>Several waste generators of varying waste streams were associated with buildings at the Tunney's Pasture campus north of Holland Avenue and &lt;300 m from the Phase One Property.</li> <li>Several fuel and coolant spills of small &gt;15 L quantities were noted along Wellington Street West but were not able to be confidently attributed to addresses within the Phase One Study Area.</li> <li>A 156 L diesel spill associated with an Esso fuel station was reported in 1998. Although no evidence was provided to indicate where the Esso was located, it is possible the spill was associated with the Esso fuel station located at 1186 Wellington Street West (<b>APEC 1a</b>).</li> </ul> <p>Of the remaining unplottable records which could confidently be attributed to addresses within the Phase One Study Area, it did not appear that records were associated with PCAs which may contribute to APECs to the Phase One Property. The remaining unplottable records could not be confidently attributed to addresses within the Phase One Property.</p> |

The remaining listings in the ERIS report are not expected to contribute to an APEC at the Site based on the nature of their operations, inferred ground water flow direction and/or the separation distances.

### 3.2.16 Other information sources

The report titled *Mapping and Assessment of Former Industrial Sites* produced by Intera Technologies Limited in 1988 was also reviewed. The report indicated that the 1922 City of Ottawa fire insurance plans referenced a UST located at the block of properties directly west of the Phase One Property (**APEC 3c**)

## 3.3 Physical Setting Sources

### 3.3.1 Aerial Photographs

Satellite images taken in 1932, 1946, 1981, and 2021 were purchased and reviewed from ERIS. Aerial photographs from the GeoOttawa mapping website were reviewed for 1928, 1958, 1965, 1976, 1991, 1999, 2002, 2005, 2007, 2008, 2011, 2014, 2015, 2017, 2019, and 2021. The aerial imagery was utilized to determine the historical activities at the Site and nearby lands. A general summary of significant features shown in each aerial image of the Site and surrounding area is provided in **Table 6** below:

**Table 6 Aerial Imagery Summary**

| Year | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1928 | <ul style="list-style-type: none"> <li>The Phase One Property appears to be mostly undeveloped with the exception of a structure visible in the southeastern corner of the property.</li> <li>The surrounding Study Area is a mix of undeveloped and residential properties. Some larger buildings including a foundry can be observed directly northwest of the Phase One Property (<b>APEC 4b</b>). The road network appears to be configured generally the same as the present day road network; however, Hamilton Avenue North appears to only be constructed from Armstrong Street to Tyndall Street.</li> </ul>                           |
| 1932 | <ul style="list-style-type: none"> <li>The Phase One Property appears to have some further development of small structures; however, they remain restricted to the southeastern corner of the property.</li> <li>Some construction can be observed on previously undeveloped land within the Study Area, particularly on the block adjacent to west of the Phase One Property where Capital Wire and Cloth (a brass foundry) was constructed and operated from the 1930s to the 1950s (<b>APEC 3b</b>). The construction of Hamilton Avenue North appears to have been completed to the north of Armstrong Street to Bullman Street.</li> </ul> |
| 1946 | <ul style="list-style-type: none"> <li>More of the present-day buildings on the Phase One Property appear to have been constructed and development has extended beyond the southeastern corner of the block.</li> <li>Continued development of commercial/light industrial buildings can be observed in the surrounding Study Area, particularly at the two blocks to the west of the Phase One Property, and the block adjacent to the north of the Phase One Property.</li> </ul>                                                                                                                                                             |
| 1958 | <ul style="list-style-type: none"> <li>No significant changes can be observed at the Phase One Property in the 1958 aerial imagery.</li> <li>The development of some small buildings can be observed on the block to adjacent to the south of the Phase One Property, primarily along the border of the block.</li> </ul>                                                                                                                                                                                                                                                                                                                       |
| 1965 | <ul style="list-style-type: none"> <li>No significant changes can be observed at the Phase One Property in the 1965 aerial imagery.</li> <li>Some minor re-development including building reconfigurations can be seen in the surrounding Study Area, notably in the blocks adjacent to the north and the south of the Phase One Property.</li> </ul>                                                                                                                                                                                                                                                                                           |

**Phase One Environmental Site Assessment: Proposed Development Hamilton Avenue, Spencer Avenue, Parkdale Avenue, Armstrong Street, Ottawa, Ontario**  
**3 Records Review**  
February 7, 2025

| Year | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 1976 | <ul style="list-style-type: none"> <li>No significant changes can be observed at the Phase One Property in the 1976 aerial imagery.</li> <li>Some minor re-development including building reconfigurations can be seen in the surrounding Study Area, notably in the block adjacent to the south of the Phase One Property can be observed to have several structures constructed including the Parkdale Park pool and the Parkdale Market (temporary tarp and fencing structures for local farmer markets)</li> </ul>                                                                                                                                                                                                                                                                                                                                                  |
| 1981 | <ul style="list-style-type: none"> <li>The building at 233 Armstrong appears to have been extended to the east on the Phase One Property.</li> <li>Some minor development can be observed at the block adjacent to the south of the Phase One Property; no significant changes can be observed in the surrounding Study Area.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 1991 | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property in the 1991 aerial imagery.</li> <li>Significant development can be seen directly northwest of the Phase One Property at The Holland Square office park including two low-rise buildings and two-levels of office space occupying the remainder of the block. Some buildings that were previously present within the southern portion of the Holland Square office park have been removed or re-developed and some open courtyard space has been developed in its place. Further, a gas station can be observed approximately 110 m south of the Phase One Property at 390 Parkdale Avenue (<b>APEC 1e</b>), and another gas station can be observed approximately 160 m south of the Phase One Property at 1186 Wellington Street West (<b>APEC 1a</b>)</li> </ul> |
| 1999 | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property in the 1999 imagery.</li> <li>Some residential construction can be observed beginning to take place northwest of the Phase One Property, while the rest of the surrounding Study Area continues to remain consistent with 1991 imagery.</li> <li>The gas station at 1186 Wellington Street West no longer appears to be present.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 2005 | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property in the 2005 aerial imagery.</li> <li>No significant changes can be seen in the surrounding Study Area with exception of a building being constructed in a former parking lot area directly north of the Phase One Property.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 2007 | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property in the 2007 aerial imagery; however, it is noted that the courtyard area near the centre of the Site can be observed to be filled with domestic waste.</li> <li>No significant changes can be seen in the surrounding Study Area with exception of a building being constructed in a former parking lot area approximately 190 m southwest of the Phase One Property.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                    |
| 2011 | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property or Study Area in the 2011 aerial imagery with exception of a shipping container placed along the northern boundary of the Block. It is noted that the courtyard at the centre of the Site appears to still be poorly maintained and domestic waste can be observed.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Year                   | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2014                   | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property in the 2014 aerial imagery. The previously observed domestic waste in the courtyard near the centre of the Site appears to be removed and the courtyard appears in good condition.</li> <li>No significant changes can be seen in the surrounding Study Area with exception of a building being constructed in a former parking lot area approximately 240 m southwest of the Phase One Property.</li> </ul> |
| 2015, 2017, 2019, 2021 | <ul style="list-style-type: none"> <li>No significant changes can be seen at the Phase One Property or Study Area in the 2015, 2017, 2019, and 2021 aerial imagery.</li> </ul>                                                                                                                                                                                                                                                                                                                                   |

The property uses identified in the aerial photographs are not expected to contribute to an APEC at the Site based on the nature of their operations and/or the separation distances.

No additional aerial imagery was obtained as the time period between photos was deemed adequate and shows the first development of the Site.

### **3.3.2 Topography, Hydrology and Geology**

#### **3.3.2.1 Topography and Regional Drainage**

Based on available topographic maps, the regional surface drainage (inferred regional ground water flow direction) appears to be north toward the Ottawa River approximately 1 km from the Phase One Property.

According to the Phase II ESA completed by Paterson in 2011, groundwater in the lower bedrock unit was determined to be flowing towards the northeast. In both the semi-annual groundwater monitoring reports by Golder in April 2018 and September 2018, it was determined that the groundwater flow direction in the shallow bedrock was variable (towards the west, north, and east), likely due to the heavy influence by underground utility trenches.

While the groundwater flow direction in the deep bedrock was noted being east and northeast towards a geological fault, it was concluded that the CoCs at the Phase One Property appeared to be migrating in a southerly direction due to the influence of the southerly dipping bedrock, with a slightly easterly migration component due to the geological fault.

It should be noted the elevation of the local ground water table can generally mimic the local topography and may not reflect the regional trend in drainage. The local shallow ground water flow pattern can also be influenced by nearby subsurface structures, such as building foundations, weeping tiles and utility trenches. Previously determined groundwater flow directions may not be reflective of current groundwater flow directions due to varying conditions during previous site investigations or current site investigations including on-going construction, remedial efforts at the Phase One Property, changes to underground utilities, and the influence of temporary construction or permanent dewatering at properties within the Study Area.

### **3.3.2.2 Hydrology and Surface Water Drainage**

Where buildings are not present, the surfaces of the Phase One Property consist of paved parking areas, concrete sidewalks, asphalt rights-of-way, and a grassy courtyard area. It is expected that surface water infiltrates to the subsurface through the grassy courtyard area or runs off towards the storm drains around the perimeter of the Phase One Property. During the site visit on March 17, 2023, there was significant pooling of rainwater in open potholes and other small localized depressions including areas where monitoring wells had been installed.

### **3.3.2.3 Surficial Geology**

Based on information obtained from Ontario Geological Survey Map titled Surficial Geology of Southern Ontario, native surficial soils near the Site reportedly consist of stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain. It should be noted that the map indicates the surficial geology immediately east of the Phase One Property is Paleozoic bedrock at surface, indicating that surficial geology is likely shallow and minimal in the Phase One Study Area.

According to the Phase II ESA completed by Paterson in 2011, two of the three boreholes advanced at the Phase One Property consisted of fill from 0.08 to 1.75 m bgs overlying bedrock. One of the three boreholes indicated there being a thin 60 cm layer of glacial till between fill and bedrock at approximately 1.17 to 1.75 m bgs. Stratigraphic logs for boreholes advanced at the Phase One Property by Golder between 2008 and 2012 were also provided to Stantec for review, indicating fill consisting of silt, sand, gravel, boulders, and cobbles was observed underlying concrete and/or asphalt to depths of approximately 0.10 to 0.20 m bgs.

### **3.3.2.4 Bedrock Geology**

Based on information obtained from MNR Ontario Geological Survey Map 2544, titled Bedrock Geology of Ontario, Southern Sheet, bedrock in the vicinity of the Site is reported to consist of limestone, dolostone, shale, arkose, and sandstone of the Ottawa Group and Simcoe Group, Shadow Lake Formation. The depth to bedrock was not indicated on the map.

According to the Phase II ESA completed by Paterson in 2011, grey limestone bedrock was encountered at the Phase One Property at depths ranging from 0.81 to 4.19 m bgs. The borehole logs by Golder from 2008 to 2014 indicated limestone bedrock was encountered at depths between 0.84 to 2.44 m bgs. The borehole logs provided by Golder indicated that there were 6 distinct bedrock units identified as G2 through G9. Unit G6 was characterized as a siliceous dolostone with grey shaly bedding partings; unit G8 was characterized as a siltstone and fine grained sandstone with interbeds of limestone and dolomitic limestone; unit G9 was characterized as siliceous sandstone interbedded with calcareous siltstone and shale; and the remaining bedrock units were characterized as geologically differing limestones. Golder completed boreholes between 2008 to 2016 to depths ranging from 7.20 to 22.15 m bgs

### 3.3.3 Fill Materials

It is possible fill material has been brought to the Site to support the construction activities observed, and likely subgrade fill material is present under the entire roadway on and adjacent to the Site. As this fill is of an unknown quality it is considered to be a PCA contributing to an APEC at the Phase One Property (APEC 6b).

### 3.3.4 Water Bodies and Areas of Natural Significance

No water bodies are present at the Phase One Property. The Ottawa River is located approximately 1 km north of the Phase One Property. Based on a review of selected aerial photographs and topographic maps, no other bodies of water or areas of natural significance were identified on or in the immediate vicinity of the Phase One Property.

According to the MECP Source Water Information Atlas interactive map, well-head protection areas are not present at the Phase One Property or within the Phase One Study Area. The Site is serviced by the municipal drinking water system based on the presence of water lines observed during the site reconnaissance and presented on GeoOttawa.

### 3.3.5 Well Records

Included in the ERIS report was a search of the Water Well Information System database for properties within the Phase One Study Area. Approximately 41 well records, the majority for monitoring wells, were listed in the ERIS report for the Phase One Property. Another 62 well records were identified within the remainder of the Study Area for domestic, industrial water supply, municipal water supply, commercial water supply and monitoring purposes.

Some records indicated wells had been abandoned. According to these well records, soil in the vicinity of the Site is primarily comprised of silt, sand, gravel or imported fill from surface to an approximate maximum depth of 4.5 m, although most well records indicate the surficial soil horizons are thin and are underlain by shallow (1 – 2 m bgs) bedrock as described in **Section 4.3.2**, above.

## 3.4 Site Operating Records

The Phase One Property is deemed an Enhanced Investigation Property, as defined in O.Reg.153/04. No operating records were provided to Stantec for review; however, an ECA registered to Honeywell Limited at 3 Hamilton Avenue North was noted in the historical report review and in the ERIS report.

Honeywell Limited located at 3 Hamilton Avenue North was registered and approved for air emissions in 2017 for emissions of air to the atmosphere related to the on-site vapour treatment process. The emissions were required to be exhausted into the atmosphere at a maximum volumetric flow rate of 0.0072 cubic metres per second through a stack with an exit diameter of 0.076 metres and extending 8.23 m above grade. Based on the height of the stack, and the emissions directly to the atmosphere, this on-Site treatment process is not considered to be a PCA contributing to an APEC at the Phase One Property.

#### 4 Interviews

February 7, 2025

## 4 Interviews

Stantec was unaccompanied during the site visit on March 17, 2023. No Taggart Reality Management/1000147699 Ontario Inc. personnel were available on-Site for interviews during the site visit. Stantec briefly discussed site operations with individual tenants when given the opportunity. The details of these discussions have been included in **Table 7** below, as applicable.

No other individuals at or associated with the current and/or former operations at the Phase One Property were available for an interview. Information gathered from individual tenants and received during the reporting process has been included in the applicable sections throughout this report.

## **5 Site Reconnaissance**

### **5.1 General Requirements**

The site visit was conducted by Romeet Gonsalves, B.Sc., G.I.T., of Stantec, on March 17, 2023. The field work was conducted between 8:30AM and 1:00PM. The weather was cloudy and rainy, and the temperature was approximately 2°C. Portions of the ground surface including the sidewalks were partly covered in snow during the site visit. Other localized depressions were filled with rainwater and snowmelt, where some monitoring wells were suspected to be present. At the time of the site visit, the Site was occupied by several commercial businesses ranging from self-storage, coffee shops, a bar, a fitness centre, a comic book shop, an interior design firm, a pet salon, and a bicycle store. The courtyard near the centre of the Phase One Property was locked and not accessible during the site visit. Select photographs from the site visit conducted on March 17, 2023 are included in **Appendix C**.

The Site and readily visible and publicly accessible portions of adjoining and neighbouring properties were observed for the presence of potential sources of environmental contamination. Some snow and rainwater remained on the ground at and around the Site, minimally obstructing the view during the site visit. Stantec was unaccompanied during the site visit; however, Stantec briefly discussed site operations with the owners and managers of the stores within the units on the Phase One Property, when possible.

### **5.2 Specific Observations at Phase One Property**

#### **5.2.1 Property Buildings and Structures**

Several multi-tenant buildings were present on the Phase One Property as well as a seacan along the northern boundary of the property owned by Golder, likely related to remediation activities at the Site. The Phase One Property included a paved parking lot area near the centre of the Site, and a grassy/treed courtyard also near the centre of the Site. The courtyard area was not accessible during the site visit. The buildings on the Phase One Property ranged from one storey to four storeys including three above-grade levels and one basement level. At the time of the site visit, all accessible units were occupied with exception of the Sphere Café located at 7 Hamilton Avenue unit 7A; however, the area was being used as a storage space of overstocked hardwood and tile owned by an adjoining tenant, Inner Design.

Salt was historically used for de-icing purposes on the courtyard area of the Phase One Property and on the adjacent off-site sidewalks and roadways (APEC 8).

## 5.2.2 Aboveground and Underground Storage Tanks

No USTs were observed on the Phase One Property at the time of the site visit; however, it was noted that a fill and vent port was observed at the apartment building directly north of the Phase One Property, located 320 Parkdale Avenue, which indicated at least one UST in the Study Area (**APEC 2**). One PVC drum was observed along the northern boundary of the Phase One Property in front of 340 Parkdale Avenue adjacent to the Golder shipping container. The drum was not accessible, and its contents were not confirmed during the site visit.

There was no evidence of any spill surrounding the drum; therefore, this drum is not expected to contribute to an APEC to the Site.

Based on email correspondence with Paul Hurst of WSP on April 22, 2024, two aboveground storage tanks (ASTs) were previously located on the east-central portion of the Phase One Property in the northeast corner of the basement of the Carleton Tavern at 223 Armstrong Street. The ASTs were located on a concrete floor and were removed in 2019 when the sub-slab depressurization system was installed. The presence of fuel storage ASTs on the east-central portion of the Phase One Property is considered a PCA (PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks) that contributes to an APEC on the southeast portion of the Phase One Property (**APEC 5b**).

No ASTs, generators, or other chemical or fuel storage tanks were observed at the Phase One Property at the time of the site reconnaissance.

## 5.2.3 Underground Utilities and Services

As confirmed by multiple tenants of various units on the Phase One Property and GeoOttawa, the buildings on site are provided underground utilities and services including sanitary, storm, hydro, and natural gas.

One pole-mounted transformer was located along the southern boundary of the Phase One Property. One pole-mounted transformer was also located east and west of the Phase One Property, immediately across the adjacent rights-of-way. No apparent leakage or staining were present at the transformers. Overhead hydro lines were also present along the boundaries of the Phase One Property.

## 5.2.4 Site Building Features

At least four buildings, comprising several units and a variety of tenants, were observed at the Phase One Property during the site reconnaissance. The building at the southwest corner of the Block included the civic addresses 7 Hamilton Avenue North and 233 Armstrong Street (including 233A, 223B, and 223C) and was only one floor, with access to a small basement level in 233A Armstrong Street only. The building along the centre of the southern boundary of the Block was identified by the civic address 229 Armstrong Street and was two above grade storeys with a small basement space; during the site reconnaissance, access was provided to the basement area, but not the second storey. The building located at the southeastern corner of the Block was identified by the civic address 223 Armstrong Street

and appeared to include two storeys and a basement. The property at 223 Armstrong Street was not accessed at the time of the site reconnaissance. The building along the entirety of the northern boundary of the Block included civic addresses 340 Parkdale Avenue, 340B Parkdale Avenue, 3 Hamilton Avenue North, and 5 Hamilton Avenue North. This building had three storeys and a basement level; however, all three storey and the basement section were only accessible through Parkdale Mini Storage located at 340 Parkdale Avenue at the northeast corner of the Block. The remaining tenants at the other units in this building were not aware of basement space below their units, nor did they have access to the second or third storeys. These buildings, the tenants, and their specific operations are discussed further in **Table 7**, below.

### **5.2.5 Wells**

Numerous monitoring wells were observed on the Phase One Property or the properties within the Phase One Study Area at the time of the Site reconnaissance. At least 26 monitoring wells were observed; however, it should be noted that portions of the Phase One Property and the Study Area were partly covered by snow and rainwater puddles. It should also be noted that at least 10 monitoring wells and one observation well were observed in the paved parking area near the centre of the Phase One Property where numerous cars were parked, and that observation of additional wells may have been obstructed by parked cars.

### **5.2.6 Sewage Works**

Storm and sanitary sewer manholes, and storm drains were observed on Hamilton Avenue North, Spencer Street, Parkdale Avenue, and Armstrong Avenue around the Phase One Property block. As noted on GeoOttawa, sanitary and storm sewers are located along Spencer Street, Parkdale Avenue, and Armstrong Avenue; and a combined sanitary/storm sewer is located along Hamilton Avenue North. Public water mains are also located along Hamilton Avenue North, Parkdale Avenue, and Armstrong Avenue. Wastewater was observed to be generated by all observed units at the Phase One Property.

### **5.2.7 Surface Features**

Where buildings were not present, the surfaces of the Phase One Property consisted of and paved parking areas, access routes, and a landscaped courtyard. The Phase One Property is at grade with the surrounding Study Area and dips very gently north towards the Ottawa River.

### **5.2.8 Current or Former Railway Lines or Spurs**

No current or former railway lines were identified on the Phase One Property or surrounding Study Area.

### **5.2.9 Surface Staining and Stressed Vegetation**

No stained surficial materials or stressed vegetation was observed during the March 17, 2023 site visit; however, it should be noted that no access was provided to the courtyard near the centre of the Phase One Property and surfaces were generally wet due to rain and snowmelt.

### **5.2.10 Imported Fill and Debris**

It is possible fill material has been brought to the Site to support the construction of the buildings on the Phase One Property. As many units on the Phase One Property did not have any basement area, it is possible that subgrade fill material is present on portions of the Phase One Property and under the roadways adjacent to the Phase One Property. As this fill is of an unknown quality is considered to be a PCA contributing to an APEC at the Phase One Property (**APEC 6b**).

Domestic and restaurant garbage was observed along the sidewalks outside of the units. The garbage appeared to be well-maintained and organized and no evidence of a PCA resulting from the present debris could be observed.

### **5.2.11 Enhanced Investigation Property**

Due to current and historical industrial operations at the Phase One Property, the Phase One Property is considered an Enhanced Investigation Property, as defined in O.Reg.153/04.

Minor generation of solid and/or liquid waste would be expected from ongoing commercial activities at the Phase One Property.

None of the following were observed at the Site:

- Stained surficial materials or stressed vegetation
- Watercourses, pits, or lagoons
- Air emissions or strong, pungent, or unusual odours

However, the following were observed:

- Drains, sumps, and septic systems
- Standing water

Standing water was observed due to ongoing rain and recent snowmelt in localized depressions, potholes and other cracks in the concrete and asphalt surroundings. Drains, sumps, and septic systems were observed to be associated with the buildings on the property and storm and sanitary manholes as well as storm catch basins were observed along the rights-of-way surrounding the Block. As these drains, sumps, and septic systems were observed to be in good maintenance, these are not considered to be PCAs contributing to APECs to the Phase One Property.

## **5.3 Phase One Study Area**

The Phase One Property is located within a commercial land use area and is bounded by Spencer Street to the north, Parkdale Avenue to the east, Armstrong Road to the south, and Hamilton Avenue North to the west. The surrounding Phase One Study Area is comprised of mixed residential and commercial land use properties.

A summary of relevant property use information in the Phase One Study Area is provided below in **Table 7** below.

**Table 7 Phase One Study Area Information**

| Address                        | Occupant/Unit                      | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------------------|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 340 Parkdale Avenue (the Site) | Parkdale Drip House<br>Unit 340B   | During the site visit, this part of the Site appeared to be in good maintenance and operated as a coffee shop. Some kitchen oils were observed in small quantities and the employees on site were not aware of recent spills. The coffee house included one floor of space with a kitchen and a storage room used by employees to cook and prepare food, and to store breads, pastries, coffee and other coffee shop style foods. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 340 Parkdale Avenue (the Site) | CrossFit Hintonburg                | Minimal access was provided to the crossfit gym space; however, the entire space appeared to be visible from the entrance. The space included one large exercise area stocked with weights, ropes and other similar exercise equipment. Staff on site indicated not being aware of any known spills or environmental occurrences at the property. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 340 Parkdale Avenue (the Site) | Jack's Upholstery and Re-Finishing | Minimal access was provided to this store. During the site visit, this property appeared to be disorganized; however, the store area was small and no notable observations were made. Some small paint cans and household cleaning products were noted to be present but no evidence of staining or spilling could be observed. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 340 Parkdale Avenue (the Site) | Parkdale Mini Storage              | During the site visit, this property appeared to be in good maintenance with exception of the basement area. Staff on site accompanied Stantec through the unit. Access was provided to the second and third floor hallways, where storage units were noted, but none were entered. Near the main entrance, an elevator was identified, and according to the staff on site was reported to be original to the building but had been out of service for several years. A mechanical room was observed on the second floor with a variety of equipment present. Service tags on the equipment indicated the equipment was last inspected in March 2023. Staff on site did not know how the equipment operated; however, no staining was observed and no floor drains were noted in the vicinity. The basement of the unit was observed to be in poor maintenance, with a room occupied by various wastes including old plumbing, and fluorescent light bulbs. As the basement room appeared to be built directly on top of the underlying bedrock at the property (no floor or impermeable membrane), the poor maintenance of the storage area and potentially contaminating materials laid directly on top of the subsurface may be a PCA contributing to an APEC at the Phase One Property ( <b>APEC 7</b> ). Access was also briefly provided to the roof of the unit; however, Stantec only observed the roof from the door. The roof was covered in snow and no environmental concerns were noted at the time. |

| Address                         | Occupant/Unit                    | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 223 Armstrong Street (the Site) | The Carleton Tavern              | Minimal access as provided to this property as there were not sufficient staff on site to escort Stantec to the basement area or the kitchen area. During the site visit, the main restaurant and bar portion were observed and appeared to be in good maintenance. Based on the observations made at the time of the site visit, the current site operations are not expected to contribute to an APEC to the Phase One Property; however, the historical presence of ASTs in the basement (which were removed in 2019) is considered to be a PCA and contributes to an APEC ( <b>APEC5b</b> ).                                                                                                                                                        |
| 229 Armstrong Street (the Site) | Morning Owl Coffee               | During the site visit, this property appeared to be in good maintenance. This property is a coffee shop. Several small (<1 gallon) bottles of cooking oils and cleaning products were observed at the site, and staff were unaware of any spills. The store had access to a basement used to extra storage space. No visible tanks, sumps, floor drains or other notable observations were made in the basement area. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                                                                                                                                                                                  |
| 233 Armstrong Street (the Site) | Nostalgia Collectibles Unit 233C | During the site visit, this property appeared to be in good maintenance. This property was a comic book store with other similar cartoon memorabilia. Access was limited as the space was generally small and the store was densely packed with books; however, no notable observations were made. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                                                                                                                                                                                                                                                                                                     |
| 233 Armstrong Street (the Site) | The Barking Barber Unit 233B     | During the site visit, this property appeared to be in good maintenance. This property is a pet groomer for small animals, namely dogs. No floor drains were observed at the site; however, one sump was noted near the centre of the store. The store manager on site was unsure if the sump was for sanitary or storm services; however, based on visual inspection it appeared to have been for combined storm/sanitary sewage. Two hot water tanks were observed, both appeared to be in good maintenance. Several 1 gallon bottles of shampoos (for dogs) were observed around the store, in good maintenance with no visible spills or staining. The current site operations are not expected to contribute to an APEC to the Phase One Property. |
| 233 Armstrong Street (the Site) | Inner Designs                    | During the site visit, this property appeared to be in good maintenance. This property is an interior design showroom and storage site. Floor drains were noted in the small basement space below the shop; however, only a hot water tank was observed in the basement area and the staff on site were unaware of any spills at the site. The site served as a showroom and storage space for some hardwood, tile, and ceramic materials for residential properties. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                                                                                                                                  |

| Address                            | Occupant/Unit                          | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------------------------------|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7 Hamilton Avenue North (the Site) | Full Cycles                            | During the site visit, this property appeared to be in good maintenance. This property is a bicycle sale, repair, and maintenance shop. Small volumes of household cleaning products were observed and small volumes of suspension fluids were noted as being used during bicycle repair and maintenance. The staff on site indicated that suspension fluid is jarred and disposed off-site, and no spills were known to have recently occurred on the site. Bike frames, tires, and other parts are disposed of on the corner of the sidewalk for pick up by the City of Ottawa. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                          |
| 5 Hamilton Avenue North (the Site) | Mino'Weesini                           | During the site visit, this part of the site appeared to be in good maintenance and operated as a food bank. Some small volumes of cooking oils, paints, and household cleaning products were observed to be stored for usage at the property. The employees indicated that oils are not used at the property, instead they are collected, stored and donated. The employees were not aware of any oil or paint spills. The property included one floor of space. Two floor drains were observed at the property, and one monitoring well was observed. The current site operations are not expected to contribute to an APEC to the Phase One Property.                                                                    |
| 3 Hamilton Avenue North (the Site) | Railbender Tattoo Shades & Art Gallery | During the site visit, this part of the Site appeared to be in good maintenance and operated as a tattoo parlour. Small volumes of household cleaning products used during tattooing were observed and employees indicated that cleaning supplies were disposed of down the drain or disposed of at nearby pharmacies along with needles and other tattooing supplies rather than being disposed of in the garbage on site. One soil vapour probe was observed under a table but was not accessed. The employees indicated the port was typically accessed once or twice a year. The property included one floor of space. The current site operations are not expected to contribute to an APEC to the Phase One Property. |

**Phase One Environmental Site Assessment: Proposed Development Hamilton Avenue, Spencer Avenue, Parkdale Avenue, Armstrong Street, Ottawa, Ontario**  
**5 Site Reconnaissance**  
February 7, 2025

| Address | Occupant/Unit                           | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         | The remainder of the Phase One Property | <p>The remainder of the Phase One Property that was not occupied by buildings was noted as being a paved area with parked vehicles, and a courtyard area. During the site visit, at least 26 monitoring wells were observed on the Phase One Property, and several more in the rights of way surrounding the Block. Ten monitoring wells and one observation well were noted in the paved parking lot area near the centre of the Property; however, it should be noted that observation of additional wells or vapour probes may have been obstructed by vehicles, rainwater and snowmelt was puddled into localized depressions, and snow was still present on the Site. No access was provided to the courtyard area and the view of this area was generally obstructed by parked cars in front of the fence leading to the courtyard area.</p> <p>The Phase One Study Area was generally observed during the site reconnaissance. The surrounding Study Area was comprised mostly of residential homes (single unit and multi-level apartments), parking lots, rights of way, a community park, and small businesses/local retailers; however, some notable observations include:</p> <p>A fill and vent pipe was observed at the southern entrance to the apartment building at 320 Parkdale Avenue, adjacent to the north of the Phase One Property. A fuel oil leak of unknown quantity was listed in the ERIS report in 2016 at this property. This spill and the presence of at least one UST near the Site is considered to be a PCA contributing to an APEC at the Phase One Property (<b>APEC 2</b>).</p> <p>A Petro-Canada gas station was observed at 390 Parkdale Avenue approximately 110 m from the Site. As noted in <b>Table 5</b>, above several USTs were listed at the gas station. Based on the proximity to the Site, this property is considered to be a PCA contributing to an APEC at the Phase One Property (<b>APEC 1e</b>).</p> <p>Grant's Street Garage located at 1 Grant Street approximately 180 m east of the Site, and Bourk's Car Care located at 24 Hamilton Avenue North, approximately 120 m south of the Site were observed during the site reconnaissance. Both automobile garages appeared to be in good maintenance and no significant environmental concerns were observed. Although these two properties are PCAs, due to the distance to the Site, it is not expected that the volumes of fuel normally observed at local garages would be of environmental impact to the Site. Therefore, this PCA is not considered to contribute to an APEC to the Phase One Property.</p> |

## **5.4 Written Description of Investigation**

The site reconnaissance was conducted on March 17, 2023, between 8:30AM and 1:00PM. The Site and readily visible with exception of some partly snow and rain covered portions, and publicly accessible portions of adjoining and neighbouring properties were observed for the presence of potential sources of environmental contamination. Numerous monitoring wells and at least one observation well, and one soil-vapour port were observed on the Phase One Property or the properties within the Phase One Study Area at the time of the Site reconnaissance. Based on the proximity to the Site and the inferred groundwater flow direction to the Site, the following PCAs were identified as contributing to an APEC to the Site:

- A historical mill, lumber yard, and dry kiln located at several properties at the block directly south of the Phase One Property;
- A historical foundry and several other metal fabrication-related workshops located at the block of properties directly northwest of the Phase One Property;
- A historical foundry located at the block directly west of the Phase One Property;
- The former manufacturing and maintenance of aviation, aerospace, defense, and other electronic equipment at 3 Hamilton Avenue North and 340 Parkdale Avenue (the Site);
- Former shoe manufacturing at 3 Hamilton Avenue North (the Site);
- A gas station with at least three USTs operating at 390 Parkdale Avenue as well as a gasoline spill of unknown quantity in 2005 (approximately 110 m south of the Phase One Property).
- A former gas station with at least two USTs previously operating at 1186 Wellington Street West as well as a 3000 L furnace oil spill in 1992, and another gasoline spill to soil of unknown quantity in 1993 (approximately 160 m south of the Phase One Property);
- A commercial autobody shop registered for the fuel and oil related waste generation at 16 Hamilton Avenue (approximately 90 m south of the Phase One Property);
- A UST and associated fuel leak of unknown quantity in 2016 at the apartment building directly north of the Phase One Property located at 320 Parkdale Avenue;
- A gasoline spill of unknown quantity in 1988 located at 383 Parkdale Avenue (approximately 80 m southeast of the Phase One Property);
- A 5,000 L fuel tank formerly located at 1175 Wellington Street West (approximately 100 m south of the Phase One Property);
- The importation of fill material of unknown quality at the Site and surrounding rights-of-way
- Exposed subsurface in the basement of 340 Parkdale Avenue (the Site) where potentially contaminating wastes have been stockpiled with no impermeable floor between the building and the underlying subsurface (APEC 7).
- Historical use of salt for de-icing purposes on the courtyard areas of the Phase One Property and on off-Site sidewalks and roadways (APEC 8).

No other PCAs contributing to an APEC were identified on the Site or within the Phase One Study Area. Findings of the site reconnaissance of the Phase One Property and the Phase One Study Area are presented in **Section 6.0**.

**Section 4.0** presents the findings of the records review for the Phase One Property and **Section 5.0** presents the findings of the interviews with the site contacts, where applicable. No additional investigations were undertaken during the Phase One ESA to assess potential environmental concerns noted or identified during the site reconnaissance or records review. A summary of the relevant findings to the existence of APECs at the Phase One Property is provided below in **Section 7.0**.

## 6 Review and Evaluation of Information

### 6.1 Current and Past Uses of The Phase One Property

Based on the scope of the Phase One ESA, formal land registry searches were not completed to identify historical ownership information for the Phase One Property. Current and past uses have been identified through other sources as described below.

Based on information collected during the Phase One ESA, 3 Hamilton Avenue North (the northern half of the Phase One Property) was first developed in the early 1940s for industrial use which converted to commercial uses in 2000; 233 Armstrong Street (the southwest portion of the Phase One Property) was first developed for residential use between 1928 and 1932 and was converted to various commercial uses in the early 1940s; 229 and 223 Armstrong Street (the southeast portion of the Phase One Property) were first developed for residential use prior to 1932 and were converted to commercial uses in the 1940s and 1930s, respectively, as noted in **Table 8** below. Current land use is commercial/residential.

**Table 8 Table of Current and Past Uses of the Phase One Property**

| Year                                       | Name of Owner                                                  | Description of Property Use(s) | Property Use(s) (per regulatory types) | Other Observations from Aerial Photographs, Fire Insurance Plans, etc.                                                                                                                                                                                                                                                       |
|--------------------------------------------|----------------------------------------------------------------|--------------------------------|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>3 Hamilton North (PIN 04035 – 0144)</b> |                                                                |                                |                                        |                                                                                                                                                                                                                                                                                                                              |
| <b>Historical Property Use</b>             |                                                                |                                |                                        |                                                                                                                                                                                                                                                                                                                              |
| 1895 - 1938                                | Ottawa Land Association                                        | Undeveloped                    | Agricultural or other use              | Based on a review of the 1932 aerial photo, the northern 3 Hamilton Ave. N. parcel of the Site appears undeveloped.                                                                                                                                                                                                          |
| 1938 – 1940                                | Shirley Woods, Duncan MacTavish, Frederick Runge, Robert Brown | Undeveloped                    | Agricultural or other use              |                                                                                                                                                                                                                                                                                                                              |
| 1940 - 1951                                | Ontario Hughes Owens Company Ltd.                              | Manufacturing                  | Industrial                             | 3 Hamilton Ave. N. was first listed in Ottawa city directories as 'Ontario Hughes Owen Co.' (manufacturer of scientific instruments) from 1945 to 1950 and as 'Sperry Gyroscope' from 1955 to 1984.<br><br>Based on a review of the 1946 aerial photo, the Site appears developed in a similar configuration to the present. |

## 6.2 Potentially Contaminating Activities (PCA)

The following PCAs, as defined in O.Reg.153/04, were identified to have been present currently or historically on the Phase One Property or within the Phase One Study Area and were considered to be environmentally relevant to the Phase One Property. The PCA numbering, where applicable, is consistent with the Table 2, Schedule D. in O.Reg.153/04.

As discussed in previous sections of this report, Stantec has identified 13 groupings of PCAs that have contributed to APECs at the Site. For the purpose of this investigation, the PCAs have been grouped by the property on which they are located, **Table 9** summarizes these PCAs.

**Table 9 Potentially Contaminating Activities**

| # | O.Reg 153/04 PCA number                                                                                                                             | Location | Description                                                                                                                                                                                                                                                                                                                                                                         |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | No PCA number; however, it is the opinion of the QP <sub>ESA</sub> that this is a PCA, and confirmed impacts have been previously observed          | On-site  | The review of previous reports indicated that PCE may have been used by the Ottawa Shoe Manufacturing Company at 233 Armstrong Avenue during leather preparation as part of shoe fabrication.                                                                                                                                                                                       |
| 2 | No PCA number; however, it is the opinion of the QP <sub>ESA</sub> that this is a PCA, and confirmed impacts have been previously observed          | On-site  | A review of previous reports indicated various impacts of PCE, TCE, DCE, vinyl chloride and petroleum hydrocarbon impacts in soil and groundwater around the Site.                                                                                                                                                                                                                  |
| 3 | Waste generation of various types including fuel related waste and chlorinated solvents<br><br>Vehicles and Associated Parts Manufacturing (PCA 57) | On-site  | Honeywell Aerospace, Sperry Gyroscope and/or Sperry Aerospace were noted as having operated at 3 Hamilton Avenue North between 1955 to 2021. During this time wastes related to fuel and chlorinated solvents were registered as they related to operations or aerospace and aviation equipment.                                                                                    |
| 4 | Importation of Fill Material of Unknown Quality (PCA 30)                                                                                            | On-site  | It is likely that fill material has been imported to site for the construction of the buildings on the Property and the rights of ways along the perimeter of the Site. Fill has been noted in previously drilled boreholes on the Property and in the Phase One Study Area.                                                                                                        |
| 5 | No PCA number; however, it is the opinion of the QP <sub>ESA</sub> that this is a PCA                                                               | On-site  | Property maintenance debris (discarded PVC pipe, fluorescent bulbs) and domestic waste were observed in a pile in the basement of the property at 340 Parkdale Avenue (Photo 006). Waste materials further within the pile could not be safely characterized. The poor housekeeping in this area suggests a potential for adverse impacts to the Site.                              |
| 6 | Gasoline and Associated Products Storage in Fixed Tanks (PCA 28)<br>Fuel related spill                                                              | Off-site | A former gas station with at least two USTs was present at 1186 Wellington Street West (160 m south of the Site) since at least 1956 as noted in the fire insurance plans, until the early 2000s. Furthermore, a 3000 L furnace oil spill was noted in 1992 with confirmed impacts to the soil and groundwater in the area, as well as a gasoline spill of unknown quantity in 1993 |
| 7 | Metal Fabrication (PCA 34)                                                                                                                          | Off-site | Several metal-work operations including Beach Foundry Ltd. were located at the block of properties adjacent to the northwest of the Phase One Property, observed in the 1956 fire insurance plans.                                                                                                                                                                                  |
| 8 | Waste generation of various types including fuel related waste<br>Commercial Autobody Shop (PCA 10)                                                 | Off-site | CAA North and East Ontario located 16 Hamilton Avenue North (90 m south of the Site) were registered for the generation of oil and fuel related wastes between 1999 to 2001.                                                                                                                                                                                                        |

| #  | O.Reg 153/04 PCA number                                                                | Location | Description                                                                                                                                                                                                                                                                                                            |
|----|----------------------------------------------------------------------------------------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9  | Gasoline and Associated Products Storage in Fixed Tanks (PCA 28)<br>Fuel related spill | Off-site | A multi-unit apartment building located at 320 Parkdale Avenue (adjacent to the north of the Site) was noted as having a fuel leak of unknown quantity in 2016 during the filling of an underground storage tank. The fill and vent pipes were also observed during the site visit, confirming the presence of a tank. |
| 10 | Fuel related spill                                                                     | Off-site | A gasoline spill of unknown quantity was recorded in 1988 at 383 Parkdale Avenue (approximately 80 m southeast of the Site).                                                                                                                                                                                           |
| 11 | Gasoline and Associated Products Storage in Fixed Tanks (PCA 28)                       | Off-site | A 5,000 L fuel tank which was delisted in 2012 was registered to 785730 Ontario Inc. in 1990 at 1175 Wellington Street West (100 m south of the Site).                                                                                                                                                                 |
| 12 | No PCA number; however, it is the opinion of the QP <sub>ESA</sub> that this is a PCA  | Off-site | Several properties on the block adjacent to the south of the Phase One Property were associated with milling, the storage of lumber, and a dry kiln were observed in the 1902 fire insurance plans.                                                                                                                    |
| 13 | Gasoline and Associated Products Storage in Fixed Tanks (PCA 28)<br>Fuel related spill | Off-site | A gas station with at least three USTs present at 390 Parkdale Avenue (110 m south of the Site) since at least 1956 as noted in the fire insurance plans. Furthermore, a spill of unknown quantity was noted in 2005 near the operating gas station.                                                                   |
| 14 | Metal Fabrication (PCA 34)                                                             | Off-site | A brass foundry, Capital Wire and Cloth (previously Capital Wire and Clothing Manufacturing Co.) was observed at the block directly west of the Phase One Property in the 1932 aerial imagery.                                                                                                                         |
| 15 | Gasoline and Associated Products Storage in Fixed Tanks (PCA 28)                       | Off-site | A UST was noted in the 1922 fire insurance plans at the block of properties west of the Phase One Property.                                                                                                                                                                                                            |
| 16 | Gasoline and Associated Products Storage in Fixed Tanks (PCA 28)                       | On-site  | Two 500 L fuel oil ASTs were reported to be previously located in the northeast corner of the Carleton Tavern basement. The ASTs were removed from the Site in 2019.                                                                                                                                                   |
| 17 | No PCA number; however, it is the opinion of the QP <sub>ESA</sub> that this is a PCA  | On-Site  | Central and south-central portions of the Site (outside the building footprints), as well as off-Site sidewalks and roadways, have been used in part for paved parking and pathway areas which may have been impacted by historical application of de-icing compounds for winter safety.                               |

## 6.3 Areas of Potential Environmental Concern (APEC)

APECs identified on the Phase One Property based on the presence of PCAs (see **Table 9**) are summarized in **Table 10**. PCAs were considered likely to contribute to APECs based on distance from and/or direction in relation to the Phase One Property. **Table 9** also presents the contaminants of potential concern (COPCs) associated with the PCAs, the media of concern, and a brief description of each of the APECs.

The Phase One ESA research has identified 17 APECs at the Site.

**Table 10** briefly summarizes the APECs and associated PCAs at the Site.

**Table 10 Areas of Potential Environmental Concern**

<sup>1</sup> Contaminants include petroleum hydrocarbons (PHCs), volatile organic compounds (VOCs), benzene, toluene, ethylbenzene, and xylenes (BTEX), polycyclic aromatic hydrocarbons (PAHs), electrical conductivity (EC), Sodium Adsorption Ratio (SAR), metals (includes 19 metals parameters including hydride-forming metals, but does not include Chromium VI as no evidence of leather tanning in historical records).

## 6.4 Phase One Conceptual Site Model

In developing the Conceptual Site Model for the Phase One Property and Phase One Study Area, the following physical characteristics/pathways described in **Table 11** were evaluated to assess whether PCAs have contributed to an APEC at the Phase One Property:

**Table 11 Conceptual Site Model**

| Physical Characteristics/<br>Pathways       | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Subsurface Soils</b>                     | Based on information obtained from the Ontario Geological Survey Map titled Surficial Geology of Southern Ontario, the surficial geology in the vicinity of the Phase One Property generally consists of stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain. According to previous assessments of the Site, surficial soils are only present to approximately 1.75 m bgs, overlying a shallow bedrock in the area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Bedrock</b>                              | Based on information obtained from MNR Ontario Geological Survey Map 2544, titled Bedrock Geology of Ontario, Southern Sheet, bedrock in the vicinity of the Site is reported to consisted of limestone, dolostone, shale, arkose, and sandstone of the Ottawa Group and Simcoe Group, Shadow Lake Formation. The depth to bedrock was not indicated on the map; however, according to previous assessments of the Site and the Phase One Study Area, bedrock was encountered at depths as shallow as 0.81 m bgs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Inferred Ground Water Flow Direction</b> | <p>Based on information accessed from the MNR online mapping, regional surface drainage (and anticipated shallow ground water flow direction) is expected to flow to the north toward the Ottawa River approximately 1 km from the Phase One Property.</p> <p>It should be noted the elevation of the local ground water table can generally mimic the local topography and may not reflect the regional trend in drainage. The local shallow ground water flow pattern can also be influenced by nearby subsurface structures, such as building foundations, weeping tiles and utility trenches. According to the Phase II ESA completed by Paterson in 2011, groundwater in the lower bedrock unit was determined to be flowing to the northeast; however, according two semi-annual groundwater monitoring events by Golder in 2018 (April and September 2018), groundwater flow was variable towards the west, north, and east. Groundwater flow in the deep bedrock was also noted as being towards the south due to the southerly dipping bedrock.</p> <p>Stormwater collected on the Site is anticipated to drain by infiltration or overland flow to nearby catch basins or roadways.</p> |
| <b>Underground Utilities</b>                | Given the current operations on the Site and surrounding Study Area and evidence provided by GeoOttawa, the Phase One Property is serviced and underground utility can be observed surrounding the Phase One Property and likely under the Property. Sanitary and storm manholes, catch basins, and fire hydrants were observed along the streets bounding the Block.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

The following items were deemed to be not present at the Phase One Property:

1. water bodies located in whole or in part on the Phase One Study Area;
2. ANSIs located in whole or part on the Phase One Study Area and;
3. drinking water wells.

### **Discussion of Uncertainty or Absence of Information**

As indicated in Section 5.0, no representatives knowledgeable of the Site were provided to Stantec for an interview.

However, the past use of the Phase One Property is well understood based on historical information sources obtained and reviewed during the Phase One ESA.

The physical characteristics of the land area comprising the Site are inferred from the available historical information sources referenced herein. The presence of any associated subsurface structures and/or utilities, as well as the geological faults identified in the Semi-Annual Groundwater Monitoring reports prepare by Golder in 2018 may influence contaminant migration pathways within the Phase One Property.

As indicated in Section 4.2.6., a response from the MECP has been received indicating that approximately 6,500 hardcopy pages had been located and were available for purchase. Stantec has purchased the information and it was received from the MECP on February 13, 2024. A total of 20,403 pages of records were provided and reviewed. Generally, the results were consistent with information that was previously provided to Taggart. Further, considering the historical data there was no new information presented that would warrant additional environmental assessment or change the recommendation for a Phase Two ESA.

As indicated in Section 6.1, some areas of the Phase One Property and the surrounding Study Area were partially covered by snow and/or rainwater and may have obstructed the view of some surface features.

No other potential uncertainties or missing information were encountered during completion of the Phase One ESA.

The figures include features and details in relation to the Phase One Study Area and the Phase One Property. In general, the figures illustrate the following where applicable: road names and existing buildings and structures, water bodies, location of areas of natural significance (if present), presence of drinking water wells at the Phase One Property (if present), property usage types on adjoining properties, APECs, locations and types of known tanks (if present), general inferred direction of ground water flow in the vicinity of the Phase One Property, and the approximate locations of underground utilities or structures, if known.

## 7 Conclusions

### 7.1 Whether Phase Two Environmental Site Assessment required before Record of Site Condition submitted

As APECs were identified associated with the Phase One Property based on review of the city directories, aerial photographs, chains of title, other historical records and observations made during the site reconnaissance, a Phase Two ESA is required before an RSC can be submitted.

Prior to filing an RSC, the maximum soil and ground water concentrations of contaminants of concern must either meet the applicable MECP generic standards, or alternatively, property specific standards generated specifically for the Phase One Property.

### 7.2 Record of Site Condition based on Phase One Environmental Site Assessment alone

An RSC cannot be filed based solely on the findings of this Phase One ESA.

### 7.3 Signatures

The site reconnaissance and the preparation of this report was completed by Romeet Gonsalves, B.Sc., G.I.T. Quality review was completed by Jill Peters-Dechman, P.Eng., QP<sub>ESA</sub>. The tasks completed for the Phase One ESA were also overseen by Jill Peters-Dechman. Credentials of the project team members are provided in **Appendix D**.

The objectives and requirements set out in O.Reg.153/04 for a Phase One Environmental Site Assessment were applied in carrying out the environmental site assessment and preparing this report.

### 7.4 Closure

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential liabilities associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the identified portion of the property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information. All information received from the client or third parties in

## **7 Conclusions**

February 7, 2025

the preparation of this report has been assumed by Stantec to be correct. Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

The opinions in this report can only be relied upon as they relate to the condition of the portion of the identified property that was assessed at the time the work was conducted. Activities at the property subsequent to Stantec's assessment may have significantly altered the property's condition. Stantec cannot comment on other areas of the property that were not assessed.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition. This report should not be construed as legal advice.

This report has been prepared for the exclusive use of the client identified herein and any use by any third party is prohibited. Stantec assumes no responsibility for losses, damages, liabilities or claims, howsoever arising, from third party use of this report.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures are not guaranteed. If future work is planned, the exact location of all such utilities and structures should be confirmed and Stantec assumes no liability for damage to them.

The conclusions are based on the site conditions encountered by Stantec at the time the work was performed at the specific testing and/or sampling locations, and conditions may vary among sampling locations. Factors such as areas of potential concern identified in previous studies, site conditions (e.g., utilities) and cost may have constrained the sampling locations used in this assessment.

In addition, analysis has been carried out for only a limited number of chemical parameters, and it should not be inferred that other chemical species are not present. Due to the nature of the investigation and the limited data available, Stantec does not warrant against undiscovered environmental liabilities nor that the sampling results are indicative of the condition of the entire site.

As the purpose of this report is to identify site conditions which may pose an environmental risk, the identification of non-environmental risks to structures or people on the site is beyond the scope of this assessment.

Should additional information become available which differs significantly from our understanding of conditions presented in this report, Stantec specifically disclaims any responsibility to update the conclusions in this report.

The site reconnaissance and the preparation of this report was completed by Romeet Gonsalves, B.Sc., G.I.T., and the senior technical review was conducted by Jill Peters-Dechman, P.Eng., QP<sub>ESA</sub>. Credentials of the project team members are provided in **Appendix D**.

Topographic data was collected under Winter Conditions.  
Snow cover and ice preclude determining location and  
elevation of some topographical data that is otherwise visible.

Convergence of 0°30'40" has been applied to bearing from a Plan by  
(AOG) November 3, 2000 to account for different reference meridians.  
Bearings shown hereon are grid bearings and are derived from  
the westerly limit of Hamilton Avenue North shown to be  
N23°34'30"E on a Plan by (B57) dated August 31, 1983 and are  
referred to the Central Meridian of Zone 9 of the Ontario  
Coordinate System, Longitude 76°30' West (MTM NAD-83).

BOUNDARY INFORMATION SHOWN HEREON HAS  
BEEN COMPILED FROM FIELD SURVEY AND EXISTING  
SURVEY RECORD.

SITE AREA = 2654 m<sup>2</sup>

## ELEVATION NOTES

- Elevations shown are referred to geodetic datum.
- It is the responsibility of the user of this information to verify that the job benchmark  
has not been altered or disturbed and that its relative elevation and description  
agrees with the information shown on this drawing.

## UTILITY NOTES

- This drawing cannot be accepted as acknowledging all of the utilities and it will  
be the responsibility of the user to contact the respective utility authorities for  
confirmation.
- Only visible surface utilities were located.
- A field location of underground plant by the pertinent utility authority is  
mandatory before any work involving breaking ground, probing, excavating etc.
- Underground utility services and inverts are taken from City of Ottawa Engineering  
Drawings E-07-14, E-07-10, 2333 sheet 5 of 6, 3094 sheet 4 of 7 and 2292 sheet  
5 of 6.

## **Appendix D      Project Team Members**

Principal, Business Centre Practice Leader, Environmental Engineer

24 years of experience · Ottawa, Ontario

Jill Peters Dechman is a Principal and Business Centre Practice Leader for the Environmental Services group in Ontario. She has more than 20 years' experience in environmental consulting, specifically with respect to Environmental Site Assessment (ESA) programs at contaminated sites. Ms. Peters Dechman is a licensed professional engineer in Ontario and is a Qualified Person under Ontario Regulation 153/04 of the Environmental Protection Act. She also is a licensed professional engineer in Manitoba. Ms. Peters Dechman is responsible for health and safety, technical quality, and innovation within the Environmental Services group in Ontario. She provides senior support and technical review for Phase I, Phase II, Phase III ESAs and remediation programs at contaminated sites. She has completed environmental site assessments and remediation action plans dealing with a variety of contaminants (fuels, solvents, and emerging contaminants) at sites for federal, municipal, and private proponents. Ms. Peters Dechman has provided consulting services as an environmental engineer on multiple municipal infrastructure-related projects for road, bridge, and utility projects. Ms. Peters Dechman has experience in the development and preparation of tender specifications to support remediation projects at a variety of properties.

## EDUCATION

B.Eng. Environmental, Carleton University, Ottawa, Ontario, Canada, 2000

Groundwater Pollution & Hydrology, Princeton Groundwater Inc., Orlando, Florida, USA, 2008

Remediation Course, Princeton Groundwater Inc., Miami, Florida, 2012

## CERTIFICATIONS & TRAINING

Certificate of Achievement, POST 2023 LEVEL 1 - BBS - Orientation and Test, Ottawa, Ontario, Canada, 2023

## REGISTRATIONS

Professional Engineer, Engineers Geoscientists Manitoba

Professional Engineer, Professional Engineers Ontario

## PROJECT EXPERIENCE

### ENVIRONMENTAL SITE ASSESSMENTS PHASE I, II, III

Cove Island Light Station, Environmental Program | PSPC | Cove Island, Ontario, Canada | 2020-2021 | Senior Quality Reviewer

Provided senior quality review for the preparation of a remedial options evaluation and liability estimate for the 13.2 hectare DFO light station and related facilities situated on the northern portion of the island in Fathom Five National Marine Park. Intent of the program was to provide viable remediation / risk management options for the Site and to present a preferred option and associated liability estimates.

Tunney's Pasture, Phase One ESA | PSPC | Ottawa, Ontario, Canada | 2019-2020 | Project Manager

Phase One ESA completed to assess the 49-hectare land parcel occupied by the federal government office building complex. The assessment included 21 buildings and two former building lots. Project was completed to support the PWGSC Tunney's Pasture Master Plan and potential divestment of the Site. The Phase One ESA was tailored to guide further assessment work to reduce environmental liabilities prior to divestment.

530 Tremblay Road Redevelopment | PSPC | Ottawa, Ontario, Canada | 2018-2020 | Project Manager, Senior Quality Reviewer

Provided project management and senior quality review for the Phase I ESA and subsequent Phase II ESA of a former MTO equipment and repair centre prior to possible property divestment. Areas of potential environmental concern were identified in the Phase I ESA and were further assessed in the Phase II ESA. Included the preparation of recommendations for further assessment, delineation, and remediation of the soil and groundwater impacts identified. Subsequent work stage included the preparation of cost estimates for remediation prior to redevelopment.

Debris, Waste & Rubble Pile at Joyceville Institution, Potable Water Well Survey and Data Gap Analysis, and Detailed Work Plan | | PSPC | Kingston, Ontario, Canada | 2018-2021 | Senior Quality Reviewer

Provided senior quality review for the completion of the potable water well survey, data gap analysis, and development of the detailed workplan for further assessment activities to address the identified data gaps. Intent of the work plan was to prepare a program to inform and support subsequent remediation/risk management program to achieve site closure. Subsequent work stages included soil and debris sampling, installation and sampling of groundwater monitoring wells in support of a screening level risk assessment.

Phase I ESA, Sorting Facility | Canada Post | Kingston, Ontario, Canada | 2015 | Project Manager

Managed the Phase I ESA of a mail sorting facility in downtown Kingston. The assessment was completed for due diligence purposes prior to potential divestment of the property.

Phase I ESA, Three First Nations Sites | AANDC | Manitoba, Canada | 2016 | Senior Quality Reviewer

Senior quality reviewer of Phase I ESAs of three First Nations sites in Manitoba. The sites included former gasoline retail outlets and waste disposal sites within the First Nation's communities. Recommendations included the completion of Phase II ESAs to assess potential soil and groundwater concerns.

Phase I and II ESA, Boteler Street | City of Ottawa | Ottawa, Ontario, Canada | 2015 | Project Manager

Managed the completion of both Phase I and II ESAs of a vacant property in downtown Ottawa, to support the divestment and redevelopment of the property. The assessments were completed in accordance with the requirements of Ontario Regulation 153/04. Additional components of the project included remedial excavation of mercury impacts, management of soil transfer activities, asbestos sampling and removal.

Phase II ESA, Former Fire Fighting Training Area #2 | DCC/DND | CFB Shilo, Manitoba, Canada | 2017-2018 | Senior Technical Reviewer

Provided senior technical review and support for the Phase II ESA to assess possible soil and groundwater impacts by PFAS at the site.

Phase I & II ESA, Conroy Road | City of Ottawa | Ottawa, Ontario, Canada | 2016-2017 | Project Manager

Managed the Phase I and II ESA of a vacant parcel of land in rural Ottawa, ON. The assessments were completed for due diligence purposes prior to potential divestment of the property. The Phase I ESA was completed in accordance with O.Reg. 153/04. The Phase II ESA was recommended to address potential environmental concerns associated with the presence of fill material and debris at the former driving range facility.

Phase I and II ESA, 1599 Carling Avenue | Suncor | Ottawa, Ontario, Canada | 2010-2019 | Senior Quality Reviewer

Provided senior quality review for the environmental site assessments required to support the filing of a Record of Site Condition under O.Reg. 153/04. Project work included the completion of a Phase I ESA and Phase II ESA in accordance with O.Reg. 153/04, as well as the completion of a remedial excavation at the site. Environmental site assessment work completed to support the completion of a human health and ecological risk assessment for proposed future re-development of the property.

Phase I & II ESA, 25 Khymer Court | City of Ottawa | Ottawa, Ontario, Canada | 2016-2017 | Project Manager

Managed the Phase I and II ESA of a vacant parcel of land in rural Ottawa, ON. The assessments were completed for due diligence purposes prior to potential divestment of the property. The Phase I ESA was completed in accordance with O.Reg. 153/04. The Phase II ESA was recommended to address potential environmental concerns associated with an off-site salvage yard/auto wrecker.

Phase I & II ESA | Via Rail Canada | Smiths Falls to Brockville, Ontario, Canada

Managed the completion of both Phase I and II ESAs of the rail alignment between Smiths Falls and Brockville, ON, in support of potential acquisition of the property. The completion of the assessments were time sensitive to meet the requirements of the transaction.

Canadian Food Inspection Agency, Phase I ESA | PSPC | Ottawa, Ontario, Canada | 2021 | Senior Quality Reviewer

Phase I ESA completed to assess the 820-hectare land parcel occupied by agricultural land, wooded areas, offices, storage buildings and laboratory facility for a total of 24 buildings. Reporting included recommendations for further assessment of identified APECs.

Residential Drinking Water Sampling | DCC/DND | 22 Wing North Bay, North Bay, Ontario, Canada | 2017-2018 | Senior Technical Reviewer

Contaminated Sites Specialist and Quality Reviewer for water supply survey and PFAS testing program of 30 privately- owned water supply wells upgradient and downgradient of former firefighter training locations at the North Bay airport.

Shirley's Bay Campus and Connaught Range and Primary Training Centre, Phase I ESA | DCC/DND | Ottawa, Ontario, Canada | 2018-2019 | Senior Technical Advisor, Quality Review

Provided senior technical support and quality review for the Phase I ESA in support of the development of a major infrastructure project at the Site and potential land transfer activities. Historical report review in conjunction with standard Phase I ESA practices were employed to identify and prioritize areas of potential environmental concern for further assessment.

Knapp Point Minor Shore Light, Remedial Confirmation Soil Assessment and Site Closure Report | PSPC | Wolfe Island, Ontario, Canada | 2018-2019 | Senior Quality Review

Provided senior quality review for the site closure reporting which included the completion of a remedial confirmation sampling program to document that remediation/risk management objectives had been achieved at the Site. Report provided documentation of the completion of the FCSAP 10-Step process.

London International Airport, Golfland Area, Phase I and II ESA | Transport Canada | London, Ontario, Canada | 2018-2019 | Project Manager, Senior Quality Reviewer

Provided project management and senior quality review for the Phase I ESA and subsequent Phase II ESA of property adjacent to the LIA for due diligence purposes. Areas of potential environmental concern were identified in the Phase I ESA and were further assessed in the Phase II ESA. Scoring according to the NCSCS was completed. Included the preparation of recommendations for further assessment, delineation, and remediation of the soil and groundwater impacts identified.

PSPC/NRCan, 555 Booth Street Remediation | Ottawa, Ontario, Canada | 2016-2018 | Senior Environmental Engineer

Senior Environmental Engineer for the preparation and review of design documents for the remediation of metals and PAH impacted soils surrounding the site building. Responsible for the review of existing documentation including: Environmental Site Investigations, Environmental Assessments, and Geotechnical Investigations. Responsible for the preparation of 75%, 99%, and tender-ready drawings, specifications, and cost estimates and submission to PSPC for review and approval. Project included provision of client support during the tendering process and third-party oversight of contractor during remediation phase.

Canada Centre for Inland Waters, Phase II ESA | PSPC | Burlington, Ontario, Canada | 2018-2019 | Quality Reviewer

Provided independent quality review of the Phase II ESA of the land-based portions of the facility positioned on an infilled area separating the Hamilton Harbour from Lake Ontario. The Phase II ESA assessed seven areas of potential environmental concern through installation of boreholes and monitoring wells. Scoring according to the NCSCS was completed. Included the preparation of recommendations for further assessment of AECs.

Lyal Island Light Station, Detailed Work Plan, Liability Reporting and Supplemental Site Investigation | PSPC | Lyal Island, Ontario, Canada | 2018-2021 | Senior Quality Reviewer

Provided senior quality review for the completion of a data gap analysis, sampling program, and development of the detailed workplan for the unmanned DFO light station on the western side of Bruce Peninsula. Subsequent work stage included the completion of a supplemental site investigation to close data gaps identified through historical documentation review. Intent of the program was to conduct a Site Specific Risk Assessment for the Site.

Parliamentary Precinct Block 2 Redevelopment, Phase II ESA | PSPC | Ottawa, Ontario, Canada | 2018-2019 | Senior Technical Advisor, Quality Review

Provided senior technical support and quality review for the Phase II ESA of the Site which included 11 buildings slated for a redevelopment including possible demolition, infill development, and redevelopment. The Phase II ESA assessed areas of potential environmental concern identified through a review of historical documentation. Installation of a network of groundwater monitoring wells allowed for the collection of soil and groundwater samples to better delineate known areas of impact. Scoring according to the NCSCS was completed. Project included the preparation of recommendations for further assessment, delineation, and remediation of the soil and groundwater impacts identified.

DCC/DND, Detailed Testing Program, Building 16, 22 Wing, CFB North Bay | North Bay, Ontario, Canada | 2016 | Senior Technical Review

Provided senior technical review and support for the detailed testing program to characterize and better delineate soil and groundwater impacted by PFAS at the site. Estimated volumes of impacted soil and groundwater were provided along with recommendations for further assessment. NCSCS scoring completed for the Site.

**NRC National Fire Laboratory | Mississippi Mills,  
Ontario, Canada | 2012-2019 | Senior Technical  
Reviewer**

Provided senior technical review and support for a multi-disciplinary PFAS investigation program that has included: on-site groundwater, soil, surface water, and sediment sampling, off-site residential drinking water sampling, targeted soil removal, ecological assessment programs, and air deposition studies at the NRC's NFL property. The NFL facility has historically been used to conduct a wide-range of full-scale scenarios to test fire detection, fire suppression, smoke movement, and smoke movement management and to test the performance of building materials and systems.

**Abandoned Grenade Range, Phase I ESA, CFB  
Shiloh | DCC/DND | Shilo, Manitoba, Canada | 2015 |  
Senior Quality Reviewer**

Senior quality reviewer for the Phase I ESA of an abandoned grenade range at CFB Shiloh, Manitoba. Assessment included the review of historical information including interviews with retired personnel. Provided remedial options analysis and recommendations for on-going site management.

**Phase I & II ESA | PSPC | 100 Sparks Street / 30  
Metcalf Street, Ottawa, Ontario, Canada | 2019-2020 |  
Senior Environmental Engineer**

Provided senior technical review and support for the Phase I ESA of two downtown office buildings. Subsequent work included completing a combined Phase II ESA and Geotechnical Investigation at each of the two buildings and completing a Soil and Groundwater Management Plan to support future development at the site.

**Proposed CSC National Training Academy | PSPC |  
Kingston, Ontario, Canada | 2020-2021 | Senior  
Environmental Engineer**

Provided senior technical review and support for the Phase II ESA of the 12.5 hectare land parcel within the Collins Bay Institution grounds. The Phase II ESA was completed in support of the site selection process and assessed areas of potential environmental concern identified through a previously completed data gap analysis. Soil and groundwater sampling to characterize the environmental quality of the Site was completed in coordination with a geotechnical investigation and archaeological investigation. Data collected was used to develop a conceptual site model and prepare recommendations based on the Site findings.

**Former Sir John Carling Building | PSPC | Ottawa,  
Ontario, Canada | 2016-2021 | Senior Quality  
Reviewer**

Provided senior quality review for the Phase II ESA, subsequent Phase III ESA of the former government office building demolished by controlled implosion. Provided support to the project team on environmental aspects of the assessment and provided recommendations for further assessment, delineation, and remediation of the soil and groundwater impacts identified. Additional work stages were undertaken to inform further demolition plans and specifications required to support site redevelopment.

**Peer Review and Remedial Options Cost Estimating |  
Resolute Forestry Products | Iroquois Falls, Ontario,  
Canada | 2015 | Senior Environmental Engineer**

Environmental engineer and project manager for the peer review of Phase I and Phase II ESA reports completed by others on behalf of Resolute for the mill site. Opinion of cost for remedial options prepared based on delineation work completed and findings of preliminary gap analysis.

**Environmental Site Assessments | Suncor | Various  
Sites, Eastern Ontario, Canada | 2010-present |  
Project Manager/Senior Environmental Engineer**

Project Manager and Senior Environmental Engineer for multiple property environmental site assessments for the purposes of: 1) investigation of contaminant impacts, 2) baseline evaluation in context of property acquisition and/or divestment, and 3) support for on-going operation of the property. Projects have been undertaken throughout Ontario in a variety of geological and hydrogeological environments. Projects have included conventional remedial excavations, removal of underground storage tank systems, in-situ chemical oxidation, and passive (e.g., MNA) and active (e.g., pump and treat) groundwater remediation. Responsibilities have included: preparation of scope of work, development and management of budgets and schedules, integration of project team and contractors, completing assessments, managing acquired data, preparation and senior review of report quality, mitigation of project risks, attendance of client and third party meetings.

**Critical Peer Review, FFTA & HazMat Compounds  
Site | PSPC | 8 Wing CFB Trenton, Trenton, Ontario,  
Canada | 2021-2023 | Senior Quality Reviewer**

Provided senior technical support for the peer review of historical reports completed by others regarding PFAS and the remediation of perfluoroalkyl substances (PFAS) impacted media at the Site. Historical documentation included a remedial options evaluation, indicative liability estimate, and annual monitoring and inspection plan. Peer review identified key issues regarding site characterization and management goals.

**Pelee Island Non-Directional Beacon Site | PSPC | Pelee Island, Ontario, Canada | 2021 | Senior Quality Reviewer**

Provided senior quality review for the preparation of a sampling and analysis plan and remedial action plan for the Nav Canada NAVAID site at Pelee Island Municipal Airport. The purpose of the program was to outline the sampling requirements to close identified data gaps and to outline the approach to the biopile remediation of hydrocarbon impacts at the Site.

**Davieaux Island Light Station, Environmental Program | PSPC | Davieaux Island, Ontario, Canada | 2020-2021 | Senior Quality Reviewer**

Provided senior quality review for the environmental site assessment program for the 50 hectare island site in Lake Superior that is occupied by a DFO light station and related facilities. Scope of the program included historical review and data gap analysis, with subsequent environmental work program to address the data gaps in support of future remediation and risk management of the Site. Recommendations for the Site, a Site Worker Health and Safety Plan and liability estimates were prepared.

**3 CDSB Edmonton, FFTA, Phase III ESA | DCC/DND | Edmonton, Alberta, Canada | 2015-2016 | Project Manager**

Managed the completion of the Phase III ESA which included the delineation and preliminary human health risk assessment of co-impacted soil and groundwater at the fire fighter training area. Contaminants of concern included both petroleum hydrocarbons and PFAS. Estimated volumes of impacted soil and groundwater and provided remedial options analysis and recommendations for on-going site management.

**Reclassification of 7 DFO Small Craft Harbour Sites, Central and Arctic Region | DFO | Various Sites, Ontario, Manitoba, and Saskatchewan, Canada | 2014-2015 | Project Manager**

Managed the reclassification of seven small craft harbor sites located in Ontario, Manitoba, and Saskatchewan. Sites had a variety of background environmental site assessment work completed and detailed reviews were required to prepare the reclassifications employing the current Aquatic Sites Classification System for each Site.

**Fuel Oil Spills | Various Sites, Eastern Ontario, Canada | 2010-present | Senior Quality Reviewer**

Provided senior technical review of several fuel oil spill assessments completed on behalf of a variety of insurance providers at sites throughout Ontario. Remediation of these residential fuel oil spills is driven by the TSSA or the MECP. Preliminary work includes Phase II ESA to determine the extent of the spill. Subsequent work has included conventional excavation followed by in-situ chemical oxidation and groundwater monitoring.

**Defoliant Impact Assessment | DND | CFB Gagetown, New Brunswick, Canada | 2005-2006 | Environmental Engineer**

Reviewed historical records and prepared field sampling program for collection of subsurface and surface soil, water, sediment, and vegetation samples for analysis of a variety of defoliants. Field observations and analytical results were extremely sensitive and confidential; media training was required prior to project commencement. Roles: historical research, field activities, report writing.

**Phase I & II ESA - National Printing Bureau | PSPC | Gatineau, Quebec, Canada | 2019-2021 | Senior Environmental Engineer**

Provided senior technical review and support for the Phase I & II ESAs completed to support future construction and/or redevelopment of the Site. Phase I ESA included recommendations for further assessment of identified APECs. Phase II ESA included the collection and analysis of soil and groundwater samples to assess the identified APECs. Scoring according to the NCSCS was completed. Soil and groundwater management plans were developed along with a roadmap to guide environmental components of possible redevelopment activities.

**Hawkins Island | PSPC | Lake Superior, Ontario, Canada | 2022-2024 | Senior Environmental Engineer**

Provided senior technical review and support for the environmental site assessment work and remediation planning at the site occupied by a minor shore light where near surface soils are impacted by metals, included elemental mercury.

**Supplemental Phase II ESA, Former Fire Fighting Training Area #1 | DCC/DND | Shilo, Manitoba, Canada | 2017-2018 | Senior Technical Reviewer**

Provided senior technical review and support for the supplemental Phase II ESA to better delineate soil and groundwater impacted by perfluoroalkyl substances (PFAS) at the site.

**Phase II ESAs, Buildings 87, 88, and 129 | DCC/DND | CFB Winnipeg, Manitoba, Canada | 2017 | Senior Technical Reviewer**

Provided senior technical review and support for the Phase II ESA of three sites at CFB Winnipeg to assess potential soil and groundwater impacts associated with the use of fire fighting foams containing PFAS. Recommendations for additional assessment and delineation provided. NCSCS scoring provided.

**Phase II ESAs, Foam Sites #1 and #2, 15 Wing | DCC/DND | CFB Moose Jaw, Saskatchewan, Canada | 2017-2018 | Senior Technical Reviewer**

Provided senior technical review and support for the Phase II ESA of two sites at CFB Moose Jaw to assess potential soil and groundwater impacts associated with the use of fire fighting foams containing PFAS. Recommendations for additional assessment and delineation provided. NCSCS scoring provided.

Nottawasaga Island | PSPC | Lake Huron, Ontario, Canada | 2023-2024 | Senior Environmental Engineer

Provided senior technical review and support for the environmental site assessment work and remediation planning at the site occupied by a minor shore light where near surface soils are impacted by metals.

## **REMEDIATION**

Kinonjeoshtegon - Former Hydro Diesel Site | Indigenous Services Canada | Hodgson, Manitoba, Canada | 2021-2024 | Senior Environmental Engineer

Senior Environmental Engineer for the supplemental site assessment activities and remedial program undertaken in support of the construction of a water treatment facility within the First Nation. Petroleum hydrocarbon impacted soil and groundwater were assessed and removed from the Site during construction. Long-term monitoring program initiated following remedial excavation.

In-Situ Bioremediation Program - Former landfill site | PSPC | Ottawa, Ontario, Canada | 2018-2023 | Senior Environmental Engineer

Senior Environmental Engineer supporting the multi-year bioremediation of a chlorinated volatile organic compound groundwater plume. Initial program consisted of the injection of molasses substrate solution to enhance reductive dechlorination of VOCs in the groundwater. Performance monitoring completed following each injection event

State Island Coast Guard Site | PSPC | Ontario, Canada | 2020-2022 | Senior Environmental Engineer

Senior Environmental Engineer responsible for the remedial components of the program to remove impacted soil from three individual contaminated areas that comprise the Coast Guard Site. Draft specifications were prepared for remediation of the Site through soil washing and through excavation and sorting. Provided senior technical review of the NMS specifications to facilitate the remediation planning and required pilot program for the work program at this remote Site.

Booth Street Complex Remediation Project | NRCan | Ottawa, Ontario, Canada | 2009-2010 | Environmental Engineer

Environmental engineer during contracting and remediation stages of Phase 1 of the remediation project. Senior technical review of environmental component of NMS specifications for Phase III of the remediation project. Duties included consultant coordination, reporting to federal management team, client meetings, ESA review and approval for NRCan.

Former Bulk Plant Soil Remediation, CFB Uplands | DND | Ottawa, Ontario, Canada | 2004-2007 | Environmental Engineer

Environmental engineer for Phase 2 of former bulk plant soil remediation. Project included the review of existing environmental site assessment reports and the Phase 1 remediation report. Engineering design included the remedial excavation and the construction/operation of the soil treatment cell for jet-fuel impacted soils. The construction stage of the project included monitoring construction, operation, and decommissioning of soil treatment cell that successfully achieved site closure on schedule. Deliverables included: contract drawings and specifications, site monitoring, coordination with client and contractors, and reporting. A thorough knowledge of municipal, provincial, and federal environment related legislation was required to address intersecting needs of federal (DND, NRC, PWGSC, Environment Canada), provincial (MOE), and municipal (City of Ottawa) stakeholders.

Diesel Spill Remediation, Former Lumber Mill | Tembec Inc. | Braeside, Ontario, Canada | 2001-2004 | Environmental Engineer

Completed Phase II ESA following identification of a fuel release along the Ottawa River. Prepared and submitted remedial action plan, permitting for soil and surface water remediation, undertook clean-up activities with a remediation contractor and completed annual groundwater monitoring and reporting.

## **WASTEWATER**

Annual Wastewater Monitoring - Multiple DND Sites within NCA | PSPC/DND | Ottawa, Ontario, Canada | 2016-Present | Senior Technical Reviewer

Stantec completed annual sampling of sanitary and storm sewers at multiple DND sites within the National Capital Area. The sampling programs were completed to identify concentrations at each facility at the point of compliance prior to discharge to the municipal sewer system. Responsible providing senior support to the programs and technical review of report deliverables.

Hydrotest Water Sampling Program - Reinforcement Project | Enbridge | Ottawa, Ontario, Canada | 2015 | Senior Technical Reviewer

Provided senior technical review of hydrotest water sampling program; including collection of surface water samples prior to and following discharge of hydrotest water. Analytical results were compared to Ontario Provincial Water Quality Objectives (PWQO).

Sewer Effluent Compliance Monitoring | Algonquin College | Ottawa, Ontario, Canada | 2010-2021 | Senior Technical Reviewer

Provided senior technical review for monthly sewer effluent sampling program in accordance with sewer use agreement with the City of Ottawa.

## POTABLE WATER

Annual Potable Water Quality Assessment - SPIB Facilities | PSPC | Ottawa, Ontario, Canada | 2016-2024 | Senior Technical Reviewer

Stantec provides annual potable water quality assessment, data interpretation and reporting for multiple Science and Parliamentary Infrastructure Branch facilities in Ottawa. The intent of the sampling program is to assess the quality of water at selected fixtures in accordance with federal and provincial guidelines and standards. Provided senior support and technical review of report deliverables for the annual potable water sampling programs.

2020 Potable Water Audit Program - Four Health Canada Facilities | PSPC/Health Canada | Ottawa, Ontario, Canada | 2019-2020 | Senior Technical Reviewer

Stantec undertook potable water audits at four Health Canada facilities to assess areas for improvement of the distribution of potable water within the identified buildings. The audit included a site visit, interviews, and review of water demand within the buildings, review of fixture availability and layout, and review of recent potable water quality data to develop recommendations for improved water quality. Provided senior support and technical review of report deliverables for the audit.

Residential Drinking Water Sampling | DCC/DND | North Bay, Ontario, Canada | 2017-2018 | Senior Technical Reviewer

Contaminated Sites Specialist and Quality Reviewer for water supply survey and PFAS testing program of 30 privately- owned water supply wells upgradient and downgradient of former firefighter training locations at the North Bay airport.

Annual Potable Water Quality Assessment - Multiple Sites within NCA | PSPC/DND | Ontario, Canada | 2016-2024 | Senior Technical Reviewer

Stantec provides annual potable water quality assessment, data interpretation and reporting for multiple DND facilities in Ottawa. The intent of the sampling program is to assess the quality of water at selected fixtures in accordance with federal and provincial guidelines and standards. Provided senior support and technical review of report deliverables for the annual potable water sampling programs.

## GAS & LIQUID PIPELINES

Emergency Suspect Soil Response | Enbridge Gas Distribution | Various Sites, Eastern Ontario, Canada | 2015-2019 | Senior Technical Reviewer

Provided senior technical review of proposals, work programs following emergency response to calls regarding suspected contaminated soil at various Enbridge Gas Distributions site across Eastern Ontario. Subsequent work included senior technical review and support during assessment of site conditions, collection of soil and/or groundwater samples for laboratory analyses of contaminants of concern, summary reporting and recommendations for proper safety protocols and soil management options.

Proposals and Work Programs | TransCanada PipeLines Ltd. | Various Sites, Ontario, Canada | 2016-2019 | Senior Technical Reviewer

Provided senior technical review of proposals and work programs to facilitate the application for Permits to Take Water in support of the launcher/receiver program at sites across Ontario. Subsequent work included senior technical review and support during assessment of site conditions, collection of soil and/or groundwater samples for laboratory analyses of contaminants of concern, summary reporting and recommendations for proper safety protocols and soil management options.

Maintenance Investigation Site | Trans-Northern Pipelines Inc. | Near Belleville, Ontario, Canada | 2020 | Independent Technical Review

Provided independent review of work programs and deliverables to support the assessment of soil and groundwater quality at Maintenance Investigation Site as part of the 2020 Legacy Contaminated Sites Assessment Program.

Integrity Maintenance Investigation Site | Trans-Northern Pipelines Inc. | Near Bowmanville, Ontario, Canada | 2020-2021 | Independent Technical Review

Provided independent review of work programs and deliverables to support the assessment and delineation of soil and groundwater quality impacts at an Integrity Maintenance Investigation Site.

## **CIVIL & MUNICIPAL INFRASTRUCTURE**

**Orleans Watermain East Link | City of Ottawa | Ottawa, Ontario | 2013 | Environmental Engineer**

Senior Environmental Engineer for the Phase I/II Environmental Site Assessment. Assignment consisted of the assessment of existing environmental conditions along the project alignment. Issues of potential environmental concern included several locations where historical and/or current activities on neighbouring sites may have adversely impacted the quality of soil and/or groundwater within the project alignment. Supplemental assessment of soil, fill, and groundwater quality within the right-of-way was completed to support materials management during the Construction Stage. Materials management support provided during Construction Stage.

**Rideau River Pedestrian Crossing | City of Ottawa | Ottawa, Ontario | 2013 | Environmental Engineer**

Senior Environmental Engineer for the Phase I Environmental Site Assessment. Assignment consisted of the assessment of existing environmental conditions within the project area. The project area was assessed for issues of potential environmental concern where historical and/or current activities on neighbouring sites may have adversely impacted the quality of soil and/or groundwater.

**Glebe Avenue Integrated Road Renewal | City of Ottawa | Ottawa, Ontario, Canada | 2022-2024 | Senior Environmental Engineer**

Glebe Avenue Integrated Road Renewal | City of Ottawa | Ottawa, Ontario, Canada | 2022 - 2023 | Senior Environmental Engineer Senior Environmental Engineer and Qualified Person for the excess soil planning in accordance with Ontario Regulation 406/19. Assessment of Past Uses, Sampling and Analysis Plan, and Soil Characterization Reports prepared to support the management of excess soils anticipated to be generated during the construction phase of the integrated road renewal program.

**Greenbank Road Realignment & Southwest Transitway Extension | City of Ottawa | Ottawa, Ontario, Canada | 2021-2024 | Senior Environmental Engineer**

Senior Environmental Engineer and Qualified Person for the excess soil planning in accordance with Ontario Regulation 406/19. Assessment of Past Uses, Sampling and Analysis Plan, and Preliminary Soil Characterization Reports prepared to support the management of excess soils anticipated to be generated during the construction phases.

**Laurier Avenue West Bike Lane Redevelopment | City of Ottawa | Ottawa, Ontario, Canada | 2022-2023 | Senior Environmental Engineer**

Senior Environmental Engineer and Qualified Person for the excess soil planning in accordance with Ontario Regulation 406/19. Assessment of Past Uses, Sampling and Analysis Plan, and Soil Characterization Reports prepared to support the management of excess soils anticipated to be generated during the construction phase.

**Montreal Station Bus Loop | City of Ottawa | Ottawa, Ontario, Canada | 2022-2023 | Senior Environmental Engineer**

Senior Environmental Engineer and Qualified Person for the excess soil planning in accordance with Ontario Regulation 406/19. Assessment of Past Uses, Sampling and Analysis Plan, and Soil Characterization Reports prepared to support the management of excess soils anticipated to be generated during the construction phase.

**Integrated Road, Sewer and Watermain for Canterbury, Arch, Plesser | City of Ottawa | Ottawa, Ontario | 2020-2024 | Environmental Engineer**

Senior Environmental Engineer for the Phase I Environmental Site Assessment (ESA) and Limited Phase II ESA. Assignment consisted of the assessment of existing environmental conditions within the project area and identification of areas potential environmental concern including a former fuel spill, former gasoline retail outlet, and fill quality concerns. Assessment of soil and groundwater quality within the project area was completed in conjunction with geotechnical and hydrogeological investigations to support materials management during construction.

**Combined Sewer Storage Tunnel | City of Ottawa | City of Ottawa, Ottawa, Ontario, Canada | 2015-2020 | Environmental Engineer**

Environmental Site Assessment Team Lead for the design and construction phases of the project. Design assignment consisted of the assessment of existing environmental conditions along the project alignment. Issues of potential environmental concern included several locations where historical and/or current activities on neighbouring sites may have adversely impacted the quality of soil and/or groundwater within the project alignment. Assessment of soil, fill, and groundwater quality within the right-of-way was completed to support materials management and the development of environmental components of the construction drawings and specifications. Construction phase responsibilities include presentations at public consultation meetings, client support for stakeholder questions, additional baseline assessments to support stakeholder requirements, and review of contractor submissions based on the requirements of the construction drawings and specifications.

**Imperial Avenue, Renfrew Avenue, Lakeview Terrace Reconstruction | City of Ottawa | Ottawa, Ontario | Environmental Engineer**

Provided senior technical review and support for the two Phase I ESAs and two Phase II ESAs completed for the project. Included recommendations relating to management and disposal of contaminated soil for the project.

**Lynda Lane Urbanization | City of Ottawa | Ottawa, Ontario | 2015 | Environmental Engineer**

Senior Environmental Engineer for the Phase I Environmental Site Assessment. Assignment consisted of the assessment of existing environmental conditions within the project area. The project area was assessed for issues of potential environmental concern where historical and/or current activities on neighbouring sites may have adversely impacted the quality of soil and/or groundwater.

**Crystal Beach Area, Infrastructure Renewal and Roadway Reconstruction | City of Ottawa | Ottawa, Ontario | 2015 | Environmental Engineer**

Senior Environmental Engineer for the Phase I Environmental Site Assessment. Assignment consisted of the assessment of existing environmental conditions within the project area. The project area was assessed for issues of potential environmental concern where historical and/or current activities on neighbouring sites may have adversely impacted the quality of soil and/or groundwater.

**Glen Cairn Stormwater Management Pond and Storm Pumping Station | City of Ottawa | Ottawa, Ontario | 2013 | Environmental Engineer**

Senior Environmental Engineer for the Phase I/II Environmental Site Assessment. Assignment consisted of the assessment of existing environmental conditions in the proposed work area. Assessed potential environmental concerns associated with historical and/or current activities that may have adversely impacted the quality of soil and/or groundwater within the project area.

**Chapel Hill Park & Ride Environmental Assessment | City of Ottawa | Ottawa, Ontario | 2015 | Environmental Engineer**

Senior Environmental Engineer for the Phase I Environmental Site Assessment. Assignment consisted of the assessment of existing environmental conditions within the project area. The project area was assessed for issues of potential environmental concern where historical and/or current activities on neighbouring sites may have adversely impacted the quality of soil and/or groundwater.

**Street Improvement: Albert and Slater | City of Ottawa | Ottawa, Ontario | 2019 | Environmental Engineer**

Senior Environmental Engineer for the Modified Phase I Environmental Site Assessment (ESA) and Limited Phase II ESA. Assignment consisted of the assessment of existing environmental conditions within the project area and identification of 47 areas potential environmental concern associated with the historical uses of the project area. Assessment of soil and groundwater quality within the project area was completed in conjunction with geotechnical and hydrogeological investigations to develop recommendations for materials management.

**Mooney's Bay Sanitary Sewer Collector Replacement Program | City of Ottawa | Ottawa, Ontario | 2019 | Environmental Engineer**

Senior Environmental Engineer for the Phase I Environmental Site Assessment (ESA) and Limited Phase II ESA. Assignment consisted of the assessment of existing environmental conditions within the project area and identification of areas potential environmental concern including rail lines and associated historical infrastructure, fill quality concerns, former petroleum products storage, and a closed waste disposal site. Assessment of soil and groundwater quality within the project area was completed in conjunction with geotechnical and hydrogeological investigations to support materials management.

## **SPECIFICATIONS WRITING**

**Cabot Head Light Station Abatement and Remediation, Cabot Head Light Station | PSPC | Ontario, Canada | 2018-2019 | Senior Environmental Engineer**

Senior Environmental Engineer responsible for the remediation components of the program to remove impacted soil from the area surrounding the light station. Work program was to be designed to be carried out in conjunction with interior and exterior lead-based paint abatement on select structures at the Light Station. Provided senior technical review of environmental component of NMS specifications to facilitate the aggressive project schedule for the work program.

**Bullmoose Area Mine Sites, Updated Remedial Action Plan and Class B Cost Estimate, Mine Remediation and Rehabilitation | PSPC | 0 km west of Tumbler Ridge, British Columbia, Canada | 2014-2015 | Senior Environmental Engineer**

Senior Environmental Engineer responsible for the review of 75% and 99% NMS specifications for the remediation and rehabilitation of seven abandoned mine sites in the area of the former Bullmoose mine site.

**Kenaston/Scurfield Property Remediation | Client Confidential | Winnipeg, Manitoba, Canada | 2017 | Senior Environmental Engineer**

Senior Environmental Engineer for the preparation and review of design documents for the remediation of metals and PAH impacted soils surrounding the site building. Responsible for the review of existing documentation including: Environmental Site Investigations, Environmental Assessments, and Geotechnical Investigations. Responsible for the preparation of 75%, 99%, and tender-ready drawings, specifications, and cost estimates.

**Finance and Finance Annex Building Demolition | BGIS | Ottawa, Ontario, Canada | 2021-2022 | Senior Environmental Engineer**

The objective of this project was to provide environmental and engineering support for the demolition of the Finance and Finance Annex buildings. The scope of environmental services included the collection soil and groundwater data from the site, a pre-construction survey of site conditions, development of a soil and groundwater management plan, development of the project specific specifications, provision of support for the tendering and demolition phases of the project, and review of contractor submittals. In addition, contractor oversight including oversight of soil and groundwater management and imported and excess soil sampling was completed. The collected soil and groundwater data were compared to the applicable provincial and federal criteria, including the excess soil regulation (O.Reg. 406/19). Groundwater data was also compared to municipal sewer use criteria. Specifications were prepared using the National Master Specifications (NMS), including project specific customization to align with the requirements of O.Reg. 406/19.

**Building Demolition and Remediation, CFB Rockcliffe | DCC | Ottawa, Ontario, Canada | 2011 | Project Manager, Senior Environmental Engineer**

Project Manager and Senior environmental engineer responsible for the preparation of NMS specifications for the abatement of hazardous materials and demolition of a former elementary school building, and for three remedial excavations nearby. Duties included client meetings, background documentation review, team coordination, and preparation of specifications.

**Cliff Street Central Heating and Cooling Plant, Underground Storage Tank Removal | PSPC | Ottawa, Ontario, Canada | 2016 | Senior Environmental Engineer**

Senior Environmental Engineer responsible for the environmental components of the program to remove two 30,000 L concrete underground bunker "C" storage tanks from their location adjacent to the Site building. Provided senior technical review of environmental component of NMS specifications for the excavation project. The UST removal program was supplemented by a Phase III ESA to further assess residual soil impacts associated with the USTs. Project work was completed in support of on-going renovation and redevelopment of the Site.

**7 Clarence Street | NCC | Ottawa, Ontario, Canada | 2016 | Senior Environmental Engineer**

Senior Environmental Engineer for the preparation and review of design documents for the remediation of metals and PAH impacted soils surrounding the site building. Responsible for the review of existing documentation including: Environmental Site Investigations, Environmental Assessments, and Geotechnical Investigations. Responsible for the preparation of 75%, 99%, and tender-ready drawings, specifications, and cost estimates.

**Davieaux Island Light Station | PSPC | Davieaux Island, Ontario, Canada | 2024 | Senior Quality Reviewer**

Senior Environmental Engineer responsible for the specifications developed for the site works to support the exterior lead-based paint abatement and structural repairs of select structures at the Light Station. Provided senior technical review of environmental component of NMS specifications.

## **PUBLICATIONS & WHITEPAPERS**

Presentation. Federal Contaminated Sites Workshop.  
Successful Application of On-Site Ex-Situ  
Bioremediation, Canadian Forces Support Unit  
(CFSU) Uplands Tank Farm, Ottawa, Ontario,

Maheux, D. Drost, and A. Silverstein, 2006.*

Environmental Scientist

7 years of experience · Calgary, Alberta

Romeet is a geoscientist-in-training and has project management and technical field experience in completing Environmental Site Assessments (Phases I, II, III). Romeet focuses on site safety and client communication to propel projects to successful execution and completion. Romeet works primarily within the Environmental Services group but also spends time supporting the Water Resources group with hydrogeological investigations.

Project coordination and implementation of field operations including safety compliance, supervision of jobsite personnel and contractors, soil management, and environmental sampling. Romeet is experienced in site project management, environmental and hydrogeological field work, and technical report writing.

Prior to consulting, Romeet worked in the energy sector providing technical geological and geophysical support for oil and gas exploration and production in the Western Canadian Sedimentary Basin and offshore Gulf of Mexico.

## EDUCATION

B.Sc. (Hons), Geology with a minor in Geophysics,  
University of Calgary, Calgary, Alberta, 2017

## PROJECT EXPERIENCE

### ENVIRONMENTAL SITE ASSESSMENTS

Canadian Forces Base, Trenton | Various including  
DCC, DND, PSPC | Quinte West, Ontario, Canada |  
Project Manager, Field Technician and Environmental  
Scientist (Report Author)

Phase II ESA and remedial program support as  
project manager, field technician, and report author  
for various projects across several locations at CFB  
Trenton including the Aerospace Telecommunications  
and Engineering Support Squadron (ATESS),  
Firefighting Training Area (FFTA), Cadet Camp, and  
Hangars 5 and 6. Field support including soil,  
groundwater, and surface water sampling for various  
contaminants of concern including PHCs, PAHs,  
VOCs, PFAS. Subsequent reporting writing for annual  
field programs.

NRC Effluent Sampling | National Research Council  
Canada | 2020-Present | Project Manager, Field  
Technician and Reporting

Conducted waste water sampling at NRC campuses  
(Sussex Drive, Montreal North, Montreal South), as  
well as project management and annual reporting.

1601 The Queensway | Crombie REIT | Project  
Manager

Oversaw project management and assisted senior  
project manager is multi-faceted real estate re-  
development of former Sobey's building. Multiple  
scopes of works including environmental, indoor  
environment (DSS), hydrogeology, and geotechnical.  
Provided client communication between multiple  
Stantec BCs, tracked several unique budget and  
tasks, and ensured field work and reporting efforts  
were efficiently conducted between all BCs on the  
client Site.

**Excess Soil Projects for the City of Ottawa | City of Ottawa | Ottawa, Ontario, Canada | Site Assessor, Report Author**

Conducted numerous Phase I Environmental Site Assessments and Assessments of Past Uses at City of Ottawa owned sites across the city to support excess soil projects related to infrastructure renewal and property development/re-development.

Subsequently acted as a field technician during the drilling and collection of soil and groundwater on sites, and as the report author to produce Sampling Analysis Plans and Soil Characteristic Reports. Projects include the Glebe Avenue Road Renewal; Canterbury, Arch & Plesser Road, Sanitary, and Watermain Project; Montreal Road Bus Loop Construction; Ottawa South and Carlington Heights Pump Station Upgrades.

**Shadow Ridge Production Wells | City of Ottawa | Ottawa, Ontario, Canada | Site Inspector**

Provide on-site support to contractors (drillers, hydrogeology, geophysics) during the construction and installation of two production water wells. Tasks included general oversight of the project, maintaining health and safety requirements, and communicating with nearby residents regarding ongoing project progress.

**Road Renewal at Yonge Street, Newmarket, ON (Excess Soil) | Municipality of Newmarket | Newmarket, Ontario, Canada | Environmental Scientist (Report Author)**

Conducted an Assessment of Past Uses and provided assistance in developing the Sampling Analysis Plan and Soil Characterization Report.

**Phase I ESA at L'Esplanade Laurier and the Jackson Building | PSPC Canada | Ottawa, Ontario, Canada | Site Assessor and Report Author**

Conducted a Phase I ESA at two PSPC-owned sites in preparation of re-development of the properties. Conducted the Phase I Site Reconnaissance at the 11-storey Jackson Building and 23-storey (two tower) L'Esplanade Laurier Building. Subsequently authored the Phase I ESA report for both Sites.

**NRC National Fire Laboratory On-site and Residential Sampling | National Research Council Canada | Kanata, Ontario | Field Technician**

Sampled groundwater wells and residential water wells and taps for PFAS, while following specific PFAS-sampling standard operating procedures.

**Slate Island Remediation | PSPC | Environmental Scientist**

Prepared the Plans and Specifications package for a soil remediation program at Slate Island.

**Greely Phase I and Phase II ESA | Justice Construction Limited. | Greely, Ontario | Field Technician and Report Author**

Conducted the Phase I and Phase II ESA including overseeing of drilling and monitoring well installation, soil sampling, and groundwater sampling. Completed the final report for the Phase I and Phase II ESA.

**Phase I ESA at 187 Boteler Drive | Ministry of Foreign Affairs of the State of Qatar | Ottawa, Ontario, Canada | Site Assessor and Report Author**

Conducted a Phase I Site Visit including reconnaissance of previously installed monitoring wells at the client Site as well as subsequent authoring of the Phase I ESA.

**PSPC 2019-2020 Annual Potable Water Quality Assessment | Public Services and Procurement Canada | Ottawa, Ontario | Report Author and Field Technician**

Conducted field work including accounting fixtures, flushing fixtures, and collecting potable water samples across various DND sites. Assisted project managers in coordination of field work including scheduling and planning of site work and, preparing site specific field forms and writing proposals. Report writing for individual sites upon completion of field programs.

**Phase II Environmental Site Assessment 355 Riverside Drive | Public Services and Procurement Canada | Field Technician**

Helped plan and coordinate a three week field program, and conducted field work including well reconnaissance and groundwater monitoring and sampling.

**Phase I Environmental Site Assessment 720 Riverside Drive | Public Services and Procurement Canada | Report Author**

Conducted a Phase One ESA including site visit and report writing.

**Phase III Environmental Site Assessment Sir Charles Tupper Building | Public Services and Procurement Canada | Field Technician**

Supervised drilling program while collecting environmental soil samples.

**Phase II and III Environmental Site Assessment Gloucester Landfill | Public Works and Government Services Canada | Field Technician**

Oversaw injection of remediation material at contaminated site, and subsequent drilling of new monitoring wells.

**Arnprior Data Gap Analysis and Work Plan | Public Works and Government Services Canada**

Well reconnaissance and site investigation at former RCAF training center site.

**DND Well Reconnaissance and Decommissioning | 2020-Present | Field Technician**

Well reconnaissance at various DND sites across the Ottawa area for potential sampling events or decommissioning.

**Canada Post Annual Groundwater Monitoring | Canada Post | Ottawa, Ontario | 2019-2020 | Field Technician**

Maintenance/repair, development and groundwater sampling of 21 monitoring wells on a Canada Post vehicle fleet site. Conducting groundwater sampling.

**Phase II ESA Albany Drive | Public Services and Procurement Canada | Ottawa, Ontario | Report Author**

Completed a Phase II ESA report for a drilling and well monitoring program for the City of Ottawa.

**Phase I ESA Telus Telecommunication Tower | Telus Communications | Ottawa, Ontario | 2019 | Site Assessor, Report Author**

Successful proposal, assessment and final report for Phase I ESA for a Telecommunications Tower.

**Phase II ESA Telus Telecommunication Tower | Telus | Ottawa, Ontario | Field Technician**

Oversaw and coordinated drilling of three monitoring well, followed by soil and groundwater sampling of the three wells.

**Carlton Place semi-annual groundwater monitoring | AVIVA | Ottawa, Ontario | Field Technician**

Groundwater sampling for several flushmount wells, and two potable wells.

**Suncor Carling In-Situ Remediation | Suncor | Ottawa, Ontario | Field Technician**

Oversaw drilling and in-situ remediation of 32 injections points over multiple weeks.

**Pendleton Phase II ESA | EDF Renewables Development Inc. | Curran, Ontario | Field Technician**

Dug four test pits, oversaw drilling of two monitoring wells, and sampled five monitoring wells.

**Phase I ESA Brandt Developments | Brandt Developments | Carp, Ontario | Field Assessor, Report Author**

Completed a Phase I ESA site visit and assessment as well as reporting for the Nortrax heavy equipment facility.

**Phase I ESA Tesla | Tesla Motors Inc. | Several sites in southern Ontario | Site Assessor, Report Author**

Completed the Phase I ESA for a suite of proposed Tesla supercharger stations along southern Ontario as well as completed reporting for the sites.

**Casselman Annual Groundwater Monitoring | Village of Casselman | Casselman, Ontario | Field Technician**

Conducted monitoring and sampling for 19 wells in the Village of Casselman.

**Casselman Village Landfill Monitoring | Village of Casselman | Casselman, Ontario | Field Technician**

Collected surface water and groundwater samples from across the Casselman landfill.

**Castlefrank Well Decommissioning | Kanata, Ontario**

Oversaw the decommissioning of nine wells.

**Suncor Phase II ESA Groundwater Monitoring | Suncor | Ottawa, Ontario**

Conducted the monitoring and sampling of 29 wells post-remediation as well as supporting the report writing for the project.

**Enbridge Gas Distribution Soil Monitoring | Enbridge Gas Distribution | Ottawa, Ontario**

Ongoing support at various location across Ottawa for soil and vapour monitoring on as as-needed basis.

**Campeau Drive Drilling | Kanata, Ontario | Field Technician**

Oversaw and supported drilling of three monitoring wells.

**OHS Emergency Spills | NavCanada | Ottawa, Ontario | Emergency Responder (phone)**

Oversee the emergency response line for the NavCanada spill response phone.

**Monthly and Quarterly Effluent Sampling | Stante | Ottawa, Ontario | Field Technician**

Collect effluent samples (sewer, sanitary) for multiple projects and clients on a monthly or quarterly basis.

**Water Well Testing | NavCanada | Ottawa, Ontario | Field Technician**

Collected water samples from inlet and outlet valves on either end of heat exchangers and completed reporting for the project.

## **HYDROGEOLOGY**

**TransCanada Energy PTTW/EASR applications | TransCanada Energy | Report Author**

Provided assistance in the preparing PTTW and EASR applications in support of pipeline modifications being made to TC infrastructure in northern Ontario.

**Greenbank Road Realignment | City of Ottawa | Field Technician and Report Author**

Deployed and collected level loggers at twelve monitoring well locations and conducted slug tests at each location to support a realignment project at Greenbank Road. Performed K-test analysis of the data and subsequent reporting.

**Various support roles | Environmental Scientist**

Provided support to various hydrogeological assessments for projects all around Ontario (mostly the Ottawa and GTA regions) by correcting level logger data, creating hydrographs, and k-test analysis. Provided additional support through the preparation of EASR and PTTW reports.

### **Shadow Ridge Production Wells | City of Ottawa**

Site supervision during the drilling of two municipal production wells being drilled to augment the Shadow Ridge Well System to supply over 2,000 local residents for the proposed community developments in Greely, Ontario. Conducted on-site interviews with local residents to plan and coordinate pumping tests using the domestic, installed level loggers, and prepared the EASR application for the pumping tests.

#### **335 River Road | PSPC | Field Technician**

In addition to environmental site assessment including groundwater monitoring and sampling, conducted k-testing at several well locations for hydrogeological assessment.

### **POTABLE WATER AND LEGIONELLA SAMPLING**

SPIB (formerly PPB) Annual Drinking Water Quality Assessment | PSPC | Ottawa, ON, Canada | 2020-present | Project Manager and Field Technician

Project management and coordination for the annual and bi-monthly sampling and drinking water quality assessment of 40 buildings located in the Science and Parliamentary Infrastructure Branch for the Canadian Federal Government located in downtown Ottawa, Ontario. Also provides technical assistance to field technicians executing field program and proposal writing for upcoming drinking water quality assessment bids. Previous role of field technician also included executing field program and reporting writing.

PSPC Potable Water and Flushing Program | Public Services and Procurement Canada | 2019-Present | Project Manager and Field Technician

Conducted field work including accounting fixtures, flushing fixtures, and collecting potable water samples across various federally-owned or leased sites in Ottawa. Assisted project managers in coordination of field work including scheduling and planning of site work and, preparing site specific field forms and writing proposals. Report writing upon completion of field programs. Project management of various potable water programs includes providing services for urgent sampling requests, providing notifications for potable water exceedances, efficient budget tracking, and continuous client communication to ensure successful project execution and completion.

### **EMPLOYMENT HISTORY**

#### **TC Energy (Formerly TransCanada Pipelines Ltd.)**

SCADA Technician (Contract)

2017 - 2017 · 1 year

Point-to-point verification of several key North American pipelines and implementation of CygNet and OASyS SCADA systems.

#### **Blaze Energy Ltd.**

Geologist-In-Training

2016 - 2017 · 1 year

Characterization of shale gas plays in the Deep

Basin, Alberta, and the Western Canadian Sedimentary Basin. Development of the company's first horizontal production plan.

#### **Suncor Energy Ltd.**

Geology Intern

2015 - 2015 · 1 year

Large-scale exploration of US Gulf of Mexico deep-water assets.

#### **Blaze Energy Ltd.**

Geology Intern.

2015 - 2015 · 1 year

Characterization of shale-gas plays in the Deep Basin.
