Executive Summary

EXP Services Inc. (EXP) was retained by In-Harmony Developments Inc. to complete a Phase One Environmental Site Assessment (ESA) of the property located at 133 Forward Avenue in Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by a two-storey residence.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

EXP understands that the existing residence will be demolished, and the Phase One property will be re-developed with a four-storey residential apartment building with one basement level. As there is no proposed change in land use, a Record of Site Condition (RSC) is not required.

The Phase One property has the municipal address 133 Forward Avenue and is located approximately 35 m south of Burnside Avenue in Ottawa, Ontario. The Phase One property is rectangular in shape and has a total area of approximately 0.05 hectares. The legal description of the Phase One property is Lot 3, Plan 35, East Forward Avenue, Ottawa/Nepean. The property identification number (PIN) is 040960060.

Based on a review of historical aerial photographs, historical maps, and other records the Phase One property has been developed with the existing single-family residence since at least 1912.

Ontario Regulation (O. Reg.) 153/04 defines a Potential Contaminating Activity (PCA) as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D that occurs or has occurred in the Phase One study area.

The following PCAs were identified:

EXP PCA #	Location of PCA	Potentially Contaminating Activity (PCA)	Description	Rationale
PCA 1	174 Forward Avenue (150 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks,	Record for a UST of unknown volume.	No, due to the distance from the Phase One property.
PCA 2	140 Hinchey Avenue (south adjacent)	PCA #10 – Commercial autobody shops PCA #28 – Gasoline and associated products storage in fixed tanks	Repair garage from the 1940s to present. Records for USTs/pump island inferred to have been present on the south part of the property.	Yes, due to the proximity and inferred upgradient location from the Phase One property
PCA 3	147 Forward Avenue (30 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for 1,135 L gasoline tank, UST/AST not specified.	No, the property was redeveloped in the early 2020s, a Phase Two ESA for the property did not identify any groundwater contamination
PCA 4	159 Forward Avenue (50 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for fuel oil tank at St. Antoine School, AST/UST not specified.	No, the property was redeveloped in the early 2020s, a Phase Two ESA for the property did not identify any groundwater contamination
PCA 5	121 Parkdale Avenue (105 m northwest)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for a 1,362 L gasoline UST.	No, due to the distance and inferred downgradient location from the Phase One property.

EXP PCA #	Location of PCA	Potentially Contaminating Activity (PCA)	Description	Rationale
PCA 6	55 Carruthers Avenue (130 m east)	PCA #10 – Commercial autobody shops	Repair garage from the 1940s to 2010s.	No, due to the distance and inferred cross gradient location from the Phase One property. The property was redeveloped with an apartment building in 2017. An RSC was filed for this property; no groundwater contamination was identified.
PCA 7	173 Hinchey Avenue (150 m southeast)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for 1,135 L gasoline UST.	No, due to the distance from the Phase One property.
PCA 8	187 Forward Avenue (180 m south)	PCA #10 – Commercial autobody shops PCA #28 – Gasoline and associated products storage in fixed tanks	Repair garage from the 1960s to the 1970s. Record for 4,540 L gasoline UST.	No, due to the distance from the Phase One property. The property was redeveloped with stacked townhouses in the late 1990s.
PCA 9	196 Forward Avenue (180 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for two 2,270 L gasoline USTs and a fuel oil tank.	No, due to the distance from the Phase One property.
PCA 10	193 Hinchey Avenue (215 m southeast)	PCA #10 – Commercial autobody shops	Repair garage from the 1970s to present.	No, due to the distance from the Phase One property.
PCA 11	Stonehurst Avenue & Bayview Avenue (250 m east)	PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Several large sewage lagoons were present on the property which were filled with earth and construction rubble (cider, ash, glass etc.) between 1928 and 1932. The former landfill occupied approximately 0.6 hectares and is currently occupied by a park and a church.	No, due to the distance and cross-gradient location from the Phase One property.
PCA 12	154 Hinchey Avenue (50 m south)	PCA #Other – Furnace oil spill	Furnace oil spill of unreported quantity to an earthen basement floor at a private residence.	Yes, due to the proximity and inferred upgradient location from the Phase One property.
PCA 13	170 Tunney's Pasture Driveway (170 m southwest)	PCA #28 – Gasoline and associated products storage in fixed tanks	Aboveground storage tank for an emergency generator installed in 2010.	No, due to the distance and cross gradient location from the Phase One property.
PCA 14	133 Forward Avenue (Phase One property)	PCA #30 – Importation of fill material of unknown quality	The Phase One property is located in an area of shallow bedrock, fill is likely present overlying the bedrock.	Yes, as this PCA is located on the Phase One property.
PCA 15	133 Forward Avenue (Phase One property)	PCA #28 – Gasoline and associated products storage in fixed tanks	Historically, the residence was heated with oil.	Yes, as this PCA is located on the Phase One property.

The former on-site furnace oil AST, and the likely presence of fill material on the Phase One property is considered to contribute to APECs. Due to the proximity and inferred up-gradient direction from the Phase One property, the former repair

garage/gas station at 140 Hinchey Avenue and the furnace oil spill at 154 Hinchey Avenue result in an APEC. None of the other off-site PCAs were determined to contribute to APECs.

The following areas of potential environmental concern (APEC) were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
APEC #1	South property line	PCA 2: PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks	Off-site	VOC, PHC, PAH	Groundwater
APEC #2	South property line	PCA 12: PCA #Other – Furnace oil spill	Off-site	VOC, PHC, PAH	Groundwater
APEC #3	Entire Phase One property	PCA 13: PCA #30 – Importation of fill material of unknown quality	On-site	VOC, PHC, PAH, metals and inorganics	Soil
APEC #4	Southwest corner of the residence	PCA 14: PCA #28 – Gasoline and associated products storage in fixed tanks	On-site	VOC, PHC, PAH	Groundwater

The Qualified Person who oversaw this work, Leah Wells, P.Eng. recommends that a Phase Two ESA be conducted to address the PCA that may have adversely affected the Phase One property.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

1.0 Introduction

EXP Services Inc. (EXP) was retained by In-Harmony Developments Inc. to complete a Phase One Environmental Site Assessment (ESA) of the property located at 133 Forward Avenue in Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by a two-storey residence.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. It is understood that the report will be used for due diligence purposes, and in the future to support a site plan application with the City of Ottawa.

EXP understands that the existing residence will be demolished, and the Phase One property will be re-developed with a four-storey residential apartment building with one basement level. As there is no proposed change in land use, a Record of Site Condition (RSC) is not required.

EXP personnel who conducted assessment work for this project included Leah Wells, P.Eng. and Scott Lessard, B.Sc. An outline of their qualifications is provided in Appendix A.

1.2 Phase One Property Information

The Phase One property has the municipal address 133 Forward Avenue and is located approximately 35 m south of Burnside Avenue in Ottawa, Ontario. The Phase One property is rectangular in shape and has a total area of approximately 0.05 hectares. A Site Location Plan is provided as Figure 1 in Appendix B.

The legal description of the Phase One property is Lot 3, Plan 35, East Forward Avenue, Ottawa/Nepean. The property identification number (PIN) is 040960060.

At the time of the investigation, the Phase One property was occupied a two-storey residence with a basement. A detached garage was present on the southeast corner of the site.

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid are Zone 18, 442707 m E and 5028560 m N. The UTM coordinates are based on measurements from Google Earth Pro, published by the Google Limited Liability Company (LLC). The accuracy of the centroid is estimated to be less than 10 m.

Authorization to proceed with this investigation was provided by Mr. Marc-Alexander Shank of In-Harmony Development Inc. Contact information for Mr. Shank is 187 Chemin Old Chelsea, Suite 101, Chelsea, Quebec J9B 1J3.

2.0 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Obtaining a search of land title and assessment rolls for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250-metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

3.0 Records Review

3.1 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250-metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property. At the time of the site reconnaissance, land usage within 250 metres of the Phase One property was primarily residential properties.

According to the City of Ottawa zoning by-laws, the Phase One property and the majority of the properties in the Phase One study area are zoned residential. Select properties along Parkdale Avenue are zoned mixed use centre. The vacant property approximately 60 m northeast of the site is zoned institutional.

The Phase One study area is shown on Figure 2 in Appendix B.

3.2 First Developed Use Determination

Based on a review of historical aerial photographs, historical maps, and other records the Phase One property has been developed with the existing single-family residence since at least 1912.

3.3 Fire Insurance Plans

EXP reviewed the Catalogue of Canadian Fire Insurance Plans 1875 – 1975. Fire insurance plans (FIP) from 1912 and 1948 were available for the Phase One study area.

The 1912 FIP shows that a residence is present at 133 Forward Avenue. Streets in the Phase One study area are shown to be similar to the present configuration.

The 1948 FIP shows the Site appears similar to the 1912 FIP. Infill residential development has occurred in the Phase One study area. An underground storage tank is present at 174 Forward Avenue (140 m south of the Phase One property).

Based on a review of the FIPs, the following potentially contaminating activities (PCAs) were identified:

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
174 Forward Avenue	140 m south	Underground storage tank (UST)	1956	No, due to the distance from the Phase One property (PCA 1 – PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks).

Due to the distance from the Phase One property, the UST at 174 Forward Avenue is not considered to result in an area of potential environmental concern (APEC).

3.4 Chain of Title

A chain of title has been requested from Read Abstracts. EXP has not yet received the chain of title, but it will be forwarded to the Client once it's received.

3.5 City Directories

City directories pertaining to the site were requested from the EcoLog Environmental Risk Information Services (or EcoLog ERIS) for the municipal street directories in the Phase One study area. EcoLog ERIS is an environmental database and information service provider.

The Phase One property is listed as residential from 1920 to 2023. Most of the properties in the Phase One study area were also residential.

The following properties of interest were noted:

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
140 Hinchey Avenue	South adjacent	Automotive garage/gas station	1960 to 2023	Yes, due to the proximity and inferred upgradient location from the Phase One property (PCA 2 – PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products in fixed tanks).

Based on a review of the city directories, a garage/service station has been present at 140 Hinchey Avenue since the 1960s. Due to the proximity and inferred upgradient location from the Phase One property, this PCA is considered to contribute to an APEC.

3.6 Environmental Reports

No reports pertaining to the Phase One property were available for review.

3.7 Environmental Source Information

Information pertaining to the Phase One property was obtained by reviewing documents that are available to the public through municipal and provincial sources. EXP did not identify the need to contact any federal agencies.

Written responses from regulatory agencies and copies of documents obtained via searches are provided in Appendix C.

3.7.1 Ontario Ministry of the Environment, Conservation and Parks Records

As part of a previous investigation conducted in 2023, records pertaining to the Phase One property were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act* (FOI).

A response from the MECP has not yet been received. EXP will review the documents once received and will notify the client if any of the information materially impacts the conclusions of the report.

The request is included in Appendix C.

3.7.2 Historical Land Use Inventory

Records pertaining to the site were requested from the City of Ottawa for the Historical Land Use Inventory (HLUI) through the Municipal Freedom of Information and Protection of Privacy Act (FOI).

The following properties of interest were noted:

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
140 Hinchey Avenue	South adjacent	Repair garage from the 1940s to present. Records for USTs/pump island inferred to have been present on the south part of the property.	Yes, due to the proximity and inferred upgradient location from the Phase One property (PCA 2 – PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products in fixed tanks).
147 Forward Avenue	30 m south	Record for 1,135 L gasoline tank, UST/AST not specified.	No, the property was redeveloped in the early 2020s, a Phase Two ESA for the property did not identify any groundwater contamination (PCA 3 – PCA #28 – Gasoline and associated products storage in fixed tanks).
159 Forward Avenue	50 m south	Record for fuel oil tank at St. Antoine School, AST/UST not specified.	No, the property was redeveloped in the early 2020s, a Phase Two ESA for the property did not identify any groundwater contamination (PCA 4 – PCA #28 – Gasoline and associated products in fixed tanks).
154 Hinchey Avenue	50 m south	Listed as Bastien Fuels Ltd. from the 1960s to 1980s.	No, it is noted that there were no tank records for the property, and the property from aerial photographs to have been occupied by a residence since at least the 1920s.
121 Parkdale Avenue	105 m northwest	Record for a 1,362 L gasoline UST.	No, due to the distance and inferred downgradient location from the Phase One property (PCA 5 – PCA #28 – Gasoline and associated products in fixed tanks).
55 Carruthers Avenue	130 m east	Repair garage from the 1940s to 2010s.	No, due to the distance and inferred cross gradient location from the Phase One property (PCA 6 – PCA #10 – Commercial autobody shops). The property was redeveloped with an apartment building in 2017. An RSC was filed for this property, no groundwater contamination was identified.
174 Forward Avenue	150 m south	Record for a UST of unknown volume.	No, due to the distance from the Phase One property (PCA 1 – PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks).
173 Hinchey Avenue	150 m southeast	Record for 1,135 L gasoline UST.	No, due to the distance from the Phase One property (PCA 7 – PCA #28 – Gasoline and associated products storage in fixed tanks).

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
187 Forward Avenue	180 m south	Repair garage from the 1960s to the 1970s. Record for 4,540 L gasoline UST.	No, due to the distance from the Phase One property (PCA 8 – PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks). The property was redeveloped with stacked townhouses in the late 1990s.
196 Forward Avenue	180 m south	Record for two 2,270 L gasoline USTs and a fuel oil tank.	No, due to the distance from the Phase One property (PCA 9 – PCA #28 – Gasoline and associated products storage in fixed tanks).
193 Hinchey Avenue	215 m southeast	Repair garage from the 1970s to present.	No, due to the distance from the Phase One property (PCA 10 – PCA #10 – Commercial autobody shops).
Stonehurst Avenue and Bayview Avenue (Ur-38)	250 m east	Several large sewage lagoons were present on the property which were filled with earth and construction rubble (cider, ash, glass etc.) between 1928 and 1932. The former landfill occupied approximately 0.6 hectares and is currently occupied by a park and a church.	No, due to the distance and cross-gradient location from the Phase One property (PCA 11 – PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners).

Based on a review of the HLUI database, PCAs identified in the Phase One study included USTs, repair garages, and a former waste disposal site. The garage and USTs at 140 Hinchey Street were considered to contribute to an APEC due to the proximity to and inferred upgradient location from the Phase One property. None of the other off-site PCAs identified in the Phase One study area were considered to contribute to an APEC.

3.7.3 Environmental Registry

On August 19, 2025 the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. The following records were found:

- Three Permits to Take Water (PTTW) were issued for dewatering associated with construction activities along Parkdale Avenue.

None of these records pose an environmental concern to the Phase One Property.

3.7.4 Environmental Access

On August 19, 2025, the MECP Environmental Access website was searched for postings within the Phase One study area. The following records were found:

- Three PTTW were issued for dewatering associated with construction activities along Parkdale Avenue.
- Two Environmental Compliance Approvals (ECAs) were issued for municipal sewage works in the Phase One study area.

None of these records pose an environmental concern to the Phase One Property.

3.7.5 Hazardous Waste Program Registry

On August 19, 2025, the MECP Hazardous Waste Program (HWP) Registry website was searched for registered waste generators within the Phase One study area, the following records were found:

Location (Generator)	Proximity to the Site	Wastes Generated	Years	Environmental Concern to Site and Rationale
Centretown Citizens Ottawa Corporation 151 Parkdale Avenue (ON001054570)	60 m southwest	Oil skimmings and sludges	2023 to present	No, waste generation is inferred to be associated with building maintenance, it is not anticipated that significant quantities of wastes are generated.
Tunney's Pasture 120 Parkdale Avenue (ON4690864)	140 m west	Waste compressed gases, photoprocessing wastes, laboratory chemicals, pharmaceuticals, wastes oil and lubricants, oil skimmings and sludges, PCBs, light fuels, petroleum distillates, aliphatic solvents, other specified inorganics, pain/pigment/coating residues, alkaline wastes, acid wastes	2022 to present	No, due to the distance and cross-gradient location from the Phase One property. Waste generation is associated with laboratory and other operations at Tunney's Pasture.
150 Tunney's Pasture Driveway (ON001054364)	140 m west	Pathological wastes	2023 to present	No, due to the distance and cross gradient location from the Phase One property. Waste generation is associated with operations at Tunney's Pasture.
Tomlinson Environmental Services Ltd. 200 Tunney's Pasture Driveway (ON001059691)	200 m west	Waste oils and lubricants	2023 to present	No, due to the distance and cross gradient location from the Phase One property. Waste generation is inferred to be associated with demolition of a building at Tunney's Pasture.
Sentinel Management 215 Parkdale Avenue (ONS0402-1-346TKO-1)	220 m southwest	Oil skimmings and sludges	2023 to present	No, waste generation is inferred to be associated with building maintenance, it is not anticipated that significant quantities of wastes are generated.

None of the records reviewed pose an environmental concern to the Phase One property.

3.7.6 Records of Site Condition

On August 21, 2025, the MECP Brownfields Registry website was searched for postings of Records of Site Condition within the Phase One study area. The following RSCs were found:

- 55-59 Carruthers Avenue: An RSC was filed for this property in 2017. PHC and metals impacted soil was identified on the property. No groundwater impact was identified.

This record does not represent an environmental concern to the Phase One property.

3.7.7 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

3.7.8 PCB Storage Sites

Documents entitled *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada, 2003 Annual Report* prepared by Environment Canada and *Ontario Inventory of PCB Storage Sites* prepared by the MECP were reviewed. No records pertaining to PCB storage sites were identified within the Phase One study area.

3.7.9 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed.

Ur-38 was located at Stonehurst Avenue and Bayview Avenue (MOE ID x1021), approximately 250 m east of the Phase One property. Several large sewage lagoons were present on the property which were filled with earth and construction rubble (cider, ash, glass etc.) between 1928 and 1932. The former landfill occupied approximately 0.6 hectares and is currently occupied by a park and a church.

As the former landfill (PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners) is located over 200 m cross-gradient of the Phase One property, it was not considered to contribute to an APEC.

3.7.10 Former Industrial Sites

The document entitled *Mapping and Assessment of Former Industrial Sites; City of Ottawa* prepared by Intera Inc. was reviewed. No historic industrial sites were identified within the Phase One study area.

3.8 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the Phase One property and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the EcoLog ERIS report is provided in Appendix D.

The following entries from the EcoLog ERIS report were reviewed and summarized below:

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
151 Parkdale Avenue	60 m southwest	Centretown Citizens Ottawa Corporation, registered waste generator of oil skimmings and sludges in 2024 (ON001054570).	Ontario Regulation 347 Waste Generator Summary (GEN)	No, wastes are inferred to be associated with building maintenance.
154 Hinchey Avenue	50 m south	October 1999, a furnace oil spill to the basement floor at a private residence.	Ontario Spills (SPL)	Yes, due to the proximity and inferred up gradient location from the Phase One property (PCA 12 – PCA #Other – Furnace oil spill).

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
159 Forward Avenue	50 m south	Golder Associates, registered waste generator of inorganics in 2019 (ON8253910).	GEN	No, waste generation activities were associated with environmental investigations on the property.
120 Parkdale Avenue	100 m west	Public Works and Government Services Canada registered waste generator laboratory chemicals, petroleum distillates, aliphatic solvents, light fuels, waste compressed gases, PCBs, waste oils and lubricants, photoprocessing wastes, paint/pigment/coating residues, alkaline and acid wastes from 2005 to 2024 (ON4690864, ON9360293). SNC Lavalin, registered waste generator of acid wastes, aliphatic solvents, alkaline wastes, paint/pigment/coating residues, organic laboratory chemicals, waste oils and lubricants, oil skimmings and sludges, petroleum distillates, waste compressed gases in 2013 (ON8217071).	GEN	No, due to the distance and cross gradient location from the Phase One property.
80 Carruthers Avenue	110 m southeast	Johannes Pothuma, registered waste generator of petroleum distillates from 1988 to 1998 (ON1024000).	GEN	No, due to the distance and cross-gradient location from the Phase One property.
170 Tunney's Pasture Driveway	170 m southwest	Aboveground storage tank for an emergency generator installed in 2010.	Federal Identification Registry for Storage Tank Systems (FRST)	No, due to the distance and cross gradient location from the Phase One property (PCA 13 – PCA # 28 – Gasoline and associated products storage in fixed tanks).
18 Burnside Avenue	130 m east	Ottawa Community Housing Corporation, registered waste generator of light fuels in 2006 (ON7534774). Elevation Elevator Inc., registered waste generator of waste oils and lubricants in 2017 (ON3902198).	GEN	No, waste generation is associated with building maintenance. It is not anticipated that significant quantities of wastes are generated.
1405 Main Statistics Canada	150 m southwest	Statistics Canada, registered waste generator of petroleum distillates, alkaline wastes, photo processing wastes, organic laboratory chemicals, pathological wastes from 2002 to 2022 (ON0684800, ON5658190).	GEN	No, due to the distance from the Phase One property. It is considered unlikely that government buildings generate a significant quantity of wastes.
150 Tunney's Pasture	170 m southwest	Lexus Mechanical, registered waste generator of unlisted wastes in 2011 (ON7437788). Statistics Canada, registered waste generator of pathological wastes from 2017 to 2024 (ON7845931).	GEN	No, due to the distance and cross-gradient location from the Phase One property.

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
		Record for 15,000 L diesel fuel UST for a backup generator installed in 2006.		
44 Emerson Avenue	180 m north	CCC384 registered waste generator of aliphatic solvents in 2005 (ON9041525).	GEN	No, waste generation is associated with building maintenance. It is not anticipated that significant quantities of wastes are generated.
183 Forward Avenue	180 m south	BluePrint Construction Services Ltd., registered waste generator of light fuels in 2022 (ON7521255).	GEN	No due to the distance from the Phase One property.
184 Forward Avenue	180 m south	Frank & Sons Painting & Decorating Ltd., registered waste generator of aromatic solvents, petroleum distillates from 1998 to 2010 (ON2361400).	GEN	No due to the distance from the Phase One property.
185 Hinchey Avenue	190 m southeast	August 1999, unknown quantity of furnace oil reported spilled to basement floor.	SPL	No, due to the distance from the Phase One property. Sill was reported cleaned.
51 Stonehurst Avenue	220 m east	4241258 Canada Inc., registered waste generator of inorganics in 2024 (ON001060493).	GEN	No, due to the distance and cross-gradient location from the Phase One property.
Burnside Avenue and Sidell Street	250 m east	Closed waste disposal site.	Anderson's Waste Disposal Sites (ANDR)	No, due to the distance and cross-gradient location from the Phase One property (PCA 11 – PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners).

In addition to the databases outlined above the following entries from the EcoLog ERIS report were reviewed and summarized below:

- The Certificate of Approval and Environmental Compliance Approval databases identified nine records in the Phase One study area. The records were all for private/municipal sewer or water works;
- The Permit to Take Water database identified three PTTW in the Phase One study area. All of the records were associated with construction dewatering;
- The Ontario Spills database identified 20 records for minor spills. None of these spills were considered to results in environmental concerns to the Phase One property; and,
- There were 11 records found in the Water Well Information System (WWIS) database for the Phase One study area. All of the well records were for monitoring wells.

Based on a review of Ecolog report, several PCAs were identified in the Phase One study area. Due to the proximity and inferred upgradient location from the Phase One property **PCA 12** – PCA #Other – Furnace oil spill, was considered to contribute to an APEC.

3.9 Physical Setting Sources

3.9.1 Aerial Photographs

Aerial photographs dated 1928, 1933, 1946, 1965, 1976, 1991, 1999, 2014, and 2022 were available for review on the City of Ottawa website. Aerial photographs dated prior to 1928 were not available for review. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs. Copies of the aerial photographs are provided in Appendix E.

Aerial Photograph (year)	Details
1928	The existing residence is present on the Phase One property. Forward Avenue and streets to the east and west of the site are in a similar configuration to present day. Property to the west of Parkdale Avenue is undeveloped. Properties in the Phase One study appear to be mainly residential.
1933	The Phase One property and study area appear similar to the 1928 aerial photograph.
1946	The Phase One property and study area appear similar to the 1933 aerial photograph.
1965	The Phase One property appears similar to the 1946 aerial photograph. Infill development with multi-storey apartment buildings has occurred throughout the Phase One study area. The garage is visible at 140 Hinchey Avenue, what may be a pump island is visible on the west side of 140 Hinchey Street. Development of the Tunney's Pasture federal complex has occurred to the west across Parkdale Avenue. The waterfront area to the northeast of the site appears to have been partially infilled.
1976	The Phase One property and study area appear similar to the 1965 aerial photograph.
1991	The Phase One property appears similar to the 1976 aerial photograph. The residences to the south of the site have been demolished and an apartment building has been constructed.
1999	The residence across from 159 Forward Avenue has been demolished and townhouses have been constructed. The Phase One property and remainder of the Phase One study area appear similar to the 1991 aerial photograph.
2014	The Phase One property and study area appear similar to the 1999 aerial photograph.
2019	The addition at the rear of the residence on the Phase One property has been demolished. The Phase One study area appears similar to the 2014 aerial photograph.
2022	The residences at 132 and 134 Forward Avenue have been demolished, and the properties are vacant. The buildings at 147 and 159 Forward Avenue have been demolished, and an apartment building is under construction. The Phase One property and the remainder of the Phase One study area appear similar to the 2019 aerial photograph.

Based on the review of the aerial photography, other than the previously identified **PCA 2**, no additional environmental concerns were identified.

3.9.2 Topography, Hydrology, Geology

The following information sources were reviewed to determine the nature of the subsurface materials at the site:

- Map 1506A, Surficial Geology, Ottawa- Hull. Scale 1:50,000. 1982;
- Map 1508A, Generalized Bedrock Geology, Ottawa- Hull. Scale 1:125,000. 1980; and,
- MECP Water Well Records.

Limestone bedrock is anticipated to be present between surface and 0.5 m bgs. Any surficial material present on the Phase One property will be fill.

3.9.3 Fill Materials

Bedrock is present approximately 0.5 metres below ground surface (m bgs) in the Phase One study area. Any surficial material present on the site is likely fill (**PCA 14**: PCA #30 – Importation of fill material of unknown quality).

3.9.4 Water Bodies and Areas of Natural Significance

There are no water bodies on the subject site. The nearest water body is the Ottawa River is located approximately 300 m northeast of the Phase One property. The inferred groundwater flow direction is to the north-northeast towards the Ottawa River.

There are no Area of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website (www.gisapplication.lrc.gov.on.ca/mamnh/Index.html).

3.9.5 Well Records

The Ontario well records website (www.ontario.ca/environment-and-energy/map-well-records water wells) was accessed. Eleven well records were identified in the Phase One study area. All of the records were for monitoring wells. Well records indicate that surficial geology in the Phase One study area generally consists of fill. Limestone bedrock is present approximately 0.5 metres below ground surface.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library (maps.ogsrlibrary.com/wells/).

3.10 Site Operating Records

No site operating records were provided to EXP for review.

3.11 Summary of Records Review

The following PCAs were identified in the records review:

- **PCA 1**: PCA #28 – UST at 174 Forward Avenue (140 m south)
- **PCA 2**: PCA #10 PCA #28 – garage/service station at 140 Hinchey Avenue (south adjacent)
- **PCA 3**: PCA #28 – Record for gasoline tank, UST/AST not specified at 147 Forward Avenue (30 m south)
- **PCA 4**: PCA #28 – Record for fuel oil tank, AST/UST not specified at 159 Forward Avenue (50 m south)
- **PCA 5**: PCA #28 – Record for gasoline UST at 121 Parkdale Avenue (105 m northwest)
- **PCA 6**: PCA #10 – Repair garage from the 1940s to 2010 at 55 Carruthers Avenue (130 m east)
- **PCA 7**: PCA #28 – Record for gasoline UST at 173 Hinchey Avenue (150 m southeast)
- **PCA 8**: PCA #10, PCA #28 – Repair garage from the 1960s to the 1970s; Record for gasoline UST at 187 Forward Avenue (180 m south)
- **PCA 9**: PCA #28 – Record for two gasoline USTs and a fuel oil tank at 196 Forward Avenue (180 m south)
- **PCA 10**: PCA #10 – Repair garage from the 1970s to present at 193 Hinchey Avenue (215 m southeast)

*In-Harmony Developments Inc.
Phase One Environmental Site Assessment
133 Forward Avenue, Ottawa, Ontario
OTT-25011403-A0
October 3, 2025*

- **PCA 11:** PCA #58 – Former waste disposal site at Stonehurst Avenue and Bayview Avenue (250 m east)
- **PCA 12:** PCA #Other – Furnace oil spill at 154 Hinchey Avenue (50 m south)
- **PCA 13:** PCA #28 – AST for emergency generator at 170 Tunney's Pasture Driveway (170 m southwest)
- **PCA 14:** PCA #30 – Site is located in an area of shallow bedrock, fill is likely present overlying the bedrock (Phase One property)

The likely presence of fill material on the Phase One property is considered to contribute to an APEC. Due to the proximity and inferred up-gradient direction from the Phase One property, the former repair garage/gas station at 140 Hinchey Avenue and the furnace oil spill at 154 Hinchey Avenue result in an APEC. None of the other off-site PCAs were determined to contribute to APECs.

4.0 Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable about both the current and historical Phase One property uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the Phase One property.

The current property owner, Mr. Pierre Bellefeuille, was interviewed via email on September 2, 2025. Mr. Bellefeuille has owned the property since November 2004. The heating was converted from oil to propane in December 2019. Mr. Bellefeuille was not aware of any spills related to the heating oil tank. The former heating oil tank is a PCA (**PCA 15** – PCA #28 – Gasoline and associated products storage in fixed tanks).

Mr. Bellefeuille was unaware of any environmental issues pertaining to the Phase One property.

5.0 Site Reconnaissance

5.1 General Requirements

On August 15, 2025, at 8:00 am, Ms. Leah Wells of EXP conducted the site visit for the Phase One property. The weather was sunny with an approximate temperature of 20 degrees Celsius on the day of the site visit. The site visit lasted approximately 60 minutes.

The site visit was conducted in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the Phase One property.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

Photographs were taken at the Phase One property on August 15, 2025, and pertinent photographs are included in Appendix F.

5.2 Specific Observations at the Phase One Property

5.2.1 Buildings and Structures

A detached two-storey residence with a basement was present on the Phase One property. The residence was divided into two apartment units.

5.2.2 Site Utilities and Services

The residence was connected to municipal water and sewer. Heating was supplied via a propane fired furnace. The propane tanks were located on the north side of the residence.

5.3 Storage Tanks

5.3.1 Underground Storage Tanks

EXP did not observe any evidence of underground storage tanks (USTs), such as vent and fill pipes, during the site reconnaissance.

5.3.2 Above Ground Storage Tanks

EXP did observe two propane tanks on the north side of the residence. Due to the contents, these ASTs are not considered a concern. Historically, a heating oil AST was present in the southwest corner of the basement. No staining was observed on the concrete floor in this area.

5.4 Chemical Storage Handling and Floor Condition

Chemicals observed on the Site were limited to retail sized containers of household cleaners, and maintenance products such as paint.

All chemicals observed on the property were stored in small quantities and in their original retail packaging or approved containers. All chemical storage containers on the property were observed to be in good condition at the time of EXP's site visit. Flooring in the vicinity of any chemical storage areas was observed to be in good condition, free of damage or staining.

As such, the potential environmental concern to the subsurface environmental conditions of the property from the use of chemicals is considered to be low.

5.5 Areas of Stained Soil, Pavement or Stressed Vegetation

No staining or stressed vegetation was observed on the Phase One property.

5.6 Fill and Debris

No fill material or areas of disturbed soil was observed on the Phase One property.

5.7 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. According to the Environmental Protection Act (EPA), an ECA (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29, 1988.

No air emissions of concern were identified at the time of the site visit.

5.8 Odours

No strong odours were present during the site visit.

5.9 Noise

No excessive noise was heard during the site visit.

5.10 Other Observations

There were no pits and lagoons, no railways or spurs and no unidentified substances observed on the Phase One property.

5.11 Special Attention Items, Hazardous Building Materials and Designated Substances

5.11.1 Asbestos

Asbestos-containing materials (ACM) are fibrous hydrated silicates and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-Friable asbestos refers to asbestos that is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-Friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACM in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHSA). Under OHSA, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACM was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

Based on the age of the buildings, ACM may be present in the building.

5.11.2 Ozone Depleting Substances (ODSs)

Chlorofluorocarbons (CFC), often referred to as freons, ceased production in Canada in 1993 as a result of their ozone-depleting characteristics. Importation of CFCs into Canada ceased in 1997 and a total ban on their use is proposed for 2020. The use of these materials is still permitted in existing equipment, but equipment must be serviced by a licensed contractor such that CFCs are contained and not released to the environment during servicing or operation.

Maintenance of refrigerant containing equipment should continue to be completed by a licensed refrigeration contractor. The equipment should only be repaired, removed, or serviced by an appropriately licensed contractor.

5.11.3 Lead

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinplate and plumbing. The use of lead-based paints (LBPs) was phased out *circa* 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain higher levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the age of the buildings, it is possible that LBPs are present. Painted surfaces observed during the site visit were in good condition.

5.11.4 Mercury

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove "interior uses" from their product labels.

The interior painted surfaces observed during EXP's site visit were good condition. No mercury containing equipment was observed at the site. Due to the age of the buildings, there is potential for mercury containing fluorescent lightbulbs/tubes to be present.

5.11.5 Polychlorinated Biphenyls (PCB)

The manufacture of PCB in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Phase One property. Potential equipment, which could contain PCB include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCB must be disposed of in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCB is permissible.

Based on the age of the it is possible that PCB containing equipment is present.

5.11.6 Urea Formaldehyde Foam Insulation

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets, and fabrics, and it contributes to "that new house smell."

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose, and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. The further use of UFFI was banned in Canada in 1980.

No evidence of UFFI was observed during the site visit.

5.11.7 Radon

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints, and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerels per cubic metre (Bq/m³) where radon gas is present and the annual radon concentration exceeds 200 Bq/m³ in the normal occupancy area.

A radon gas assessment was beyond the scope of this Phase One ESA, and as such, radon gas was not assessed. The Radon Potential Map of Ontario created by Radon Environmental indicates that the Phase One property is located in Zone 3 – Guarded, which has the lowest potential for radon. The zones are identified based on regional geologic conditions. It is noted that although the property is located in Zone 3, a wide spectrum of readings can occur in all zones.

5.11.8 Mould

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow, a food source (i.e. gypsum wallboard, wallpaper, wood, etc.) and moist conditions are required. Mould can have an impact on human health depending on the species and concentration of the airborne mould spores. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment, the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled "mould guidelines for the Canadian construction industry" and the Environmental Abatement Council of Ontario (EACO) guidelines titled "EACO Mould Abatement Guidelines, Edition 3 (2015)."

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

No mould or water damage was observed in the building.

5.12 Other Substances

No other special attention substances (such as acrylonitrile or isocyanates) were suspected to be present at the Phase One property at the time of site reconnaissance.

5.13 Processing and Manufacturing Operations

No processing or manufacturing operations were observed at the Phase One property.

5.14 Hazardous Materials Use and Storage

No hazardous materials are used or stored at the Phase One property.

5.15 Vehicle and Equipment Maintenance Areas

No vehicle or equipment maintenance was observed at the Phase One property.

5.16 Oil/Water Separators

No oil/water separators were observed at the Phase One property.

5.17 Sewage and Wastewater Disposal

Sewage and wastewater generated at the Phase One property are disposed of via the municipal system.

5.18 Solid Waste Generation, Storage & Disposal

Solid wastes are limited to household wastes, collected by the City of Ottawa.

5.19 Liquid Waste Generation, Storage & Disposal

No liquid wastes are currently generated at the Phase One property.

5.20 Unidentified Substances

No unidentified substances were observed on the Phase One property at the time of the site visit. No dumping or any other deleterious materials were identified.

5.21 Hydraulic Lift Equipment

No hydraulic lift equipment of concern was identified at the Phase One property.

5.22 Mechanical Equipment

No mechanical equipment of concern was present on the Phase One property.

5.23 Abandoned and Existing Wells

No abandoned or existing wells were observed during the site visit.

5.24 Roads, Parking Facilities and Right of Ways

Vehicular access to the Phase One property is via Forward Avenue.

5.25 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within 250 m of the Phase One property was conducted from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the Phase One property. Refer to Figure 3 in Appendix B for the adjacent land uses.

The following land uses border the Phase One property:

- North: Residential;
- West: Residential;
- East: Residential; and
- South: Commercial (garage) and residential.

A garage is present at 140 Hinchey Avenue (**PCA 2**), south adjacent to the Phase One property. No other environmental concerns relating to the adjacent properties were observed at the time of the site visit.

5.26 Enhanced Investigation Property

Ontario Regulation 153/04 defines an enhanced investigation property as a “property that is used, or has ever been used, in whole or in part for an industrial use or any of the following commercial uses: a garage; a bulk liquid dispensing facility, including a gasoline outlet; or, for the operation of dry-cleaning equipment.”

Therefore, in accordance with Regulation 153/04, the property is not considered to be an enhanced investigation property.

6.0 Review and Evaluation of Information

6.1 Current and Past Uses

Based on a review of historical aerial photographs, historical maps, and other records the Phase One property has been developed with the existing single-family residence since at least 1912.

6.2 Potentially Contaminating Activity

Ontario Regulation (O. Reg.) 153/04 defines a Potential Contaminating Activity (PCA) as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D that occurs or has occurred in the Phase One study area. The following PCA were identified for the Phase One property and the Phase One study area:

The following PCAs were identified:

- **PCA 1:** PCA #28 – UST at 174 Forward Avenue (140 m south)
- **PCA 2:** PCA #10 PCA #28 – garage/service station at 140 Hinchey Avenue (south adjacent)
- **PCA 3:** PCA #28 – Record for gasoline tank, UST/AST not specified at 147 Forward Avenue (30 m south)
- **PCA 4:** PCA #28 – Record for fuel oil tank, AST/UST not specified at 159 Forward Avenue (50 m south)
- **PCA 5:** PCA #28 – Record for gasoline UST at 121 Parkdale Avenue (105 m northwest)
- **PCA 6:** PCA #10 – Repair garage from the 1940s to 2010 at 55 Carruthers Avenue (130 m east)
- **PCA 7:** PCA #28 – Record for gasoline UST at 173 Hinchey Avenue (150 m southeast)
- **PCA 8:** PCA #10, PCA #28 – Repair garage from the 1960s to the 1970s; Record for gasoline UST at 187 Forward Avenue (180 m south)
- **PCA 9:** PCA #28 – Record for two gasoline USTs and a fuel oil tank at 196 Forward Avenue (180 m south)
- **PCA 10:** PCA #10 – Repair garage from the 1970s to present at 193 Hinchey Avenue (215 m southeast)
- **PCA 11:** PCA #58 – Former waste disposal site at Stonehurst Avenue and Bayview Avenue (250 m east)
- **PCA 12:** PCA #Other – Furnace oil spill at 154 Hinchey Avenue (50 m south)
- **PCA 13:** PCA #28 – AST for emergency generator at 170 Tunney's Pasture Driveway (170 m southwest)
- **PCA 14:** PCA #30 – Site is located in an area of shallow bedrock, fill is likely present overlying the bedrock (Phase One property)
- **PCA 15:** PCA #28 – Former heating oil AST in the basement of the residence (Phase One property)

No other PCAs that took place within the vicinity of the Phase One property (approximately 250 m radius) were identified.

6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present.

The following areas of potential environmental concern (APEC) were identified:

- **APEC #1** – South property line (**PCA 2:** PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks)

- APEC #2 – South property line (**PCA 12**: PCA #Other – Furnace oil spill)
- APEC #3 – Entire Phase One property (**PCA 13**: PCA #30 – Importation of fill material of unknown quality)
- APEC #4 – Southwest corner of the residence (**PCA 14**: PCA #28 – Gasoline and associated products storage in fixed tanks)

6.4 Phase One Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 2.

6.4.1 Current and Past Uses

Based on a review of historical aerial photographs, historical maps, and other records the Phase One property has been developed with the existing single-family residence since at least 1912.

6.4.2 Buildings and Structures

The Phase One property is occupied by a two-storey residence with a basement, and a detached garage.

6.4.3 Underground Utilities

The Phase One property, and all other properties located, in whole or in part, within 250 metres of the boundaries of the Phase Two property, are supplied by a municipal drinking water system, as defined in the Safe Drinking Water Act, provided by the City of Ottawa. Further, the Phase One property is not located in an area designated in the municipal official plan as a well-head protection area and no properties within the Phase One study area have a well that is being used or is intended for use as a source of potable water. Thus, in accordance with Section 35 of Ontario Regulation 153/04, non-potable water standards apply to the Phase One property.

The Phase One property is serviced by municipal water and sewer, and overhead hydro. Heating is provided via propane.

6.4.4 Water Bodies and Groundwater Flow Direction

There are no water bodies on the subject site. The nearest water body is the Ottawa River is located approximately 300 m northeast of the Phase One property. The inferred groundwater flow direction is to the north-northeast towards the Ottawa River.

6.4.5 Areas of Natural Significance

The Phase One property is not located within an area of natural significance, and it does not include land that is within 30 metres of an area of natural significance. In accordance with Section 41 of Ontario Regulation 153/04, the Phase Two property is not an environmentally sensitive area.

6.4.6 Water Wells

No wells used as a source of potable water or for agricultural purposes were observed on the Phase One property or on any property within 250 metres of the Phase Two property.

6.4.7 Potentially Contaminating Activity

Ontario Regulation 153/04 defines a PCA as one of 59 operations set out in Table 2 of Schedule D that occurs or has occurred in a Phase One study area.

Ontario Regulation 153/04 defines a potentially contaminating activity (PCA) as one of 59 operations set out in Table 2 of Schedule D that occurs or has occurred in a property study area. If an activity is not listed in Table 2, the PCA is to be identified as “not applicable” and described. Potentially contaminating activities were identified on-Site and within 250 m from the Phase Two property site boundaries (Figure 2). Each PCA was further evaluated to determine if the activity may be contributing to an area of potential environmental concern (APEC) at the Phase Two property or if they are considered de-minimis and not contributing to an APEC.

The following PCAs were identified:

EXP PCA #	Location of PCA	Potentially Contaminating Activity (PCA)	Description	Rationale
PCA 1	174 Forward Avenue (150 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks,	Record for a UST of unknown volume.	No, due to the distance from the Phase One property.
PCA 2	140 Hinchey Avenue (south adjacent)	PCA #10 – Commercial autobody shops PCA #28 – Gasoline and associated products storage in fixed tanks	Repair garage from the 1940s to present. Records for USTs/pump island inferred to have been present on the south part of the property.	Yes, due to the proximity and inferred upgradient location from the Phase One property
PCA 3	147 Forward Avenue (30 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for 1,135 L gasoline tank, UST/AST not specified.	No, the property was redeveloped in the early 2020s, a Phase Two ESA for the property did not identify any groundwater contamination
PCA 4	159 Forward Avenue (50 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for fuel oil tank at St. Antoine School, AST/UST not specified.	No, the property was redeveloped in the early 2020s, a Phase Two ESA for the property did not identify any groundwater contamination
PCA 5	121 Parkdale Avenue (105 m northwest)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for a 1,362 L gasoline UST.	No, due to the distance and inferred downgradient location from the Phase One property.
PCA 6	55 Carruthers Avenue (130 m east)	PCA #10 – Commercial autobody shops	Repair garage from the 1940s to 2010s.	No, due to the distance and inferred cross gradient location from the Phase One property. The property was redeveloped with an apartment building in 2017. An RSC was filed for this property; no groundwater contamination was identified.
PCA 7	173 Hinchey Avenue (150 m southeast)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for 1,135 L gasoline UST.	No, due to the distance from the Phase One property.
PCA 8	187 Forward Avenue (180 m south)	PCA #10 – Commercial autobody shops PCA #28 – Gasoline and associated products storage in fixed tanks	Repair garage from the 1960s to the 1970s. Record for 4,540 L gasoline UST.	No, due to the distance from the Phase One property. The property was redeveloped with stacked townhouses in the late 1990s.
PCA 9	196 Forward Avenue (180 m south)	PCA #28 – Gasoline and associated products storage in fixed tanks	Record for two 2,270 L gasoline USTs and a fuel oil tank.	No, due to the distance from the Phase One property.
PCA 10	193 Hinchey Avenue (215 m southeast)	PCA #10 – Commercial autobody shops	Repair garage from the 1970s to present.	No, due to the distance from the Phase One property.

EXP PCA #	Location of PCA	Potentially Contaminating Activity (PCA)	Description	Rationale
PCA 11	Stonehurst Avenue & Bayview Avenue (250 m east)	PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Several large sewage lagoons were present on the property which were filled with earth and construction rubble (cider, ash, glass etc.) between 1928 and 1932. The former landfill occupied approximately 0.6 hectares and is currently occupied by a park and a church.	No, due to the distance and cross-gradient location from the Phase One property.
PCA 12	154 Hinchey Avenue (50 m south)	PCA #Other – Furnace oil spill	Furnace oil spill of unreported quantity to an earthen basement floor at a private residence.	Yes, due to the proximity and inferred upgradient location from the Phase One property.
PCA 13	170 Tunney's Pasture Driveway (170 m southwest)	PCA #28 – Gasoline and associated products storage in fixed tanks	Aboveground storage tank for an emergency generator installed in 2010.	No, due to the distance and cross gradient location from the Phase One property.
PCA 14	133 Forward Avenue (Phase One property)	PCA #30 – Importation of fill material of unknown quality	The Phase One property is located in an area of shallow bedrock, fill is likely present overlying the bedrock.	Yes, as this PCA is located on the Phase One property.
PCA 15	133 Forward Avenue (Phase One property)	PCA #28 – Gasoline and associated products storage in fixed tanks	Historically, the residence was heated with oil.	Yes, as this PCA is located on the Phase One property.

6.4.8 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present.

The following areas of potential environmental concern (APEC) were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
APEC #1	South property line	PCA 2: PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks	Off-site	VOC, PHC, PAH	Groundwater
APEC #2	South property line	PCA 12: PCA #Other – Furnace oil spill	Off-site	VOC, PHC, PAH	Groundwater
APEC #3	Entire Phase One property	PCA 13: PCA #30 – Importation of fill material of unknown quality	On-site	VOC, PHC, PAH, metals and inorganics	Soil

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
APEC #4	Southwest corner of the residence	PCA 14: PCA #28 – Gasoline and associated products storage in fixed tanks	On-site	VOC, PHC, PAH	Groundwater

6.4.9 Subsurface Stratigraphy

Limestone bedrock is anticipated to be present between surface and 0.5 m bgs. Any surficial material present on the Phase One property is anticipated to be fill.

6.4.10 Uncertainty Analysis

The CSM is a simplification of reality, which aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

7.0 Conclusions

The Qualified Person who oversaw this work, Leah Wells, P.Eng., recommends that a Phase Two ESA be conducted to address the PCA that may have adversely affected the Phase One property.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

9.0 Limitation of Liability, Scope of Report, and Third Party Reliance

Basis of Report

This report ("Report") is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or In-Harmony Developments Inc. ("the Client") has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Reliance on Information Provided

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp. If new information about the environmental conditions at the Site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

Standard of Care

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

Complete Report

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

Use of Report

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

Report Format

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

Appendix A: Qualifications of Assessors

Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment, Conservation and Parks. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Leah Wells, P.Eng., has six years of experience in the environmental consulting field. She has worked on numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, completing soil and groundwater sampling, soil vapour sampling, assisting in report preparation and data entry and analysis. Ms. Wells is a Qualified Person for completing Phase One and Two Environmental Site Assessments as per O.Reg. 153/04

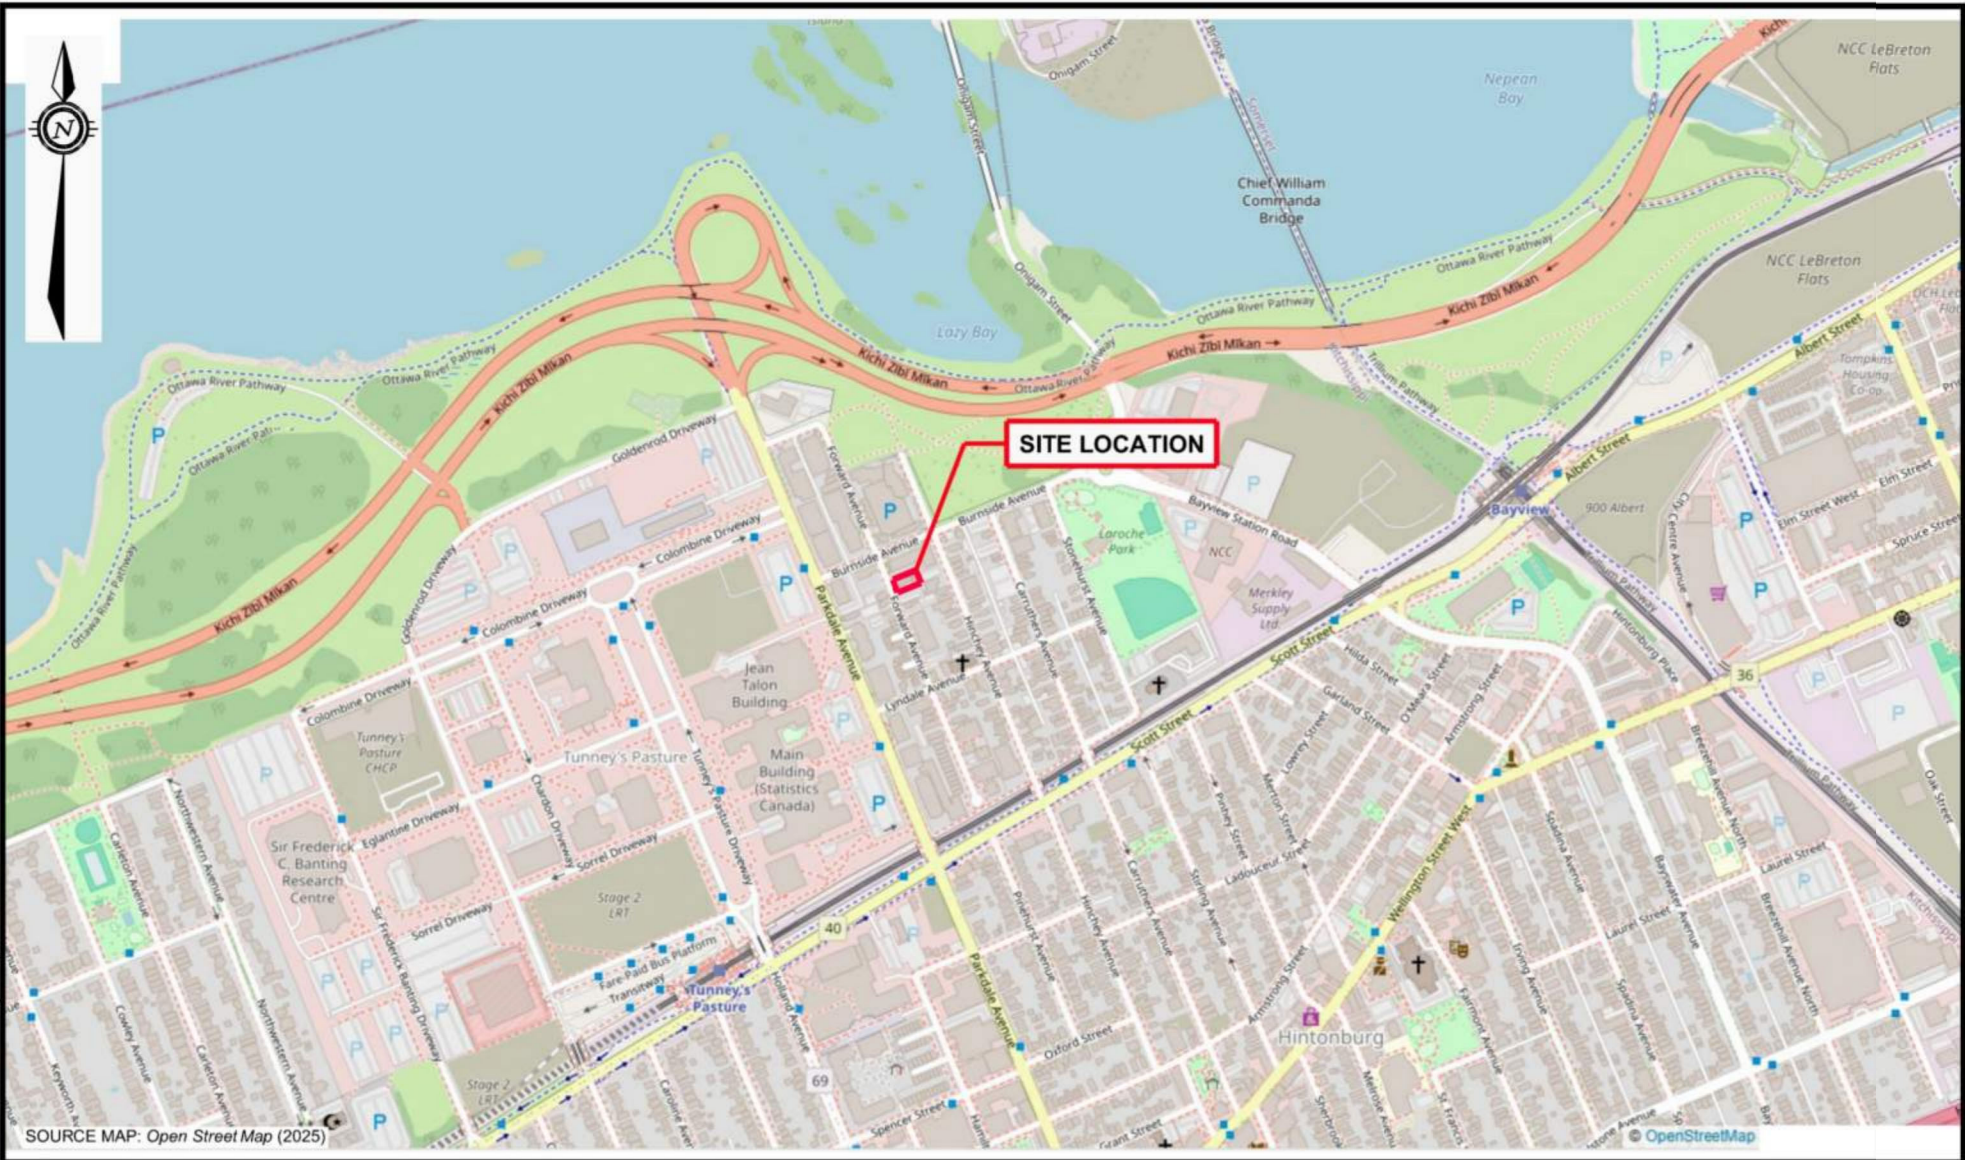

Scott Lessard, B.Sc., is a Project Manager with 9 years of experience in the environmental consulting field. A graduate of Concordia University in Environmental Science, his technical undertakings have included: project coordination; Phase I and II Environmental Site Assessments; indoor air quality surveys including radon monitoring, contaminated site investigations including drilling supervision, environmental sampling and data evaluation including Designated Substance Surveys; proposal preparation, client liaison and technical report preparation.

Appendix C: Title Search, Municipal Records & Provincial Records

August 28th, 2025

Leah Wells
EXP Services Inc.

Sent via email : leah.wells@exp.com

Dear Leah Wells,

**Re: HLUI Information Request
133 Forward Avenue, Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City’s Environmental Remediation Unit (ERU) does not have any environmental records for this property. To submit requests for information under the Municipal Freedom of Information and Protection of Privacy Act, please visit <https://ottawa.ca/en/city-hall/open-transparent-andaccountable-government/access-information-and-protection-privacy/accessinformation>
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website: <https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** No records found for this property.
- **Solid Waste Services:** No records found for this property.

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

1. For more information on how to interpret the HLUI data identified in the attached excel sheet (‘HLUI Summary Report – D06-03-25-0090 – 133Forward .xlsx’), please refer to the [Overview and User Guide.](#)”

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Liam White

Student Planner

HLUI SUMMARY REPORT
OLMS LANDFILL FEATURES

HISTORIC LANDFILL FEATURE ID #97	The historic landfills identified within the HLUI are referenced from the City's Old Landfill Management Strategy report (OLMS, 2004). Contact the City's Environmental Remediation Unit (ERU-UAE@ottawa.ca) if you would like more information about the old landfill sites identified in the OLMS report.
OBJECTID	97
ADJACENT_LANDUSE	commercial on east side; residential on south and west sides; open green space on north side; the zoning is partially L3 (community leisure) and RSA[600] H(10.7) (low rise apartment) in the general area of the sil
GROUNDWATER_FLOW_DIRECTION	assumed to be N towards the Ottawa River
G_GENERATION	
INFORMATION_SOURCE	1991-WDSI/WMB/MOE
UTM_NAD27_E_NOTE	
WATER_SUPPLY	municipally supplied water
SITE_NAME	Stonehurst and Bayview Avenue
OPERATIONAL_PERIOD	1928-1932
OVERBURDEN	limited topsoil over near surface bedrock
ROAD_TYPE	
WASTEDEPTH	unknown
ECOLOGICAL	since area is used as a park, human contact is possible
DISTANCE_TO_SURFACE_WATER	Ottawa River 350 m NNW
WASTETYPE	unknown; cinder, ash, glass, cobbles in a silty sand textured soil encountered in probe hole
ADJACENT_OWNER	private home owners west of Stonehurst Ave. and industries east of site
MAGNITUDE	analytical results exist but not available for review
LOCATION	east of Stonehurst Ave: southeast portion of Laroche Park and east portion of Russian Orthodox Church propert
ACTIVITYID	6122
DEPTH_TO_BEDROCK	interbedded calcarenite, bioclastic limestone, crystalline limestone and shale bedrock expected at or near surfac
SITE_STATUS	Confirmed
UTM_NAD27_NORTHING	5028230
UTM_NAD27_EASTING	443050
SOIL_COVER	wastes are assumed to be covered based on land use, however thickness of cover unknow
PARAMETERS	see ""Landfill Monitoring/Remediation""
G_VERSION	0
SERVICE_AREA	presumably City of Ottawa
SITE_ACCES	area is fenced but currently accessible to the public
CONCENTRTN	analytical results exist but not available for review
METHANE	none detected during GLL survey conducted in 1988
ACTIVITY2	6122
ADJACENT_INDUSTRY	Modern Containers Ltd. (Primary Metals Industry), 1940s, 20 Bayview Rd. [Intera #6
OWNERCATEGORY	City and Institutional
SITE_IDENTIFICATION	Ur-38
OWNER	City of Ottawa (Laroche Park) and Russian Orthodox Church
G_NEXT_VERSION	
SITE_ALIAS	Laroche Park
TOPOGRAPHY	generally flat
OPERATOR	presumably City of Ottawa
FORMER_MUN	OTTAWA
PHYSICAL	Laroche Park is currently used as a playing field
ROAD_NAME	
MOE_ID	x 1021
OTHERREF	Gartner Lee, 1988 (Site #38); Intera, 1988 (Lf #38); AMEC, April 2002 (Parcel A)
LANDFILL_1998_ID	_6O045L
UTM_NAD27_N_NOTE	
SIZE_HA	area approx. 0.6 ha
DEPTH_TO_GROUNDWATER	unknown
PARENT_ID	
ANDERSONSWASTEDISPOSALSITES_ID	068
OTHER_INFO	Several large sewage lagoons observed on 1928 aerial photographs. Earth and construction rubble used to fill lagoons and shallow low-lying areas between 1928 and 1932. [GLL, 1988]
LOCTN_REF	
SITE_COORD	UTM = 443050E, 5028230N, map 31G/5. Site #X1021 of closed sites in the MOE inventory (pg133.

Dear Leah Wells,

The Ministry is in receipt of your request made pursuant to the Freedom of Information and Protection of Privacy Act along with your payment of \$5.00 (non-refundable application fee). **The search will be conducted on the following:**

133 Forward Avenue, Ottawa

Timeframe: January 1, 1950 to September 10, 2025

If there is any discrepancy, please contact us immediately.

Please note the file number that has been assigned to your request. This number should be referred to in all future communications with our office.

Your request is being processed and our office will be in touch.

Yours truly,
Access and Privacy Office
Ministry of the Environment, Conservation and Parks

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

63 1 of 1 **ENE/239.7** **57.9 / -4.00** **Burnside & Slidell Dump** **ANDR**
Ottawa ON K1Y

Legal Description: Nepean
Location Description: a park S of Burnside Ave*, W of Bayview Ave*
Municipality: Ottawa City
Current Municipality: Ottawa City
RM: Ottawa-Carleton Region
Facility: Dump
Date Active: 1947
Date Begun:
Date Complete: 1947
Area (Ha):
Landfill Type:
Group Name: Ottawa River
Operated By:
Serial: MOEE 1020
NTS: 31G05
Diameter (m):

Historical Summary:

Burnside & Slidell Dump MOEE 1994 Burnside Ave & Slidell St cited as closed waste disposal site ([Ontario Ministry of the Environment [1994] Waste disposal site inventory, [Toronto]: Ontario Environment, 1994., i, 196 p. : maps. ISBN 0772984093). 1965 Military Town Plan ASE 306 Not marked, site is a park S of Burnside Ave*, W of Bayview Ave* [1965 Military Town Plan Ottawa-Hull ASE 306 Edition 1 (produced 1965)]. *[1992] MapArt Corporation Ontario, Towns and Cities [Street Atlas].

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2025

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Apr 2025

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jun 30, 2025

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2024**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Jun 30, 2025**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jun 30, 2025**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Jun 30, 2025**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 31, 2024**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jan 2025

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Dec 31, 2024

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Apr 2024

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-May 31, 2025

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2025

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-Aug 2024

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jun 30, 2025

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Jun 30, 2025

Ontario PFAS Spills:

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI:

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR:

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jun 30, 2025

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2025

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-May 2025

Wastewater Discharger Registration Database:

Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Jun 30, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
