Appendix F – City of Ottawa Historic Land Use Inventory (HLUI)
Appendix G – Aerial Photographs
Appendix H – Topographic Map
Appendix I – Photographic Log
Appendix J – Qualifications of Assessors

1. Executive Summary

Lopers & Associates (Lopers) was retained by 11034936 Canada Inc., a subsidiary company of Brigil Construction ("BRIGIL") to complete a Phase One Environmental Site Assessment (Phase One ESA) of the residential properties with civic address Nos. 131 Parkdale Avenue, 139 Parkdale Avenue and 122-124 Forward Avenue, Ottawa, Ontario ("Phase One Property", "Property" or "Site").

This Phase One ESA is being completed as part of due diligence requirements associated with the submission of a Development Application to the City of Ottawa Municipal Planning Department.

The Phase One Property has been developed or occupied for residential use since at least 1912 and the northwest portion of the Property was redeveloped in 1962 for the present day apartment residential use. Various portions of the Property became vacant in the 1980's and 2020's and have not been developed for any other use. The Phase One Property is currently owned by BRIGIL. It is Lopers' understanding that BRIGIL intends to develop the Phase One Property for residential purposes, including the current concept for construction of 2 multi-unit, multi-storey buildings: Building A (6 to 40- Storeys) on the west portion of the Property and Building B (6-Storeys) on the east portion of the Property. The proposed development concept includes excavation for 3 to 4 levels of underground parking.

The Phase One Property is immediately surrounded by municipal Right-of-Ways and residential buildings to the north and east, by residential buildings to the south and by Parkdale Avenue followed by the Tunney's Pasture Government of Canada offices and research complex to the east.

The presence of historical residential buildings present at the Phase One Property was observed from at least 1912 to 1958. These historical structures were demolished prior to redevelopment of the northeast portion of the Property in the 1960's and the clearing of the southeast portion of Property in the 1980's; historical demolition and backfilling practices have included backfilling foundations and grading with demolition debris and other fill materials of unknown environmental quality. These original structures were located outside of the existing and redeveloped building footprints. The fill material represents PCA #1 and is associated with the O.Reg. 153/04 PCA Item 30: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

The on-Site PCA is further summarized in Table 1 below.

Table 1: Potentially Contaminating Activities and Areas of Potential Environmental Concern

PCA Report Reference No.	Potentially Contaminating Activity	Location	APEC Report Reference No.
1	Fill placement during historical grading activities (O.Reg. 153/04 PCA Item 30: Importation of Fill Material of Unknown Quality)	All portions of the Phase One Property outside of existing building footprints.	APEC #1

Twenty additional PCAs at neighbouring properties in the Phase One Study Area were identified as part of this Phase One ESA. Neighbouring property PCAs consist of active and historical automotive garages, autobody shops and fuel storage tanks.

Two PCAs were identified in close proximity to the Phase One Property during the historical research and were reviewed at the time of the Site Investigation. Based on historical research, visual observations during the Site Investigation and waste registration experience, the waste generator listing at 151 is suspected to be associated with clean out of a hydraulic elevator pit or underground parking catch basin, which is not considered to represent an APEC for the Phase One Property. The Tunney's Pasture (120 & 150 Parkdale) property limits are 20 m west of the Phase One Property, however, the operations at the various Government of Canada facilities identified in the Waste Generators summary and UST registry are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property.

The other PCAs at neighbouring properties in the Phase One Study Area are located significant distances and at down- or cross-gradient orientations with respect to the Phase One Property and are not considered to represent APECs for the Phase One Property.

Based on the identification of one APEC at the Phase One Property, it is recommended that a Phase Two Environmental Site Assessment be completed to assess the soil and/or groundwater quality in the vicinity of the APEC.

2. Introduction

Lopers & Associates (Lopers) was retained by 11034936 Canada Inc., a subsidiary company of Brigil Construction ("BRIGIL") to complete a Phase One Environmental Site Assessment (Phase One ESA) of the residential properties, referred to as the Parkdale 3 Development Lands with Civic address Nos. 131 Parkdale Avenue, 139 Parkdale Avenue and 122 Forward Avenue, Ottawa, Ontario ("Phase One Property", "Property" or "Site").

The Phase One Property is legally described as Lots 1, 2, 3 & 4 East Parkdale Avenue, Lots 1 & 2 West Forward Avenue and Part of Lane (closed by Judge's Order) Inst. N719490. Amended by Judge's Orders Inst. N722887 & N723202, Registered Plan 35, in the City of Ottawa as obtained from a Topographical Survey completed by Annis, O'Sullivan, Vollebakk Ltd., on July 21, 2025, provided by BRIGIL; a copy of the Topographical Survey is presented in Appendix A.

A concept plan showing the proposed 131 Parkdale re-development was prepared by Perkins & Will and was provided by BRIGIL. The development concept plans, provided in Appendix B, show the Property re-developed with 2 multi-storey residential towers:

- Building A – 6 Storey podium across Parkdale Avenue (west lots) with a 40-Storey tower on the northeast portion of the Property; and,
- Building B – 6 Storey podium across Forward Avenue (east lots) portion of the Property.

Based on approximate dimensions obtained from the City of Ottawa geoOttawa website, the Phase One Property has a total approximate area of 3,137 m² (0.31 Hectares). The Phase One Property consists of 3 residential lots and a part of a laneway, with property identification numbers (P.I.N.) of 04096-0001 (131 Parkdale), 04096-0002 (139 Parkdale), 04096-0012 (122 Forward) and 0496-0054 (Laneway) as obtained from the Topographical Survey and Property Parcel Registers from GeoWarehouse, provided by BRIGIL, included in Appendix A and Appendix C, respectively.

The approximate elevation of the Phase One Property as indicated on the Topographical Survey, City of Ottawa mapping and confirmed through Google Earth is between approximately 60.6 and 61.8 m above mean sea level (m AMSL). The approximate centre of the Phase One Property has Latitude and Longitude coordinates of 45° 24' 29" N and 75° 43' 59" W and Universal Transverse Mercator (UTM) coordinates of 442640 m E and 5028550 m N. As of February 3, 2026, the Phase One Property has 2 zoning definitions:

- The west portion of the Property is zoned R5B (H37), which signifies Residential zoning with a height restriction of 37 m.
- The east portion of the Property is zoned R5L (H19), which signifies Residential zoning with a height restriction of 19 m.

The Phase One Property is currently owned by 11414801 Canada Inc., a subsidiary company of BRIGIL. It is Lopers' understanding that BRIGIL intends to redevelop the Phase One Property for residential purposes, including the current concept for construction of 2 multi-unit, multi-storey buildings, with 3 to 4 levels of underground parking. A copy of the current Site development design concept plan, as provided by BRIGIL, is presented in Appendix B.

This Phase One ESA was commissioned by Mr. Jean-Luc Rivard, Vice-President - Land Acquisition and Development for BRIGIL. BRIGIL has a business address of 200-425 St. Joseph Boulevard, Gatineau, Quebec, J8Y 3Z8 and a business telephone number of 819-243-7392.

3. Scope of Investigation

This Phase One ESA has been completed as per the details of scope presented in Lopers' Letter entitled "Proposal for Phase One Environmental Site Assessment, Phase Two Environmental Site Assessment and Supplemental Excess Soil Management Sampling, Proposed Residential Re-development, 131 Parkdale Avenue, Ottawa, ON", dated September 25, 2025, reference No. PRO-035C-25-BRIGIL.

The Phase One ESA has been prepared in accordance with the technical requirements and formatting guidance as presented by the Ministry of Environment, Conservation and Parks (MECP) in Ontario Regulation (O.Reg.)153/04, as amended October 23, 2025. This format is based on the provincial regulation for brownfields redevelopment and has been adopted as a standard for the City of Ottawa for development applications.

The scope of work for the Phase One ESA involved the following components:

- Historical Research (Review of available historical reports, public environmental databases, Fire Insurance Plans (FIPs), City Directories, Aerial Photographs, geological mapping and any other relevant environmental records which were readily accessible at the time of the Phase One ESA);
- Requests for Information from the MECP Freedom of Information (FOI) and City of Ottawa Historical Land Use Inventory (HLUI);
- Subcontracted research of environmental databases through Environmental Risk Information Services (ERIS);
- Property Ownership Registration, obtained by BRIGIL through GeoWarehouse
- Physical Site inspection
- Interviews with persons knowledgeable about the Property and past uses
- Interpretation of findings
- Preparation of a Phase One ESA report

The specific objectives of the Phase One ESA are to:

- Provide an overview of the Phase One Environmental Site Assessment conducted with respect to the Phase One Property.
- Provide an environmental record of the Phase One Property, in a manner that can be assessed, tested and reconstructed, to document and demonstrate:
 - How the objectives of the Phase One ESA were achieved and how the requirements for the objectives were met;
 - Whether further investigation is required to submit a Record of Site Condition (RSC) for filing;
 - Whether there exists an adequate basis for further investigation; and,
 - The basis for required certifications.

4. Records Review

a) General

i. Phase One Study Area

The Phase One Study Area includes the Phase One Property and properties with boundaries within 250 m of the Phase One Property limits. Based on a review of the Phase One Property and properties in the Phase One Study Area, their associated historical and/or current uses and operations and physical characteristics of the Phase One Study Area, it was determined that an assessment of properties within 250 m of the Phase One property will be sufficient to meet the objectives of the scope of this investigation for a Phase One ESA.

ii. First Developed Use Determination

A review of the fire insurance plans (FIPs) from the City of Ottawa shows the Phase One property to be developed primarily for residential use as early as 1912. This use was maintained until at least 1956, based on the FIPs.

Aerial photographs reviewed from 1928 through 1958 confirm early residential development across the Phase One Property. Aerial Photographs from 1965 through 2022 depict the Phase One Property occupied with two original (row-house and single family home) residential buildings and an apartment constructed on the northwest portion of the Property.

The Phase One Property was found to be occupied by the residential apartment at 131 Parkdale Avenue and two vacant buildings at 139 Parkdale Avenue (house) and 122 Forward Avenue (row-house) during the 2026 Phase One Site Inspection.

Based on the information reviewed as part of this Phase One ESA, specifically 1912 Fire Insurance Plans and aerial photographs, the Phase One Property was first developed for residential use in 1912 and the O.Reg. 153/04 property use classification is considered to be Residential Use.

iii. Fire Insurance Plans

Fire insurance plans, where available, for the City of Ottawa as part of this Phase One ESA.

Early development of the Phase One Property is depicted on Sheet 131 of the June 1912 FIPs; while neighbouring lands are depicted on Sheets 130 (east) and Sheet 132 (north). The Property was initially developed with 7 municipal addresses (125, 131, 135 & 139 Parkdale Avenue and 13, 15 & 17 Forward Avenue) across the entire Phase One Property limits. The Property is used for residential purposes.

The Phase One Property is shown again on Sheet 304 of the December 1956 FIPs. Some residential infill development is apparent at formerly undeveloped portions of the Phase One Property.

The presence of historical residential buildings at the Phase One Property was observed from at least 1912 to 1956. Some of these structures were demolished prior to redevelopment of the Property in the 1960's; historical demolition and backfilling practices have included backfilling foundations with demolition debris and other fill materials of unknown environmental quality. Several of these structures are located outside of the original and 1960's apartment building footprint and are suspected to have remnant demolition materials and/or other poor environmental quality fill material within their historical footprints. The suspected presence of poor-quality fill material at the Property represents PCA #1 and is associated with the O.Reg. 153/04 PCA: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

None of the occupants at other properties in the Phase One Study Area were considered to represent PCAs during a review of the FIPs.

iv. Chain of Title

A chronological chain of title was not prepared as part of the Phase One historical research. The historical ownership of the Phase One Property generally consisted of transfers between individual residents of the many smaller historical lots which now comprise the Property; this type of residential occupancy took place from at least the early 1910's up to the 1980's and 1990's.

Corporations began acquisitions of various portions of the Phase One Property in the 1960's through the 2020's. 114014801 Canada Inc. purchased the 3 parcels that comprise the Phase One Property on October 24, 2024 (131 Parkdale Avenue), February 25, 2025 (139 Parkdale Avenue) and June 20, 2025 (122 Forward Avenue). The Phase One Property remains fully owned by BRIGIL; with demolition of the original buildings scheduled for 2026 and demolition of the 1960's apartment building planned for a time closer to re-development of the Property.

A copy of the Parcel Registers for the Phase One Property from GeoWarehouse, as provided by BRIGIL is included in Appendix C.

Based on the chain of title ownership summary there are no identifiable PCAs known to be associated with the ownership of the Phase One Property.

v. Environmental Reports

BRIGIL provided the following reports for review as part of this Phase One ESA:

1. "Phase I Environmental Site Assessment, 131 Parkdale Avenue, Ottawa, Ontario", dated March 12, 2015, completed by Pinchin Ltd., for Timbercreek Asset Management Inc.
2. "Phase I Environmental Site Assessment, 131 Parkdale Avenue, Ottawa, Ontario", dated June 18, 2024, completed by Pinchin Ltd., for Portage Capital Corporation.
3. "Phase I - Environmental Site Assessment, 139 Parkdale Avenue, Ottawa, Ontario", dated April 5, 2021, completed by Paterson Group Inc., for Vika Land & Development Group.
4. "Phase I - Environmental Site Assessment, 122-124 Forward Avenue, Ottawa, Ontario", dated April 3, 2020, completed by Paterson Group Inc., for 2634410 Ontario Inc.

2015 Phase I Environmental Site Assessment by Pinchin (2015 Pinchin Phase I ESA)

Report was prepared for 131 Parkdale Avenue

The 2015 Pinchin Phase I ESA identified that the 131 Parkdale Avenue portion of the Phase One Property was originally developed for residential purposes since at least the mid-1940's. Pinchin identified the historical presence of two residential dwellings at the Site from at least the mid-1940's until the late 1950's. The Site was redeveloped with the present day apartment building circa 1962. The Property was occupied with the 6-storey residential apartment building at the time of the 2015 Pinchin Phase I ESA.

Pinchin did not identify the current or historic presence of any underground storage tanks (USTs) or aboveground storage tanks ("ASTs") at the Site. No PCAs were identified at the Site and no off-Site PCAs were interpreted to represent APECs for the Site. A Phase II ESA was not recommended for the Site. The report did identify waste generators at the neighbouring property to the west (Government of Canada Tunney's Pasture), which are associated with PCA(s); these adjacent properties will be discussed in greater detail in subsequent sections of this report.

2024 Phase I Environmental Site Assessment by Pinchin (2024 Pinchin Phase I ESA)

Report was prepared for 131 Parkdale Avenue

The 2024 Pinchin Phase I ESA updated the information summarized in the above noted 2015 Pinchin Phase I ESA. The Property was occupied with the 6-storey residential apartment building at the time of the 2024 Pinchin Phase I ESA.

Pinchin did not identify the current or historical presence of any USTs or ASTs at the Site. No PCAs were identified at the Site and no off-Site PCAs were interpreted to represent APECs for

the Site. A Phase II ESA was not recommended for the Site. The report did identify waste generators and an oil/gas spill at the neighbouring property to the west (Government of Canada Tunney's Pasture), which are associated with PCA(s); these adjacent properties will be discussed in greater detail in subsequent sections of this report.

2021 Phase I Environmental Site Assessment by Paterson (2021 Paterson Phase I ESA)

Report was prepared for 139 Parkdale Avenue

The 2021 Paterson Phase I ESA identified that the 139 Parkdale Avenue portion of the Phase One Property was originally developed for residential purposes since at least 1912. The Property was occupied with the 2-storey residential dwelling at the time of the 2021 Paterson Phase I ESA.

Paterson did not identify the current or historical presence of any USTs or ASTs at the Site. No PCAs were identified at the Site and no off-Site PCAs were interpreted to represent APECs for the Site. A Phase II ESA was not recommended for the Site. The report did identify waste generators at the neighbouring property to the west (Government of Canada Tunney's Pasture), which are associated with PCA(s); these adjacent properties will be discussed in greater detail in subsequent sections of this report.

2020 Phase I Environmental Site Assessment by Paterson (2020 Paterson Phase I ESA)

Report was prepared for 122-124 Forward Avenue

The 2020 Paterson Phase I ESA identified that the 122-124 Forward Avenue portion of the Phase One Property was originally developed for residential purposes since at least 1912. The former building on the south portion of 122 Forward Avenue was identified to have been demolished prior to 1986. The Property was occupied with the 2-storey residential dwelling at the time of the 2020 Paterson Phase I ESA.

Paterson did not identify the current or historical presence of any USTs or ASTs at the Site. No PCAs were identified at the Site and no off-Site PCAs were interpreted to represent APECs for the Site. A Phase II ESA was not recommended for the Site.

b) Environmental Source Information

A review of the readily available environmental source information records was completed as part of this Phase One ESA.

As part of environmental source information review, Environmental Risk Information Systems (ERIS) was also contracted to complete a search of their records of environmental databases within 250 m of the Site. The pertinent search results to this Phase One ESA are presented in the following subsections. A copy of the ERIS database search dated November 4, 2025 is included as Appendix D.

National Pollutant Release Inventory

The National Pollutant Release Inventory (NPRI) is a database maintained by Environment and Climate Change Canada (ECCC). Reporting of releases of pollutants into the natural environment are reported annually by corporations and/or their representatives and posted for public record by ECCC. Presently, data is available and posted for the years 1993 through 2024. No records were reported in a review of the NPRI registry on February 3, 2026, and the results were confirmed through the subcontracted ERIS search, dated November 4, 2025. There was one NPRI listing in the ERIS search results, however, this release was to air and is not associated with a PCA.

Polychlorinated Biphenyl (PCB) Inventories

The MECP, formerly known as the Ministry of Environment and Energy, published the "Ontario Inventory of PCB Storage Sites" dated January 1993. The inventory documented the company information, physical address, number of tonnes of liquid PCBs by region. The National PCB Inventory, which details in-use PCB containing equipment in federal, provincial and private facilities was also reviewed. No records were identified within 250 m of the Phase One Property during a review of these documents and the results were confirmed through the subcontracted ERIS search, dated November 4, 2025.

Environmental Instruments

Environmental Instruments, such as Environmental Compliance Approvals (ECAs), Certificates of Approval (CAs), Permits to Take Water (PTTWs), Risk Management Plans (RMPs), and Certificates of Property Use (CPUs) are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of any such records associated with properties.

FOI requests were submitted to the MECP for each of the Parkdale and Forward Avenue lots, as part of this Phase One ESA; the responses dated December 9, 2025 are included as Appendix E. The FOI responses did not identify any records of Environmental Incidents at the Phase One Property.

The ERIS search did not identify any records of environmental instruments at the Phase One Property, however, 2 records of CAs, 1 Environmental Activity and Sector Register (EASR), 3 PTTWs and 7 records of ECAs were identified within 250 m of the Phase One Property. The activities and associated records are not considered to represent PCAs and none are suspected to contribute to an APEC for the Property.

Inventory of Coal Gasification Plants

The document "Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, Volume II", produced by Intera Technologies Ltd. for the Ontario Ministry of the Environment, dated July 1988 was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document and the results were confirmed through the ERIS search.

Environmental Records of Incidents, Orders, Offences, Spills, Discharges of Contaminants or Inspections maintained by the Ministry

Environmental records of incidents, orders, offences, spills, discharges of contaminants or inspections are maintained by the MECP on a property specific basis and can generally be obtained by submitting a FOI request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA; the MECP decision letter did not identify any records of spills or discharges at the Phase One Property. The ERIS search did not identify any records of environmental records at the Phase One Property; however, 20 records of spills were identified within 250 m of the Phase One Property in the ERIS search records. The spills interpreted to be associated with PCAs included:

- A furnace oil spill at 154 Hinchy Avenue, 80 m southeast of the Property – PCA #2 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
- A furnace oil spill at 58 Carruthers Avenue, 130 m east of the Property – PCA #3 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
- A furnace oil spill at 56 Carruthers Avenue, 130 m east of the Property – PCA #4 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
- A furnace oil spill at 63 Carruthers Avenue, 170 m east of the Property – PCA #5 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.

The PCAs associated with spills identified at properties in the Phase One Study Area are not considered to represent APECs for the Property based on their distances and/or orientations with respect to the Phase One Property.

Waste Management Records

Waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors are maintained by the MECP on a property specific basis and can generally be obtained by submitting a FOI request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA, which did not identify any waste management records at the Phase One Property. The ERIS search did not identify any waste generators at the Phase One Property.

Registered Waste Generators at neighbouring properties within the Phase One Study Area are summarized in Table 2 below.

Table 2: Off-Site Waste Generators Summary

PCA Report Reference No.	Address	Generator	Waste Classes (Related to PCAs)	Distance from Site
PCA #6	151 Parkdale Avenue	Centretown Citizens Ottawa Corporation	Oil skimmings & sludges	Adjacent to south
PCA #7	120 Parkdale Avenue / 150 Tunney's Pasture Driveway	Public Works and Government Services Canada	Petroleum distillates, Inorganic Laboratory Chemicals, Aliphatic Solvents, Light Fuels, Waste compressed gases, PCBs, Waste oils and lubricants, Organic Laboratory Chemicals, Photoprocessing Wastes, Paint/Pigment/Coating Residues, Acid Waste – Heavy Metals, Alkaline Wastes – Heavy Metals, Pharmaceuticals	20 m west
PCA #8	80 Carruthers Avenue	Johannes Pothuma	Petroleum distillates	150 m southeast
PCA #9	184 Forward Avenue	Frank & Sons Painting and Decorating	Petroleum distillates	170 m south
PCA # 10	18 Burnside Avenue	Ottawa Community Housing Corp.	Light Fuels	170 m east

The waste generator listing at 151 is suspected to be associated with clean out of a hydraulic elevator pit, which is not considered to represent an APEC for the Phase One Property. The Tunney's Pasture (120 & 150 Parkdale) property limits are 20 m west of the Phase One Property, however, the operations at the various Government of Canada facilities identified in the Waste Generators summary are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property. The PCAs associated with the other waste generators identified at properties in the Phase One Study Area are not considered to represent APECs for the Property based on the nature of operations at these properties, their distances and/or orientations with respect to the Phase One Property. The locations of these PCAs are depicted on Figure 3: Surrounding Land Use and are summarized in Table 7 in Section 7. (b).

MECP Property Specific Reports

Reports submitted to the Ministry related to environmental conditions are maintained by the MECP on a property specific basis and can generally be obtained by submitting a FOI request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA, which did not identify any MECP Property Specific Reports for the Phase One Property. The ERIS search did not identify any records of environmental reports at the Phase One Property, or properties within 250 m of the Phase One Property.

Technical Standards and Safety Authority

Records of retail fuel storage tanks, retail fuel outlets, spills, releases, and other associated information is maintained by the Technical Standards and Safety Authority (TSSA). These records can be obtained upon request from the TSSA. The subcontracted ERIS search also confirms the filing of such records associated with properties.

The subcontracted ERIS search did not identify any records of private and retail fuel storage tanks or historical incidents at the Phase One Property. The following records of private and/or retail fuel storage tanks were reported at neighbouring properties in the Phase One Study Area:

Table 3: Off-Site Fuel Storage Tanks

PCA Report Reference No.	Address	Owner	Fuel Storage Tank Records	Distance from Site
PCA #2	154 Hinchy	Private Residence	Aboveground storage tank in basement leaked and soil contamination reported	80 m southeast

The PCAs associated with fuel storage tanks identified at properties in the Phase One Study Area are not considered to represent APECs for the Property based on their distances and/or orientations with respect to the Phase One Property. The locations of these PCAs are depicted on Figure 3: Surrounding Land Use and are summarized in Table 7 in Section 7. (b).

Registry Filings

Records of notices and instruments, including records of site condition (RSC), which have been posted in the environmental registry, are maintained by the MECP. These records can be reviewed electronically on the MECP Environmental Site Registry (ESR) website. The subcontracted ERIS search also confirms the filing of such records associated with properties. The website was reviewed for RSCs filed at the Phase One Property and in the Phase One Study Area; no RSCs have been filed for the Phase One Property.

Two RSCs have been filed for properties in the Phase One Study Area (55 Carruthers & 59 Carruthers Avenue). A brief review of the RSC documents indicated that an Automotive garage was historically present at 55 Carruthers Avenue, approximately 170 m east of the Phase One Property. The automotive garage is associated with the O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems). This former automotive garage, PCA #11, is not considered to represent an APEC for the Phase One Property given the separation distance and cross-gradient orientations of the properties.

The RSC filed for 59 Carruthers Avenue was filed on an adjacent property to the aforementioned 55 Carruthers Avenue RSC. The APECs for this 2nd property were poor quality fill material, in addition to those identified at the adjacent historic automotive service garage.

Areas of Natural and Scientific Interest

Records of areas of natural and scientific interest (ANSIs) formerly referred to as areas of natural significance, are maintained by the Ministry of Natural Resources and Forestry (MNRF), and are available for review on the Ontario GeoHub website. The website was reviewed for records of ANSIs in the Phase One Study Area on February 6, 2025. There were no ANSIs identified within 250 m of the Phase One Property.

Current and Historical Landfills

Records of historical and operating landfills is maintained by the MECP. The document "Waste Disposal Site Inventory", produced by the Ontario Ministry of the Environment, dated June 1991 was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document.

The City of Ottawa contracted Golder Associates Ltd. to conduct an inventory and assessment of former waste disposal sites within the City of Ottawa. The document "Old Landfill Management Strategy, Phase 1 – Identification of Sites, City of Ottawa, Ontario", produced by Golder Associates Ltd., finalized October 2004, was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document.

Two landfills were identified within 500 m of the Phase One Property: Stonehurst & Bayview Avenue (approximately 270 m east) and Bayview Dump (450 m east). These former landfills are situated at significant distances and down- or cross-gradient orientations with respect to the Property and are not considered to represent APECs for the Phase One Property.

City of Ottawa Historical Land Use Inventory

The City of Ottawa's Planning, Infrastructure and Economic Development department was contacted to complete a search of the Historical Land Use Inventory (HLUI) maintained by the City. Through the HLUI responses, received on December 5 and December 15, 2025, Lopers interpreted that there were no activities (of environmental significance) associated with the

Phase One Property identified in the HLUI search records. There were various activities at neighbouring properties in the Phase One Study Area, including the following PCAs listed in Table 4.

Table 4: Potentially Contaminating Activities Identified during HLUI Review

Plan Reference No.	PCA	Address	Orientation	APEC (Y/N)
7	UST	120 Parkdale Avenue	20 m west	N
11	Automotive Service Garage	55 Carruthers Avenue	170 m east	
12	Fuel Storage Tank	147 Forward Avenue	50 m southeast	N
13	Fuel Storage Tank	159 Forward Avenue	60 m southeast	N
14	UST	174 Forward Avenue	160 m south	N
15	2 USTs, Automotive Repairs	187 Forward Avenue	200 m southeast	N
16	3 USTs	196 Forward Avenue	180 m south	N
17	3 USTs, Service Garage	140 Hinchy Avenue	50 m east	N
18	Fuel Storage Tank	173 Hinchy Avenue	180 m southeast	N
19	UST	55 Parkdale Avenue	200 m north	N
20	UST	121 Parkdale Avenue	20m north	N
21	Service Garage and Autobody Repair Shop	193 Hinchy Avenue	240 m southeast	N
N/A	Former Landfill	51 Stonehurst Avenue	270 m east	N
N/A	Former Landfill	7 Bayview Station Road	450 m east	N
N/A	Environmental Management Risk Area - VOC Groundwater Plume	3 Hamilton Avenue North & Surrounding Lands	Limits shown approximately 330 m south	N

The Tunney’s Pasture property limits are 20 m west of the Phase One Property, however, the operations at the 120 Parkdale Avenue facilities are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property. Additional activities were identified at properties in the HLUI study area; however, these activities were not interpreted to have been associated with PCAs. None of the identified listed ‘activities’ at neighbouring properties were considered to represent APECs for the Phase One Property given their distances and/or orientations with respect to the Property. A copy of the HLUI response letter is included in Appendix F.

c) Physical Setting Sources

i. Aerial Photographs

Aerial Photographs were reviewed for the Phase One Property and Phase One Study Area from available sources as part of the historical review. Aerial photographs were reviewed from historical research previously completed in the Phase One Study Area, Google Earth Aerial Imagery and from the City of Ottawa website. Aerial Photographs were reviewed over the period of 1928 through 2022, which depict development of the Phase One Study Area. A summary of the information gleaned from the aerial photographs is provided below. Copies of the aerial photographs reviewed are provided in Appendix G.

1928 Aerial Photograph

The Phase One Property is developed with what appears to be 5 single family residential dwellings across most of the Property. A laneway is shown to divide the Parkdale and Forward Avenue portions of the Property. Parkdale Avenue, Burnside Avenue and Forward Avenue have been constructed to the west, north and east of the Property, respectively. Properties west of Parkdale Avenue are undeveloped and appear to be vegetated. The neighbouring properties to the north, south and east in the Phase One Study Area appear to have been developed for primarily residential use. An inlet from the Ottawa River is present approximately 210 m east-northeast of the Property. Soil disturbance, suspected to be associated with aforementioned landfilling operations, was observed approximately 270 m east of the Phase One Property.

1946 Aerial Photograph

No significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

1958 Aerial Photograph

No significant changes appear to have been made at the Phase One Property. The property to the west of Parkdale Avenue has been developed with what appears to be the present day Tunney's Pasture government complex. Increased residential infill is apparent to the north, south and east of the Property.

1965 Aerial Photograph

The northwest portion of the Phase One Property has been re-developed with what appears to be the present day residential apartment building. A single family dwelling is present on the southern Parkdale portion of the Property, and 2 dwellings are present on the Forward portion of the Property. The inlet from the Ottawa River has receded to the north and is now approximately 270 m northeast of the Phase One Property. No other significant changes appear to have been made to the neighbouring properties in the Phase One Study Area.

1976 Aerial Photograph

No significant changes appear to have been made to the Phase One Property. Additional construction/infill is apparent at the institutional (Government of Canada) complex to the west of Parkdale Avenue. The Sir John A. MacDonald Parkway has been constructed approximately 210 m northeast of the Phase One Property. The historical suspected landfill approximately 270 m east of the Phase One Property has been converted to parkland (baseball diamonds).

1991 Aerial Photograph

The former residential dwelling on the southeast portion Phase One Property has been demolished. Several of the properties to the north and northeast of the Phase One Property have been redeveloped with what appear to be residential apartments.

2002 Aerial Photograph

The adjacent property to the south of the Phase One Property has been redeveloped with a residential apartment building. No other significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

2011 Aerial Photograph

No significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

2022 Aerial Photograph

Redevelopment is apparent at the former suspected landfill property approximately 270 m east of the Phase One Property. No other significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

Summary

The presence of historical residential buildings present at the Phase One Property was observed from at least 1928 to 1965. Several of these structures were demolished prior to redevelopment of the northwest portion of the Property in the 1960's; historical demolition and backfilling practices have included backfilling foundations and grading with demolition debris and other fill materials of unknown environmental quality. Several of these structures are located outside of the existing building footprints and are suspected to have remnant demolition materials and/or other poor environmental quality fill material within their historical footprints. The fill material represents PCA #1 and is associated with the O.Reg. 153/04 PCA: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

Topography, Hydrology, Geology

The Ontario Ministry of Natural Resources and Forestry's (MNR's) Topographic Map GIS website was used to produce a topographic map showing the location of the Phase One Property, nearby water bodies and the regional topography of the Phase One Study Area. A copy of the Topographic Map is provided in Appendix G. The local topography in the vicinity of the Phase One Study Area generally slopes gently downward to the north. The Phase One Property is generally at grade with the neighbouring properties and Right-of-Ways. There are no water bodies at the Phase One Property or in the Phase One Study Area.

The nearest surface water body identified on the mapping is Lazy Bay, an inlet off the Ottawa River to the north; the southern limits of Lazy Bay are shown approximately 270 m northeast of the Phase One Property. The Ottawa River, flowing towards the east, is located approximately 500 m north of the Phase One Property.

Information on the regional surficial soil was obtained from the Geological Survey of Canada map 1425A titled Surficial Materials and Terrain features Ottawa Hull. Based on a review of the map, the natural soil conditions in the Phase One Study Area consist of "Pre-Champlain Sea Deposits consisting of glacial deposits of till; heterogeneous mixture of material ranging from clay to large boulders, generally sandy, grades downwards into unmodified till; surface is generally modified by wave or river action and the topography is flat to hummocky". Localized overburden thickness was shown to be between 1 and 2 m.

Information on the regional bedrock was obtained from the Ontario Geological Survey Map P2716 titled 'Paleozoic Geology Ottawa Area'. Based on a review of the map, the Phase One Study Area is underlain by the Lindsay Formation, described as "sublithographic to fine crystalline limestone, calcareous Shale and Calcareous".

Well records and borehole logs, obtained from the MECP Water Well Records database, the subcontracted ERIS search and from historical investigations at the Phase One Property were reviewed. Based on these records, the general stratigraphy of the Phase One Property and Phase One Study Area consists of silty sand and gravel type soils underlain by limestone bedrock.

ii. Fill Materials

The presence of historical residential buildings present at the Phase One Property was observed from at least 1912 to 1958. These historical structures were demolished prior to redevelopment of the northeast portion Property in the 1960's and clearing of the southeast portion of Property in the 1980's; historical demolition and backfilling practices have included backfilling foundations and grading with demolition debris and other fill materials of unknown environmental quality. These original structures were located outside of the existing and redeveloped building footprints. The fill material represents PCA #1 and is associated with the

O.Reg. 153/04 PCA: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

The Phase One Property was observed to generally be at grade with the neighbouring properties.

Water Bodies and Areas of Natural Significance & Ground Water Information

There were no water bodies at the Phase One Property or in the Phase One Study Area. The nearest surface water body identified on the mapping is Lazy Bay, an inlet off the Ottawa River to the north; the southern limits of Lazy Bay are shown approximately 270 m northeast of the Phase One Property. The Ottawa River is located approximately 500 m north of the Phase One Property.

The Phase One Property and Study Area are not located in the vicinity of any well-head protection areas identified by the City of Ottawa in its official plan for the protection of ground water. The Phase One Property is located approximately 330 m north of a City of Ottawa designated Environmental Risk Management Area (ERMA), however, this distance is considered significant and the ERMA is not considered a PCA in this study (outside of the Phase One Study Area) or to represent an APEC for the Phase One Property. The Phase One Study Area is serviced by municipally treated drinking water. No private or agricultural water supply wells are located within the Phase One Study Area.

iii. Well Records

Well records and borehole logs, obtained from the MECP Water Well Records database and the subcontracted ERIS search were reviewed. No monitoring wells were registered at the Phase One Property. The stratigraphy was reported to consist of fill, followed by silty sand and gravel over limestone bedrock.

Several monitoring wells were at neighbouring properties in the Phase One Study Area as part of the subcontracted ERIS search. Given that the Phase One Study Area is provided with municipally treated non-potable water as is the Phase One Study Area, it is not suspected that any potable water wells are present in the vicinity of the Property. The groundwater table was reported at approximately 2.8 to 5.9m BGS.

d) Site Operating Records

The Phase One Property is developed for residential use and has been occupied by residential occupants for at least 114 years. As such, it is not expected that any pertinent operating records exist for the Property.

5. Interviews

An interview was completed by telephone on January 29, 2026 with Mr. Jean-Luc Rivard, Vice-President of Land Acquisition & Development for BRIGIL. Mr. Rivard and/or members of BRIGIL have been familiar with the Phase One Property for at least 2 years. Mr. Rivard stated that there are no remaining contacts familiar with the Property since acquisition of the land from various holding companies. Mr. Rivard was not aware of any other historical developed use at the Property prior to the present-day residential use. Mr. Rivard was not aware of any spills or poor environmental management practices associated with the Phase One Property or adjacent lands. Mr. Rivard stated that no fuels or chemicals, other than commercially available domestic cleaning chemicals, are stored at the Property.

Mr. Rivard stated that the heating source for the entirety of the Property is natural gas and/or supplemental electric baseboard heaters. Mr. Rivard was not aware of any existing or historical fuel storage tanks at the Phase One Property, however, he stated that given the era when the current Site buildings were constructed & occupied, that heating oil may have been used at the Site.

6. Site Reconnaissance

a) General Requirements

The Phase One Site Investigation was completed on February 8, 2026 between the hours of 2:30 PM and 4:00 PM. An earlier Site Investigation was completed by Lopers on July 16, 2025 between the hours of 9 AM and 4 PM during completion of a designated substance survey for the 139 Parkdale Avenue (residential dwelling) and 122-124 Forward Avenue (rooming house) buildings. Weather conditions during the February 8, 2026 Site Investigation were sunny with clouds with an ambient air temperature of approximately -18 degrees Celsius. Weather conditions during the July 16, 2025 Site Investigation were sunny with clouds with an ambient air temperature of approximately 33 degrees Celsius.

The Phase One Property was occupied by a residential apartment on the northwest portion of the Property, by a vacant residential dwelling on the southwest portion of the Property, by a vacant rooming house on the northeast portion of the Property and by a parking area on the southeast portion of the Property at the time of the Site Investigation. The Site Investigation was completed by Mr. Luke Lopers, who is a registered Professional Engineer (Environmental) in the province of Ontario and a Qualified Person (QP) for Environmental Site Assessments, and has been conducting Phase I/One Environmental Site Assessments and environmental reconnaissance since 2006. Mr. Lopers was unaccompanied during the Site Inspections.

Photographs were taken of the exterior portions of the Phase One Property, documenting conditions of the Phase One Property and adjacent lands. A copy of the Photographic Log and written descriptions of the photos are provided in Appendix I.

b) Specific Observations at Phase One Property

The Phase One Property was developed with 3 multi-unit residential buildings at the time of the Site Investigation. The 3 building styles observed at the Phase One Property were:

- Six storey apartment building (occupied) – northwest portion of Property;
- Two storey rooming house building (vacant) – northeast portion of Property; and,
- Two storey converted multi-unit residential dwelling (vacant) – southwest portion of Property.

The apartment building is a 6-storey, slab-on-grade building with roof-top penthouse elevator room. Asphalt parking is present to the south and east of the apartment building. The exterior of this building is finished with brick, has a flat roof and steel doors. No residential units in the apartment building were available for inspection.

The rooming house building was a two-storey, stone foundation building with a partial crawl space basement level. The exterior of the rooming house building is finished with brick, has a flat roof and steel doors. Inspections of the individual residential units in the rooming house buildings were completed on July 16, 2025 as part of the designated substance survey; the basement crawlspace was observed to be flooded with standing water and was not accessed.

The residential dwelling is a two-storey building, with a partial basement mechanical room. Inspections of the residential units in the converted multi-unit residential dwelling were completed on July 16, 2025 as part of the designated substance survey; the basement mechanical area had a burst water pipe and was not accessed. The asphalt parking is present to the south of the residential dwelling. The exterior of this building is finished with stucco and vinyl siding, has a sloped asphalt shingle roof and wood doors. No sumps were observed on the interior of the building.

There were no below ground structures present on the Phase One Property at the time of the Site investigation.

No ASTs or visual indications of the presence of USTs, such as vent and fill pipes or access hatches, were observed as part of the Site Investigation.

No potable water wells were observed at the Phase One Property during the Site Investigation. The Phase One Property is provided with potable water by the City of Ottawa through underground service connections from Parkdale Avenue to the west or Forward Avenue to the east of the Property.

Underground utility corridors for sanitary and storm sewers, potable water, private electricity and natural gas lines lead to the residential buildings, generally from Parkdale Avenue to the west, Burnside Drive to the north or Forward Avenue to the east of the Property. Electrical services are supplied to the residential buildings through overhead connections to pole mounted transformers (located on public property).

The residential units throughout the residential dwelling and rooming house buildings were most recently heated with natural gas fired furnaces, present in each of the mechanical rooms and by electric baseboard heaters. The residential units in the apartment style building are heated by central natural gas fired boilers in the ground floor mechanical room. There were no details regarding former heating and cooling systems, including historical fuel sources for buildings at the Phase One Property, however, given the date of development of the Property, it is suspected that the apartment building has always been heated and cooled using natural gas or electricity, while the vacant residential dwelling and rooming house may have used other historical heating sources.

There were no significant cracks or stains on the concrete or finished floors of the residential units in the portions of the buildings that were accessible for inspection.

The building is connected to the City of Ottawa municipal sanitary sewer system. There were no septic tanks or leaching beds observed at the Phase One Property as part of the Site Investigation.

Approximately 40 % of the Phase One Property is developed with the 3 residential buildings, while 5 % of the Property is landscaped and grass/tree covered. There are 3 asphalt surfaced parking areas on the Property and a bisecting laneway, these paved surfaces account for approximately 55 % of the Property.

There were no current or former railway lines, tracks or spurs identified at the Phase One Property or in the Phase One Study Area as part of the Site Investigation.

No surficial staining was observed on the asphalt or landscaped surfaces of the Phase One Property during the July 2025 Site Investigation. No stressed vegetation was observed during the July 2025 Site Investigation.

The presence of fill material was not apparent during the Site Investigation as Property was at grade with the surrounding properties and municipal rights-of-way.

i. Enhanced Investigation Property

The Phase One Property is not currently operating for any industrial use or any of the following commercial uses: as a garage, as a bulk liquid dispensing facility, including a gasoline outlet, or for the operation of dry cleaning equipment. The Phase One Property is hence not an enhanced investigation property.

c) Land Use Observations of the Phase One Study Area

Properties in the Phase One Study Area were reviewed from publicly accessible Rights-of-Way as part of the Site Investigation on February 8, 2026. Uses of these lands were noted and any potential presence of PCAs was also assessed. Neighbouring land uses were recorded as follows:

North: Burnside Drive is present to the north of the Phase One Property. Properties further north of Burnside Drive have been redeveloped with residential apartment buildings.

East: Forward Avenue is present to the east of the Phase One Property. Properties east of Forward Avenue are generally occupied for residential land use. Some limited institutional and commercial uses were also observed further east of the Phase One Property. An automotive repair garage and autobody shop (PCA #17) was observed at 140 Hinchy Avenue, approximately 50 m east of the Property.

South: Properties to the south of the Phase One Property are developed for residential use.

West: Parkdale Avenue is present to the west of the Phase One Property. The property east of Parkdale Avenue is developed with the Tunney's Pasture Government of Canada office and research complex. The closest building is present approximately 60 m west of the Phase One Property.

The presence of an automotive garage identified 50 m east of the Phase One Property was identified as PCA #17 associated with Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems and Commercial Autobody Shops.

Neighbouring land uses are shown on Figure 3: Surrounding Land Use. The aforementioned PCAs at neighbouring properties and their respective operations are located down-gradient and/or at significant distances with respect to the Phase One Property and as such these PCAs are not considered to represent APECs for the Property. Several of the PCAs mentioned previously in this report have been eliminated through redevelopment of their sites and the inherent remediation required to obtain City approvals and permits. Two previously identified PCAs in close proximity to the Phase One Property were reviewed at the time of the Site Investigation. Based on historical research, visual observations during the Site Investigation and waste registration experience, the waste generator listing at 151 is suspected to be associated with clean out of a hydraulic elevator pit or underground parking catch basin, which is not considered to represent an APEC for the Phase One Property. The Tunney's Pasture (120 & 150 Parkdale) property limits are 20 m west of the Phase One Property, however, the operations at the various Government of Canada facilities identified in the Waste Generators summary and UST registry are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property. The current uses of the neighbouring properties are not considered to represent any APECs for the Phase One Property.

7. Review and Evaluation of Information

a) Current and Past Land Use

The current and past land use of the Phase One Property, dating back to the first developed use, is provided in Table 5 below.

Table 5: Current and Past Land Use

Year	Name of Owner	Description of Property Use	Property Use	Other observations from historical sources
1912 - 1961	Individuals	Property occupied by several (5-6) individual residential lots and dwellings.	Residential Use	1912 FIPs and 1928-1958 aerial photographs depict Property developed in individual lots, primarily as single-family dwellings.
1962 – 1980's	Individuals & Corporations	South and east portions of the Property occupied by 3 individual residential lots and dwellings. Northwest portion of the Property redeveloped with apartment building.	Residential Use	Observations from 1965 aerial photograph shows redevelopment of northeast portion of Site with residential apartment.
1990's - 2025	Corporations	Property has residential apartment on northwest, residential dwelling on southwest and residential row house on northeast portions of the Property.		Observations from 1991 aerial photographs show the former residential dwelling on the southeast portion of the Property to be cleared and that area paved for parking. Aerial photos through 2022 confirm this configuration of the Phase One Property.
June 20 2025 - Present	11414801 Canada Inc. (BRIGIL)	Residential apartment on northwest portion of Site is occupied, while residential dwelling on southwest and residential row house on northeast portions of the Property are vacant.	Residential use	Site visits from 2025 and February 2026 confirmed residential occupancy of the apartment building and the other 2 residential buildings are vacant.

b) Potentially Contaminating Activity

Two PCAs were identified at the Phase One Property and are summarized in Table 6 below.

Table 6: Potentially Contaminating Activities at the Phase One Property

PCA Report Reference No.	Potentially Contaminating Activity	Location
1	Fill placement during historical grading activities (O.Reg. 153/04 PCA Item 30: Importation of Fill Material of Unknown Quality)	All portions of the Phase One Property outside of existing building footprints.

Additionally, 20 PCAs were identified at neighbouring properties in the Phase One Study Area and are summarized in Table 7 below.

Table 7: Potentially Contaminating Activities in the Phase One Study Area

PCA Report Reference No.	Potentially Contaminating Activity	Location
2	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	154 Hinchy Avenue – approximately 80 m southeast of the Phase One Property
3	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	58 Carruthers Avenue – approximately 30 m east of the Property
4	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	56 Carruthers Avenue – approximately 130 m east of the Property
5	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	63 Carruthers Avenue – approximately 170 m east of the Property
6	Fuel or Petroleum storage and/or on-Site use (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	151 Parkdale Avenue – adjacent to the south of the Property
7	Fuel Storage Tank(s) & Chemical Storage/Use (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	120 Parkdale Avenue / 150 Tunney's Pasture Driveway – property limits approximately 20 m west of the Property, with nearest operations 60 m west
8	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	80 Carruthers Avenue – approximately 150 m southeast of the Property
9	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	184 Forward Avenue – approximately 170 m south of the Property
10	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	18 Burnside Avenue – approximately 170 m east of the Property

PCA Report Reference No.	Potentially Contaminating Activity	Location
11	Former Garage, Former Retail Fuel Outlet with USTs (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks) (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	55 Carruthers Avenue – approximately 170 m east of the Property
12	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	147 Forward Avenue – approximately 50 m southeast of the Property
13	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	159 Forward Avenue – approximately 60 m southeast of the Property
14	Underground Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	174 Forward Avenue – approximately 160 m south of the Property
15	2 Underground Storage Tanks & Automotive Repairs (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks) (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	187 Forward Avenue – approximately 200 m southeast of the Property
16	3 Underground Storage Tanks (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	196 Forward Avenue – approximately 180 m south of the Property
17	Active Automotive Repairs & Autobody Shop with 3 Underground Storage Tanks (O.Reg. 153/04 PCA Item 10: Commercial Autobody Shops) (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks) (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	140 Hinchy Avenue – approximately 50 m east of the Property
18	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	173 Hinchy Avenue – approximately 180 m southeast of the Property
19	Underground Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	55 Parkdale Avenue – approximately 200 m north of the Property
20	Underground Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	121 Parkdale Avenue – approximately 20 m north of the Property
21	Automotive Repairs & Autobody Shop (O.Reg. 153/04 PCA Item 10: Commercial Autobody Shops) (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	193 Hinchy Avenue – approximately 240 m southeast of the Property

c) Areas of Potential Environmental Concern

The presence of historical residential buildings present at the Phase One Property was observed from at least 1912 to 1958. These historical structures were demolished prior to redevelopment of the northeast portion Property in the 1960's and clearing of the southeast portion of Property in the 1980's; historical demolition and backfilling practices have included backfilling foundations and grading with demolition debris and other fill materials of unknown environmental quality. These original structures were located outside of the existing and redeveloped building footprints. The fill material represents PCA #1 and is associated with the O.Reg. 153/04 PCA: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

Two PCAs were identified in close proximity to the Phase One Property during the historical research and were reviewed at the time of the Site Investigation. Based on historical research, visual observations during the Site Investigation and waste registration experience, the waste generator listing at 151 is suspected to be associated with clean out of a hydraulic elevator pit or underground parking catch basin, which is not considered to represent an APEC for the Phase One Property. The Tunney's Pasture (120 & 150 Parkdale) property limits are 20 m west of the Phase One Property, however, the operations at the various Government of Canada facilities identified in the Waste Generators summary and UST registry are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property. The other PCAs at neighbouring properties in the Phase One Study Area are located significant distances and at down- or cross-gradient orientations with respect to the Phase One Property and are not considered to represent APECs for the Phase One Property.

d) Phase One Conceptual Site Model

Three Figures are provided to visually depict the Conceptual Site Model. Figure 1: Key Plan shows the location of the Phase One Property within the City of Ottawa. Figure 2: Site Plan depicts environmentally significant features at the Phase One Property. Figure 3: Surrounding Land Use shows the current uses of properties in the Phase One Study Area, location of PCAs at the Property and neighbouring lands.

The Phase One Property is located at Civic address Nos. 131 & 139 Parkdale Avenue and 122-124 Forward Avenue, Ottawa, Ontario, commonly referred to as 131 Parkdale and has an approximate area of 3,137 m² (0.31 Hectares).

Based on the information reviewed as part of this Phase One ESA, specifically FIPs and aerial photographs, the Phase One Property has been developed or occupied for residential use since at least 1912 and the northwest portion of the Property redeveloped in 1962 for the present day apartment residential use. Various portions of the Property became vacant in the 1980's and 2020's and have not been developed for any other use. The O.Reg. 153/04 property use classification is considered to be Residential Use.

The Phase One Property has 2 zoning definitions:

- The west portion of the Property is zoned R5B (H37), which signifies Residential zoning with a height restriction of 37 m.
- The east portion of the Property is zoned R5L (H19), which signifies Residential zoning with a height restriction of 19 m.

The Phase One Property is currently owned by 11414801 Canada Inc., a subsidiary company of BRIGIL. It is Lopers' understanding that BRIGIL intends to re-develop the Phase One Property for residential purposes. The Phase One Property is immediately surrounded by a municipal Right-of-Ways and residential buildings to the north and east, by residential buildings to the south and by Parkdale Avenue followed by the Tunney's Pasture Government of Canada office and research complex to the east.

The Phase One Study Area includes the Phase One Property and properties with the boundaries within 250 m of the Phase One Property limits. Based on a review of the Phase One Property and properties in the Phase One Study Area, their associated historical and/or current uses and operations and physical characteristics of the Phase One Study Area, it was determined that an assessment of properties within 250 m of the Phase One property was sufficient to meet the objectives of the scope of this investigation for a Phase One ESA.

There were no water bodies at the Phase One Property or in the Phase One Study Area. The nearest surface water body is Lazy Bay, an inlet off the Ottawa River to the north; the southern limits of Lazy Bay are shown approximately 270 m northeast of the Phase One Property. The Ottawa River, flowing towards the east, is located approximately 500 m north of the Phase One Property.

No drinking water wells are located at the Phase One Property and the Phase One Study Area is serviced by municipally treated non-potable water. The regional topography in the Phase One Study Area slopes downward to the north and northeast, towards the Ottawa River.

Based on the historical research, the general stratigraphy of the Phase One Property and Phase One Study Area consists of silty sand and gravel type soils underlain by limestone bedrock. Overburden soils are expected to be 1 and 2 m thick. The shallow groundwater table is expected at a depth of approximately 3 to 6 m BGS and has regional flow in a predominantly northeast direction with local variations influenced by deep building foundations and buried utilities.

The presence of historical residential buildings at the Phase One Property was observed from at least 1912 to 1958. These historical structures were demolished prior to redevelopment of the northeast portion Property in the 1960's and clearing of the southeast portion of Property in the 1980's; historical demolition and backfilling practices have included backfilling foundations and grading with demolition debris and other fill materials of unknown environmental quality. These original structures were located outside of the existing and redeveloped building footprints. The

fill material represents PCA #1 and is associated with the O.Reg. 153/04 PCA: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

Twenty additional PCAs at neighbouring properties in the Phase One Study Area were identified as part of this Phase One ESA. Neighbouring property PCAs consist of active and historical automotive garages, autobody shops and fuel storage tanks. Two PCAs were identified in close proximity to the Phase One Property during the historical research and were reviewed at the time of the Site Investigation. Based on historical research, visual observations during the Site Investigation and waste registration experience, the waste generator listing at 151 is suspected to be associated with clean out of a hydraulic elevator pit or underground parking catch basin, which is not considered to represent an APEC for the Phase One Property. The Tunney's Pasture (120 & 150 Parkdale) property limits are 20 m west of the Phase One Property, however, the operations at the various Government of Canada facilities identified in the Waste Generators summary and UST registry are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property. The other PCAs at neighbouring properties in the Phase One Study Area are located significant distances and at down- or cross-gradient orientations with respect to the Phase One Property and are not considered to represent APECs for the Phase One Property.

Underground utility corridors for sanitary and storm sewers, potable water, private electricity and natural gas lines lead to the residential buildings, generally from Parkdale Avenue to the west, Burnside Drive to the north or Forward Avenue to the east of the Property. Electrical services are supplied to the residential buildings through overhead connections to pole mounted transformers (located on public property).

Given that an APEC has been identified for the Phase One Property, any uncertainty or absence of information obtained in the components of this Phase One ESA are not expected to affect the validity of the conclusions or conceptual site model.

8. Conclusions

- i. Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

The presence of historical residential buildings present at the Phase One Property was observed from at least 1912 to 1958. These historical structures were demolished prior to redevelopment of the northeast portion Property in the 1960's and clearing of the southeast portion of Property in the 1980's; historical demolition and backfilling practices have included backfilling foundations and grading with demolition debris and other fill materials of unknown environmental quality. These original structures were located outside of the existing and redeveloped building footprints. The fill material represents PCA #1 and is associated with the

O.Reg. 153/04 PCA: Importation of Fill Material of Unknown Quality. This represents APEC #1 for the Phase One Property.

Twenty additional PCAs at neighbouring properties in the Phase One Study Area were identified as part of this Phase One ESA. Neighbouring property PCAs consist of active and historical automotive garages, autobody shops and fuel storage tanks. Two PCAs were identified in close proximity to the Phase One Property during the historical research and were reviewed at the time of the Site Investigation. Based on historical research, visual observations during the Site Investigation and waste registration experience, the waste generator listing at 151 is suspected to be associated with clean out of a hydraulic elevator pit or underground parking catch basin, which is not considered to represent an APEC for the Phase One Property. The Tunney's Pasture (120 & 150 Parkdale) property limits are 20 m west of the Phase One Property, however, the operations at the various Government of Canada facilities identified in the Waste Generators summary and UST registry are located at least 110 m southwest of the Property and are not considered to represent an APEC for the Phase One Property. The other PCAs at neighbouring properties in the Phase One Study Area are located significant distances and at down- or cross-gradient orientations with respect to the Phase One Property and are not considered to represent APECs for the Phase One Property.

Based on the identification of an APEC at the Phase One Property, it is recommended that a Phase Two Environmental Site Assessment be completed to assess the soil and/or groundwater quality in the vicinity of the APEC.

ii. Record of Site Condition Based on Phase One Environmental Site Assessment Alone

Given that there was an APEC identified at the Phase One Property, a Phase Two ESA is required before an RSC may be submitted with respect to all or part of the Phase One Property.

iii. Recommendations

An environmental remediation program, including the bulk removal and off-site disposal of soil (which is in excess of the site condition standards) excavated as part of the proposed redevelopment, is recommended for the Phase One Property.

iv. Signatures

The Qualified Person for this study is Mr. Luke Lopers, P. Eng. Mr. Lopers is a Professional Engineer registered in Ontario since 2012 and has been working on environmental site assessments since 2006. Mr. Lopers has been an author, project manager and/or peer reviewer for hundreds of Phase One ESAs and Phase Two ESAs as well as previously filed RSCs.

The reviewer for this study is Ms. Natasha Corrin, P.Eng. Ms. Corrin is a Professional Engineer registered in Ontario since 2005 and has authored and/or reviewed many of Phase One and Two ESAs in Ontario and the rest of Canada leading to, or incorporated in to Risk Assessments. The qualifications of the assessor/Qualified Person and reviewer are included in Appendix J.

Sincerely,

Luke Lopers, P.Eng.

Natasha Corrin, M.A.Sc., P.Eng.

v. Limitations

The findings and conclusions of this Phase One ESA are based on the information provided and/or reviewed as part of this study.

This Phase One ESA has been completed with the standard of care generally expected in the industry for a study of this nature.

This Phase One ESA has been prepared for the sole use of 11034936 Canada Inc. for the purposes of a due diligence assessment of the potential liabilities which may exist at the Phase One Property. No other party is permitted to rely on the conclusions or findings of this report without the written consent of Lopers & Associates and 11034936 Canada Inc.

There were no portions of the Phase One Property which were inaccessible, or components of this ESA where insufficient information was available to complete the interpretation.

Changes to the physical setting of the Phase One Property, Phase One Study Area and applicable regulations governing Phase One Environmental Site Assessments have the potential to influence the validity of the conclusions and opinions presented in this Phase One ESA.

Dec 23, 2015	\$595,000	Transfer	GOLDEN DRAGON HO 10 INC.;	
Oct 03, 2012	\$555,000	Transfer	FUNG, SAM;	
Sep 16, 1996	\$90,000	Transfer Under Power of Sale (Grant)	1189556 ONTARIO INC.;	

Terms and Conditions

Reports Not the Official Record. Reports, other than the Parcel Register, obtained through Geowarehouse are not the official government record and will not necessarily reflect the current status of interests in land.

Currency of Information. Data contained in the Geowarehouse reports are not maintained real-time. Data contained in reports, other than the Parcel Register, may be out of date ten business days or more from data contained in POLARIS.

Coverage. Data, information and other products and services accessed through the Land Registry Information Services are limited to land registry offices in the areas identified on the coverage map.

Completeness of the Sales History Report. Some Sales History Reports may be incomplete due to the amount of data collected during POLARIS title automation. Subject properties may also show nominal consideration or sales price (e.g. \$2) in cases such as transfers between spouses or in tax exempt transfers.

Demographic Information. Demographic Information is obtained from Environics Analytics. Environics Analytics acquires and distributes Statistics Canada files in accordance with the Government of Canada's Open Data Policy. No information on any individual or household was made available to Environics Analytics by Statistics Canada. PRIZM and selected PRIZMC2 nicknames are registered trademarks of The Nielsen Company (U.S.) and are used with permission.

The Property Information Services, reports and information are provided "as is" and your use is subject to the applicable Legal Terms and Conditions. Some information obtained from the Land Registry Information Services is not the official government record and will not reflect the current status of interests in land. Use of personal information contained herein shall relate directly to the purpose for which the data appears in land registry records and is subject to all applicable privacy legislation in respect of personal information. Such information shall not be used for marketing to a named individual.

Parcel Mapping shown on the site was compiled using plans and documents recorded in the Land Registry System and has been prepared for property indexing purposes only. It is not a Plan of Survey. For actual dimensions of property boundaries, see recorded plans and documents.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNR), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Jul 2025

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Aug 2025

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Aug 31, 2025

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Jul 2025

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Aug 31, 2025

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Aug 31, 2025

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Aug 31, 2025

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Apr 30, 2025

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Offenders Registry:

Federal **EOR**

The Environmental Offenders Registry, enforced by Environment and Climate Change Canada and Parks Canada, tracks corporations convicted under specific federal environmental laws. The registry includes corporate convictions resulting from court proceedings. Court prosecutions are one of several enforcement measures used when violations or potential violations are detected. Other measures like tickets, warning letters, or compliance orders may also be employed to restore compliance. Although not affected by the Environmental Enforcement Act, convictions obtained by Environment and Climate Change Canada under the Species at Risk Act and the Pollution Prevention Provisions of the Fisheries Act are also included.

Government Publication Date: Mar 31, 2025

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2025

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial [FST](#)

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial [FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial [GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Mar 31, 2025

Greenhouse Gas Emissions from Large Facilities:

Federal [GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Feb 2025

TSSA Historic Incidents:

Provincial [HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Historical Business Activity Risk:

Federal [HIST RISK](#)

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this list does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including BC Directories, Hendersons, Mights, Sun Directories, Vernons, and Wrights; spanning roughly 1920s through 1960 depending on information available by city.

This list is currently limited to sites as reported in the following provinces: Alberta, British Columbia, Saskatchewan.

Government Publication Date: 1920s - 1960

Indian & Northern Affairs Fuel Tanks:

Federal [IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial **INC**

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial **MNR**

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES):

Federal **NATE**

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial **NCPL**

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks:

Federal **NDFT**

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal **NDSP**

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jul 31, 2025

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPR2](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2025

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-May 2025

Inventory of PCB Storage Sites:

Provincial [OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial [ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Aug 31, 2025

Canadian Pulp and Paper:

Private [PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal [PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial [PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Aug 31, 2025

Ontario PFAS Spills:

Provincial [PFAS](#)

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances:

Federal [PFCH](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI:

Federal [PFHA](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents:

Provincial [PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR:

Provincial [PPHA](#)

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks:

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Aug 31, 2025

Ontario Regulation 347 Waste Receivers Summary:

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial [RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Aug 2025

Retail Fuel Storage Tanks:

Private [RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directory:

Private [SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial [SPL](#)

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-May 2025

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Aug 31, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

City of Ottawa Historic Land Use Inventory (HLUI)

December 15, 2025

Luke Lopers
Lopers & Associates

Sent via email [Luke@Lopers.ca]

Dear Luke Lopers,

Re: Information Request
131, 139 Parkdale Avenue, **Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City’s Environmental Remediation Unit (ERU) does not have any environmental records for this property.
- **Sewer Use Program:** No information found pertaining to the subject property.
- **Solid Waste Services:** No information found pertaining to the subject property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet (‘HLUI Summary report – 131, 139 Parkdale Avenue.xlsx’), please refer to the [Overview and User Guide.](#)”

Additional information may be obtained by contacting:

Ontario’s Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any

purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Bator Toth

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet (‘ADDRESS – HLUI Summary report.xlsx’), please refer to the [Overview and User Guide.](#)”

Additional information may be obtained by contacting:

Ontario’s Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any

purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Anna Liu

UTM_NAD27_E_NOTE	(as plotted by Gartner Lee, 1980); 442880 (MOE 1991 Waste Disposal Site Inventory)
Unique ID	Bayview DumpUr-05
TOPOGRAPHY	relatively flat
SOIL_COVER	sand and graver fill cover of varying thickness either as the primary surfacing material or as the subbase beneath asphalted areas; thickness ranges from approx. 0.1 m to several metres [AMEC, April 2002]
SIZE_HA	area approx. 7 ha
SITE_STATUS	Confirmed
SITE_NAME	Bayview Dump
SITE_IDENTIFICATION	Ur-05
SITE_COORD	UTM = 443300E, 5028650N (UTM coordinates revised from MOE inventory). Site #X1010 of closed sites in MOE inventory (pg133).
SITE_ALIAS	Bayview & Slidell - Bayview Road Works Yard
SITE_ACCES	site is located on municipal property (presumably with restricted access)
Site ID French	Ur-05
Sie Name French	Dépotoire Bayview
SHAPE.LEN	1186.734471
SHAPE.AREA	57505.53868
SHAPE	Polygon
SERVICE_AREA	presumably City of Ottawa
ROAD_TYPE	<null>
ROAD_NAME	<null>
PHYSICAL	several municipal buildings and Bayview Snow Dump (at former location of maintenance garage) located on site; asphalt and concrete paving cover on most of the site
PARENT_ID	<null>
PARAMETERS	sodium, chloride, ammonia, boron, iron, phosphorous, potassium, sulphate in groundwater; heavy metals (barium, beryllium, cadmium, copper, lead, nickel, molybdenum, zinc) and PAHs (benzo(a)pyrene and dibenzo(a,h)anthracene) in soil and groundwater [AMEC,
OWNERCATEGORY	City
OWNER	City of Ottawa
OVERBURDEN	clayey sand with gravel, possibly a basal till, overlies the bedrock [AMEC, April 2002]
OTHERREF	Gartner Lee, 1980 (Site #5); Gartner Lee, 1982 (Site #5); Intera, 1988 (Lf #5); City of Ottawa Operations Branch, 1980 (Site 5); ADAMAS, 1994; AMEC, Jan. 2002, April 2002 (Parcel C); City of Ottawa Memo #PE-1880-2-3, dated Feb. 3, 1986, from Duncan Burry
OTHER_INFO	Duplicate HLUI Activity ID # 6121 corresponding to this site. - Petroleum hydrocarbon and VOC groundwater plumes originating from source other than old landfill are currently being monitored and mitigated through pump-and-treat systems [AMEC, Jan. & Apr
OPERATOR	City of Ottawa
OPERATIONAL_PERIOD	1933-1946
OBJECTID	65
MOE_ID	x 1010 and x 1020 (the name and date of closure of site in the MOE 1991 Waste Disposal Site Inventory seem to indicate that these two entries correspond to the same site, despite the fact that the UTM co-ordinates [northing] are approx. 400 m apart)
METHANE	35 % v/v gas concentration [GAL, 1980]; up to 75% v/v methane on Dec. 3, 1981 [GLL, 1982]; detailed pumping test undertaken in June 1985 and Jan. 1986 to test feasibility of gas venting system [City of Ottawa memo, June 3, 1986]; up to 53.2 % v/v methan
MAGNITUDE	heavy metal soil contamination found from 0.45 m to 5.91 BGL and impacts include the majority of the fill material which has been placed on site; volume of heavy-metal impacted soil evaluated at 260,000 cubic metres; PAH impacts occur sporadically [AMEC,
LOCTN_REF	<null>
LOCATION	between Bayview Rd., C.P. Railroad, Ottawa River Parkway and a line running approx. through the middle of the Bayview snow dump
LANDFILL_1998_ID	60043S

Qualifications of Assessors

PROFILE

Mr. Lopers is an environmental engineer with over 17 years of experience in environmental consulting, specializing in due diligence investigations. Mr. Lopers has extensive experience in Phase I and II Environmental Site Assessments; environmental remediation direction and supervision; record of site condition submissions; asset inventory; designated substance surveys and abatement projects; environmental expertise on legal issues; and coordination of various monitoring programs (groundwater, surface water, air).

Mr. Lopers has a strong commitment to health and safety, having experience leading a regional health and safety committee as a certified employee representative and Ottawa office safety captain. Mr. Lopers has extensive training including OSHA 40-hour HAZWOPER, ASP Health and Safety on Construction Sites in Quebec, Ontario Working at Heights, Emergency First Aid/CPR and WHMIS.

Principal

LOPERS & ASSOCIATES

EDUCATION

University of Waterloo,
B.A.Sc., Honours Environmental Engineering
Management Science Option Designation - 2002 - 2008

PROFESSIONAL EXPERIENCE

Lopers & Associates, Principal, Project Manager, Senior Environmental Engineer

Ottawa, Ontario - 2020–Present
Responsible for the management, coordination, supervision, completion and delivery of Phase I/1 and II/2 Environmental Site Assessments, Environmental Remediation Programs, Environmental litigation support, Designated Substance Surveys, scope of work development, cost estimates and proposals

GHD Limited, Project Manager, Senior Environmental Engineer

Ottawa, Ontario - 2013–2020
Responsible for the management, senior technical review, coordination, supervision, completion and delivery of Phase I/1 and II/2 Environmental Site Assessments, Environmental Remediation Programs, Environmental litigation support, Designated Substance Surveys, scope of work development, cost estimates and proposals
Office Safety Captain and Joint Health and Safety Committee team leader

Paterson Group Inc., Project Manager, Environmental Engineer

Ottawa, Ontario - 2009–2013
Responsible for supervision, completion and review for Phase I/1 and II/2 Environmental Site Assessments, Environmental Remediation Programs, Designated Substance Surveys

NEXT Environmental Inc., Site Investigation Staff

Burnaby, British Columbia - 2008–2009
Responsible for fieldwork and reporting for Stage/Phase I and II Environmental Site Assessments, Environmental Remediation Programs

PROFESSIONAL DESIGNATIONS

Licensed Professional Engineer (P.Eng.) with Professional Engineers Ontario (PEO) since 2012

Qualified Person (QP), Environmental Site Assessments with Ontario Ministry of the Environment, Conservation and Parks

SELECT LIST OF CLIENTS

Ottawa Community Housing Corporation
Brigil Construction
Willms & Shier Environmental Lawyers LLP

RECENT & RELEVANT PROJECT EXPERIENCE

Phase One Environmental Site Assessments

Project Engineer/ Project Manager & Site Assessor | Various Clients | Ottawa, Ontario | 2020-2024

Mr. Lopers has completed 18 Phase One Environmental Site Assessments since starting Lopers & Associates 2020. Several of these Phase One ESA Sites progressed to subsequent stages of investigation and remediation, which is discussed in further detail in the sections below.

Project Engineer / Manager & Site Assessor | Various Clients | Ottawa & GTA, ON, Vancouver, BC | 2006-2020

Prior to starting Lopers & Associates in 2020, Mr. Lopers completed over 250 Phase One/I Environmental Site Assessments in 3 large urban centers in Canada including Ottawa, Toronto and Vancouver. Mr. Lopers developed Phase One Environmental Site Assessment Report templates for 3 unaffiliated Engineering companies.

Phase Two Environmental Site Assessments

Project Engineer/ Environmental Project Manager & Site Supervisor | Various Clients | Ottawa, Ontario | 2020-2024

Coordination & Field Supervision consisting of meeting with underground service locators, determining investigation locations, supervising and directing drilling subcontractors, logging soil profiles for borehole logs, daily field notes and subcontractor timesheets. Also completed independent field elevation surveys and groundwater sampling in active pedestrian traffic areas.

Project Engineer/Manager for the following Phase Two ESA field investigation and/or environmental delineation and environmental remediation programs and other Site Investigations:

- Former Canex Fuel Outlet and Residential Lands, Former CFB Rockliffe, Ottawa Community Housing Corporation.
- Former Petro Canada Retail Fuel Outlet, Automotive Service Garage and Commercial Lands, Ridgewood Avenue, Brigil Construction.
- Former Urban Waste Disposal Site and Operational Commercial Lands, DuMaurier Avenue, Brigil Construction.
- Residential Properties (regional dNAPL groundwater concerns), Parkdale Avenue, Homestead Developments Corporation.
- Former Private Fuel Outlet and Construction & Equipment Rental Yard and Service Garage, 2940 Baseline Road, Brigil Construction.
- Former historic lumberyard, Central Bus Terminal and Fuel Outlet, 265 Catherine Street, Brigil Construction.
- Residential Property (adjacent up-gradient dry-cleaner APEC), Penfield Avenue, Ottawa Community Housing Corporation.
- Former Private Fuel Outlet and Contractor's Yard, Ogilvie & Cummings Avenue, Lux Place LP.
- Former Residential Developments with historic USTs, poor environmental quality fill materials and/or in vicinity to off-Site VOC groundwater plume, Gladstone Avenue & Rochester Street, Ottawa Community Housing Corporation.

Environmental Remediation Programs (Lopers & Associates)

Project Engineer/ Environmental Project Manager & Site Supervisor / Client/Owner Advisor | Various Clients | Ottawa, Ontario | 2021-2024

Coordination & Field Supervision consisting of supervising and directing excavation/remediation subcontractors, logging trucking information for off-Site disposal, daily field notes and subcontractor invoice review and approval. Independent determination of remediation extents based on field soil and groundwater sampling in active remediation/excavation under timeline constricted conditions. Filing of Record of Site Conditions with Ontario Ministry of Environment, Conservation and Parks.

- Former Private Fuel Outlet and Construction & Equipment Rental Yard and Service Garage, Baseline Road, Brigil Construction.
 - Site Environmental Project Experience dating back to 2009, with 2 unaffiliated property owners and Mr. Lopers practicing Professional Engineering for 3 unaffiliated Engineering companies.
- Former Private Fuel Outlet and Contractor's Yard, Ogilvie & Cummings Avenue, Lux Place LP.
 - Project Experience dating back to 2011, with several changes in ownership structure and with Mr. Lopers practicing Professional Engineering for 3 unaffiliated Engineering companies.
 - Site Remediation Complete, RSC #: B-403-1823439436

- Lopers assisted the Client with regulatory approvals and in obtaining municipal brownfields redevelopment grant funding as part of Site remediation/redevelopment.
- Former lumberyard, Central Bus Terminal and Fuel Outlet, Catherine Street, Brigil Construction.
 - Project Experience dating back to 2010, with 2 unaffiliated property owners and with Mr. Lopers practicing Professional Engineering for 2 unaffiliated Engineering companies.
 - Environmental Remediation Plan prepared by Mr. Lopers Fuel terminal remediation February-April 2024. UST removal, bulk soil excavation, groundwater pump & treat & discharge to municipal storm sewer under SSA. Post-remediation groundwater monitoring in progress to support RSC application (2025)
 - Lopers is also assisting the Client with regulatory approvals and in obtaining municipal brownfields redevelopment grant funding as part of Site remediation/redevelopment.
- Former Retail Fuel Outlet and Automotive Service Garage, Ridgewood, Brigil Construction.
 - Environmental Remediation Plan prepared by Mr. Lopers Fuel remediation June-October 2024. Bulk soil excavation and off-Site disposal. Post-remediation groundwater monitoring in progress to support RSC application (2025)
 - Lopers is also assisting the Client with obtaining municipal brownfields redevelopment grant funding as part of Site remediation/redevelopment.
- Former Residential Developments with historic USTs, poor environmental quality fill materials and/or in vicinity to off-Site VOC groundwater plume, Gladstone Avenue & Rochester Street, Ottawa Community Housing Corporation.
 - Environmental Remediation Plan prepared by Mr. Lopers poor environmental quality fill remediation September-October 2024 (periodically on-going). Bulk soil excavation and off-Site disposal.
 - Lopers is also assisting the Client with verification of contractor quantities and rates for disposal of contaminated soil.

Designated Substance Surveys

Project Manager for portfolio Designated Substance Surveys and Hazardous Building Materials Assessment | Ottawa, Pembroke, Southeastern Ontario | 2010- 2024

- DSSs at various municipal facilities for the City of Pembroke, Pembroke, Ontario. Preparation of Asbestos Management Plan. Supervised 3 staff (remotely from Ottawa) completing DSS on 10 municipal facilities.
- HBMA at various institutional buildings for the Catholic District School Board of Eastern Ontario, Southeastern Ontario. Supervised 2-3 staff (remotely from Ottawa) complete 10-20 DSS on schools and maintenance buildings, generally after hours or on weekends.

Project Manager for asbestos containing material (ACM) surveys, designated substance surveys (DSSs), Hazardous Building Materials Assessments (HBMA) or mould assessments at the following sites:

- DSSs and ACM surveys at various residential, buildings (dwellings and apartment buildings) for private residential clients, Ottawa, Ontario.
- DSS and abatement oversight and contractor approvals during demolition, residential buildings (townhouses) for Ottawa Community Housing Corporation, 818 Gladstone Avenue, Ottawa, Ontario.
 - Completed contractor compliance oversight and daily field inspection reports. Provided additional recommendations when warranted.
- DSS for residential buildings (townhouses) for Ottawa Community Housing Corporation, 66-82 Finch Private, Ottawa, Ontario.
- DSS for residential buildings (adjoining rooming houses) for Ottawa Community Housing Corporation, 214-224 Somerset Street East, Ottawa, Ontario.
- DSS commercial building (Central Bus Terminal) for Brigil Construction, 265 Catherine Street, Ottawa, Ontario.
- DSS commercial buildings (2 Commercial Plaza buildings) for Brigil Construction, 729 Ridgewood Avenue, Ottawa, Ontario.

Environmental Litigation Support

Project Manager, Field Engineer, Expert Witness | Ottawa, Ontario | 2014-2020

Project Manager, Field Engineer and Expert Witness for a fuel spill, remediation program, groundwater monitoring program and litigation review for redevelopment of a residential property adjacent to a central heating plant at an institutional facility.

- Coordination & Field Supervision consisting of meeting with underground service locators, determining investigation locations, supervising and directing drilling and remediation subcontractors, logging soil profiles for borehole logs, daily field notes and subcontractor timesheets. Also completed independent field elevation surveys and groundwater sampling.

Project Manager, Field Engineer, Expert Witness | Gladstone Avenue, Ottawa, Ontario | 2021-2023

Project Manager, Field Engineer and Expert Witness for assessment of damages resulting from temporary expropriation of residential lands for industrial use (Bridge Construction).

- Coordination & Field Supervision consisting of determining investigation locations, supervising and directing drilling subcontractors, logging soil profiles for borehole logs. Also completed independent field elevation surveys and groundwater sampling. Completed environmental investigation, remediation and management cost estimates for different scenarios to determine incremental costs resulting from Site occupancy.

Select Federal and Provincial Experience

- Field Engineer, PWGSC representative for monitoring access road reconstruction, asset inventory, camp drainage assessment, reservoir construction progress monitoring | Outcome Consultants (PWGSC) | Governmental Facilities, Eureka, Nunavut | June 2022
- Environmental Project Manager, Field Assessor for UST removal, DSS, Abatement Review & Compliance Monitoring | BGIS (PWGSC) | CRA Taxation & Data Centre, 875 Heron Road, Ottawa, Ontario | 2017-2019
- Environmental Project Manager, Field Assessor for Project Specific DSSs | BGIS (PWGSC) | 20 to 30 buildings in Ottawa & Gatineau | 2016-2019
- Environmental Project Manager, Field Assessor for Environmental Compliance Audit | BGIS (PWGSC) | Tunney's Pasture (select facilities), Ottawa, Ontario | 2016
- Planning Coop Student for Executive Assistant to Director of Ministry of Transportation | St. Catharines, Ontario | 2003

Natasha Corrin

M.A.Sc., P.ENG., QP_{RA}

SENIOR RISK ASSESSOR

AREAS OF SPECIALTY

Areas of expertise include Human Health Risk Assessment, Ecological Risk Assessment and Risk Management for contaminated sites and environmental impact assessments.

PROFESSIONAL MEMBERSHIPS AND AFFILIATIONS

Professional Engineer #100079432, Professional Engineers Ontario, 2005-present

Qualified Person for Risk Assessment, Ontario, 2011 - present

EDUCATION

M.A.Sc. Chemical Engineering, University of Waterloo, 1999

B.Eng. Chemical Engineering, McGill University, 1997

Graduate Course Engineering Risk Assessment, University of Idaho, 2010

EXPERIENCE

Ms. Corrin is a professional engineer and senior risk assessor with over 20 years of experience in environmental consulting. She reviews and carries out projects related to human health and ecological risk assessment and risk management for contaminated sites. In this role, her responsibilities include planning and designing site specific human health and ecological risk assessments, particularly complex risk assessments that involve consumption of country foods and/or emerging contaminants. She provides senior technical advice and oversight to project teams and acts as the senior technical lead for risk assessment on complex multi-disciplinary projects. She has been responsible for developing standard operating procedures including those for the collection and brewing of Labrador tea according to traditional methods as well as the collection of various types of vegetation for human and animal consumption. Additionally, she has conducted peer reviews on behalf of Public Works and Government Services Canada and the Department of National Defence. Ms. Corrin is designated as a Qualified Person for Risk Assessment (QP_{RA}) in Ontario and has worked on numerous risk assessments under Ontario Regulation 153/04, successfully receiving approval under the regulatory process. Ms. Corrin believes in a holistic approach to managing contaminated sites and collaborates closely with clients and other stakeholders on projects so that objectives are achieved efficiently.

RISK ASSESSMENTS

Soil Vapour and Indoor Air Quality Assessment, Residential Development, Etobicoke Ontario. Senior Risk Assessor, 2022

Corrin Environmental Consulting evaluated sub-slab vapour data and indoor air quality data related to a historical fuel spill below a residential building. Work included providing technical input into the sampling programs, comparing data to Ontario Health Based Indoor Air Criteria and providing recommendations for additional work.

Modified Generic Risk Assessment, Site in Brantford, Ontario. Qualified Person for Risk Assessment, 2021-2022

Completed a Tier 2 Risk Assessment for a client where land use was changing from commercial to residential. Liaised with MECP District Engineer and Standards Development Branch. The main source of contamination was material used to infill the Grand River in the 1880s. MGRA received approval from the MECP and the client was able to obtain their RSC for the site.

Tier 3 Risk Assessment under O.Reg. 153/04, Site in Ottawa, Ontario. Qualified Person for Risk Assessment, 2022

Completed a Pre-Submission Form and Tier 3 Risk Assessment for a client where land use was changing from commercial to residential. Liaised with MECP District Engineer and Standards Development Branch. The main contaminants were chlorinated solvents in groundwater in a complex hydrogeological

Natasha Corrin – Senior Risk Assessor

environment. The contamination was from an upgradient, off-site source, and the site is part of a larger area designated by the City of Ottawa as an Environmental Risk Management Area due to the contaminated groundwater. Groundwater migration is complicated by dewatering associated with the presence of the Light Rail Train adjacent to the site. Non-standard delineation was applied at the site.

Human Health Risk Assessment for the Iqaluit Main Power Plant, Iqaluit, Nunavut. Qulliq Energy Corporation. Senior Risk Assessor, 2022.

Evaluated if human health risks could be present at the site due to historical fuel spills. Quantitatively evaluated risks associated with the inhalation pathway inside the plant and provided recommendations for additional work to reduce uncertainties.

Due Diligence Risk Assessment, Development Site in Ottawa, Ontario. Senior Risk Assessor, 2021

Completed a due diligence risk assessment for a development in Ottawa where a residence was being demolished and the site was being developed into a multi-unit property. Evaluated potential risks at the site and recommended risk management measures. Assessment was used to satisfy lender requirements related to financing the project.

Human Health and Ecological Risk Assessment, Ottawa, Ontario. Senior Risk Assessor, QP_{RA}, 2011-2018

Conducted human health and ecological risk assessment for numerous sites under O.Reg. 153/04. Tasks included preparation and submission of Pre-Submission Form and completion of Risk Assessment including hazard assessment, problem formulation, toxicity assessment and risk characterization. Developed Risk Management Plans. Contaminants of concern at the sites have included VOCs, PAHs, PHCs, metals, and methane. Some of the sites have been considered sensitive due to high or low pH and presence of species at risk.

Various Due Diligence Risk Assessments for Real Estate Clients, Ontario – GWLRA. Risk Assessor, 2011-2015

Ms. Corrin has conducted numerous due diligence risk assessments for real estate clients for the purpose of financing or re-financing their sites as well as for satisfying requirements of the insurers.

Residential Development, Ottawa, Ontario – Claridge. Senior Risk Assessor, 2015

QP_{RA} for a risk assessment at a residential high-rise development in downtown Ottawa. The site had been impacted by upgradient chlorinated solvents. Ms. Corrin is the technical director and reviewer for the risk assessment. Ms. Corrin used a pro-active approach engaging local district engineers resolving issues related to risk management and off-site migration of contaminants early in the RSC process.

National Research Council's National Fire Laboratory (NFL), Mississippi Mills, Ontario. Senior Risk Assessor, 2015-2018

NRC's NFL property is approximately 78 hectares in size and includes one large main structure (Building U-96) located approximately in the centre of the property. The NFL facility has historically been used to conduct a wide range of full-scale scenarios to test fire detection, fire suppression and smoke movement and to test the performance of building materials and systems. Fire testing associated with aqueous film forming foam (AFFF) was conducted at the site, with process waters containing PFAS reportedly discharged to ground surface. Since PFAS was discovered in soil, groundwater, and surface water at the site, work has involved in a multi-disciplinary PFAS investigation program that has included on-site groundwater, soil, surface water, and sediment sampling, off-site residential drinking water sampling, targeted soil removal, ecological assessment programs, and air deposition studies. Ms. Corrin was the Senior Lead for the Human Health Risk Assessment for risks associated with exposure to soil, water, vegetation, big game and small game at the Site.

Tundra Mine Detailed HHERA for INAC, Tundra Mine, NWT. Project Manager and Senior Risk Assessor, 2016-2017

INAC requested that the HHERA be completed to assess residual risks associated with the remediated mine site in order to facilitate project closure. Ms. Corrin was the project manager and senior risk assessor involved in designing and managing a DQRA for the Tundra Mine, 240 km northeast of Yellowknife. For the human health risk assessment, the critical receptor was a First Nation Hunter. Exposure pathways evaluated included direct contact with soil, ingestion of surface water and consumption of: berries, small game, large game, fish and Labrador tea. Terrestrial ecological receptors were evaluated as well as aquatic receptors in lakes downstream of the Tailings Containment Area. Lines of evidence used to assess risks to

Natasha Corrin – Senior Risk Assessor

aquatic receptors included: surface water and sediment chemistry, benthic community survey, *Hyalella* critical body residue analysis, fish internal and external health examinations and biological habitat assessment. A comprehensive sampling program was planned and executed and included collection of soil, surface water, fish tissue, benthic invertebrates, *Hyalella*, berries and Labrador tea from both impacted and reference areas. A risk management plan was developed. Ms. Corrin managed a multi-disciplinary team, worked with multiple stakeholders including INAC, Expert Support, and First Nations Communities. As the senior risk assessor, Ms. Corrin planned the technical direction of the risk assessment, developed the risk management plan and reviewed all deliverables.

PEER REVIEW PROJECTS

Peer Reviews of Numerous Small Craft Harbour Waterlot Assessments, Maritime and Gulf Region – PSPC/DFO. Senior Risk Assessor 2021, 2022

Responsible for the review and provision of construction comments related to the review of reports for 8 sites in the 2021/22 Fiscal Year and 6 sites in the 2022/23 Fiscal Year. Work conducted included sediment sampling, benthic community assessment and tissue analysis. Reports included descriptions of field work, dive work, historical reviews and human health and ecological risk assessments.

Vendor of Record (VOR) Risk Assessment Peer Reviews on behalf of the Ontario Ministry of Environment, Conservation and Parks. Senior Reviewer, 2014 – 2018

Natasha has been part of MECP teams that were Vendors of Record (VORs) reviewing risk assessments conducted under Ontario Regulation 153/04 on behalf of the Ministry. As part of the VOR team, Natasha has an in depth understanding of the regulation and the required steps to get a risk assessment through the review and approvals process.

3rd Party Peer Review, Risk Assessment Camp Ipperwash, Lambton Shores, Ontario – DND. Project Manager/Senior Risk Assessor, 2016

A 3rd party peer review was performed for an aquatic site assessment and risk assessment conducted in surface water bodies at the Former Camp Ipperwash in Lambton Shores, Ontario. The Site was appropriated from the Stony Point Indian Reserve in 1942 and used for infantry training. The site assessment work investigated impacts associated with sediment and surface water including metals, polycyclic aromatic hydrocarbons (PAHs) and DDT. The risk assessment considered potential risks to aquatic life including benthic invertebrates, fish and turtles, particularly associated with biomagnifying contaminants. Risks to human health were also considered associated with the consumption of fish.

AQUATIC TOXICOLOGY / DEVELOPMENT OF DISCHARGE CRITERIA

Development of Discharge Limits for the Abercrombie Ash Management Site - Nova Scotia Power Incorporated. Senior Risk Assessor, 2019-2020

Natasha worked on a multi-disciplinary team to develop effluent discharge criteria for aluminum, chromium (VI) and molybdenum at the site. The work involved process engineers, biologists, site assessors and risk assessors. The process engineers worked on reducing concentrations of chromium (VI) and molybdenum in the discharge by evaluating numerous treatment options. The preferred option was piloted and implemented and included the use of a combined granular activated carbon and resin recirculation system. Acute discharge criteria were developed based on multiple lines of evidence including a literature review of available information combined with surface water and sediment chemistry as well as an aquatic habitat assessment and benthic community analysis. The numeric limits were selected based on the 5th percentile of the species sensitivity distributions of acute effects data.

CLIMATE CHANGE

Climate Change Impacts and Indices for the National Capital Region - NCC and City of Ottawa. Facilitator, Senior Reviewer, 2019

Conducted stakeholder engagement sessions and facilitated workshops to get feedback from multiple stakeholder groups from the NCC and City of Ottawa regarding how climate change impacts their sector (e.g., contaminated sites, recreation, transportation, public health, water/wastewater) and what climate change parameters and indices would be most valuable to them for future vulnerability assessments and resilience planning. Natasha provided senior technical advice, reviewed deliverables and was a facilitator at the workshop and stakeholder engagement sessions.

Natasha Corrin – Senior Risk Assessor

STAKEHOLDER ENGAGEMENT

Completion of Two Stakeholder Engagement Sessions to support the Clyde River Small Craft Harbour Development, Nunavut - PSPC/DFO. Senior Risk Assessor and Assistant Project Manager, July 2020 – March 2021

Planned and led biological studies and stakeholder engagement sessions to support the design of the Clyde River Small Craft Harbour. Coordinated meetings with the Hamlet Council and the Hunters and Trappers Organization. Held IQ sessions with elders and used participatory maps to gather insights into historical and current use of the area. Also engaged with ECCC, DFO, NIRB, NPC, Arctic Fisheries Alliance, sealift operators, CIRNAC, GN Petroleum Products Division and fuel provider.

SOIL REUSE

Screening Level Risk Assessments for Soil Reuse at City of Ottawa Infrastructure Projects – Various locations, City of Ottawa, Ontario. Senior Risk Assessor, 2022 -2023.

Evaluated available data including soil, groundwater and leachate data (if available) to determine if there were potential risks to human and ecological receptors associated with reusing material at integrated roadway and sewer projects in consideration of O.Reg. 406/19 and O.Reg. 153/04. Made recommendations for soil reuse on and off-site.

Soil Reuse Program at a Development Site in Hawkesbury, Ontario - United Counties of Prescott-Russell. Project Manager/Senior Risk Assessor, 2020 and 2022 for Project Close-out.

Selenium exceedances in soil were identified at a redevelopment site in Hawkesbury, Ontario. Completed a risk assessment that identified that the exceedances would not pose a risk to human health or the environment if the soil were to be reused at the site and avoided costly site assessment and soil removal fees. Provided advice in the context of Ontario Regulation 406/19 (the excess soil management regulation), provided specification for a tender document related to excess soil management, advice for excess soil management and cost saving strategies, tender support and construction support. Provided follow-up work post-construction to close out the project. Hired MP as a subconsultant for both phases of the project to collaborate on creative solutions for soil management and money-saving options for the client.

Soil Reuse Program at the Cliff Central Heating and Cooling Plant, Ottawa, Ontario - PCL Constructors Canada Inc. Senior Environmental Engineer, November 2020

Reviewed historical reports and evaluated options for soil reuse at the site in consideration of potential risks to human health, the environment and planned risk management measures. Determined that soil could be reused at the site, saving disposal fees for contaminated soil.

COURSES AND PRESENTATIONS GIVEN

- Science, Approaches and Challenges in Human Health Risk Assessment When Considering PFAS. RPIC Federal Contaminated Sites Regional Workshop. Halifax, NS. June 2019.
- Lessons learned in the FCSAP Program: Custodian and ESD Perspective. Natasha Corrin. Oral Presentation. RPIC, 2018.
- Understanding the Impacts of Confounding Uncertainties with PFAS – from Assessment to Communication with Stakeholders. Half-Day Professional Development Session. Natasha Corrin – presented HHRA and ERA. RPIC, 2018.
- FCSAP Project Managers Toolkit. Half-Day Professional Development Session. Natasha Corrin – presented Site Closure Tool and TRAV. RPIC, 2016.
- Site Closure Tool/Tool for Risk Assessment Validation. Half-Day Professional Development Session. Natasha Corrin, Golder; Andrew Henderson, Franz. RPIC, 2014.
