EXECUTIVE SUMMARY

Assessment

Paterson Group was commissioned by Concorde Properties to carry out a Phase I – Environmental Site Assessment (Phase I ESA) for the property addressed 114 Richmond Road in the City of Ottawa, Ontario. The objective of this Phase I ESA was to research the past and current use of the site (Phase I Property) and a 250m radius (Phase I Study Area) to identify any environmental concerns with the potential to have impacted the subject property.

According to the historical research, the Phase I Property was first developed with the existing convent building prior to 1928 and was used as such until approximately 2008. No PCAs were identified with respect to the historical use of the Phase I Property.

Historically, properties in the Phase I Study Area were used for agricultural purposes or consisted of vacant land, prior to commercial and residential development. Some historical off-site PCAs were identified on properties situated within the Phase I Study Area, particularly along Richmond Road to the north, however, due to their separation distances and/or their inferred down-gradient or cross-gradient orientation with respect to the Phase I Property, none of these off-site PCAs are considered to represent APECs on the Phase I Property.

Following the historical research, a site visit was conducted. The Phase I ESA Property is still occupied by the aforementioned three (3) storey convent building on the northwest portion of the property. The building was unoccupied at the time of the site visit. No potential environmental concerns were identified with respect to the current use of the Phase I Property.

Neighbouring land use in the Phase I Study Area consists primarily of residential properties, with a commercial strip further to the north, and a high school to the west. Some existing off-site PCAs were identified on properties situated within the Phase I Study Area, particularly along Richmond Road to the north, however, due to their separation distances and/or their inferred down-gradient or cross-gradient orientation with respect to the Phase I Property, none of these off-site PCAs are considered to represent APECs on the Phase I Property.

Based on the findings of our assessment, it is our opinion that a **Phase II – Environmental Site Assessment will not be required for the Phase I Property.**

Recommendations

Potentially Hazardous Building Materials

Potential asbestos containing materials (ACMs) observed at the time of the site visit include linoleum flooring, pipe insulation, fireproof cement board, and stucco. A Designated Substance Survey (DSS) of the building must be conducted in accordance with Ontario Regulation 278/05, under the Occupational Health and Safety Act prior to any renovation or demolition work.

Lead-based paint may be present on any remaining original surfaces within the building. It is recommended that paint be tested for lead content prior to its disturbance. Major work involving lead-based paint or other lead containing products must be done in accordance with Ontario Regulation 843, under the Occupation Health and Safety Act.

1.0 INTRODUCTION

At the request of Concorde Properties, Paterson Group (Paterson) carried out a Phase I-Environmental Site Assessment (Phase I-ESA) for 114 Richmond Road, in the City of Ottawa, Ontario, herein referred to as the Phase I Property. The purpose of this Phase I-ESA was to research the past and current use of the Phase I ESA Property and properties within the Phase I Study Area to identify any potentially contaminating activities (PCAs) that would result in areas of potential environmental concern (APECs) on the Phase I Property.

Paterson was engaged to conduct this Phase I-ESA by Mr. Jordan Tannis of Concorde Properties. Mr. Tannis can be reached via his mailing address at 408 Tweedsmuir Avenue, Ottawa, ON, K1Z 5N5.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared under the supervision of a Qualified Person, in general accordance with Ontario Regulation (O.Reg.) 153/04, as amended under the Environmental Protection Act, and CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical, and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

2.0 PHASE I PROPERTY INFORMATION

Address:	114 Richmond Road, Ottawa, Ontario
Legal Description:	Plan 152, Part of Block C, in the City of Ottawa, Ontario.
Location:	The Phase I Property is located approximately 45 m south of Richmond Road between Hilson Avenue and Leighton Terrace, in the City of Ottawa, Ontario. Refer to Figure 1 - Key Plan in the Figures section following the text.
Latitude and Longitude:	45° 23' 52" N, 75° 44' 35" W

Site Description:

Configuration:	Irregular
Area:	1.72 ha (approximately)
Zoning:	TM – Traditional Mainstreet Zone in the northern portion R5 – Residential 5th Density Zone in the southern portion O1 – Parks and Open Space Zone along the eastern property boundary
Current Use:	The Phase I ESA Property is currently occupied by a three (3) storey convent building with a basement level on the north side of the property. The convent building was vacant at the time of the site visit. Remaining areas of the site are surfaced with asphaltic concrete or are landscaped.
Services:	The Phase I Property is situated in a municipally serviced area.

3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I Environmental Site Assessment (ESA) is described as follows:

- ☐ Determine the historical activities occurring on the Phase I Property and in the Phase I Study Area by conducting a review of readily available records, reports, photographs, plans, mapping information, databases, and regulatory agencies;
- ☐ Investigate the existing conditions present on the Phase I Property and in the Phase I Study Area by conducting site reconnaissance;
- ☐ Conduct interviews with persons knowledgeable of current and historic operations on the Phase I Property and, if warranted, the neighbouring properties;
- ☐ Present the results of our findings in a report in general accordance with the requirements O. Reg. 153/04, as amended under the Environmental Protection Act, and CSA Z768-01 (reaffirmed 2022);
- ☐ Provide a preliminary environmental site evaluation based on our findings;
- ☐ Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

4.0 RECORDS REVIEW

4.1 General

Phase I-ESA Study Area Determination

A radius of approximately 250m was deemed appropriate for defining the study area for this assignment, herein referred to as the Phase I Study Area. Properties located outside of the Phase I Study Area are not considered to have had the potential to impact the Phase I Property, based on their significant separation distances.

First Developed Use Determination

Based on a review of available historical information, the Phase I Property was first developed with the existing convent building prior to 1928.

Fire Insurance Plans

Fire Insurance Plans (FIPs) from 1925 (revised 1948) and 1956 were reviewed for the area of the Phase I Property. These plans contain detailed mapping information regarding the property uses within the general area of the subject property.

At the time of the 1925 (revised 1948) FIPs, the subject property was occupied by the existing convent. Surrounding properties in the Phase I Area were comprised mostly of residential dwellings with some commercial and institutional properties. A high school (addressed as 401 Hilson Avenue) was present immediately west of the Phase I Property. The Ottawa Electric Railway Right of Way was present immediately south of the Phase I Property. The Canadian Bank Note Co. Ltd (addressed as 145 Richmond Road) was present further northwest of the Phase I Property. A paper sales warehouse (addressed as 90 Richmond Road) was present northeast of the Phase I Property. An auto garage/gas station with two underground storage tanks (addressed as 107 Richmond Road) was present north of the Phase I Property. Several gasoline service stations with underground storage tanks (addressed as 40 Richmond Road, 51 Richmond Road, 64 Richmond Road, and 75 Richmond Road) were present further northeast of the Phase I Property.

The 1956 FIPs depict the Phase I Property in the same configuration as the 1925 (revised 1948) FIPs. Surrounding lands remained largely unchanged from the 1925 (revised 1948) FIPs with a few exceptions discussed below. The auto garage/gas station, previously addressed as 107 Richmond Road in the 1925

(revised 1948) FIPs is now addressed as 105 Richmond Road. Two residential dwellings northeast of the subject property have been replaced with a Canadian Tire store addressed as 119 Richmond Road. An additional gasoline service station with two underground storage tanks (addressed 24 Richmond Road) was present further northeast of the Phase I Property.

Based on a review of the FIPs, the following activities are considered to represent off-site Potentially Contaminating Activities (PCAs): the Canadian Bank Note Company (145 Richmond Road), the Ottawa Electric Railway Right of Way, the auto garage/gas station (105-107 Richmond Road), and five gasoline service stations (24 Richmond Road, 40 Richmond Road / 369 Island Park Drive, 51 Richmond Road, 64 Richmond Road, and 75 Richmond Road).

Based on the physical separation distance between the Phase I Property, their downgradient location, and their redevelopment, these off-site PCAs are not considered to represent APECs on the Phase I Property. It should be noted that many of these properties have since been redeveloped and have Records of Site Condition (RSCs) filed, as discussed further in the MECP Brownfields Environmental Site Registry (ESR) section of the report.

City of Ottawa Street Directories

City Directories for the area of the Phase I Property were reviewed in approximate 10-year intervals from 1940 to 2000. The Phase I Property was developed with the convent building prior to the 1940s. No PCAs were identified on the Phase I Property. Properties in the Phase I Study Area were listed as commercial, residential, or institutional use.

Neighbouring properties to the east have always been occupied by single family dwellings. Part of the neighbouring property to the south was used as a municipal tram line prior to its conversion to a park. The neighbouring property to the west was occupied by single family dwellings and Hilson Avenue school. Properties to the north (across Richmond Road) were originally developed with single family dwellings, which were later redeveloped for various commercial purposes.

The following are considered to be potentially contaminating activities (PCAs) on properties in the Phase I Area based on the city directories:

☐ Historic retail fuel outlets and auto garages:

72 Richmond Road, 20m northeast of the Phase I Property, was listed as an auto garage (multiple names) in the 1960s-2010s. 70 Richmond Road (previously 64

Richmond Road), 50m northeast of the Phase I Property, was listed as a gas station in the 1950s-1960s and as an auto garage in the 1970s-2010s. 93 Richmond Road, 60m north of the Phase I Property, was listed as an auto garage in the 1970s-2000s. 119 Richmond Road, 65m northwest of the Phase I Property, was listed as an auto garage (Canadian Tire) in the 1960s-2000s. 109 Richmond Road, 65m north of the Phase I Property, was listed as an auto garage in the 1950s and as a gas station in the 1970s-1990s.

77 Richmond Road, 70m northeast of the Phase I Property, was listed as a gas station (Island Park Texaco) in the 1970s-1980s and as an auto garage/dealer in the 1990s-2010s. 369 Island Park Drive (previously 40 Richmond Road), 120m northeast of the Phase I Property, was listed as a gas station (Imperial Oil) in the 1960s-2010s. 51 Richmond Road, 140m northeast of the Phase I Property, was listed as a gas station (Farmer Fred, Parkway Garage) in the 1950s-1960s and an auto garage (Joe's Car Audio) in the 1970s-2000s. 24 Richmond Road, 200m northeast of the Phase I Property, was listed as a gas station (Gus + John's) in the 1960s-1970s. 33 Richmond Road, 215m northeast of the Phase I Property, was listed as an auto garage (Don Miles) in the 1960s.

☐ Historic cleaners:

96 Richmond Road, northeast of the Phase I Property, was listed as a cleaner (Associated Cleaners) in the 1940s.

☐ Historic printers:

145 Richmond Road, 85m northwest of the Phase I Property, was listed as a printer (Canada Bank Note Company) in the 1950s-2010s. 190 Richmond Road, 230m west of the Phase I Property, was listed as a printer (R. L. Crain Printer) in the 1950s.

☐ Other:

90 Richmond Road, northeast of the Phase I Property was listed as an auto garage in 1960, a cleaner from 1969-1971, and an Canadian Tire warehouse from 1972-1990s. Given the short period of time that the cleaner was listed on the site (3 years), it is not suspected that dry cleaning operations took place in this building.

175 Richmond Road, 240m northwest of the Phase I Property, was listed as an electrical manufacturing company (Canadian General Electric Co.) in the 1970s.

Due to their separation distances and/or their inferred down-gradient or cross-gradient orientation with respect to the Phase I Property, and/or our involvement in their redevelopment, none of the off-site PCAs identified above are considered to represent APECs on the Phase I Property.

Chain of Title

Based on historical records and previous reporting, the subject property was first developed with the existing convent building prior to 1928 and was used as such until approximately 2008. Since approximately 2008, the property has not been occupied. A chain of title was not requested for the Phase I Property as part of this assessment, since it is our opinion that no new information would be ascertained.

4.2 Environmental Source Information

National Pollutant Release Inventory (NPRI)

A search of the National Pollutant Release Inventory (NPRI) database was conducted as part of this assessment. This federally managed database provides various reports and tracking information relating to the release of solid, liquid, or gaseous pollutants from industrial facilities into the natural environment.

A search of this database did not identify any pollutant release records listed for the Phase I Property. Two records were identified for the property addressed as 145 Richmond Road currently operating as the Canadian Bank Note Company, located approximately 85m northwest of the Phase I Property. The records pertain to air releases resulting from printing and related support activities and are not considered to represent an environmental concern for the Phase I Property.

Ministry of the Environment, Conservation and Parks (MECP) Submissions

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to reports related to environmental conditions for the Phase I Property. A response from the MECP was received on February 20, 2026, which is incorporated into the respective sections below and provided in Appendix 2.

MECP Instruments

A request was submitted to the MECP FOI office for information with respect to certificates of approval, permits to take water, certificates of property use, or any other similar MECP issued instruments for the Phase I Property.

The response from the MECP received on February 20, 2026, contained some applications for approval of municipal and private sewage works along Richmond Road. Some records were also identified for 114 Richmond Road, Thunder Bay which do not pertain to the Phase I Property. These records are not considered to pose a potential environmental concern to the Phase I Property.

The response from the MECP is provided in Appendix 2.

MECP Waste Management Records

A request was submitted to the MECP FOI office for information with respect to waste management records for the Phase I Property.

The response from the MECP received on February 20, 2026, contained one hazardous waste information record. This record was associated with the subject building's former use as Sœurs De La Visitation D'Ottawa. The waste class listed was light fuels. Based on previous reporting, the building was historically heated with fuel oil stored in a former exterior underground fuel storage tank (UST) removed in 2009. Based on the previous work completed on site, as discussed further in the Previous Engineering Reports section of this report, this record is not considered to represent a PCA for the Phase I Property.

The response from the MECP is provided in Appendix 2.

MECP Incident Reports

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, or inspections maintained by the MECP for the Phase I Property or any of the neighbouring properties.

The response from the MECP received on February 20, 2026, contained one incident report. The incident report was created in 2013 pertaining to an expired waste generator record on the Hazardous Waste Information Network (HWIN) was associated with the subject building's former use as Sœurs De La Visitation D'Ottawa. No further action was deemed necessary and the file was closed. This record is not considered to represent a PCA for the Phase I Property.

The response from the MECP is provided in Appendix 2.

MECP Brownfields Environmental Site Registry (ESR)

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment. This database contains publicly available information on Records of Site Condition (RSCs) filed in the Province of Ontario since 2004.

No RSCs were filed for the Phase I Property. A review of the registry identified multiple RSCs filed for properties within the Phase I Study Area:

- ❑ **RSC#B-403-7370678106** – 376 Island Park Drive and 70 Richmond Road (approximately 45m to the northeast); According to the RSC filed on November 12, 2025, by Paterson Group Inc., all impacted soil was removed from the property as part of the remediation. Additionally, concentrations of VOCs, BTEX and PHCs in the groundwater from each post-remediation groundwater sampling event were in compliance with the MECP Table 3 RPI Standards. As a result, this property is not considered to represent an environmental concern to the Phase I Property.
- ❑ **RSC#3125** – 93 Richmond Road (approximately 60m to the northeast); According to the RSC filed on May 15, 2006, by Trow Associates Inc., all the soil and groundwater met the applicable site condition standards at the time. As a result, no remedial work was required for this property. This property is not considered to represent an environmental concern to the Phase I Property.
- ❑ **RSC#58713** – 101 Richmond Road (approximately 65m to the north); According to the RSC filed on September 3, 2010, by Paterson Group Inc., a total of 2,300 m³ of soil and a total of 13,500 litres of impacted groundwater were removed from the property and disposed of as part of the remediation. No monitoring or maintenance works after the certification date were required. As a result, this property is not considered to represent an environmental concern to the Phase I Property.
- ❑ **RSC#113164** – 111 Richmond Road (approximately 65m to the northwest); According to the RSC filed on June 23, 2011, by Paterson Group Inc., a total of 750 m³ of soil and a total of 216,000 litres of impacted groundwater were removed from the property and disposed of as part of the remediation. No monitoring or maintenance works after the certification date were required. As a result, this property is not considered to represent an environmental concern to the Phase I Property.

- ❑ RSC#230407 – 1451 and 1445 Wellington Street West (approximately 140m to the northeast); According to the RSC filed on June 23, 2011, by Paterson Group Inc., a total of 4,482 m³ of soil was removed from the property and disposed of as part of the remediation and the groundwater complied with the applicable standards. No monitoring or maintenance works after the certification date were required. As a result, this property is not considered to represent an environmental concern to the Phase I Property.
- ❑ RSC#96918 – 1433 Richmond Road (approximately 215m to the northeast); According to the RSC filed on March 10, 2011, by Exp Services Inc., a total of 4,000 m³ of soil was removed from the property and disposed of as part of the remediation. No monitoring or maintenance works after the certification date were required. As a result, this property is not considered to represent an environmental concern to the Phase I Property.
- ❑ RSC#224523 – 190 Richmond Road (approximately 230m to the west); According to the RSC filed on May 7, 2018, by Toronto Inspection Ltd., all the soil and groundwater met the applicable site condition standards at the time. As a result, no remedial work was required for this property. This property is not considered to represent an environmental concern to the Phase I Property.

No potential environmental concerns to the Phase I Property were identified in a review of the Brownfields Environmental Site Registry.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of this assessment. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario.

A review of this document did not identify any such sites situated on the Phase I Property or within the Phase I Study Area.

MECP Coal Gasification Plant Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed as part of this assessment. This document provides a reference to the locations of former plants with respect to the Phase I Property.

A review of this document did not identify any former coal gasification plants located on the Phase I Property or within the Phase I Study Area.

OMNRF Areas of Natural and Scientific Interest (ANSI)

A search for Areas of Natural and Scientific Interest (ANSI) sites situated within the Phase I Study Area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website as part of this assessment.

A review of the available mapping information did not identify any ANSI sites situated on the Phase I Property or within the Phase I Study Area.

Ontario PCB Waste Storage Site Inventory

The Ontario Ministry of Environment, Conservation and Parks document entitled, "Ontario Inventory of PCB Storage Sites, April 1995" was reviewed as part of this assessment. This document identifies all recorded closed PCB waste storage sites situated in the Province of Ontario.

A review of this document did not identify any such sites situated on the Phase I Property or within the Phase I Study Area.

Technical Standards and Safety Authority (TSSA)

The TSSA Fuels Safety Branch in Toronto was contacted electronically on January 20, 2026, as part of this assessment, to inquire about current and former fuel storage tanks, spills, and historical incidents for the Phase I Property as well as the neighbouring properties within the Phase I Study Area.

The response from the TSSA indicated that no records were identified associated with the Phase I Property. One fuel record was found for 145 Richmond Road, the Canadian Bank Note Company located 85m northwest of the Phase I Property. However, based on a review of the TSSA provided information, this record was not considered to pose a potential environmental concern to the subject.

A copy of the TSSA correspondence is included in Appendix 2.

Ontario Landfill Sites Map

A search of the Ontario Landfill Sites Mapping Website was conducted as part of this assessment. This mapping tool provides the name and location of all active landfill sites in the Province of Ontario.

A review this map on January 22, 2026, did not identify any active landfill sites situated on the Phase I Property or within the Phase I Study Area.

City of Ottawa Old Landfill Sites

The City of Ottawa's Former Landfills online map was reviewed as part of this assessment. This map identifies 123 former landfills through the City of Ottawa's Old Landfill Management Strategy (OLMS 2004) and includes location, ownership, periods of operation and waste type for 82 sites identified as previously owned/operated either fully or in part by former municipalities and townships within the boundaries of the City of Ottawa and is updated periodically.

A review of this map on January 22, 2026, did not identify any landfill sites situated on the Phase I Property or within 250 m of the Phase I Property.

City of Ottawa Historical Land Use Inventory (HLUI)

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City's Historical Land Use Inventory (HLUI) database for any environmental records pertaining to the Phase I Property as well as any properties situated within the Phase I Study Area. A response from the City of Ottawa was received on February 26, 2026. Pertinent records identified are discussed below.

❑ On-Site Records:

The HLUI search identified a historic 2009 Phase I ESA & Tank Removal report for the Phase I Property discussed further in the Previous Engineering Reports section of this report. The HLUI search did not identify any other records for the Phase I Property.

❑ Off-Site Records:

The HLUI search returned a total of 158 records pertaining to properties within the Phase I Study Area. A summary of the relevant results is presented below.

Several historic gas stations with historic UST records were identified in the Phase I Study Area which were previously discussed in other sections of the report. The historic gas stations identified include: 1422 Wellington Street West (formerly 24 Richmond Road), 1451 Wellington Street West (formerly 51 Richmond Road), 64/70 Richmond Road, 75/77 Richmond Road, and 101 Richmond Road (formerly 109 Richmond Road). A current gas station with UST records was identified at 369 Island Park Drive (formerly 40 Richmond Road).

Several historic auto garages were identified in the Phase I Study Area which were previously discussed in other sections of the report. The historic auto garages identified include: 24 Richmond Road, 70 Richmond Road, 72 Richmond Road, 77 Richmond Road, 90 Richmond Road, 93 Richmond Road, 105 Richmond Road, and 1445/1451 Wellington Street West (formerly 51 Richmond Road). Historic UST records were identified for the historic garage at 101 Richmond Road (formerly 105/107/109 Richmond Road).

As previously discussed, based on the physical separation distance between the Phase I Property, their downgradient location, and their redevelopment, these off-site historic gas stations and garages are not considered to represent APECs on the Phase I Property. It should be noted that many of these properties have since been redeveloped and have Records of Site Condition (RSCs) filed, as discussed further in the MECP Brownfields Environmental Site Registry (ESR) section of the report.

One (1) historic garage was identified at 164 Richmond Road in the 1930s-1950s. Based on the separation distance from the Phase I Property, this off-site PCA is not considered to represent an APEC on the Phase I Property.

The HLUI search returned UST records for 407 Hilson Avenue (Hilson Avenue School), immediately west of the Phase I Property. Based on the separation distance between the building and the subject property, this off-site PCA is not considered to represent an APEC on the Phase I Property.

Two (2) printers were identified in the Phase I Study Area which were previously discussed in other sections of the report. The printers include: 190 Richmond Road (historic) and 145 Richmond Road (historic and current). UST records were identified for both sites. Based on the separation distance from the Phase I Property, these off-site PCAs are not considered to represent APECs on the Phase I Property.

Several records were identified for 175 Richmond Road, 240m northwest of the Phase I Property. The records include two historic electrical equipment suppliers (Guillevin International and R J S Electrical & Mechanical Sales Ltd) and an electrical manufacturing company (Canadian General Electric Co.) with UST records. Based on the separation distance from the Phase I Property, these off-site PCAs are not considered to represent APECs on the Phase I Property.

Two (2) historic laundry and cleaners were identified within the Phase I Study Area at 96 Richmond Road in the 1940s-1950s and 90 Richmond Road in the 1970s.

As previously discussed, the historic cleaner at 96 Richmond Road is considered a PCA which does not result in an APEC on the Phase I Property. As previously discussed in the City Directories section of the report, given the short period of time that the cleaner was listed on the site (3 years), it is not suspected that dry cleaning operations took place at 90 Richmond Road. Additionally, based on the downgradient orientation with respect to the Phase I Property, and the redevelopment of this property, these historic cleaners are not considered to result in APECs on the Phase I Property.

One (1) historic railway (Ottawa Electric Railway) was identified south of the Phase I Property in the 1920s-1950s. As previously discussed, this former railway is considered a PCA that does not result in an APEC on the Phase I Property.

The remaining records identified in the HLUI report are not considered to pose an environmental concern to the Phase I Property due to the nature of the activity, separation distance, and/or their down- or cross-gradient orientation with respect to the Phase I Property.

A copy of the HLUI request has been included in Appendix 2.

Environmental Risk Information Services (ERIS) Report

A database report, prepared by ERIS (Environmental Risk Information Services Ltd.), dated January 21, 2026, was acquired and reviewed as part of this assessment. This report provides a compilation of various provincial and federal environmental related records pertaining to properties situated within the Phase I Study Area.

❑ On-Site Records:

Based on the ERIS search, four (4) records were identified with respect to the Phase I Property. An environmental registry record (No. 019-7121) was identified for the Phase I Property which pertains to a permit to take water for construction dewatering purposes. A waste generation record from 2009 was identified for the Phase I Property. At this time, the Phase I Property was listed as a religious organisation and a waste generator of light fuels. Based on previous reporting, the building was historically heated with fuel oil stored in a former exterior underground fuel storage tank (UST) removed in 2009, as discussed further in the Previous Engineering Reports section of this report. None of the activities mentioned above are considered to pose an environmental risk to the Phase I Property.

Remaining records identified in the ERIS report for the Phase I Property are not considered to be representative of a potential environmental concern to the Phase I Property.

❑ *Off-Site Records:*

A total of 201 records from various databases were identified in the ERIS search within the 250m search radius. Pertinent records identified are discussed below.

Multiple off-site fuel tank records were listed for 109 Richmond Road (65m north), 369 Island Park Drive (115m northeast), and 24 Richmond Road (205m northeast). These records include delisted fuel tank records, expired fuels safety facility records, fuel storage tank records, historic fuel storage tank records, and retail fuel storage tanks. Based on a review of the FIPs, all three properties listed above were historically occupied by gasoline service stations and are considered PCAs.

Thirty-seven (37) off-site waste generator records were listed for properties in the Phase I Study Area associated with various waste classes. 109 Richmond Road, 65m north of the Phase I Property, was listed as a gasoline station (Canadian Tire) and a generator of light fuels in the 2000s-2010s. 119 Richmond Road, 65m north of the Phase I Property, was listed as a general merchandise store (Canadian Tire) and a generator of paint, pigment, coating residues, oil skimming and sludges, waste oils & lubricants, and emulsified oils in the 2000s. 70 Richmond Road, 20m northeast of the Phase I Property, was listed as a waste generator of light fuels and liquid industrial waste (Morley Hoppner Inc). A waste generator record of oil skimmings & sludges, waste oils & lubricants, and light fuels (Imperial Oil) was identified for Richmond Road at Island Park Drive.

As previously discussed, the properties listed above are understood to have historically consisted of retail fuel outlets and/or automotive service garages and are considered PCAs.

Multiple records were identified for the property addressed as 145 Richmond Road, 85m northwest of the Phase I Property, currently operating as the Canadian Bank Note Company. The manufacturing records and waste generation records pertain to computer and peripheral equipment manufacturing and printing activities. As previously indicated, the historical and current use of 145 Richmond Road as the Canadian Bank Note Company represents a PCA that does not result in an APEC on the Phase I Property based on its separation distance and down gradient orientation with respect to the subject site.

One (1) TSSA historic incident was identified for 417 Hilson Avenue, 60m west of the Phase I Property. The record pertains to a historic fuel oil leak in 2006. Based

on the separation distance from the Phase I Property, this incident is not considered to pose an environmental concern to the Phase I Property.

Six (6) pesticide register records pertain to the Canadian Tire at 119 Richmond Road, a vendor of pesticides. Based on the type of activity (commercial store), and the separation distance between the business and the Phase I Property, the pesticide register records are not considered to pose a potential environmental concern to the Phase I Property.

Two (2) pipeline incident records were identified for residential properties within the Phase I Study Area. Based on the type of off-site activities and the separation distance between the incidents and the Phase I Property, they are not considered to pose a potential environmental concern to the Phase I Property.

Seventeen (17) Ontario Spill records were identified within the Phase I Study Area. A 300L furnace oil spill was identified at 282 Byron Avenue (60m southwest). Based on the separation distance to the I Property, this spill record is not considered to result in an APEC on the Phase I Property. Some other spills were identified and are not considered to have had the potential to impact the Phase I Property due to separation distance, the small volume released, type of medium impacted, or the record stating that no environmental impacts are anticipated.

Six (6) Records of Site Condition (RSCs) were identified within the Phase I Study Area which are further discussed in the MECP Brownfields Environmental Site Registry (ESR) section of the report. 18 water well information system records were identified for the Phase I Area which are further discussed in the MECP Water Well Records section of this report. One (1) NPRI record was identified for 145 Richmond Road which is further discussed in the National Pollutant Release Inventory (NPRI) section of the report.

Remaining records identified in the ERIS report contain little to no pertinent information, have already been discussed in previous sections of the report, or are not considered to be representative of a potential environmental concern to the Phase I Property.

The PCAs discussed above are not considered to represent APECs on the Phase I Property based on their separation distance and/or down gradient orientations with respect to the subject site.

A copy of the ERIS report is provided in Appendix 2.

Previous Engineering Reports

The following reports were reviewed prior to conducting this assessment.

- ❑ “Phase I - Environmental Site Assessment and Tank Removal, Institutional Property, 114 Richmond Road, Ottawa, Ontario.” Prepared by Paterson Group, dated June 9, 2009.

Paterson completed a Phase I ESA for the property addressed 114 Richmond Road in June 2009. At the time of the report, the site had historically been occupied with the convent building since prior to 1940. Signs of an underground storage tank (UST) were observed in the furnace and adjacent room. It was recommended that the suspected located of the UST be excavated to determine the presence of the UST.

A UST was confirmed and a tank removal program, monitored by Paterson, was subsequently conducted. No petroleum impacted material was encountered in the excavation which covered an area of approximately 41 m² between the northwest portion of the convent and the garage addition. The results of the analytical testing were in compliance with the MOE standards.

Based on the findings of the Phase I - ESA and Tank Removal program, it was concluded that the subject property and neighbouring lands did not pose a significant risk to the subject site, and a Phase II-ESA was not required.

Lead based paints (LBPs) were noted to be potentially present within the subject building. It was recommended that original paint be tested for lead content prior to any demolition or renovation activities in accordance with Ontario Regulation 843, under the Occupational Health and Safety Act.

- ❑ “Phase I – Environmental Site Assessment Update, Residential Development, 114 Richmond Road, Ottawa, Ontario” Prepared by Paterson Group, dated December 3, 2018.

Paterson completed a Phase I ESA Update for the property addressed 114 Richmond Road in December 2018. The building was reported to have been vacant since 2008. Based on the updated records review, no significant changes had been made to the subject site or adjacent properties. No new potentially contaminating activities (PCAs) or areas of potential environmental concern (APECs) were identified as part of the Phase I ESA Update. A Phase II-ESA was not recommended at this time.

4.3 Physical Setting Sources

Aerial Photographs

Historical air photos from the National Air Photo Library (NAPL), the City of Ottawa's GeoOttawa website, and Google Earth were reviewed in approximate ten (10) year intervals. Based on the review, the following observations have been made:

1928	<i>(geoOttawa)</i> The Phase I Property is occupied by the existing convent. The neighbouring property to east is vacant. Residential dwellings are present west and southwest of the subject property. A building, presumed to be the existing school, is present immediately west of the subject property. Richmond Road is visible immediately north of the Phase I Property followed by farmsteads. A railway is visible immediately south of the Phase I Property.
1938	<i>(NAPL) (poor quality)</i> No significant changes are apparent with respect to the Phase I Property or neighbouring properties.
1944	<i>(NAPL) (poor quality)</i> No significant changes are apparent with respect to the Phase I Property. Additional residential dwellings have been constructed south of the Phase I Property.
1958	<i>(geoOttawa)</i> No significant changes are apparent with respect to the Phase I Property. Two gas stations are visible further northeast of the Phase I Property at the intersection of Richmond Road and Island Park Drive. An auto garage appears to be present north of the Phase I Property across Richmond Road. Several commercial buildings have been constructed northwest of the Phase I Property along Richmond Road. The school immediately west of the Phase I Property has been expanded. Additional residential dwellings have been constructed east and north of the Phase I Property.
1965	<i>(geoOttawa)</i> No significant changes are apparent with respect to the Phase I Property. The railway immediately south of the Phase I Property appears to be decommissioned.
1976	<i>(geoOttawa)</i> No significant changes are apparent with respect to the Phase I Property or neighbouring properties.
1984	<i>(NAPL)</i> No significant changes are apparent with respect to the Phase I Property or neighbouring properties.

- 1991 (*geoOttawa*) No significant changes are apparent with respect to the Phase I Property. A building further north of the subject property along Richmond Road has been demolished and replaced with a parking lot.
- 2007 (*geoOttawa*) No significant changes are apparent with respect to the Phase I Property. The school immediately west of the subject property has been renovated.
- 2014 (*geoOttawa*) A parking lot is present in the south portion of the subject property for the construction personnel working on the residential towers immediately north of the convent. Three high-rise buildings are under construction north of the Phase I Property along Richmond Road. Sites across Richmond Road have been redeveloped.
- 2024 (*Google Earth*) The gravel parking lot in the center and south portions of the Phase I Property has been overgrown. Additional development has occurred along Richmond Road north of the Phase I Property.

As previously discussed, the former railway south of the Phase I Property in the 1920s-1960s and the former retail fuel outlets and former automotive garages identified on Richmond Road are considered a PCAs however they are not considered to represent APECs on the Phase I Property based on their separation distance and/or down gradient orientations with respect to the subject site.

Copies of selected aerial photographs reviewed are included in Appendix 1.

Geological Maps

Geological mapping information for the Phase I Property was obtained from The Geological Survey of Canada – Urban Geology of the National Capital Area and reviewed as part of this assessment.

Based on the available mapping information, the bedrock beneath the Phase I Property consists of interbedded sandstone and dolomite of the Gull River Formation. The surficial geology consists of till with a drift thickness ranging from approximately 3 to 15m.

Topographic Maps

A topographic map of the Phase I Property was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as part of this

assessment. The topographic map indicates that the general elevation of the Phase I Property is approximately 73m above sea level. The regional topography in the vicinity of the Phase I Property slopes downward to the northwest in the direction of the Ottawa River.

An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Physiographic Maps

A physiographic map was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as a part of this assessment. According to the publication and available mapping information, the Phase I Property is situated within the St. Lawrence Lowlands. According to the description provided: “...*the lowlands are plain-like areas that were affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.*” The Phase I Property is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150m above sea level.

Water Bodies

No water bodies are present on the Phase I Property.

The nearest named waterbody to the subject property is the Ottawa River, located approximately 1.2km to the north. No creeks, rivers, streams, lakes or any other water body was identified in the Phase I study area.

MECP Water Well Records

A well record search was conducted on January 26, 2026, for all drilled wells associated with properties within a 250 m radius of the Phase I Property. The search did not identify any well records on the Phase I Property.

The search identified twenty-seven (27) well records within the Phase I Study Area. The well records pertain to clusters of monitoring wells or abandoned wells installed as part of previous investigations in the area. The well locations include: 369 Island Park Drive in 2005, 119 Richmond Road in 2007, 109 Richmond Road in 2008 and 2013, along Patricia Avenue in 2009, 1445-1451 Wellington Street West in 2013, 89 Richmond Road in 2017, 70 Richmond Road in 2018 and 2022, and Byron Avenue opposite to #434 in 2022.

Based on the well records, the overburden stratigraphy in the Phase I Study Area generally consists of a layer of sand with cobbles followed by sandy clay with silt followed by silty clay. Bedrock was recorded at a depth of approximately 2.34 and

3.18 meters below ground surface (mbgs) in two of the well records. The wells were drilled between depths of 3.5 to 9m. Static water levels of 1.75, 2.74, 2.95, and 4.35m were reported in four of the well records.

Copies of the well records have been included in Appendix 2.

5.0 INTERVIEWS

Property Owner Representative

Mr. Ed Belanger, the site contact, and the real estate agent for the bankruptcy trustee, was available at the time of the site inspection to respond to questions regarding the history of the subject property. Mr. Belanger indicated that the building is unoccupied. Mr. Belanger was unaware of any storage tanks, spills, or other environmental concerns on the Phase I Property or adjacent properties. Information obtained in the correspondence with Mr. Belanger is integrated into the other sections of this report.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

A site inspection was conducted for the Phase I Property on February 2, 2026, between 10:30 AM and 12:00 PM. Weather conditions were sunny, with a temperature of approximately -10°C. Personnel from the Environmental Department of Paterson Group conducted the inspection. The site was snow-covered at the time of the site inspection. As a result, surficial observations were limited.

In addition to the Phase I Property, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site visit from publicly accessible areas.

6.2 Specific Observations at the Phase I Property

Site Description

The Phase I Property is currently occupied by a three (3) storey unoccupied convent building with a basement level. The convent building occupies the northwest portion of the property. A fire access road with an asphaltic parking lot is present on the east side of the subject building. A concrete walkway is present along the east side of the subject property. The center and south portions of the property consist mostly of vacant land, with a mixture of trees, brush, and cleared land.

A fenced area containing construction materials was observed on the southern end of the property. The construction materials are not considered to pose an environmental concern to the Phase I Property.

Northern and southern portions of the site are generally flat, although the southern portion is at a lower elevation. The site is generally at grade with neighbouring properties and Richmond Road. The regional topography slopes gently down in a north direction towards the Ottawa River. Water drainage on the Phase I Property consists primarily of infiltration.

No ponded water, stressed vegetation, or any other indications of potential sub-surface contamination were observed on the Phase I Property at time of the site inspection. It should be noted at the Phase I Property was snow covered at the time of the site visit.

A depiction of the Phase I Property is presented on Drawing PE7403-1 – Site Plan, in the Figures section of this report.

Buildings and Structures

The subject site is currently occupied by a three (3) storey convent building with a basement level located in the northwest portion of the property. The convent building has a sloped, tin roof and is finished on the exterior with stone.

The building was constructed prior to 1928. As previously discussed, the subject building was historically heated by heating oil and was then converted to natural gas fired equipment located in the basement mechanical room. The building was not currently heated at the time of the site visit.

Potential Environmental Concerns

☐ **Fuels and Chemical Storage**

No signs of underground storage tanks (UST) or above ground storage tanks (AST) were observed on the Phase I Property at the time of the site visit.

☐ **Hazardous Materials and Unidentified Substances**

At the time of the site visit, no hazardous materials, unidentified substances, spills, abnormal odours, stressed vegetation, or any other indications of potential sub-surface contamination were observed on the Phase I Property. It should be noted at the Phase I Property was snow covered at the time of the site visit.

☐ **Transformer Oil and Polychlorinated Biphenyls (PCBs)**

No sources of PCBs or transformer oil were observed on the exterior of the Phase I Property at the time of the site visit.

☐ **Waste Management**

At the time of the site visit, no waste was being generated on the Phase I Property.

☐ **Current or Former Rail or Spur Lines**

No evidence of existing or former rail lines was observed within the Phase I Study Area at the time of the site visit.

☐ **Groundwater monitoring wells**

A groundwater monitoring well (A251214) was identified on the subject property at the time of the site visit. Based on a review of previous reports for this property, this well was installed in 2021 as part of a geotechnical investigation completed by Paterson in 2022 for a proposed residential development. No concerns were identified regarding the groundwater monitoring well on site.

Interior Assessment

A general description of the interior of the subject building is as follows:

- ☐ The floors consisted of linoleum, carpet, vinyl tiles, and concrete;
- ☐ The wall finishings consist of plaster, brick, stone, wood panelling, and concrete;
- ☐ The ceilings consist of plaster, drywall, wood panelling, stucco, and drop ceiling tiles;
- ☐ Lighting throughout the building is provided by incandescent, fluorescent, and compact fluorescent fixtures.

Potentially Hazardous Building Products

☐ **Asbestos-Containing Materials (ACMs)**

Potential asbestos containing materials (ACMs) observed at the time of the site visit include linoleum flooring, pipe insulation, fireproof cement board, and stucco. A Designated Substance Survey (DSS) of the building must be conducted in accordance with Ontario Regulation 278/05, under the Occupational Health and Safety Act prior to any renovation or demolition work.

☐ **Lead-Based Paints**

Lead-based paint may be present on any remaining original surfaces within the building. It is recommended that paint be tested for lead content prior to its disturbance. Major work involving lead-based paint or other lead containing products must be done in accordance with Ontario Regulation 843, under the Occupation Health and Safety Act.

☐ **Polychlorinated Biphenyls (PCBs) and Transformer Oil**

A dry-type transformer was observed inside the basement of the subject building at the time of inspection. No other potential sources of PCBs were identified inside the subject buildings at the time of the site inspection.

☐ **Urea Formaldehyde Foam Insulation (UFFI)**

UFFI was not observed at the time of the site inspection. However, not all areas were inspected and UFFI may be present within wall cavities.

☐ **Mould and Moisture**

No signs of mould or excessive moisture were noted at the time of the site inspection, although wall and ceiling cavities were not inspected.

Other Potential Environmental Concerns

☐ **Interior Fuel and Chemical Storage**

Based on previous reporting, the subject building was previously heated via heating oil stored in an exterior UST located on the north side of the building. The UST was removed in 2009. No spills, abnormal odours, or any other indications of potential sub-surface contamination were observed inside the mechanical room at the time of the site visit.

No vent and fill pipes, aboveground fuel storage tanks, or evidence indicating the presence of any other underground fuel storage tanks were observed within the subject building at the time of the site inspection.

Chemical products identified in the subject building were observed to be limited to commercially available cleaning products and paints stored in their original containers which do not pose a risk to the Phase I Property.

☐ **Ozone Depleting Substances (ODSs)**

Potential sources of ODSs observed at the time of inspection included fire extinguishers, refrigerators and freezers. These appliances should be serviced by a certified contractor.

☐ **Wastewater Discharges**

Sump pits and floor drains were observed in basement of the subject building at the time of the site visit. The subject building discharges into the City of Ottawa sewer system. Roof drainage is discharged via surface run-off and infiltration. The building was unoccupied at the time of the site visit.

No concerns were identified with respect to wastewater discharge on the subject site.

Neighbouring Properties

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection. Land use adjacent to the subject site is as follows:

- ☐ North: Residential apartment building followed by Richmond Road;
- ☐ South: City parkland, followed by Byron Avenue followed by residential dwellings;
- ☐ East: Residential dwellings followed by Leighton Terrace;
- ☐ West: A school (Hilson Avenue Public School) and residential dwellings;

Some existing off-site PCAs were identified on properties situated within the Phase I Study Area as discussed below. A current retail fuel outlet and automotive service garage was identified at 369 Island Park Drive (120m northeast). An automotive service garage was identified at 77 Richmond Road (70m northeast). The Canadian Bank Note Company was noted at 145 Richmond Road (85m northwest). As previously discussed, these off-site PCAs are not considered to represent APECs on the Phase I Property.

The neighbouring land use within the Phase I Study Area is depicted on Drawing PE7403-2 – Surrounding Land Use Plan, in the Figures section of this report.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Land Use History

Based on a review of available historical information, the Phase I Property was first developed with the existing convent building prior to 1928. Since approximately 2008, the property has not been occupied.

Potentially Contaminating Activities (PCAs)

Based on the findings of the Phase I ESA, no potentially contaminating activities (PCAs) were identified on the Phase I Property.

Existing and historical off-site PCAs were identified on properties situated within the Phase I Study Area, however, due to either their separation distances or their inferred down-gradient or cross-gradient orientation with respect to the Phase I Property, none of these historical off-site activities are considered to have had the potential to impact the Phase I Property.

Site features and surrounding land use can be seen on Drawing PE7403-1 – Site Plan and Drawing PE7403-2 – Surrounding Land Use Plan, respectively.

Areas of Potential Environmental Concern (APECs)

Based on the findings of the Phase I ESA, no APECs were identified on the Phase I Property.

Contaminants of Potential Concern (CPCs)

No CPCs were identified since no APECs were identified on the Phase I Property.

7.2 Conceptual Site Model

Geological and Hydrogeological Setting

Based on the available mapping information, the bedrock beneath the Phase I Property consists of interbedded sandstone and dolomite of the Gull River Formation. The surficial geology consists of till with a drift thickness ranging from approximately 3 to 15m.

Groundwater is anticipated to flow in a northerly direction towards the Ottawa River.

Water Bodies and Areas of Natural and Scientific Interest

No water bodies or areas of natural and scientific interest are present on the Phase I Property or within the Phase I Study Area.

The nearest named waterbody to the subject property is the Ottawa River, located approximately 1.2km to the north of the Phase I Property.

Drinking Water Wells

Based on the presence of municipal water services, no potable water wells are expected to exist within the Phase I Study Area.

Existing Buildings and Structures

The subject site is currently occupied by a three (3) storey convent with a basement level on the northwest portion of the property. The building was unoccupied at the time of the site visit.

Neighbouring Land Use

Neighbouring land use in the Phase I Study Area consists primarily of residential properties, with a commercial strip further to the north, and a high school to the west.

Current land use is depicted on Drawing PE7403-2 – Surrounding Land Use Plan, in the Figures section of this report.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of the Phase I ESA report, no potentially contaminating activities (PCAs), considered to result in areas of potential environmental concern (APECs), were identified on the Phase I Property.

Contaminants of Potential Concern

No CPCs were identified since no APECs were identified on the Phase I Property.

Current and Future Property Use

The Phase I Property currently consists of an unoccupied convent building, which is considered to fall within the residential/institutional land use category of O. Reg. 153/04.

Any future residential development would not constitute a change to a more sensitive land use and therefore, a record of site condition (RSC) will not be required to be filed with the MECP.

Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that there are no PCAs or APECs associated with the Phase I Property.

The absence of any PCAs was confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

8.0 CONCLUSIONS AND RECOMMENDATIONS

8.1 Assessment

Paterson Group was commissioned by Concorde Properties to carry out a Phase I – Environmental Site Assessment (Phase I ESA) for the property addressed 114 Richmond Road in the City of Ottawa, Ontario. The objective of this Phase I ESA was to research the past and current use of the site (Phase I Property) and a 250m radius (Phase I Study Area) to identify any environmental concerns with the potential to have impacted the subject property.

According to the historical research, the Phase I Property was first developed with the existing convent building prior to 1928 and was used as such until approximately 2008. No PCAs were identified with respect to the historical use of the Phase I Property.

Historically, properties in the Phase I Study Area were used for agricultural purposes or consisted of vacant land, prior to commercial and residential development. Some historical off-site PCAs were identified on properties situated within the Phase I Study Area, particularly along Richmond Road to the north, however, due to their separation distances and/or their inferred down-gradient or cross-gradient orientation with respect to the Phase I Property, none of these off-site PCAs are considered to represent APECs on the Phase I Property.

Following the historical research, a site visit was conducted. The Phase I ESA Property is still occupied by the aforementioned three (3) storey convent building on the northwest portion of the property. The building was unoccupied at the time of the site visit. No potential environmental concerns were identified with respect to the current use of the Phase I Property.

Neighbouring land use in the Phase I Study Area consists primarily of residential properties, with a commercial strip further to the north, and a high school to the west. Some existing off-site PCAs were identified on properties situated within the Phase I Study Area, particularly along Richmond Road to the north, however, due to their separation distances and/or their inferred down-gradient or cross-gradient orientation with respect to the Phase I Property, none of these off-site PCAs are considered to represent APECs on the Phase I Property.

Based on the findings of our assessment, it is our opinion that a **Phase II – Environmental Site Assessment will not be required for the Phase I Property.**

8.2 Recommendations

Potentially Hazardous Building Materials

Potential asbestos containing materials (ACMs) observed at the time of the site visit include linoleum flooring, pipe insulation, fireproof cement board, and stucco. A Designated Substance Survey (DSS) of the building must be conducted in accordance with Ontario Regulation 278/05, under the Occupational Health and Safety Act prior to any renovation or demolition work.

Lead-based paint may be present on any remaining original surfaces within the building. It is recommended that paint be tested for lead content prior to its disturbance. Major work involving lead-based paint or other lead containing products must be done in accordance with Ontario Regulation 843, under the Occupation Health and Safety Act.

9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared under the supervision of a Qualified Person, in general accordance with O.Reg. 153/04, as amended, and CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical, and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Concorde Properties. Permission and notification from Concorde Properties and Paterson will be required to release this report to any other party.

Abdul Mottalib, P.Eng., Senior Engineer, Development Review Process
City of Ottawa
By e-mail only: abdul.mottalib@ottawa.ca

Dear Mr. Mottalib:

**Re: Application for Approval of Municipal and Private Sewage Works
Sanitary sewers on Richmond Road for 114 Richmond Road
City of Ottawa
MOE Reference Number 1868-9ABKU3**

We acknowledge receipt of your application for approval dated May 16, 2013, and received on August 6, 2013, for the following:

Approval Type:	Municipal and Private Sewage Works
Project Description:	The Proposal is for an Amended Environmental Compliance Approval for sanitary sewers to be constructed on Richmond Road, to add one (1) new 120 millimetre diameter maintenance hole (SAN MH 2) on Richmond Road and install 3.3 metres of 37 millimetre diameter polyvinyl chloride sanitary sewer to connect to an existing maintenance hole (SAN1); all in accordance with final plans and specifications prepared by Stantec Consulting Ltd. The section of gravity sanitary sewer is required to pick up and convey flows from proposed condominium buildings at 114 Richmond Road.
Site Location:	Richmond Road Lots 32 and 33, Concession 1 on Ottawa River, geographic township of Nepean City of Ottawa

The Ministry's reference number for your application is 1868-9ABKU3. Please quote this number in any correspondence or enquiries regarding this application.

We have screened your submission for completeness and find that the following additional information/documentation is necessary for us to process your application:

- **Correspondence (not map)** from the municipality to confirm that the current zoning of the property permits the proposed use

(If the applicant does not have correspondence from the municipality to confirm that the current zoning of the property permits the proposed use, this should be indicated in Site Zoning and Classification – section 4.3 of application form.)

- Completed section 2.2 (b) of the Pipe Data Form – Watermain, Storm Sewer, Sanitary Sewer, and Forcemain Design – Supplement to Application for Approval for Water and Sewage Works – including **Schedule No.** (associated Schedule/Paragraph No. from the appropriate Schedule identified in section 2.2 (a) which applies to the proposed project)
- Revised letter of recommendation, including a **report that fees in the amount of \$800.00 were paid to the municipality in respect of the application**

It appears that in calculating the required application fee, you have incorrectly identified certain fee categories of the fees regulation as applicable to your proposal, and as a result the fee of \$1,100.00 which you have collected is excessive. We have determined that in accordance with the Minister's Requirement for Fees, the total fee required for this application is \$800.00, as follows:

Subsection 2 (1) of the Minister's Requirement for Fees – Application Fees for Environmental Compliance Approvals under the Environmental Protection Act – states that "An applicant for an environmental compliance approval shall pay an administrative processing fee of \$200 at the time of submitting the application, if, in the opinion of the Director, the application requires a technical review."

Subsection 5 (1) of the Minister's Requirement for Fees states that "An applicant for an environmental compliance approval to engage in an activity mentioned in subsection 53 (1) of the Ontario Water Resources Act shall pay a fee at the time of submitting the application, if, in the opinion of the Director, the application requires a technical review."

Subsection 5 (2) of the Minister's Requirement for Fees states that "The amount of the fee payable under subsection (1) is the sum of the following amounts:

[...]

5. If the applicant requests the Director to amend an environmental compliance approval, whichever of the following amounts is applicable:

[...]

- iii. \$600, in any other case."

Therefore, it is necessary that you refund the amount of \$300.00, which is in excess of the total fee required.

Please be advised that should we not receive the above information/documentation or a response with explanations within two weeks of the date of this letter, we will consider your application withdrawn, and close your file accordingly.

Please note that your submission has only been screened with respect to the presence of the supporting documentation normally required for this type of application, and did not include any technical analysis of the documentation, and therefore you may still be requested to provide some additional information during our detailed technical review of the application. In such a case, the Reviewer will contact you and/or your identified Project Technical Information Contact at that time.

Also, please note that a duplicate copy of the application and all supporting information should have been

sent to the local District Office of the Ministry. If this has not been done, please do so as soon as possible including the missing information/documentation identified above.

Should you have any questions related to your application, please contact me at the above phone number.

Sincerely,

Matthew Chisholm
Application Assessment Officer

Other Significant Missing Info: Correspondence (not map) from the municipality to confirm that the current zoning of the property permits the proposed use (If the applicant does not have correspondence from the municipality to confirm that the current zoning of the property permits the proposed use this should be indicated in Site Zoning and Classification – section 4.3 of application form.); Completed section 2.2 (b) of the Pipe Data Form – Watermain Storm Sewer Sanitary Sewer and Forcemain Design – Supplement to Application for Approval for Water and Sewage Works – including Schedule No. (associated Schedule/Paragraph No. from the appropriate Schedule identified in section 2.2 (a) which applies to the proposed project); Revised letter of recommendation including a report that fees in the amount of \$1100.00 were paid to the municipality in respect of the application	Other Insignificant Missing Info:

Additional Comments

AMENDED ENVIRONMENTAL COMPLIANCE APPROVALNUMBER 7171-9AYQGT
Issue Date: August 30, 2013

Ashcroft Homes - 108 Richmond Road Inc.
18 Antares Drive, Suite 102
Nepean ON K2E 1A9

Site Location: Richmond Road
Lots 32 and 33, Concession 1 on Ottawa River, geographic township of Nepean
City of Ottawa, Ontario

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

sanitary sewers to be constructed in the City of Ottawa on Richmond Road (from Station 0+020.0 to Station 0+023.3);

all in accordance with the application from Ashcroft Homes - 108 Richmond Road Inc., dated **May 16, 2013**, including final plans and specifications prepared by Stantec Consulting Ltd.

Upon issuance of the environmental compliance approval, I hereby revoke Approval No(s). 5046-8URQH2 issued on June 20, 2012.

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall state:

1. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

Pursuant to subsection 139(3) of the Environmental Protection Act, a hearing may not be required with respect to any terms and conditions in this environmental compliance approval, if the terms and conditions are substantially the same as those contained in an approval that is amended or revoked by this environmental compliance approval.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The environmental compliance approval number;
6. The date of the environmental compliance approval;
7. The name of the Director, and;
8. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*
Environmental Review Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario
M5G 1E5

AND

The Director appointed for the purposes of
Part II.1 of the Environmental Protection Act
Ministry of the Environment
2 St. Clair Avenue West, Floor 12A
Toronto, Ontario

General Comments:

This permit is for one pump test for well that is very likely to be drawing water from the bedrock. Based on Trow's 1988 report entitled "A Study of Groundwater Resources in the Minimum Service Rural Residential and Rural Area Designations of the City of Thunder Bay Official Plan, Thunder Bay, Ontario" the overburden in the area is an approximately 2.5 metre thick silt till. The bedrock is an argillite tuff of the Gunflint Formation is water found 4 metres below ground surface, 1.5 metres below the bedrock surface. The water quality in the area is marginal and well yields are dependant on encountering faults in the bedrock. Temporary interference is possible, however since this is only a 24 hour test from a bedrock aquifer, long term interference is highly unlikely.

Discharge is to be to a municipal drainage ditch and should not cross neighbouring properties.

The standard conditions for pump tests are recommended and listed below.

PERMIT TO TAKE WATER
Ground Water
NUMBER 8744-5RPQBA

Pursuant to Section 34 of the Ontario Water Resources Act, R.S.O. 1990 this Permit To Take Water is hereby issued to:

Thunder Bay Testing & Engineering Limited
101 North Syndicate Avenue Suite 314
Thunder Bay, Ontario, P7C 3V4
Canada

For the water taking from: Domestic Well

Located at: 114 Richmon Road, RR #7
Thunder Bay, District of Thunder Bay

For the purposes of this Permit, and the terms and conditions specified below, the following definitions apply:

DEFINITIONS

- (a) "Director" means any person appointed in writing as a Director pursuant to section 5 of the OWRA for the purposes of section 34, OWRA.
- (b) "Provincial Officer" means any person designated in writing by the Minister as a Provincial Officer pursuant to section 5 of the OWRA.
- (c) "Ministry" means Ontario Ministry of the Environment.

- (d) "District Office" means the Thunder Bay District Office.
- (e) "Permit" means this Permit to Take Water No. 8744-5RPQBA including its Schedules, if any, issued in accordance with Section 34 of the OWRA.
- (f) "Permit Holder" means Thunder Bay Testing & Engineering Limited.
- (g) "OWRA " means the *Ontario Water Resources Act*, R.S.O. 1990, c. O. 40, as amended.

You are hereby notified that this Permit is issued subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. Compliance with Permit

- 1.1 Except where modified by this Permit, the water taking shall be in accordance with the application for this Permit To Take Water, dated 2003/09/23 and signed by Scott Pearson, and all Schedules included in this Permit.
- 1.2 The Permit Holder shall ensure that any person authorized by the Permit Holder to take water under this Permit is provided with a copy of this Permit and shall take all reasonable measures to ensure that any such person complies with the conditions of this Permit.
- 1.3 Any person authorized by the Permit Holder to take water under this Permit shall comply with the conditions of this Permit.
- 1.4 This Permit is not transferable to another person.
- 1.5 This Permit provides the Permit Holder with permission to take water in accordance with the conditions of this Permit, up to the date of the expiry of this Permit. This Permit does not constitute a legal right, vested or otherwise, to a water allocation, and the issuance of this Permit

does not guarantee that, upon its expiry, it will be renewed.

- 1.6 The Permit Holder shall keep this Permit available at all times at or near the site of the taking, and shall produce this Permit immediately for inspection by a Provincial Officer upon his or her request.
- 1.7 The Permit Holder shall report any changes of address to the Director within thirty days of any such change. The Permit Holder shall report any change of ownership of the property for which this Permit is issued within thirty days of any such change. A change in ownership in the property shall cause this Permit to be cancelled.

2. General Conditions and Interpretation

2.1 Inspections

The Permit Holder must forthwith, upon presentation of credentials, permit a Provincial Officer to carry out any and all inspections authorized by the OWRA, the *Environmental Protection Act* , R.S.O. 1990, the *Pesticides Act* , R.S.O. 1990, or the *Safe Drinking Water Act*, S. O. 2002.

2.2 Other Approvals

The issuance of, and compliance with this Permit, does not:

- (a) relieve the Permit Holder or any other person from any obligation to comply with any other applicable legal requirements, including the provisions of the *Ontario Water Resources Act* , and the *Environmental Protection Act* , and any regulations made thereunder; or
- (b) limit in any way to authority of the Director or a Provincial Officer to require certain steps be taken or to require the Permit Holder to furnish any further information related to this Permit.

2.3 Information

The receipt of any information by the Ministry, the failure of the Ministry to take any action or require any person to take any action in relation to the information, or the failure of a Provincial Officer to prosecute any person in relation to the information, shall not be construed as:

(a) an approval, waiver or justification by the Ministry of any act or omission of any person that contravenes this Permit or other legal requirement; or

(b) acceptance by the Ministry of the information's completeness or accuracy.

2.4 Rights of Action

The issuance of, and compliance with this Permit shall not be construed as precluding or limiting any legal claims or rights of action that any person, including the Crown in right of Ontario or any agency thereof, has or may have against the Permit Holder, its officers, employees, agents, and contractors.

2.5 Severability

The requirements of this Permit are severable. If any requirements of this Permit, or the application of any requirements of this Permit to any circumstance, is held invalid or unenforceable, the application of such requirements to other circumstances and the remainder of this Permit shall not be affected thereby.

2.6 Conflicts

Where there is a conflict between a provision of any submitted document referred to in this Permit, including its Schedules, and the conditions of this Permit, the conditions in this Permit shall take precedence.

3. Water Takings Authorized by This Permit

3.1 Expiry

This Permit expires on **2003/10/31**. No water shall be taken under authority of this Permit after the expiry date.

3.2 Amounts of Taking Permitted

The Permit Holder shall only take water from the source, during the periods and at the rates and amounts of taking specified in Table A. Water takings are authorized only for the purposes specified in Table A.

Table A

	Source Name / Description:	Source: Type:	Taking Specific Purpose:	Taking Major Category:	Max. Taken per Minute (litres):	Max. Num. of Hrs Taken per Day:	Max. Taken per Day (litres):	Max. Num. of Days Taken per Year:	Zone/ Easting/ Northing:
1.	Domestic Well	Well Drilled	Pumping Test	Miscellaneous	90.00	24.00	25000.00	1.00	16 325371 5365094
						Total Taking:	25000.00		

4. Monitoring

- 4.1 a) The rates and amounts of water taken from the well shall be monitored by a measuring device.
- b) Pumping records shall be made for the entire duration of the test.
- c) The measuring device(s) shall be installed and operating prior to the taking of water.
- d) The water taking records shall be kept available at all times for inspection by Ministry staff.

5. Impacts of the Water Taking

5.1 Notification

The Permit Holder shall immediately notify the local District Office of any complaint arising from the taking of water authorized under this Permit and shall report any action which has been taken or is proposed with regard to such complaint. The Permit Holder shall immediately notify the local District Office if the taking of water is observed to have any significant impact on the surrounding waters. After hours, calls shall be directed to the Ministry's Spills Action Centre at 1-800-268-6060.

5.2 For Groundwater Takings

If the taking of water is observed to cause any negative impact to other water supplies obtained from any adequate sources that were in use prior to initial issuance of a Permit for this water taking, the Permit Holder shall take such action necessary to make available to those affected, a

supply of water equivalent in quantity and quality to their normal takings, or shall compensate such persons for their reasonable costs of so doing, or shall reduce the rate and amount of taking to prevent or alleviate the observed negative impact. Pending permanent restoration of the affected supplies, the Permit Holder shall provide, to those affected, temporary water supplies adequate to meet their normal requirements, or shall compensate such persons for their reasonable costs of doing so.

If permanent interference is caused by the water taking, the Permit Holder shall restore the water supplies of those permanently affected.

5.3 The Permit Holder shall identify all wells within 500 meters of this taking and shall ensure that static levels in all wells are measured during the test. Measurements shall begin prior to the commencement of this taking.

5.4 No water shall be discharged directly to a surface watercourse. All water must be directed to a well vegetated area at least 200m from the nearest watercourse and the discharge must not adversely affect the use of adjacent properties.

5.5 An energy dissipation device shall be installed at the discharge point to minimize the likelihood of scouring and erosion.

5.6 If suspended solids are observed in the discharge stream, the Permit Holder shall install a fabric silt barrier, hay/straw barrier, or take other appropriate measures to reduce the suspended solids concentration.

6. Director May Amend Permit

The Director may amend this Permit by letter requiring the Permit Holder to suspend or reduce the taking to an amount or threshold specified by the Director in the letter. The suspension or reduction in taking shall be effective immediately and may be revoked at any time upon notification by the Director. This condition does not affect your right to appeal the suspension or reduction in taking to the Environmental Review Tribunal under the *Ontario Water Resources Act*, Section 100 (3).

7. This permit is for one 24 hour pump test and one additional 24 hour pump test if necessary.

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is included to ensure that the conditions in this Permit are complied with and can be enforced.
2. Condition 2 is included to clarify the legal interpretation of aspects of this Permit.
3. Conditions 3 through 6 are included to protect the quality of the natural environment so as to safeguard the ecosystem and human health and foster efficient use and conservation of waters. These conditions allow for the beneficial use of waters while ensuring the fair sharing, conservation and sustainable use of the waters of Ontario. The conditions also specify the water takings that are authorized by this Permit and the scope of this Permit.

In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 101 of the Ontario Water Resources Act, R.S.O. 1990, as amended, provides that the Notice requiring the hearing shall state:

1. The portions of the Permit or each term or condition in the Permit in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

In addition to these legal requirements, the Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The Permit to Take Water number;
6. The date of the Permit to Take Water;
7. The name of the Director;
8. The municipality within which the works are located;

And the Notice should be signed and dated by the appellant.

RE: PTTW 03-P-6056

Reference Number 6418-5RQKCG

Dear Sir/Madam

Please find attached Permit To Take Water No. 03-P-6056 which grants the taking of water from a domestic well located at 114 Richmond Road, City of Thunder Bay, District of Thunder Bay, Ontario for the purpose of a pumping test. The rate of taking shall not exceed a maximum of 90 litres per minute or 25,000 litres per day. The Permit is valid from September 25, 2003 to October 31, 2003.

The Terms and Conditions are shown on pages 2-5 of the Permit.

This Permit does not relieve you or Thunder Bay Testing & Engineering Ltd. as the proponent from compliance with provisions of any of the applicable International, Federal, Provincial or Municipal statutes, regulations or bylaws, or other legal requirements, nor does it confer upon you any right to occupy land or water owned by others.

Should you have any questions or concerns, please contact this office as soon as possible.

Yours truly,

File Storage Number: 03-P-6056

Comments:

Note: This **Well Record for Well Cluster Part 3 - Detailed Drawing of all Well Locations**, must be attached to Parts 1 and 2. The drawing must include all property boundaries, an arrow indicating the North direction, all named roads and sufficient measurements to locate all wells in the cluster in relation to fixed points. The drawing must show the location of each well and each well must be numbered on the drawing to match number used for that well on the **Well Record for Well Cluster Parts 1 and 2**. The well with the well tag must be clearly identified on the Drawing. UTM coordinates should appear beside each well, if space permits. Additional comments on wells can be included on the drawing

Dear Isabelle Dillion-Sullivan,

Re: Information Request
114 Richmond Road, Ottawa, Ontario ("Subject Property")

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City's Environmental Remediation Unit (ERU) has copies of the following environmental reports for the property:
 - Paterson, 2009. 114 Richmond - Phase I ESA & Tank Removal. 9Jun2009
 - Please contact ERU-UAE@ottawa.ca to request copies of the reports if required
- **Sewer Use Program:** No information found pertaining to the subject property.
- **Solid Waste Services:** No information found pertaining to the subject property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('26-0009 HLUI Summary report.xlsx'), please refer to the [Overview and User Guide.](#)"

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Asiya Ali (*She/Her*)

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: PE7403 - Phase I ESA
114 Richmond Road Ottawa ON K1Z 0C3

Project No: PO# 64937 / Project# PE7403

Coordinates:

Latitude: 45.3954236
Longitude: -75.7433364
UTM Northing: 5,027,147.19
UTM Easting: 441,818.11
UTM Zone: 18T

Elevation: 223 FT
67.91 M

Order Information:

Order No: 26012100524
Date Requested: January 21, 2026
Requested by: Paterson Group Inc.

NAICS Description En:

This Canadian industry comprises establishments primarily engaged in commercial printing using silk-screen printing equipment. Establishments in this Canadian industry typically have a pre-press capability, for example, to cut stencils. Typically, these establishments print on clothing; or produce paper documents of a graphical nature, such as pictures and large-format sign-type lettering.

Map Key	Number of Records	Direction/Distance (m)	Elev/Diff (m)	Site	DB

NAICS Description Fr:

Cette classe canadienne comprend les établissements dont l'activité principale consiste à faire de l'impression commerciale en se servant de trames de soie. Les établissements de cette classe canadienne sont habituellement équipés pour effectuer les tâches préalables à l'impression, par exemple pour couper les stencils. Généralement, ces établissements impriment sur des vêtements; ou produisent des documents sur papier à caractère graphique, comme les images et les lettres d'enseigne grand format.

<u>NAICS Description En:</u>					
This Canadian industry comprises establishments primarily engaged in commercial printing using silk-screen printing equipment. Establishments in this Canadian industry typically have a pre-press capability, for example, to cut stencils. Typically, these establishments print on clothing; or produce paper documents of a graphical nature, such as pictures and large-format sign-type lettering.					
<u>NAICS Description Fr:</u>					

Map Key	Number of Records	Direction/ Distance (m)	Elev/Diff (m)	Site	DB
Cette classe canadienne comprend les établissements dont l'activité principale consiste à faire de l'impression commerciale en se servant de trames de soie. Les établissements de cette classe canadienne sont habituellement équipés pour effectuer les tâches préalables à l'impression, par exemple pour couper les stencils. Généralement, ces établissements impriment sur des vêtements; ou produisent des documents sur papier à caractère graphique, comme les images et les lettres d'enseigne grand format.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Oct 2025

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2025

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Aug 2025

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Nov 30, 2025

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Jul 2025**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011 - Nov 30, 2025**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Nov 30, 2025**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Nov 30, 2025**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2025**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Offenders Registry:

Federal

EOR

The Environmental Offenders Registry, enforced by Environment and Climate Change Canada and Parks Canada, tracks corporations convicted under specific federal environmental laws. The registry includes corporate convictions resulting from court proceedings. Court prosecutions are one of several enforcement measures used when violations or potential violations are detected. Other measures like tickets, warning letters, or compliance orders may also be employed to restore compliance. Although not affected by the Environmental Enforcement Act, convictions obtained by Environment and Climate Change Canada under the Species at Risk Act and the Pollution Prevention Provisions of the Fisheries Act are also included.

Government Publication Date: Oct 31, 2025

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

Excess Soil Registry:

Provincial

ESNR

The Excess Soil Registry is made available by the Resource Productivity and Recovery Authority (RPRA). Excess soil is soil dug up mainly during construction and excavation activities that must be removed from the development site because it cannot or will not be reused. The Minister of the Environment, Conservation and Parks directed the RPRA to establish and maintain the Excess Soil Registry, enabling regulated parties to comply with registration and filing notice requirements, the ministry to access data, and the public to view information from those filings. From January 1, 2023, construction and development project leaders, as well as operators and owners of soil Reuse Sites, and Residential Development Soil Depot sites, must file notices detailing how excess soil is reused and disposed of in compliance with Ontario's Excess Soil Regulation.

Government Publication Date: Aug 31, 2025

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Oct 2025

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Mar 31, 2025

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Feb 2025

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Historical Business Activity Risk:

Federal

HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this list does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including BC Directories, Hendersons, Mights, Sun Directories, Vernons, and Wrights; spanning roughly 1920s through 1960 depending on information available by city.

This list is currently limited to sites as reported in the following provinces: Alberta, British Columbia, Saskatchewan, Manitoba, New Brunswick, Nova Scotia, Ontario, and Quebec.

Government Publication Date: 1920s - 1960

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Oct 31, 2025

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

Notice of Contamination List:

Federal

NOC

This dataset contains Notice of Contamination (NOC) submissions reported to the Canada Energy Regulator (CER), including the most recent annual update information where applicable. Regulated companies are required to submit an NOC when contamination is identified or encountered during any phase of a facility's lifecycle and confirmed through analytical sampling, or when contamination resulting from an incident cannot be remediated within 12 weeks of being reported to the CER. Blank values in the Annual Update Year and annual update fields indicate that the site has achieved remediation closure, has been identified as third-party contamination, or was reported recently and does not yet require an annual update.

Government Publication Date: Nov, 2025

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Oct 31, 2025

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-May 2025

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Nov 30, 2025

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Nov 30, 2025

Ontario PFAS Spills:

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances:

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996***Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Nov 30, 2025**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004 - 31 Dec, 2025

Retail Fuel Storage Tanks:

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directories:

Private

SCT

Scott's Directories is a data bank containing information on various manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, applicable NAICS Codes, and product categories are included in this database.

Government Publication Date: 1992-Mar 2011; Feb 2025

Ontario Spills:

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Oct 2025

Wastewater Discharger Registration Database:

Provincial

SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2023

Anderson's Storage Tanks:

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks:

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Nov 30, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Waste Management Site:

Provincial

[WMS](#)

This data contains Waste Disposal Site types collected by the Ministry of Natural Resource (MNR). The new data class brings over data from the Waste Management Information System (WMIS), which is an MS Access based database used by MNR to track Waste Management Sites. This was married with the spatial data from Waste Disposal Sites where possible. Different Waste Disposal Site types collected by the Ministry of Natural Resources include: compost disposal, hazardous waste disposal, household waste disposal, industrial waste disposal, septic drying bed, septic field, sewage disposal, tile bed, and transfer station. The data is currently under development, meaning the data is currently in the process of being created by the MNR.

Government Publication Date: April 30, 2025

Water Well Information System:

Provincial

[WWIS](#)

This database consists of information submitted by well contractors detailing locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table. The database is provided by the Ontario Ministry of Environment, Conservation and Parks.

Government Publication Date: Jul 31, 2025

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX 3

QUALIFICATIONS OF ASSESSORS

PATERSON GROUP

solution oriented engineering

Isabelle Dillon-Sullivan, B.Eng. Junior Environmental Technician

Isabelle joined Paterson Group in 2025 as part of the Environmental Division. Isabelle received her Bachelor of Engineering in Environmental Engineering from Carleton University in 2024. In her time at Paterson, Isabelle has been involved in residential and commercial projects within Ontario and Quebec. Her scope of work consists of conducting Phase I Environmental Site Assessments (ESAs) in Ontario and Quebec, soil and groundwater sampling, soil testing, memorandum writing, and reporting.

EDUCATION

Bachelor of Engineering in
Environmental Engineering
2024
Carleton University

YEARS OF EXPERIENCE

Paterson Group
2025-Present

Kerr Wood Leidal
2022-2023

OFFICE LOCATION

9 Auriga Drive, Ottawa, Ontario,
K2E 7T9

PROFESSIONAL EXPERIENCE

2025 to present, **Junior Environmental Technician, Paterson Group, Ottawa, ON**

- Conducting Phase I Environmental Site Assessments in accordance with CSA standards and O.Reg. 153/04.
- Field experience working with excavation contractors, and conducting soil and groundwater field sampling.
- Liaising with clients, and contractors.
- Present analytical test results, interpretations, assessments, recommendation and/or conclusions in a final technical report as well as verbal and written communication with clients.

2022-2023, **Engineering Co-op Student, Kerr Wood Leidal, Victoria, BC**

- Assisted with design calculations, technical report writing, construction field review, cost estimating, asset management, and hydraulic modeling for civil and water resources related projects.
- Created and maintained organized, up-to-date electronic and hardcopies of project files including spreadheads, field notes, reports, drawings, and software files.
- Maintained professional correspondence with contractors and clients.

PATERSON GROUP

solution oriented engineering

Mark S. D'Arcy, P.Eng., QP_{ESA} **Director – Environmental Division**

After receiving his Bachelors of Applied Science from Queen's University in 1991 in Geological Engineering, Mark joined Paterson Group Inc. During the first 10 years of Mark's career, he was heavily involved in all aspects of field work, including drilling boreholes, excavating test pits, conducting phase I site inspections, environmental sampling and analysis and inspection of environmental remediations. During Mark's field experience, he gained invaluable field and office experience, which would prepare Mark to become the Environmental Division Manager. Mark's field experience ranges from Phase I Environmental Site Assessments (ESAs) to on-site soil and groundwater remediations, as well as, environmental/geotechnical borehole investigations. Mark's field experience has provided extensive knowledge of subsurface conditions, contractor relations and project management. These skills would provide Mark with the ability to understand a variety of situations, which has lead Paterson to an extremely successful Environmental Department. Mark became the Environmental Manager in 2006, which consisted of two engineers and two field technicians. Mark has been an integral part in growing the Environmental Division, which now consists of nine engineers and three field technicians. Mark is the Senior Project Manager for a wide variety of environmental projects within the Eastern Ontario area including Phase I ESAs, Phase II ESAs, remediations for filing Records of Site Condition in the Ontario Ministry of the Environment and Climate Change (MOECC) Environmental Site Registry, Brownfield Applications and Landfill Monitoring Programs. As the Senior Project Manager, Mark is responsible for directing project personnel, final report review and overall project success. Mark has proven leadership and ability to manage small to large scale projects within the allotted time and budget.

EDUCATION

B.A.Sc. 1991, Geological Engineering, Queen's University, Kingston, ON

LICENCE/PROFESSIONAL AFFILIATIONS

Professional Engineers of Ontario

ESA Qualified Person with MECP

Ontario Society of Professional Engineers

Consulting Engineers of Ontario

YEARS OF EXPERIENCE

With Paterson: 33

OFFICE LOCATION

9 Auriga Drive, Ottawa, Ontario, K2E 7T9

SELECT LIST OF PROJECTS

- 222 Beechwood Avenue, Ottawa, Ontario (Senior Project Manager for Phase I ESA, Phase II ESA, Phase III ESA, Environmental Remediation)
- 409 MacKay Street, Ottawa, Ontario (Senior Project Manager for Phase I ESA, Phase II ESA, Phase III ESA, Environmental Remediation)
- Art's Court Redevelopment, Ottawa, Ontario (Senior Project Manager for Phase I ESA, Phase II ESA, Phase III ESA, Environmental Remediation)
- Visitor Welcome Centre, Phase II and Phase III, Parliament Hill, Ottawa, Ontario (Senior Project Manager for Environmental Remediation)
- Mattawa Landfill, Mattawa, Ontario (Senior Project Manager, Annual Water Quality Monitoring report)
- Multi-Phase Redevelopment of the Ottawa Train Yards, Ottawa, Ontario (Senior Project Manager)
- Rideau Centre Expansion, Ottawa, Ontario (Senior Project Manager for Phase I ESA, Phase II ESA, Phase III ESA, Environmental Remediation)
- 26 Stanley Avenue, Ottawa, Ontario, Phase I ESA, Phase II ESA (Senior Project Manager)
- Monitoring Landfills for River Valley, Kipling and Lavigne (Senior Project Manager)
- Block D Lands – Brownfields Project - Kingston

PROFESSIONAL EXPERIENCE

2001 to present, Manager of Environmental Division, Paterson Group Inc., Ottawa, Ontario

- Manage all aspects of the environmental division (management of personnel, budgeting, invoicing, scheduling, business development, reporting, marketing, and fieldwork).
- Review day to day operations within the environmental division.
- Design, perform, and lead Phase I, II and Phase III ESAs, Remediation's, Brownfield Applications and Record of Site conditions, fieldwork surveys, excavation, monitoring, laboratory analysis, and interpretation.
- Write, present, and publish reports with methodology and laboratory analysis results, along with recommendations for environmental findings.
- Responsible for ensuring projects meet Ministry of Environment and Climate Change Standards and Guidelines.
- Building and fostering relationships with clients, stakeholders, and Ministry officials.
- Supervise and continuous training of staff in environmental methods (environmental sampling techniques, technical expertise and guidance).
- Applied due diligence in ensuring the health and safety of staff and the public in field locations.

1991 to 2001, Geotechnical and Environmental Engineer, Paterson Group Inc., Ottawa, Ontario

- Provide on-site geotechnical and environmental expertise to various clients.
- Oversee geotechnical and environmental investigations for drilling and test pitting on numerous proposed utility installations, residential and commercial developments.
- Problem solving to help advance or maintain project schedules.
- Complete environmental reports with recommendations to meet environmental standards set by MOE and CCME standards.
- Conduct site inspections, bearing medium evaluations, bearing surface inspections, concrete testing and field density testing.
- Liaising with contractors, consultants and government officials.
- Provide cost estimates for geotechnical and environmental field programs and construction costs.
- Review RFI's, submittals, monthly progress reports and other various construction related work.
