**Re: Phase One Environmental Site Assessment
3160 Carp Road
Ottawa, Ontario**

Enclosed is our Phase One Environmental Site Assessment (ESA) report for the above noted property. The report presented herein is based on the scope of work summarized in the proposal dated December 14, 2022. This report was prepared Mohit Bhargav, M.Sc.E., EIT, and reviewed by Sherry Eaton, QP(ESA).

EXECUTIVE SUMMARY

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by TLC Holdings Ltd. (TLC) to carry out a Phase One Environmental Site Assessment (ESA) of the property located at 3160 Carp Road in Ottawa, Ontario (hereafter referred to as the Site and Phase One Property). It is understood that the Phase One ESA is required in support of redevelopment and associated planning-related approvals. It is also our understanding that the land use of the Site will not be changing to a more sensitive land use thus the filing of a Record of Site Condition (RSC) under Ontario Regulation (O.Reg.) 153/04 will not be required. The Phase One ESA was carried out in general accordance with O.Reg. 153/04.

The primary objective of this Phase One ESA is to identify and document current and historical environmental conditions and operations or practices at and in the vicinity of the Site that have the potential to impact soil and/or groundwater quality at the Site, and to determine if such operations or practices result in any Areas of Potential Environmental Concern (APECs) in association with the Site. The general objectives were met through the evaluation of the information gathered from the review of records, interviews, and a site reconnaissance.

Based on the Phase One ESA findings, nine potentially contaminating activities (PCAs) were identified resulting in four APECs associated with the Site. These APECs include:

- APEC 1 – Historical, large-scale application of pesticides on the Site. COPCs include OCPs and metals with the potential for impacts in soil.
- APEC 2 – Fill material of unknown origin from the historical building is expected on the north corner of the Site. COPCs include M&I, PHCs, BTEX, and PAHs with potential for impacts in soil.
- APEC 3 – Imported fill material of unknown quality was observed during the Phase One Site visit. COPCs include M&I, PHCs, BTEX, and PAHs with potential for impacts in soil.
- APEC 4 – An AST was noted approximately 20 meters south of the Site at 3108 Carp Road. COPCs include PHCs and BTEX with potential impacts in soil and groundwater.

Based on the identification of these APECs, a Phase Two ESA is recommended to investigate the potential for soil and groundwater impacts at the Site.

1.0 INTRODUCTION

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by TLC Holdings Ltd. (TLC) to carry out a Phase One Environmental Site Assessment (ESA) of the property located at 3160 Carp Road, in Ottawa, Ontario (hereafter referred to as the Site and Phase One Property). It is understood that the Phase One ESA is required in support of planning-related approvals. It is also our understanding that the land use of the Site will not be changing to a more sensitive land use thus the filing of a Record of Site Condition (RSC) under Ontario Regulation (O.Reg.) 153/04 will not be required. The Phase One ESA was carried out in general accordance with O.Reg. 153/04. The location of the Site is provided on Figure A.1 in Appendix A.

The primary objective of this Phase One ESA is to identify and document current and historical environmental conditions and operations or practices at and in the vicinity of the Site that have the potential to impact soil and/or groundwater quality at the Site, and to determine if such operations or practices result in any Areas of Potential Environmental Concern (APECs) in association with the Site. The general objectives were met though the evaluation of the information gathered from the review of records, interviews, and a Site reconnaissance.

The Phase One ESA was conducted by GEMTEC staff members whose qualifications are provided in Appendix B.

1.1 Phase One Property Information

The legal description of the Site consists of:

- PART LOT 11 CONCESSION 2 HUNTLEY; PART LOT 12 CONCESSION 2 HUNTLEY AS IN NS 47572 EXCEPT PTS 2 & 4, 5R7272, PART 1 5R4304, PART 1 5R7483, PART 2 5R10733 & PARTS 1 & 2, 5R11909; S/T N661110, N358106; WEST CARLETON;

The Site is presently owned by TLC Holdings Ltd. The contact person for the Site at the time of this reporting is Tom Carroll, owner of the Site.

1.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Phase One Property. Based on GEMTEC's review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the Site visit, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA.

The Site and limits of the Phase One Study Area are provided on Figure A.1, Appendix A.

2.0 SCOPE OF THE INVESTIGATION

2.1 General Objectives

The Phase One ESA was carried out in general accordance with O.Reg. 153/04. The primary objective of the Phase One ESA is to identify any former, or current, operations or practices that may represent APECs with respect to the Site.

The general objectives were met through the evaluation of the information gathered from the review of records and available documents, interviews with relevant persons, and a site reconnaissance. Specific objectives for these components and the tasks completed to achieve these objectives are described in Section 2.2.

2.2 Records Review

A review of information was conducted to identify actual or potential sources of contamination within the study area from the following sources:

- Bedrock and Overburden Geology Maps – Overburden and bedrock geology maps provided by Natural Resources Canada were reviewed to identify the underlying soil deposits and bedrock types.
- Title Abstract – A chain of title abstract for the Site was obtained through Environmental Risk Information Services (ERIS).
- ERIS Databases – The ERIS report searches 74 public and private information databases to identify potential environmental concerns. An ERIS report was obtained for the Site and Phase One Study Area.
- A records search was requested from the Technical Standards and Safety Authority (TSSA) in March 2023 for the Site.
- Google Earth, National Air Photo Library (NAPL) Aerial Photographs, and geoOttawa Photographs – Aerial photographs from the years 1945, 1955, 1968, 1987, and 2021 were obtained from NAPL through ERIS. They were reviewed for the Site and study area to identify areas of potential environmental concern resulting from historical land uses on the Site and surrounding areas.
- Fire Insurance Maps and Reports – A search for fire insurance site plans was conducted for the Site.
- City Directories – A City Directory Report was obtained through ERIS for the Site and surrounding streets within the study area.
- City of Ottawa Historical Land Use Inventory (HLUI) – HLUI report was obtained from the City of Ottawa for the Site and study area.
- Well Records – The Ministry of Environment, Conservation and Parks (MECP) Well Records website was searched for the Site and the study area. Any records obtained were reviewed for depth to groundwater and soil stratigraphy.
- A Freedom of Information (FOI) request was submitted to the MECP for records relating to the Site.

2.3 Interview

An interview was conducted with the owner of the Site, Tom Carroll, outlined in Section 4.

2.4 Site Reconnaissance

The Site was visually assessed to document current conditions and to evaluate the potential for environmental impacts to on-Site soil and groundwater. Adjacent and neighbouring properties within the study area were assessed from publicly accessible boundaries to evaluate the potential for environmental impacts to the Site.

3.0 RECORDS REVIEW

3.1 General

3.1.1 First Developed Use Determination

As defined in O.Reg. 153/04, first developed land use includes the development of the first structure on Site or the first potentially contaminating activity on Site. According to a review of available historical photographs, agricultural activities are visible on the Site prior to 1945. As pesticide use has been associated with agricultural activities and is a potentially contaminating activity, the first developed land use is agricultural prior to 1945.

3.1.2 Fire Insurance Plans and Reports

No fire insurance plans were available for the Site or study area. A copy of the OPTA search report is provided in Appendix C.

3.1.3 Historical Reports

One report for the Site was available for review is summarized below.

Hydrogeological Investigation & Terrain Analysis, Proposed Industrial Subdivision, 3160 Carp Road, Ottawa, Ontario, GEMTEC Consulting Engineers and Scientists (July 2020)

The following are of note based on a review of this report:

- The investigation included the excavation of 15 test pits across the Site, installation of five overburden monitoring wells and four groundwater test wells. The wells are still present on the Site.
- Overburden on the Site was noted as being approximately 6 to 8 metres with the exception of a small portion on the south side which was 1.8 metres thick.
- The report did not indicate a groundwater flow direction.

Large quantities of imported crushed rock were present on the Site during the Phase One Site visit. One report for the property that the crushed rock originated from was available for review.

Summarized Environmental Soil Characterization Study, 1619-1655 Carling Avenue, Ottawa, ON, DEC Enviro (August 2022)

The following are of note based on a review of this report:

- The investigation included the excavation of 25 test pits from across the property.
- 42 soil samples were collected from the test pits and submitted for one or more of the following parameters: petroleum hydrocarbons (PHC F1-F4), metals, inorganics, benzene, toluene, ethylbenzene, xylenes (BTEX), and volatile organic compounds (VOCs).
- Multiple soil samples exceeded the MECP Table 1 Site Condition Standards for at least one the following: PHC F1-F4, PAHs, and metals/inorganics.
- A comparison of the soil samples to O.Reg. 406/19 Table 2.1: Full Depth Excess Soil Quality Standards in a Potable Ground Water Condition indicated exceedances to metals and PAHs.
- The report did not note any sampling of crushed rock or groundwater.

3.1.4 Environmental Source Records and Databases

3.1.4.1 Chain of Title

A chain of title abstract was obtained from ERIS and is included in Appendix D. The following are of note based on a review of the title abstracts:

- PIN 04537-0298 (LT)
 - A transfer from Albert Gale Agencies Limited to T&L Carroll Holdings Inc in 2023.

3.1.4.2 ERIS Database Report

GEMTEC contacted ERIS to conduct a search of 74 public and private information databases for the Site and the study area. The complete ERIS report, including a list of databases searched, is provided in Appendix E. The listings of note for the Site and adjacent properties are provided in the table below:

Address/ Location	Distance from Site	Company/ Name	Description
3155 Carp Road	65 m west	Thunderbolt Contracting Ltd.	Listed as a pesticide operator in 2022.
3096 Carp Road	90 m south	S&A Realty Ltd.	Listed as having a 4,350 L, single wall, steel fuel oil tank in 2013.
3075 Carp Road	175 m south	NA	Listed as a pesticide operator in 2022.
3070 Carp Road	220 m south	Weedmark Service Centre	Multiple records for a retail fuel storage tank(s). No additional information provided for the tank(s).
129 John Cavanaugh Road	235 m south	T.A. Morrison & Co.	Described as being a resin and synthetic rubber manufacturer from 2006-2008.
119 John Cavanaugh Road	230 m south	Senstar Corporation	Described as being an electrical equipment and component manufacturer in 2009.

The unplotable report summary was reviewed to determine if any of the records were located on the Site or within the study area. Many of the entries were only located geographically by concession, lot number, or company. Due to the uncertainty related to the location of the entries, which in most cases could not be confirmed as being present within the study area, these activities were not summarized in this report.

3.1.4.3 City Directories

A review of the city directories from 1990s to 2021 was completed for the Site and several adjacent properties. A summary of relevant information based on a review of the city directory information is provided in the table below. A copy of the city directory records is provided in Appendix F.

Civic Address	City Directory information
145 John Cavanaugh Drive	Senstar Site (2012-2017)
3070 Carp Road	Weedmark Service Centre (1996-2021)
1500 Thomas Argue Road	Carp Flying Academy Inc (2012) West Capital Developments (2012) Westair Aviation (2012, 2017) Carp Airport (2017, 2021)
3155 Carp Road	Thunderbolt Contracting Inc (2017, 2021)

The Carp Airport was noted at 1500 Thomas Argue Road. As the operational and developed portion of the property is located over 600 m away from the Site, this was not considered to be a potentially contaminating activity.

3.2 Regulatory Information

3.2.1 Technical Standards and Safety Authority

The TSSA was contacted on March 22, 2023, for available records for the following addresses: 3084, 3090, 3096, 3108, 3116, 3140, 3149, 3155, 3160, 3186 Carp Road. The response from the TSSA indicated that there was a record for a steel furnace oil tank at 3096 Carp Road approximately 90 meters south of the Site. The record noted that the tank was removed on November 24, 2008 and confirmatory samples were collected from the side walls and base of the excavation. The tank was noted as being in good condition with no visible evidence of cracks or corrosion. The record noted that the tank was installed in 2002 to replace a previous tank on the property. No further details were provided regarding the previous tank. Laboratory results indicated that the soil samples met the applicable Table 2 Site Condition Standards for industrial/commercial/community property use.

A copy of the search requests and the records from the TSSA are provided in Appendix G.

3.2.2 Ontario Ministry of Environment, Conservation and Parks

A Freedom of Information request was submitted to the Ontario Ministry of the Environment, Conservation and Parks (MECP) for a search of environmental records relating to the Site. The response from the MECP indicated there are no records for the Site. A copy of the FOI response is provided in Appendix H.

3.2.3 City of Ottawa

A Historical Land Use Inventory (HLUI) was provided by the City of Ottawa for the Site, which included the Site and the study area. The complete HLUI report, including a list of databases searched, is provided in Appendix I. All listing in the HLUI report were reviewed and the relevant highlights pertaining to potentially contaminating activities are as follows:

Address/ Location	Distance from Site	Company/ Name	Description
3070 Carp Road	220 m south	Weedmark Service Centre	Listed as a gasoline service station with two gasoline underground storage tanks.
119 John Cavanaugh Road	230 m south	Senstar Corporation	Electric Lighting Industry

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs were provided to GEMTEC by ERIS and were obtained at regular intervals from the National Air Photo Library (NAPL) and Maxar. GEMTEC also reviewed aerial photos online (via the City of Ottawa's geoOttawa). Aerials were selected for review considering suitable scale for analysis and coverage area. The earliest photograph obtained was from 1945. Observations made with respect to the selected aerial photographs are summarized in the table below. The aerial photographs reviewed include the following years: 1945, 1955, 1968, 1976, 1987, 1999, 2008, 2017, and 2021.

Year	Source	Site	Surrounding Area
1945	NAPL	The Site is comprised of agricultural fields. A structure is visible in the north corner of the Site.	North: Agricultural fields and vegetation. East: Agricultural fields.

Year	Source	Site	Surrounding Area
			<p>South: Potential residential/agricultural developments, and agricultural fields.</p> <p>West: Potential residential/agricultural developments, Carp Road, and agricultural fields.</p>
1955	NAPL	The structure visible on Site in the 1945 aerial photograph is no longer visible. Potential debris from the structure is visible.	There are no significant changes within the study area compared to the aerial photograph from 1945.
1968	NAPL	There are no significant changes within the Site compared to the aerial photograph from 1955.	There are no significant changes within the study area compared to the aerial photograph from 1945.
1976	Interactive Map*	There are no significant changes within the Site compared to the aerial photograph from 1955.	Additional commercial developments are visible to the south of the Site.
1987	NAPL	A roadway along the northwest border of the Site is visible. It appears that the majority of the Site is grown over with vegetation and is no longer used agriculturally. A small portion along the northeast boundary of the Site appears to still be used agriculturally.	There are no significant changes within the study area compared to the aerial photograph from 1976.
1999	Interactive Map*	There are no significant changes within the Site compared to the aerial photograph from 1987.	<p>A golf course is visible north of the Site.</p> <p>Additional residential developments are visible south of the Site.</p>
2008	Interactive Map*	There are no significant changes within the Site compared to the aerial photograph from 1987.	A commercial/industrial development is visible adjacent north of the Site.
2017	Interactive Map*	There are no significant changes within the Site compared to the aerial photograph from 1987.	Additional commercial development is visible west of the Site.
2021	Maxar	There are no significant changes within the Site compared to the aerial photograph from 1987.	There are no significant changes within the study area compared to the aerial photograph from 2021.

Notes: * geoOttawa – Publicly Available

Photographs obtained from NAPL can be found in Appendix J.

3.3.2 Surficial and Bedrock Geology

Surficial and bedrock geology maps of the Ottawa area were reviewed with Google imagery. Based on the review, overburden in the vicinity of the northeast portion of the Site generally consists of silt and clay, minor sand and gravel, massive to well laminated. The northwest portion of the Site consists of sand, gravel, minor silt and clay with littoral deposits (ESRI, 2016). A review of MECP well records in the vicinity of the Site indicates that the drift thickness is approximately 8 metres (Well Records, 2021). Bedrock is mapped as limestone, dolostone, shale, arkose, and sandstone from the Ottawa/Simcoe Group and the Shadow Lake Formation (ESRI, 2016).

3.3.3 Topography, Hydrology

Topographic mapping available through the City of Ottawa's interactive mapping tool geoOttawa was reviewed to determine topographic features in the vicinity of the Site and study area.

The elevation of the Site approximately 110 metres above sea level and is relatively flat. Topography in the study area appears to slope to the northeast (geoOttawa, n.d.).

Regional groundwater flow often reflects topographic features. Based on the topography, it is anticipated that regional shallow groundwater would flow to the northeast.

3.3.4 Fill Materials

Based on the 1945 aerial photograph, a structure was previously present on the north portion of the Site. In the 1955 aerial photograph, the structure is no longer present and potential debris from the structure is visible. Based on this, there is potential for fill and/or debris to be present in the vicinity of the former structure.

3.3.5 Water Bodies and Areas of Natural Significance

One small, unnamed pond was identified approximately 205 metres north of the study area (Ontario Hydro Network (OHN) – Waterbody, 2023).

No areas of natural and scientific interest (ANSIs) were identified on the Site or within the study area (Areas of Natural and Scientific Interest, 2022).

3.3.6 Well Records

Well records were reviewed via the MECP website. A total of 20 wells were identified within the study area and were indicated to be used for domestic wells and monitoring wells. The well records indicated the stratigraphy of the overburden in the area generally consists of clay and gravel.

4.0 SITE OPERATING RECORDS

No Site operating records were provided for review.

5.0 INTERVIEWS

The following were interviewed in association with the Phase One ESA:

- Owner of the property: Tom Carroll

Relevant information obtained during the interviews is provided in Section 6.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

A Site reconnaissance was carried out on March 31, 2023, from approximately 10:00 am to 12:30 pm. The weather at the time of the Site reconnaissance was overcast and approximately 1 degree Celsius.

The Site reconnaissance was completed by Mohit Bhargav of GEMTEC. The Site reconnaissance was completed to identify any PCAs associated with the current activities on the Site and/ or surrounding properties.

Photographs of the Site were taken during the Site reconnaissance to document the general condition of the Site and any PCAs. The relevant photographs are presented in Appendix K.

6.2 Specific Observation at the Phase One Property

The following observations were made during the Site reconnaissance:

Topic	Observations	Source
Building Areas	No buildings were present on Site.	Site observation.
Number of Floors (include all levels, whether above or below ground)	Not applicable	Not applicable
Number, Age, and Depth of Levels Below Ground Level	Not applicable	Not applicable
Number and Details of all Aboveground Storage Tanks (“ASTs”)	No ASTs were observed on the Phase One Property. An aboveground storage tank (AST) was noted approximately 20 meters south of the Phase One Property at 3108 Carp Road. The tank appeared to be in good condition.	Site observations, Site representative
Number and Details of all Underground Storage Tanks (“USTs”)	No USTs were observed on the Phase One Property.	Site observations, Site representative

Topic	Observations	Source
<u>Underground Utilities</u>		
Potable and Non-Potable Water Sources	No active water source is reportedly available at the Site.	Site representative
Utility Lines Present (i.e., Electrical, Natural Gas, other)	None identified.	Site observations, Site representative
Sanitary/Process Wastewater Receptor	None identified.	Site observations, Site Representative
Sanitary Sewer Connection	None identified.	Site representative, Site observations
Septic Systems	None identified.	Site observations, Site representative
Storm Water Flow	None identified.	Site observations, Site representative
Storm Sewer Connection	None identified.	Site observations, Site representative
<u>Interior of Structures</u>		
Entry and Exit Points for Site Buildings	Not applicable	Not applicable
Existing and Former Heating System(s) (include fuel type / source)	Not applicable	Not applicable
Existing and Former Cooling System(s) (include fuel type / source)	Not applicable	Not applicable
Drains, Pits, and Sumps (include current use, if any, and former use)	Not applicable	Not applicable
Unidentified Substances	None identified	Site observations, Site representative
Floor Stains or Corrosion Located near a Potential Discharge Location	None identified	Site observations
<u>Miscellaneous Exterior</u>		
Location of any Current and Former Wells	Several monitoring wells were observed across the Site. The wells were installed as part of a hydrogeological investigation completed by GEMTEC in 2020.	Site observations, previous reports
Ground Cover (i.e. grass, gravel, soil, or pavement, etc.)	Ground cover consisted of grass and crushed rock. Observations were limited by snow cover.	Site observations
Current or Former Railway Lines or Spurs	None observed or reported.	Site observations.

Topic	Observations	Source
Presence of Stained Soil, Vegetation, or Pavement	None observed.	Site observations
Presence of Stressed Vegetation	None observed.	Site observations
Areas Where Fill and/or Debris Materials Appear to Have Been Placed	Crushed rock was stockpiled on the southwest portion of the Site. The client indicated that the crushed rock originates from blasted bedrock and will be used the roadways/parking. Stockpiled soils were also observed on the southwest portion of the Site. The client indicated that the stockpiled soils originate from the Site.	Site observations Site representative
Potentially Contaminating Activity	As noted above, imported, crushed rock was present across the southwest portion of the Site.	Site observations

6.3 Enhanced Investigation Property

The Site is not considered an enhanced investigation property.

6.4 Surrounding Land Use

During the Site visit, a visual reconnaissance of the outdoor operations in the Phase One Study Area was carried out from the Site and publicly accessible areas. The surrounding properties include agricultural, community use, commercial, and residential land uses, as illustrated in Figure A.1, in Appendix A.

North: Agricultural use and commercial use (Irish Hills Golf and Country and KOTT Landscaping Products)

East: Agricultural fields and a cemetery.

West: Commercial use properties including Thunderbolt Contracting and community use roadway (Carp Road) and church.

South (down-gradient): Commercial use properties including Shouldice Mechanical, Novotech Technologies Inc, Senstar Corporation, Canhil Commercial and residential dwellings.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Potentially Contaminating Activities

As per O.Reg. 153/04, a potentially contaminating activity (PCA) means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred on the Phase One Site or in the Phase One Study Area. As per the regulation, a PCA located on the Phase One Site or in the Phase One Study Area may require the identification of an area of potential environmental concern (APEC). As per the regulation, an APEC means the area on, in or under the Phase One Property where one or more contaminants are potentially present, as determined through the identification of past or present uses on, in or under the Phase One Property and the identification of a PCA.

A summary of the identified PCAs and the rationale for the identification of PCAs as an APEC are provided in the table below. PCA locations are shown on Figure A.1, Appendix A.

PCA #	Address/ Location	PCA ID	Distance from Site	Description	APEC Rationale
1	3160 Carp Road	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	Historical, large-scale pesticide use across the Site is inferred given the size of the Site and since the majority of the Site was used for agricultural purposes. Based on the interview, the Site representative did not have any information pertaining to pesticide use on the Site.	Yes PCA is located on the Phase One Property and must be identified as an APEC, as per O.Reg. 153/04.
2	3155 Carp Road	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	65 m west	Listed as a pesticide operator in 2022.	No This PCA was not considered to be an APEC due to the nature of the activity. It is expected that Thunderbolt Contacting utilizes pesticides off the property at other construction sites.
3	3096 Carp Road	28. Gasoline and Associated Products Storage in Fixed Tanks	90 m south	ERIS and the TSSA had records for a 4,350 L single wall, steel fuel oil tank at the property. The TSSA record included a report which noted confirmatory sampling during the tank removal in 2008. The report indicated that the confirmatory samples met the applicable Table 2 Site Condition Standards for industrial/commercial/community property use.	No Confirmatory soil samples collected during the tank removal indicated that the soil in the vicinity of the former tank were not impacted.
4	3075 Carp Road	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing,	175 m south	Listed as a pesticide operator in 2022.	No This PCA was not considered to be an APEC due to distance from the Site (175 m).

PCA #	Address/ Location	PCA ID	Distance from Site	Description	APEC Rationale
		Processing, Bulk Storage and Large-Scale Applications			
5	129 John Cavanaugh Road	47. Rubber Manufacturing and Processing	235 m south	Described as being a resin and synthetic rubber manufacturer from 2006-2008.	No This PCA was not considered to be an APEC due to distance from the Site (235 m).
6	119 John Cavanaugh Road	19. Electronic and Computer Equipment Manufacturing	230 m south	Described as being an electrical equipment and component manufacturer in 2009.	No This PCA was not considered to be an APEC due to distance from the Site (230 m).
7	3160 Carp Road	30. Importation of Fill Material of Unknown Quality	On-Site	Based on the 1945 aerial photograph, a structure was previously present on the north portion of the Site. In the 1955 aerial photograph, the structure is no longer present and potential debris from the structure is visible. Based on this, there is potential for fill and/or debris to be present in the vicinity of the former structure.	Yes PCA is located on the Phase One Property and must be identified as an APEC, as per O.Reg. 153/04.
8	3160 Carp Road	30. Importation of Fill Material of Unknown Quality	On-Site	Imported, crushed rock was present across the southwest portion of the Site. Insufficient information was available to appropriately characterize the imported material.	Yes PCA is located on the Phase One Property and must be identified as an APEC, as per O.Reg. 153/04.
9	3108 Carp Road	28. Gasoline and Associated Products	20 meters south of the Site	An aboveground storage tank was noted at 3108 Carp Road.	Yes

PCA #	Address/ Location	PCA ID	Distance from Site	Description	APEC Rationale
		Storage in Fixed Tanks		The tank appeared to be in good condition. Construction activities in the vicinity limited further observations of the tank.	The PCA is located in close proximity, upgradient to the Site.

7.2 Areas of Potential Environmental Concern

A summary of the APECs identified at the Phase One Property is provided in the table below. The APEC locations are presented in Figure A.2, Appendix A. Contaminants of potential concern (COPCs) are specified using the method groups as identified in the MECP document "*Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act*", dated March 9, 2004, amended as of July 1, 2011.

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or Sediment)
APEC 1 – Historical pesticide use on the Site.	Site wide	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	OCPs, metals	Soil
APEC 2 – Fill material of unknown origin (historical structure)	North corner of the Site	30. Importation of Fill Material of Unknown Quality	On-Site	M&I, PHCs, BTEX, PAHs	Soil
APEC 3 – Fill material of unknown origin (imported crushed rock)	Southwest portion of the Site	30. Importation of Fill Material of Unknown Quality	On-Site	M&I, PHCs, BTEX, PAHs	Soil
APEC 4 – AST Located at 3108 Carp Road	South portion of the Site	28. Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHCs, BTEX	Soil and Groundwater

Notes:

OCPs – Organochlorine Pesticides

M&I – Metals and Inorganics

PHCs – petroleum hydrocarbon fractions F1 to F4

PAHs – polycyclic aromatic hydrocarbons

BTEX – Benzene, Toluene, Ethylbenzene, Toluene, Xylene

7.3 Phase One Conceptual Site Model

The following key features (as required by O.Reg. 153/04) are presented in Figures A.1, A.2, and A.3, Appendix A:

- Water bodies and areas of natural significance located in the Phase One Study Area;
- Drinking water wells on the Phase One Property;
- Roads (including names) within the Phase One Study Area;
- Uses of properties adjacent to the Phase One Property; and,
- Location of identified PCAs in the Phase One Study Area (including any storage tanks).

The following describes the Phase One ESA Conceptual Site Model (CSM) based on the information obtained and reviewed as part of this Phase One ESA:

- The Phase One property is located at 3160 Carp Road in Ottawa, Ontario. The Site is approximately 57 acres in size with no structures present. At the time of the Site reconnaissance, grading activities were underway in preparation for Site development with blast rock importing and stockpiling/hauling on the southwest portion. No environmental quality data was available for the blast rock that was being imported to the site. A previous report for the blast rock source site was provided, however, the quality data was for overburden soil only. The data for the overburden soil indicated exceedances for metals and PAHs when compared to the O.Reg. 406/19 Table 2.1: Full Depth Excess Soil Quality Standards in a Potable Ground Water Condition.
- Previous uses of the Site include agricultural operations. Aerial photographs indicate that the Site was used for agricultural operations prior to 1945.
- Current surrounding land uses include agricultural, community, commercial, and residential.
- The Site and nearby developed properties are serviced with natural gas and hydro. Groundwater is used as the source of potable water in the study area.
- The elevation of the Site approximately 110 metres above sea level and is relatively flat. Topography in the study area appears to slope to the northeast (geoOttawa, n.d.).
- Surficial soil conditions consist of silt and clay, minor sand and gravel, massive to well laminated for the northeast portion of the Site. The northwest portion of the Site consists of sand, gravel, minor silt and clay with littoral deposits.
- Bedrock is mapped as limestone, dolostone, shale, arkose, and sandstone from the Ottawa/Simcoe Group and the Shadow Lake Formation.
- Shallow groundwater in the vicinity of the Site is reported to be roughly 1.56 m bgs based on water well reports for the area of the Site.
- Shallow groundwater direction is interpreted to be in a north easterly direction.
- No areas of natural and scientific interest were identified on the Site or within the study area.

- One small, unnamed pond was identified approximately 205 metres north of the study area
- Based on the review of records, the interview and the Site reconnaissance completed as part of the Phase One ESA, GEMTEC identified nine PCAs resulting in four APECs on the Site. These APECs include:
 - APEC 1 – Historical, large-scale application of pesticides on the Site. COPCs include OCPs and metals with the potential for impacts in soil.
 - APEC 2 – Fill material of unknown origin from the historical building is expected on the north corner of the Site. COPCs include M&I, PHCs, BTEX, and PAHs with potential for impacts in soil.
 - APEC 3 – Imported fill material of unknown quality was observed during the Phase One Site visit. COPCs include M&I, PHCs, BTEX, and PAHs with potential for impacts in soil.
 - APEC 4 – An AST was noted approximately 20 meters south of the Site at 3108 Carp Road. COPCs include PHCs and BTEX with potential impacts in soil and groundwater.

7.3.1 Uncertainty and Absence of Information

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One ESA CSA or the findings of this Phase One ESA. The Site was snow covered at the time of the Site reconnaissance, but this is not considered to have limited the findings of this assessment.

8.0 CONCLUSIONS

8.1 Need for a Phase Two ESA

Based on the information obtained and reviewed as part of this Phase One ESA, four APECs were identified at the Phase One Property. Based on this, a Phase Two ESA is recommended.

10.0 LIMITATIONS AND USE OF REPORT

This report was prepared for the exclusive use of the TLC Holdings Ltd and is based on data and information collected during the Phase One ESA of the Site conducted by GEMTEC. This report may not be relied upon by any other person or entity without the express written consent of GEMTEC and TLC Holdings Ltd. In evaluating this Site, GEMTEC has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others. GEMTEC disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of GEMTEC's assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within GEMTEC's proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. GEMTEC did not perform a complete assessment of all possible conditions or circumstances that may exist at the Site referenced in the report. Conditions may therefore exist which were not detected given the limited nature of the assessment GEMTEC was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the report. It is understood that the services provided for in the scope of work allowed GEMTEC to form no more than an opinion of the actual conditions at the Site at the time of the Site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. If a service is not expressly indicated, do not assume it has been provided. The conclusions provided herein represent the best judgment of GEMTEC based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the Phase One ESA is sufficient to identify existing and/or potential environmental liabilities that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the Site was carried out as part of this assessment. The Phase One ESA does not include a program of intrusive observation/testing. These activities would be carried out as part of a Phase Two ESA. This environmental assessment included only a cursory overview of the neighbouring land uses from public right of ways and from the Site and does not constitute a complete assessment of the adjacent sites.

11.0 CLOSURE

The undersigned Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust this report provides sufficient information for your present purposes. If you have any questions concerning this report, please do not hesitate to contact our office.

Regards,

APPENDIX B

Qualifications of Assessors

QUALIFICATION OF ASSESSORS

Mohit Bhargav, M.Sc.E., EIT – Environmental Scientist

The primary assessor for this Phase One Environmental Site Assessment (ESA) was Mr. Mohit Bhargav, Environmental Scientist with GEMTEC. Mohit has Master of Science Civil Engineering with a specialization in water/wastewater treatment. Mr. Bhargav's formal education and work experience in environmental consulting with GEMTEC has provided him with the knowledge and expertise to identify sources of environmental concern and evaluate their potential to cause adverse environmental impacts.

Sherry Eaton, M.Sc., P.Geo., QP(ESA), PMP – Senior Environmental Consultant

The Phase One ESA was carried out under the supervision of Ms. Sherry Eaton. Sherry has over 30 years of consulting experience and specializes in assisting clients with the management of the environmental aspects of their operations, re-development projects and acquisition/divestment activities. She has extensive experience providing various environmental services including Phase I and II Environmental Site Assessments, contaminant and hydrogeological site characterization, remedial planning and implementation; risk assessment; filing of Records of Site Conditions; compliance and contract support; waste and excess soil characterization / management; designated substance and hazardous materials surveys/management and emergency response. Sherry has a Master of Science degree in Environmental Science, is a practicing member of the Association of Professional Geoscientists of Ontario, and is certified by the Project Management Institute as a Project Management Professional (PMP). Sherry is a "qualified person" under Ontario Regulation 153/04 of the Environmental Protection Act.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Executive Summary: Summary By Data Source

BORE - Borehole

A search of the BORE database, dated 1875-Jul 2018 has found that there are 2 BORE site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
	ON	104.6	18
	ON	180.4	29

CA - Certificates of Approval

A search of the CA database, dated 1985-Oct 30, 2011* has found that there are 1 CA site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
Senstar-Stellar Corporation	119 John Cavanaugh Road Ottawa ON	241.0	43

CFOT - Commercial Fuel Oil Tanks

A search of the CFOT database, dated Feb 28, 2022 has found that there are 1 CFOT site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
S. & A. REALTY LIMITED	3096 CARP RD OTTAWA K0A 2H0 ON CA ON	122.8	21

DTNK - Delisted Fuel Tanks

A search of the DTNK database, dated Feb 28, 2022 has found that there are 2 DTNK site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
S. & A. REALTY LIMITED	3096 CARP RD OTTAWA K0A 2H0 ON CA ON	122.8	21
S. & A. Realty Ltd.	3096 Carp Rd., Ottawa OTTAWA ON	122.8	21

EASR - Environmental Activity and Sector Registry

A search of the EASR database, dated Oct 2011- Jan 31, 2023 has found that there are 1 EASR site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
THUNDERBOLT HOLDINGS INC.	1-3155 Carp RD Carp ON K0A 1L0	81.7	15

EBR - Environmental Registry

A search of the EBR database, dated 1994 - Jan 31, 2023 has found that there are 2 EBR site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>
Senstar Corporation	119 John Cavanaugh Road Ottawa K0A 1L0 CITY OF OTTAWA ON	241.0	43
Senstar-Stellar Corporation	119 John Cavanaugh Road Ottawa Ontario K0A 1L0 Ottawa ON	241.0	43

ECA - Environmental Compliance Approval

A search of the ECA database, dated Oct 2011- Jan 31, 2023 has found that there are 5 ECA site(s) within approximately 0.25 kilometers of the project property.

<u>Site</u>	<u>Address</u>	<u>Distance (m)</u>	<u>Map Key</u>

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Oct 2022

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-May 31, 2022

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2020

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-May 31, 2022

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Sep 2022

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2022

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jan 31, 2023

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2022

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jan 31, 2023

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jan 31, 2023

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jan 31, 2023

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Dec 31, 2022

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2021

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Dec 2022

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2023

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2021

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2022

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jan 31, 2023

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jan 31, 2023

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jan 31, 2023

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2023

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-May 31, 2022

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jan 31, 2023

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30 2022

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX F

Subject: 3096 CARP ROAD, OTTAWA, ON
Your File No.: 102151.001
WO No.: 8286012

Dear Madam/Sir:

We are in receipt of your correspondence wherein you requested the release of information regarding the above noted address.

Requested records relating to the following Program(s) were located:

<u>Program</u>	<u>Record</u>	<u>Documents Attached</u>
Fuels Safety	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Boiler/Pressure Vessel**	<input type="checkbox"/>	<input type="checkbox"/>
Elevating & Amusement Devices	<input type="checkbox"/>	<input type="checkbox"/>
Other	<input type="checkbox"/>	<input type="checkbox"/>

**For BPV, if it has been indicated that records have been located but are not attached, it is likely that TSSA may not be the keeper of the records you are looking for, see note below.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

Should you have any questions, please contact Public Information at publicinformationservices@tssa.org.

Yours truly,

N. Carty

Nicola Carty
Public Information Services

Limitations and Notices:

General:

TSSA, as a safety regulator, uses inspection resources to address the greatest harm posed to the public. Thus, inspection only follows-up on safety orders it issues based on the degree of risk posed by the non-compliance identified in the order(s). All high-risk orders will result in a follow-up inspection by TSSA until the non-compliance is resolved. TSSA no longer follows-up on low or medium risk orders referred to as safety tasks, therefore, TSSA can no longer provide you with a report indicating the safety tasks (low and medium-risk orders) have been resolved. This information should be obtained from the device/facility owner or their contractor. One can also engage a third-party contractor to confirm device/facility compliance.

The Public Information Department, (PID), can only provide **existing** records for a specific location, facility, or device. If an inspection or any other type of record does not exist, PID cannot instruct TSSA to do work, such as an inspection, to create a record. TSSA, as an outcome-based regulator, deploys all of its resources, including, inspections to address the greatest harm posed to the public; and as such, cannot deploy resources to create records to satisfy an inquiry.

Please Note: While the PID provides existing records for a specific location, facility, or device; it does not interpret or provide further explanations of the content contained in the document.

TSSA Fuels Safety:

If you have environmental concerns regarding this property, you should consider hiring an environmental consultant to conduct an environmental assessment of the property in question.

- Sites that have not been licensed since 1987 may not be in TSSA records.
- Be advised, TSSA Fuels Safety Division did not register:
 - private fuel underground/ aboveground storage tanks prior to January of 1990; and
 - furnace oil tanks prior to May 1, 2002.
- Fuels Safety Division does not register
 - private waste oil tanks in apartments, office buildings, residences etc.; and
 - aboveground gas or diesel tanks.
- The *Technical Standards and Safety Act* and associated regulations do not require the registration of private fuel outlets, nor does it require that any documentation on these facilities be submitted to or reviewed or approved by TSSA. As a result, TSSA has limited information on these facilities. TSSA cautions that any information provided may be inaccurate, incomplete or out of date.

TSSA Elevating & Amusement Devices Program Notice:

- All orders and/or directions issued by the TSSA Inspector have a compliance date and the owner or designated contractor are required to comply within the specified time limit. Compliance is the responsibility of the owner or operator of the device.
- All written declarations of compliance (where eligible) should be sent to TSSA. Once a declaration of compliance has been received, the outstanding order will be resolved.
- Each report shows the details and date of the inspection conducted by TSSA at the requested location.
- The Ontario Amusement Devices Regulation (O. Reg. 221/01) was adopted in 2001. Since that time, TSSA retains copies of technical dossiers of new amusement devices in Ontario (as per TSSA's retention policy). However, for rides that existed prior to the adoption of the Regulation, which were

subject to a “grandfathering-in” clause, technical dossiers were not required to be filed with the TSSA. However, if the amusement ride remains in operation, as per ASTM requirements, the owner/licensee must possess an operations document for the device in question.

Federal Elevators

- Please be advised that without the express written consent of the owner, the TSSA does not release any information with respect to federal elevators or federal elevating equipment. The TSSA is a provincial regulator for the province of Ontario and federal elevators do not fall within the scope of TSSA's provincial mandate and the *Technical Standards and Safety Act* and associated Regulations. Further, the TSSA's Access and Privacy Code only applies to information collected, used, or disclosed by the TSSA in the course of TSSA's administration of the *Act*. Therefore, information with respect to federal elevators or federal elevator equipment is outside of the administration of the *Act*, and outside of the scope of the TSSA's Access and Privacy Codes.

Indigenous Lands

- Please be advised that the TSSA does not release any information with respect to indigenous lands, which are outside of the TSSA's mandate, without the express written permission from the Band. The *Technical Standards and Safety Act*, associated regulations, and TSSA's Access and Privacy Code does not apply to indigenous lands.

TSSA Boilers and Pressure Vessels (BPVs) Program Notice:

- Be advised, TSSA does not typically periodically inspect BPVs. These inspections are usually performed by insurance companies.
- **Inspection reports may not be submitted to TSSA by insurance companies; therefore, while TSSA may have some evidence of a BPV at a location on file, there may be no inspection records pertaining to BPVs located at the address provided.
- As of July 1, 2018, BPVs in Ontario may not be operated unless the Director has issued a current certificate of inspection (COI) to the owner or operator. A COI will be issued to the owner or operator of the BPV by TSSA after TSSA has received a Record of Inspection (ROI) from the insurer/third-party inspector, the associated fees have been paid and the BPV has passed a periodic inspection.
- Please note that if the BPV in question is insured, the insurance company may have additional inspection records. Please contact the insurer directly should you wish to obtain further information.

**Underground Storage Tank Removal – 3096 Carp Road, Ottawa ON
TSSA Service Request No. 1276420**

Dear Dr. S. Mounib,

Thank you for submitting the report entitled "*Soil Sampling and Testing- Former Underground Storage Tank, 3096 Carp Road, Ottawa, Ontario,*" prepared by Kollaard Associates Engineers (Kollaard) and dated December 22, 2008. The report informs Fuels Safety Program (FSP) of the removal of one (1) underground storage tank (UST) formerly used to store furnace oil for the building. Fuel Safety Program (FSP) will update our file accordingly to reflect the removal of the tank system at the above mentioned address.

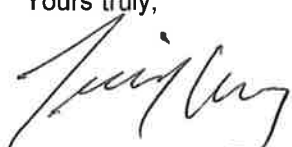

The Kollaard report provides the following information:

- Kollaard conducted a site visit on November 24, 2008.
- An excavation was advanced and one (1) steel furnace oil UST was removed by Gerry Crepin Cartage Ltd.
- Kollaard indicates that the steel tank was in good condition with no visible evidence of cracks or corrosion.
- Excavated soil was stockpiled south of the excavation and Kollaard indicates that hydrocarbon staining was not observed.
- Four (4) soil samples were collected from the excavation (SA-1 to SA-4) and were submitted for laboratory analysis of benzene, toluene, ethylbenzene, xylenes (BTEX) and petroleum hydrocarbon fractions F1 to F4 (PHC F1-F4).
- Kollaard selected the Ministry of the Environment (MOE) 2004 Table 2 Site Condition Standards (SCS) for industrial/commercial/community property use, potable groundwater conditions and coarse textured soils as being applicable.
- Laboratory results for all submitted confirmatory soil samples collected from the excavation as reported by Kollaard were less than the selected MOE 2004 Table 2 SCS for all analyzed parameters.

The information submitted has met the requirements of the Technical Standards and Safety Authority as outlined in Section 9 of the *Fuel Oil Code* and we consider the matter resolved.

Should you have any further questions, please do not hesitate to contact me directly. For general enquiries, please contact a Customer Service Advisor at 1.877.682.TSSA (8772) or e-mail customerservices@tssa.org. When contacting TSSA regarding this file, please refer to the Service Request number provided above.

Yours truly,

RE: SOIL SAMPLING AND TESTING
 FORMER UNDERGROUND STORAGE TANK
 3096 CARP ROAD
 OTTAWA, ONTARIO

Dear Sir:

This letter reports the results of a visit to the above noted site carried out by a member of our engineering staff on November 24, 2008.

The purpose of the visit was to obtain samples of soil for laboratory testing from within the area of a former underground storage tank at the site. Based on the results of the testing comments were to be provided as to whether or not the level of total petroleum hydrocarbons (TPH) measured for the samples meet the applicable Minister of the Environment (MOE) guidelines.

At the time of the site visit on November 24, 2008, an underground fuel storage tank was observed. The tank was observed as it was removed from the ground by Gerry Crepin Cartage Ltd. and placed into a dump truck parked at the site. The tank and was observed to be a steel tank in good condition with no visible evidence of cracks or corrosion. A stockpile of soil excavated from above the former tank location was observed south of the excavation. No sampling was carried out on the stockpiled soil however observations of the stockpiled soil did not indicate visible hydrocarbon staining. The location of the site and the approximate location of the excavated area, from which the tank had been removed, are shown on the attached Key Plan, Figure 1, and Site Plan Sketch, Figure 2, respectively.

It is understood from the property owner, Dr. Mounib, that the storage tank was installed about six years ago to replace a previous tank. The tank had been used to provide furnace

 of Ontario to offer professional engineering services.

OCT 24 2013

RECEIVED

oil to the commercial building at the site until the building was connected to natural gas.

Four soil samples identified as samples SA-1 to SA-4 were obtained from within the excavation for the removal of the tank. No visible evidence of soil contamination was observed within the excavation. Sample container headspace testing was carried out on two samples obtained from within the excavation, SA-1 and SA-3. The sample container headspace testing was carried out using a GasTech Model 1314 monitor. No presence of volatile vapours was detected in either sample. Soil samples were obtained from about 2.3 metres depth, below the former tank at the approximate locations shown in the attached Figure 2. The samples were collected and prepared/preserved in the field using appropriate techniques and submitted to Accutest Laboratories Ltd. in Nepean, Ontario for testing of Total Petroleum Hydrocarbons (TPH) Fractions F1 to F4 and volatile organic compounds benzene, ethylbenzene, toluene and xylenes. The soil samples obtained from within the tank excavation consist of imported silty sand fill material. A description of the subsurface conditions at the excavation is given in the attached Table I, Record of Excavation Conditions.

The results of the laboratory testing of the soil samples are provided in Attachment A. It is understood, based on a conversation with the owner, Dr. Mounib, that the current zoning of the property is commercial. The commercial standards are applicable to the site. Based on the MOE *Soil, Groundwater and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act: Table 2* dated March 9, 2004, for coarse textured soils in a potable groundwater condition with industrial/commercial/community property use, the maximum acceptable criteria for TPH Fractions F1, F2, F3 and F4 are 230 µg/g, 150 µg/g, 1700 µg/g and 3300 µg/g, respectively. The maximum acceptable criteria for the gasoline compounds of benzene, toluene, ethyl benzene and xylenes are 0.24, 2.1, 0.28 and 25 µg/g, respectively. The laboratory TPH testing of the samples from the excavation submitted on November 25, 2008, indicate hydrocarbon presence was not detected in the samples obtained from the northwest wall of the excavation (SA-2), the bottom of the south portion of the excavation (SA-3) and the southeast wall of the excavation (SA-4). A presence of hydrocarbon within the MOE standards was detected in the bottom of the north portion of the excavation (SA-1).

The results of the laboratory testing of the soil samples obtained on November 24, 2008, are provided in Attachment A. Hydrocarbon presence below the MOE standards for F3 was detected in one sample (SA-1). Sampling for the presence of BTEX compounds was also carried out on all samples and indicate that no presence of BTEX was detected in any of the samples.

It is considered that the soil sampled from beneath the former underground fuel storage tank meets the MOE guidelines for TPH and BTEX testing.

This letter was prepared for the exclusive use of S & A Realty Ltd. and is based on data and information collected by Kollaard Associates Inc. This letter may not be relied upon by any other person or entity without the express written consent of S & A Realty Ltd. and Kollaard Associates Inc. Any use of this letter by a third party is the responsibility of the third party. Kollaard Associates Inc. accepts no responsibility for damages, if any, sustained by any third party as a result of decisions made or action based on this letter. Kollaard Associates Inc. has relied in good faith on information provided by others. We accept no responsibility for any deficiencies, or inaccuracies in this letter as a result of omissions, misinterpretations, or fraudulent acts of others.

The material in this letter reflects Kollaard Associates Inc. best judgement in view of the scope of work, and information available at the time of preparation. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities. If new information is discovered during future work, including excavations, borings or other studies, Kollaard Associates Inc. should be requested to re-evaluate the conclusions presented in this report and provide amendments as required.

We trust that this letter is sufficient for your present requirements. If you have any questions concerning this letter, please do not hesitate to contact our office.

Yours truly,

Gentlemen/Ladies:

Re: Underground Tank, Registration # 200204, 3096 Carp Road Ottawa

I am referring to the above mentioned subject. This to advise you that the registered tank has been removed by Kolland Associates Engineers during the month of December, 2008, in view of the conversion to gas heating. Attached please find their report.

Yours truly,

Dr. M. Said Monib, President
S. & A. Realty Limited

Re: Ontario Fuel Oil Underground Tank Registration
Registration Number 200204-3922
Mailing and/or 2290 Whitehaven Cres., Ottawa
Facility Address 3096 Carp Rd., Ottawa

Thank you for registering your underground fuel oil tank. Please keep this letter as a record of your registration.

To ensure continued fuel delivery, please notify your fuel oil distributor of the underground tank registration number shown above.

Dear Mohit Bhargav:

RE: MECP FOI A-2023-01793, Your Reference 102151.001 – Decision Letter

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 3160 Carp Road, Ottawa.

After a thorough search through the files of the ministry's Ottawa District Office, Environmental Assessment and Permissions Division (EAPD), Environmental Monitoring and Reporting Branch (EMRB), Environmental Investigations and Enforcement Branch (EIEB), and Safe Drinking Water Branch (SDW) no records were located responsive to your request. **This file is now closed.**

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Rose D'Souza at Rose.D'Souza7@ontario.ca.

Yours truly,

ORIGINAL SIGNED BY

Ryan Gunn
